Maison Palettia
STUDIO HANDBOOK

Maison Palettia

Admin **Guide**

Everything you and your team need to run the studio's website: pages and photos, sessions and bookings, check-in at the door, emails, payments and settings. Step by step, with real screenshots.

EDITION
19 October 2026

FOR
The owner and studio team

YOUR ADMIN
maisonpalettia.com/admin

MAISON PALETTIA · STUDIO HANDBOOK

Welcome,

everything you need to **run the studio's website**, in one place.

This handbook is for you and your team. It walks through every job in the admin with real screenshots, from changing a sentence on the homepage to writing a journal post and scanning tickets at the door. Read it front to back once, then come back when you need a recipe. It is always one click away: **Docs** at the top of the admin's menu.

How to read this guide

Numbered circles

Lilac circles on a screenshot, like ❶, match the same numbers in the steps and in the list under the picture.

Where to click

A grey pill such as **Settings › Site details** is the route through the admin's left menu.

Who can do it

A dashed badge such as Owner says which role can do the job. Chapter 17 explains roles.

Coloured notes

Tip saves time. **Careful** needs a moment's thought. **Never** protects customers' money and data.

Page numbers

When the text points elsewhere in the guide, the page number follows in brackets, for example Brand wording (p. 36).

Ticking off

The day one checklist has a box beside each item. Tick them with a pen as you go.

Contents

One ticket per seat, scanned at the door with a phone.

All tickets 110
Open check-in on your phone 111
Scan a ticket 113
What the colours mean 114

CH 12 **Enquiries** 116
Messages from the contact and private-events forms.

The inbox 116
Read and reply 117

CH 13 **Emails & notifications** 120
The wording of every email, what was sent, and who gets alerts.

Change an email's wording 120
Preview and send yourself a test 123
See what was sent 124
Resend an email 124
Who gets notified 125

CH 14 **Analytics & exports** 127
Sales, visitors, VAT summary and spreadsheets for your accountant.

The overview 127
Sales 129
VAT summary and exports for your accountant 130
Visitor counting and tracking 131

CH 15 **Payments (Mamo Pay): test, then live** 132
Practise with test cards, then switch on real payments safely.

Mode: Test or Live 132
Add your keys 133
Register the webhook 134
Practise with test cards 135
Switch to Live 136

CH 16 **Settings** 137
Site details, Events page wording, opening bookings, email sending and invoices.

Site details 138
Social profiles 139
Advanced: site address and switches 140
Events page wording: Mode labels 142
The Create Anytime part of the Events page 142
Open or close online bookings 143
Email sending 144
Invoices & VAT 146

CH 17 **Staff & roles** 148
Invite your team, give each the right role, switch someone off.

Your team 148
Invite someone 149
Change a role, switch someone off, or help them back in 150
Who can do what 151

CH 18 **Routines** 154
Daily, weekly and monthly habits, and a walkthrough of booking day.

Daily, weekly, monthly 154
Booking day at the studio 155

CH 19 **When something goes wrong** 157
Payment failed, email missing, page not updating, locked out, wrong price.

A customer says their payment failed 157
A customer didn't receive their email 158
My change isn't showing on the website 158
Someone is locked out 158
A wrong price (or wrong words) went live 159
A red note says background tasks are paused, the webhook is at an old address, or settings can't be read 159
The check-in camera won't start 160
Bookings won't open 160
A photo won't delete 160
The music won't play, or I want it off 160
A journal post isn't on the Journal page 160
A journal category or workshop type won't delete 161
I can't change a session's date 161

CH 20 **Glossary & questions** 162
Plain meanings for every term, and quick answers to common questions.

Glossary 162
Questions 165

CHAPTER 01

Welcome & tour

Everything about the website lives in one place: your admin. Here is how to get in and find your way around.

IN 30 SECONDS

- Your admin is `maisonpalettia.com/admin`. Always use that address (see one database (p. 14)).
- The first page after you log in is the **dashboard**: what needs you today, this week's numbers, and buttons for everyday jobs.
- Coloured notes tell you what needs attention. **Red** means customers are affected right now. **Amber** means finish this before launch.
- When you save, the website changes within a second or two. You never need a developer to update it.

IN THIS CHAPTER

Log in	7	Forgot your password	8
Your dashboard, top to bottom	9	The coloured notes	12
Where things live	13	Always work in maisonpalettia.com/admin	14
This guide, inside the admin	15		

Log in

maisonpalettia.com/admin Everyone

1. Open `maisonpalettia.com/admin`. Bookmark it.
2. Type the email you were invited with 1 and your password 2.
3. Press Login 4. The dashboard opens.

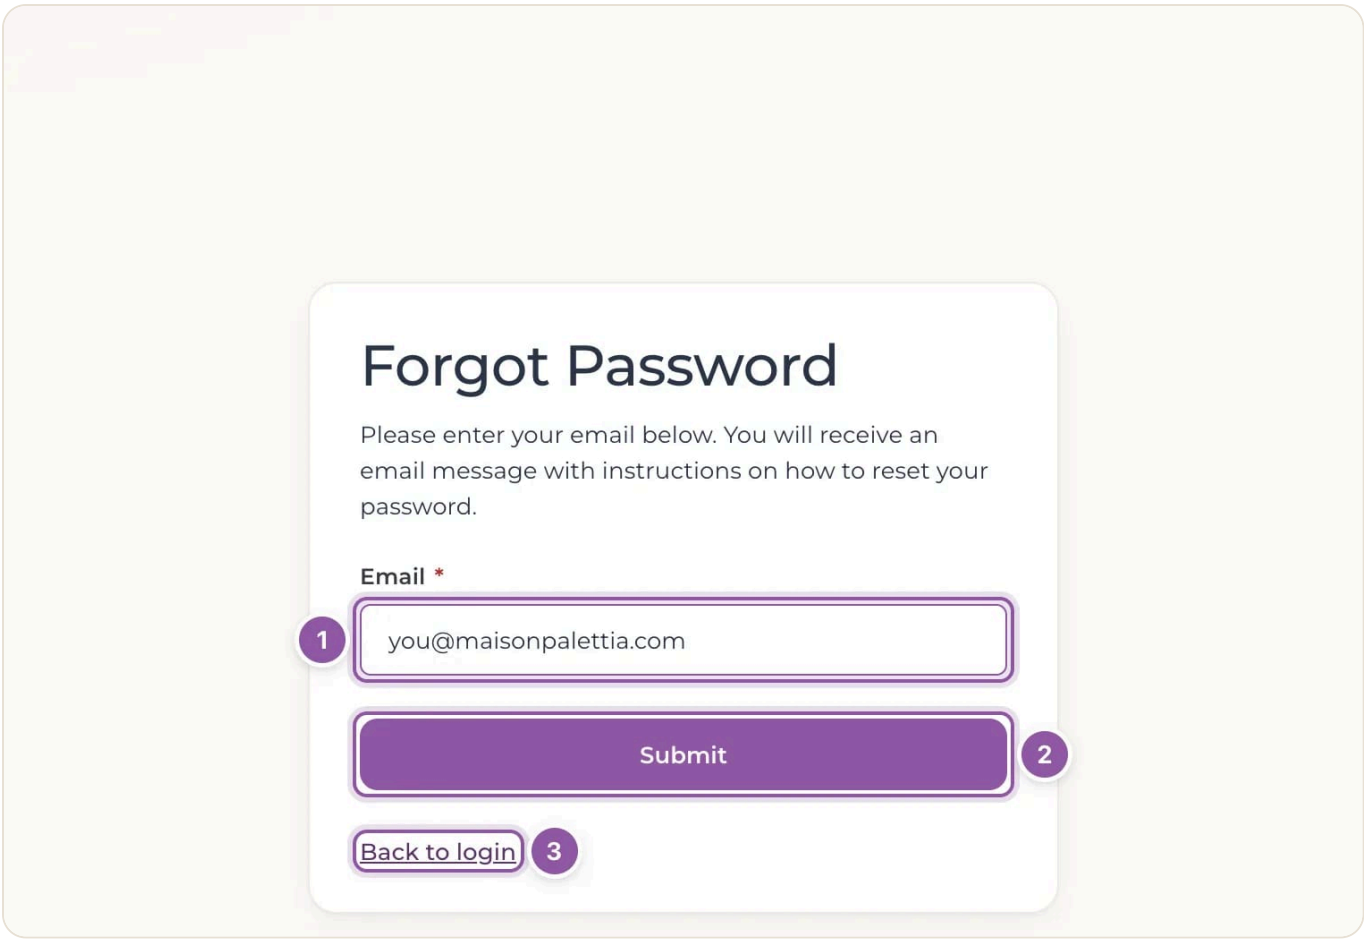

The login page. Type the email and password you chose, then press Login.

1. Your email address
2. Your password
3. Forgot password? — sends you a reset link by email
4. Login

> **TIP**
> Save your password in your phone's or browser's password manager. Then you never have to type it at the studio door.

Forgot your password

1. On the login page press **Forgot password?**.
2. Type the email you log in with 1 and press the button to send the link 2.
3. Open the email, click the link, and choose a new password.

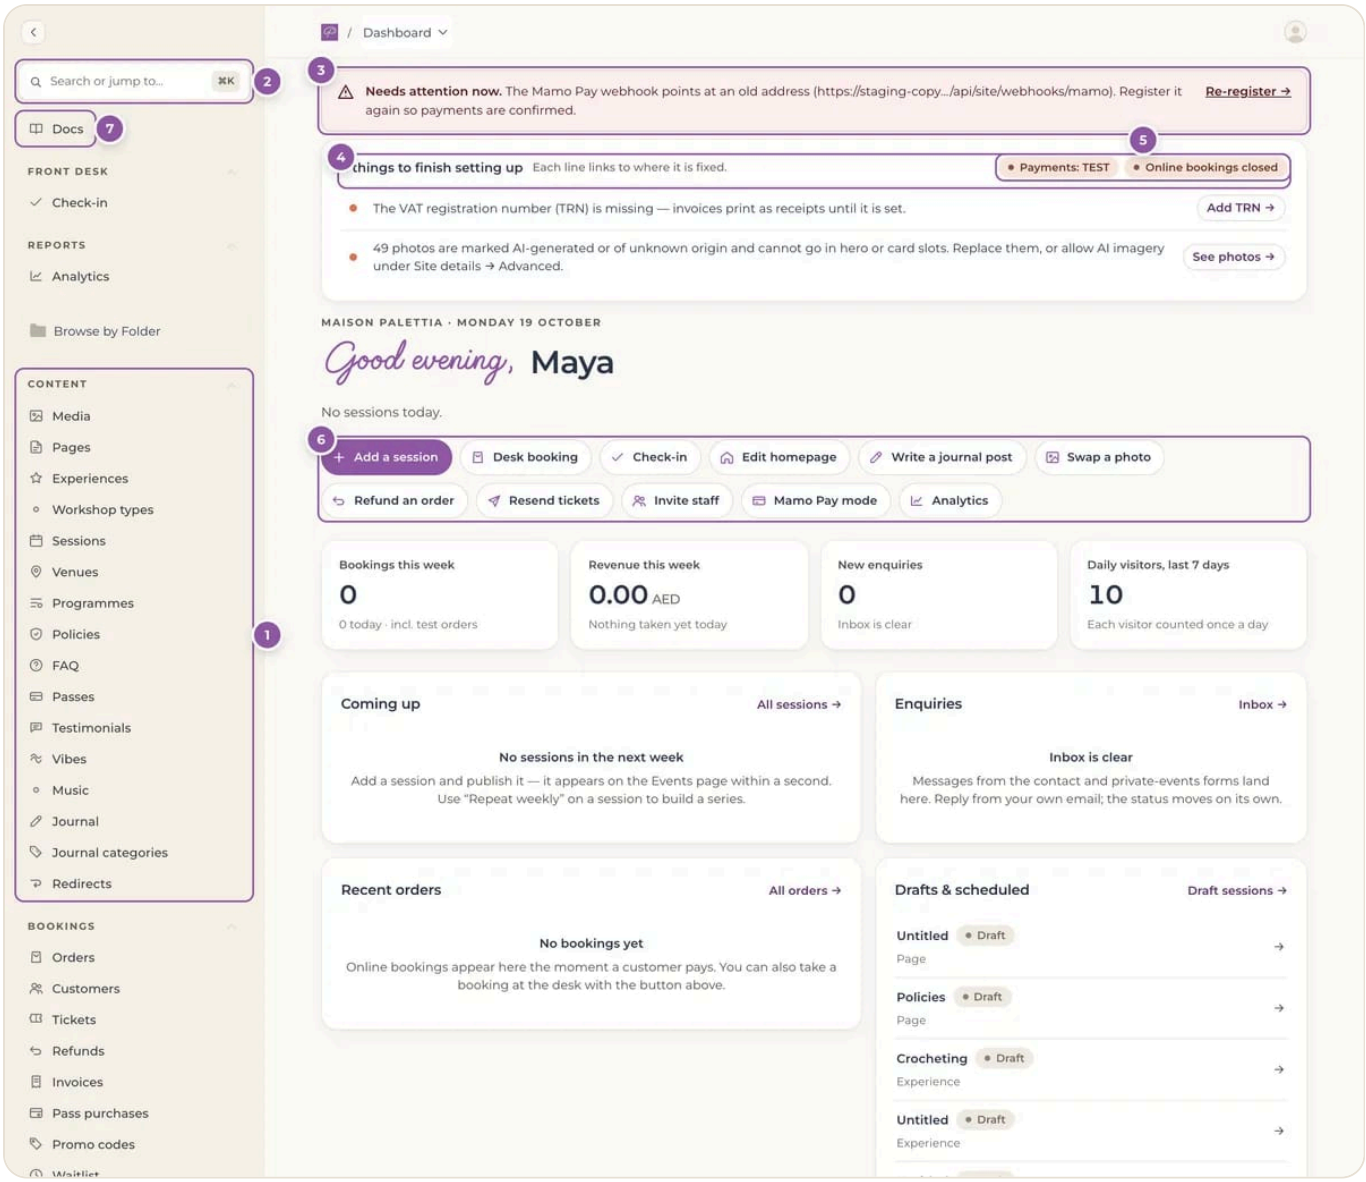

Forgot your password? Type your email and we send you a link to choose a new one.

1. The email you log in with
2. Send the reset link
3. Back to the login page

> ⚠ **GOOD TO KNOW**
>
> The reset link arrives by email, so email sending (p. 144) must be set up first. If you are the owner and email is not working yet, Nexeor can reset your password on the server in a minute.

Your dashboard, top to bottom

The dashboard is home. Come back to it any time by clicking the logo at the top left.

The dashboard is the first page you see. The left menu reaches everything; the coloured list at the top is your to-do list. Docs, at the top of the menu, opens this guide.

1. The menu — Content, Bookings, Inbox, Emails, Settings
2. Search or jump to… (⌘K / Ctrl K)
3. Needs attention now — something affecting customers
4. Things to finish setting up — each line has a button to the fix
5. Payment mode and whether online bookings are open
6. Quick actions for everyday jobs
7. Docs — this guide

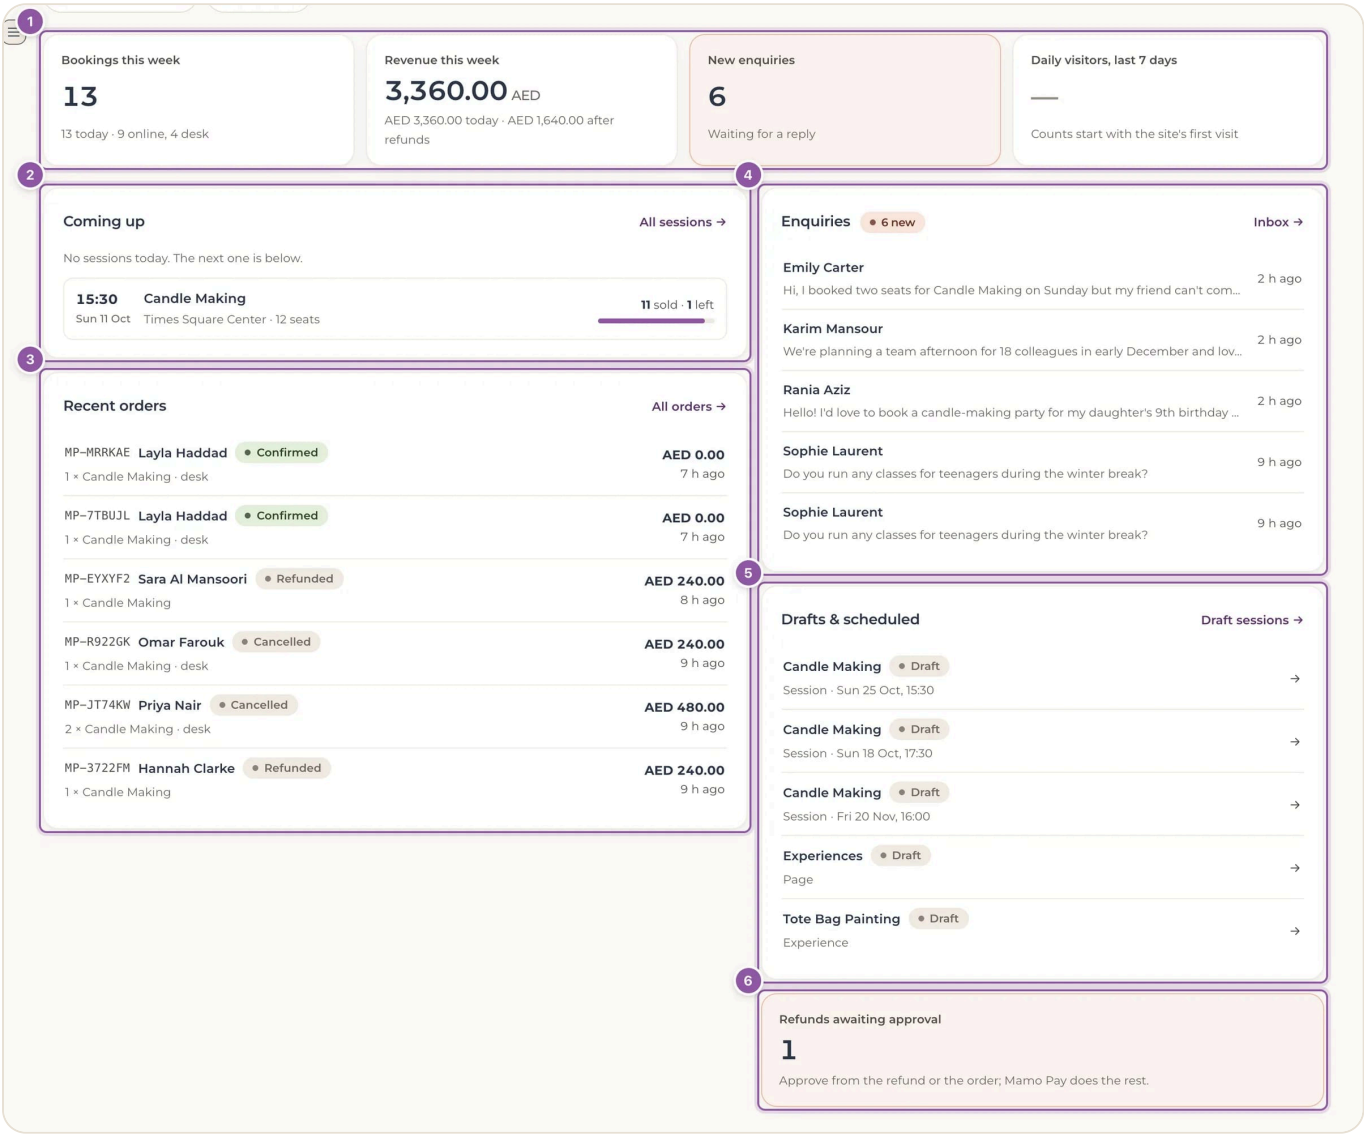

The menu on the left 1 is grouped the same way you think about the studio: **Front desk**, **Reports**, **Content** (what visitors see), **Bookings**, **Inbox**, **Emails** and **Settings**. Collapse a group you do not use by clicking its name. **Docs** 7, at the very top, opens this guide.

- **Content** holds Media, Pages, Experiences, Workshop types, Sessions, Venues, Programmes, Policies, FAQ, Passes, Testimonials, Vibes, Music, Journal, Journal categories and Redirects.
- **Settings** holds Staff, Site details, Menus & footer, Brand wording, Booking & checkout wording, Page labels, Search & sharing defaults and Music.

- The quick actions 6 are: Add a session · Desk booking · Check-in · Edit homepage · Write a journal post · Swap a photo · Refund an order · Resend tickets · Invite staff · Mamo Pay mode · Analytics. “Write a journal post” shows for Admin and Editor only.

> **TIP**
>
> Don't see the menu? Press ☰ at the top left to open it. The admin remembers your choice next time.

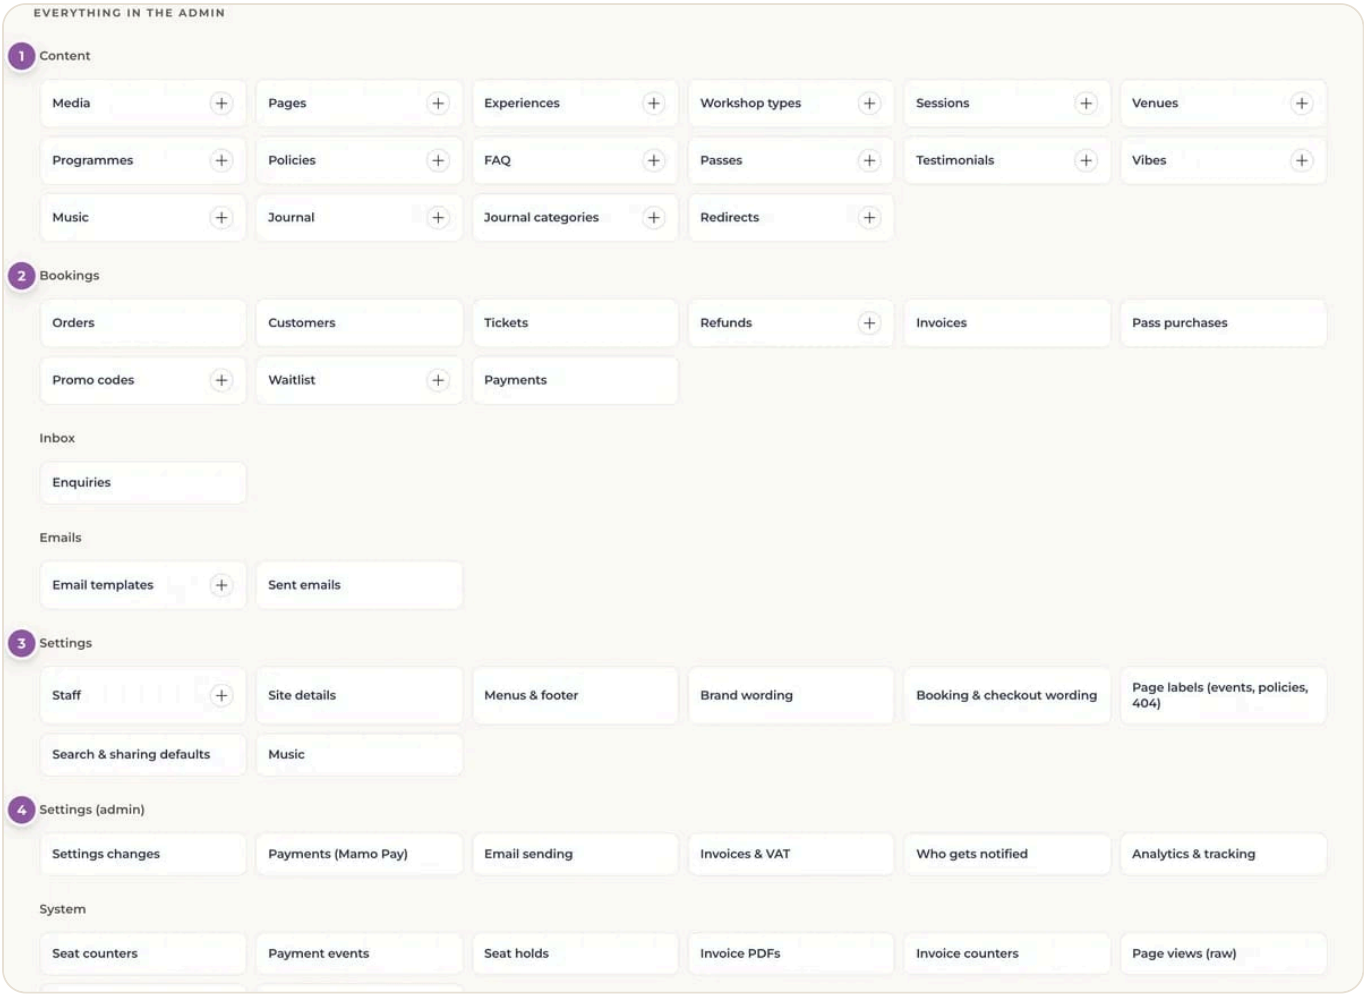

Scroll down for the week at a glance. Everything is clickable.

Further down: this week's numbers, the next sessions, the newest orders and enquiries, drafts waiting to be published, and refunds to approve.

1. This week at a glance — bookings, revenue, enquiries, visitors
2. Coming up — the next sessions and seats sold
3. Recent orders — click one to open it
4. Newest enquiries — click to open the Inbox
5. Drafts & scheduled — pages, experiences, sessions and journal posts not on the website yet
6. Refunds waiting for your approval

Further down, **Drafts & scheduled** 5 lists every page, experience, session and journal post that is not on the website yet. At the very bottom, **Everything in the admin** shows every area as a tile. The + on a tile creates a new one straight away.

At the bottom, “Everything in the admin” lists every area as a tile, including Workshop types, Music, Journal and Journal categories under Content, and Music under Settings. The + on a tile creates a new one straight away.

1. Content — what visitors see
2. Bookings — orders, customers, tickets, refunds
3. Settings — the things you set once
4. Settings (admin) — payments, email, invoices: owner only

The coloured notes

While something needs you, a slim strip sits at the top of *every* admin page. The dashboard spells each one out with a button that takes you to the fix. When everything is done, the notes disappear.

The warnings strip sits at the top of every admin page while something needs you. Red means customers are affected; the link takes you straight to the fix. (The orange MOCK bar and the “Payments: MOCK” badge only appear on the developer's copy, never on the live site.)

1. What needs attention, in one line
2. The link goes to the fix (here Re-register →)

On the dashboard the same warnings are spelled out, each with a button to the place it is fixed. Red = customers are affected now (here the Mamo Pay webhook, see the fix (p. 159)); amber = finish before launch. When everything is done, the list disappears.

1. Needs attention now (red)
2. Things to finish setting up (amber)
3. Each line says what is wrong and why it matters
4. The button takes you to the fix

WHAT THE COLOURS MEAN

Red

Customers are affected **now**. Deal with it today. Examples: *"Background tasks are paused — emails and payments will not be processed."* or *"The Mamo Pay webhook points at an old address (https://...). Register it again so payments are confirmed."* with a **Re-register →** button.

Amber Finish this before launch, or soon. Example: *"Email is not set up."*

Badge Information only, such as **Payments: TEST** or **Online bookings closed**.

TIP

Something looks wrong and you are not sure why? Take a screenshot of the dashboard and send it to Nexeor. The notes usually say exactly what happened.

Where things live

YOU WANT TO…	GO TO
See today's sessions and new bookings	The dashboard (the first page)

YOU WANT TO…	GO TO
Find a booking, refund it, move it, resend a ticket	**Bookings** › **Orders** then open the order and use **Actions**
Approve a refund your team asked for (owner)	**Approve →** on the dashboard, or **Bookings** › **Refunds**
Check people in at the door	**Front desk** › **Check-in**
Answer an enquiry	**Inbox** › **Enquiries**
Change wording on a page	**Content** › **Pages**, or click **Edit** on the page preview
Add or change a class date	**Content** › **Sessions**
Add a candle theme or a crochet level	**Content** › **Workshop types** (see Workshop types (p. 56))
Write a journal post	**Content** › **Journal**, or **Write a journal post** on the dashboard
Background music	**Content** › **Music** for tracks, **Settings** › **Music** to switch it on or off
Swap a photo	**Content** › **Media**
See visitors and sales	**Reports** › **Analytics**
See which emails went out	**Emails** › **Sent emails**
Payments, email, invoices (owner only)	**Settings (admin)**
Read this guide	**Docs** at the top of the menu

NEVER DO THIS

Never share one login between people. Invite each person with their own account (see Staff & roles (p. 148)). The history on every booking and page then shows who did what.

Always work in maisonpalettia.com/admin

Everyone

Nexeor keeps a second, test copy of the website for trying out changes. It looks the same, but it reads and writes the **same database** as the live site. Anything you change in the test copy's admin changes the live website too.

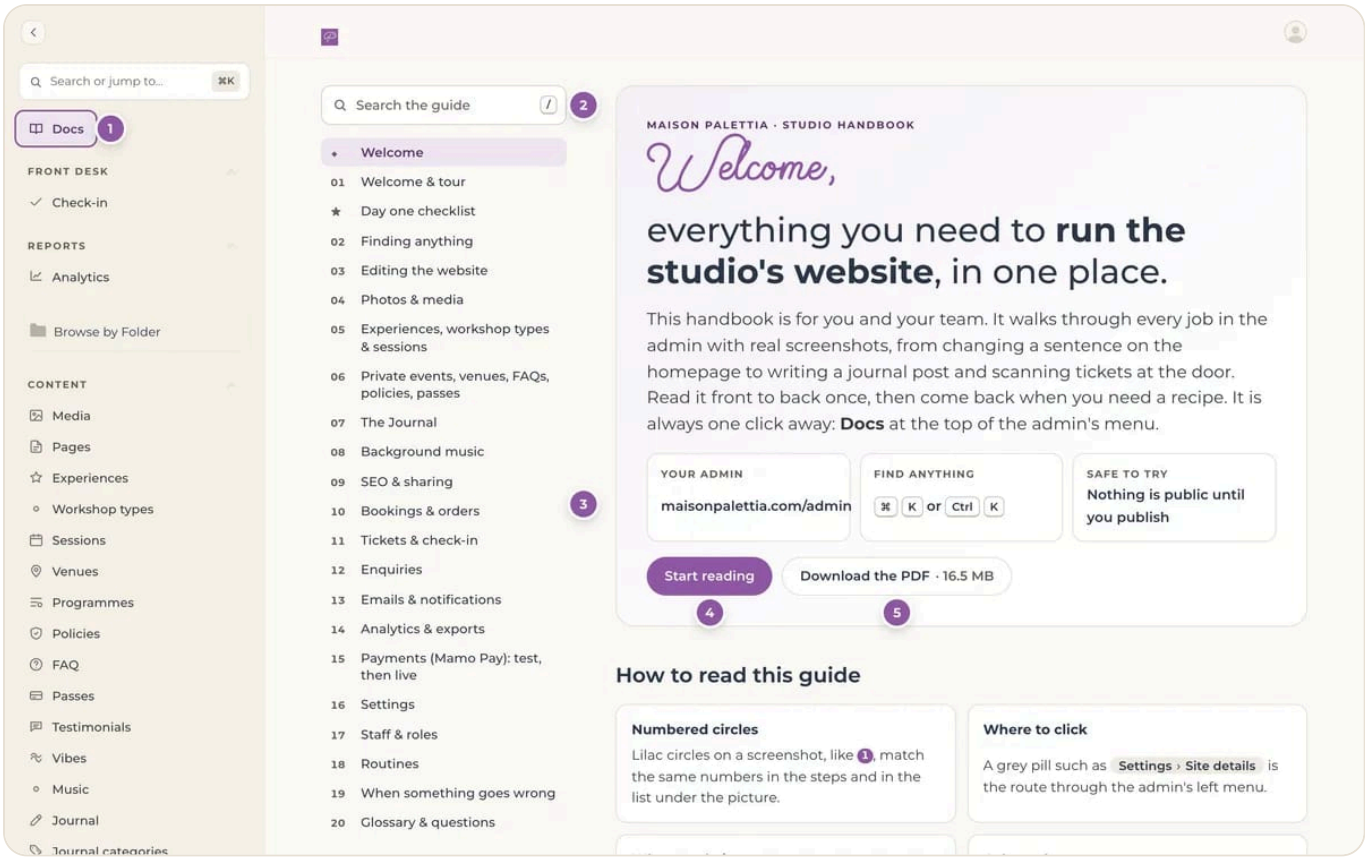

> ⚠ **CAREFUL**
>
> Always sign in at `maisonpalettia.com/admin`. Never press **Register/Update webhook** or change **Site details** from the test copy: those settings are shared, and the live site would start sending payment messages and emails to the test address.

> ⓘ **GOOD TO KNOW**
>
> The test copy is hidden from Google automatically, and Google is always told your site is `https://maisonpalettia.com`. You don't need to set anything for that.

This guide, inside the admin

Docs · Everyone

1. Press **Docs** 1 at the top of the menu. Only signed-in staff can open it.
2. Search 2 for any word, such as *refund* or *webhook*. Press / anywhere in the guide to jump to the search box.
3. Pick a chapter from the list 3, or press **Start reading** 4.
4. Click any screenshot to see it larger. The arrow keys move to the next one.
5. Want paper? **Download the PDF** 5 is the same guide, ready to print.

Docs opens this guide inside the admin: search, every chapter, and the PDF to download.

1. Docs — in the menu, at the top
2. Search the guide — press / to jump here
3. Every chapter
4. Start reading
5. Download the PDF

> **TIP**
>
> In ⌘K (p. 21), type “guide” to open the guide, or the name of a chapter, such as “Guide: Settings”.

START HERE

Day one checklist

Work through this in order. A few steps only work once the one before is done, and the admin tells you so in plain words if you jump ahead. Your ticks are remembered on this device.

BEFORE YOU START

Before you start, Nexeor does this part: the server, the secure https address, nightly backups, a fresh empty database, and the first installation with today's wording and photos. When Nexeor says “it's live”, start at step 1.

The ten steps

1 Create your account

2 minutes · maisonpalettia.com/admin

- [ ] Open maisonpalettia.com/admin and create the first account: your name, email and a password. This is the owner account and can do everything.
- [ ] Use a password of at least 12 characters that you use nowhere else, and save it in your password manager.

2 Confirm your site address and contact details

10 minutes · Settings › Site details

- [ ] Advanced tab → Site address: it must say exactly https://maisonpalettia.com (no / at the end). It does today; check it, and only Save if you had to change it. Emails, payment returns and the webhook all use it.
- [ ] Careful: the live site and Nexeor's test copy share ONE database, so Site details is one setting for both. Always work in maisonpalettia.com/admin; a change made in the test copy's admin changes the live site too.
- [ ] Contact tab: public email, public phone, WhatsApp business number, address, and your social profiles (up to seven: Instagram, Facebook, TikTok, Pinterest, LinkedIn and more, each with its own icon). Save.
- [ ] Photos: replace the launch photos marked AI-generated or unknown origin (the dashboard's “See photos” lists them), or tick “Allow AI-generated imagery in hero and card slots” on the Advanced tab.

3 Set up email — everything after this depends on it

15 minutes · Settings (admin) › Email sending

- [ ] Provider: out of the box this says Log only, which sends nothing. Change it to SMTP (your email provider's details) or Resend (a key from resend.com). Your email provider or Nexeor can give you these.
- [ ] For the password or key: next to Not set, click the Enter button, paste it into the box that opens, then press Save.
- [ ] Fill in the From address: the name and address customers see.
- [ ] Press Verify connection and wait for the green confirmation.
- [ ] Press Send test..., send one to yourself, and check it arrived (look in spam too).

4 Invite your team

5 minutes · Settings › Staff › Invite staff

- [ ] Invite each person with the right role: Editor (content), Front desk (bookings and check-in) or Admin (everything — keep this to yourself).
- [ ] Check each person received the invitation and chose their own password.

5 Your invoice details

10 minutes · Settings (admin) › Invoices & VAT

- [ ] Legal name on invoices, registered address and trade licence number.
- [ ] TRN (VAT registration number). Until it is filled in, documents print as receipts, not tax invoices.
- [ ] Invoice email and phone; open PDF appearance and choose your logo (or leave it empty to use the Site details logo). Save.

6 Who gets told about what

5 minutes · Settings (admin) › Who gets notified

- [ ] Add a row per person and tick at least: New order, Failed payment, Refund requested, New enquiry.
- [ ] Tick Background task failed for yourself and add Nexeor's address for it too. Save.

7 Payments with Mamo Pay

about an hour, over a day or two

Settings (admin) › Payments (Mamo Pay)

- [ ] Ask Mamo for your sandbox (test) key. Next to Sandbox API key, click the Enter button, paste the key into the box that opens, then press Save.
- [ ] Test connection → wait for the green confirmation.
- [ ] Register/Update webhook → confirm the address it shows. Press it only from maisonpalettia.com/admin, never from the test copy.
- [ ] Place test bookings with Mamo's test cards: one that succeeds, one with the security step, one that is declined.
- [ ] Check Bookings → Orders: paid ones show a ticket and invoice, the declined one shows Failed. The confirmation email arrived.
- [ ] Ask Mamo for your live key. Next to Live API key, click Enter, paste it and press Save.
- [ ] Under Mamo Pay actions switch to Live, then Test connection → Register/Update webhook (again, only from maisonpalettia.com/admin).
- [ ] Set Mode to Live. When every line of the checklist passes, press Switch to Live, then press Save at the top right. Payments are only live after Save.
- [ ] Make one real AED 2 payment with your own card, then refund it from the order. Money can now go both ways.

8 Your real content

as long as it takes Content

- [ ] Workshop types: one per candle theme or crochet level (Content › Workshop types). Publish each one.
- [ ] Sessions: your real dates, prices and seats, each pointing at its experience and workshop type. Publish them (Repeat weekly… helps for regular classes; set the workshop type on every copy).
- [ ] Passes: publish the passes you sell, or leave them as drafts (the loyalty page then says “coming soon”).
- [ ] Testimonials: only real quotes, with “Written permission to publish” ticked.
- [ ] Policies: your Privacy and Terms pages, each with “Show in footer legal row” ticked.
- [ ] Settings › Booking & checkout wording › Event page tab › “Ready for you” body: read it and make sure it matches your DIY policy about materials.
- [ ] Photos of children: tick “Model/parent consent on file” only if you have it; otherwise replace the photo.
- [ ] Bookings → Promo codes: any discount codes you want to launch with.
- [ ] Journal (optional): create your categories, then your first post (Content › Journal categories, then Content › Journal).
- [ ] Music: switch the player on or off (Settings › Music) and check each track's credit under Content › Music.

9 Open bookings

1 minute · Settings › Booking & checkout wording › Bookings

- [ ] Tick Bookings open and Save. If something is still missing, the panel tells you exactly what.

10 Final look

10 minutes · Dashboard

- [ ] The dashboard shows no red or amber notes, and the badge says Payments: LIVE.
- [ ] In a private browser window, book a session as a customer would. Check the email, the ticket and the invoice.
- [ ] Your front desk has opened Front desk → Check-in on a phone and knows how to scan.

CHAPTER 02

Finding anything

You never need to remember where something lives. One keyboard shortcut finds it.

IN 30 SECONDS

- Press ⌘ K on a Mac, or Ctrl K on Windows, anywhere in the admin. Or click **Search or jump to…** at the top of the menu.
- Type a page name, an experience, a journal post, a booking reference (`MP-…`), a customer's email, or a setting such as “TRN”.
- To find where a sentence on the website is kept, start with a quote mark " and type a few of its words. Give it a few seconds.
- Arrow keys move, Enter opens, Esc closes.

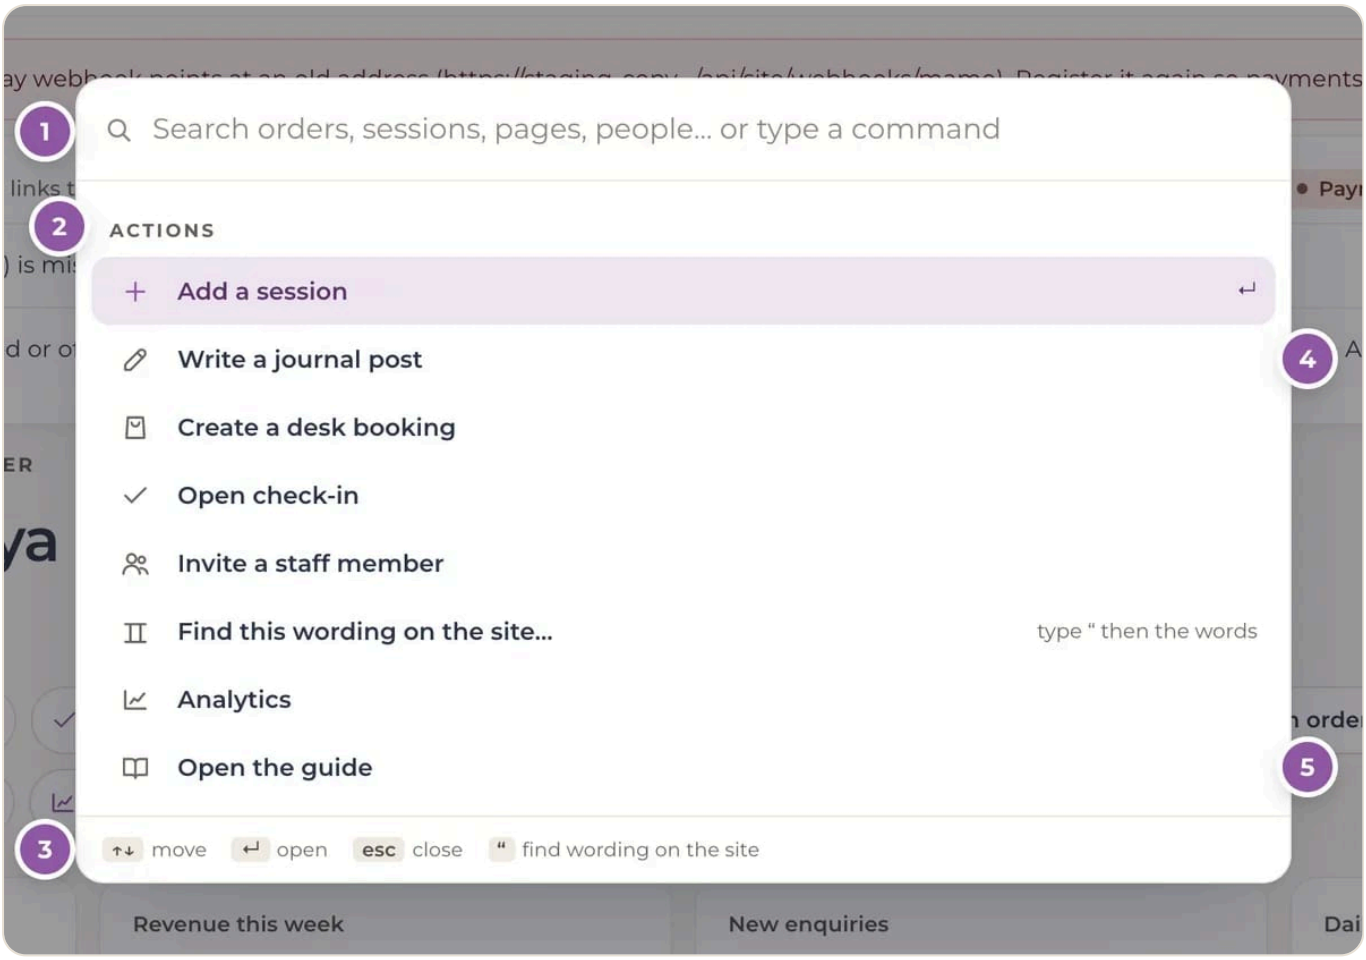

IN THIS CHAPTER

Open the search box 21
Find a page or an experience 22
Find a booking 23
Where does this sentence live? 24

Open the search box

Everyone

1. Press ⌘ K (Mac) or Ctrl K (Windows).
2. Start typing in the box 1. Before you type, it shows shortcuts to common jobs 2, such as **Write a journal post** 4 and **Open the guide** 5.
3. Press Enter to open the highlighted line, or click any line. The keys are listed at the bottom 3.

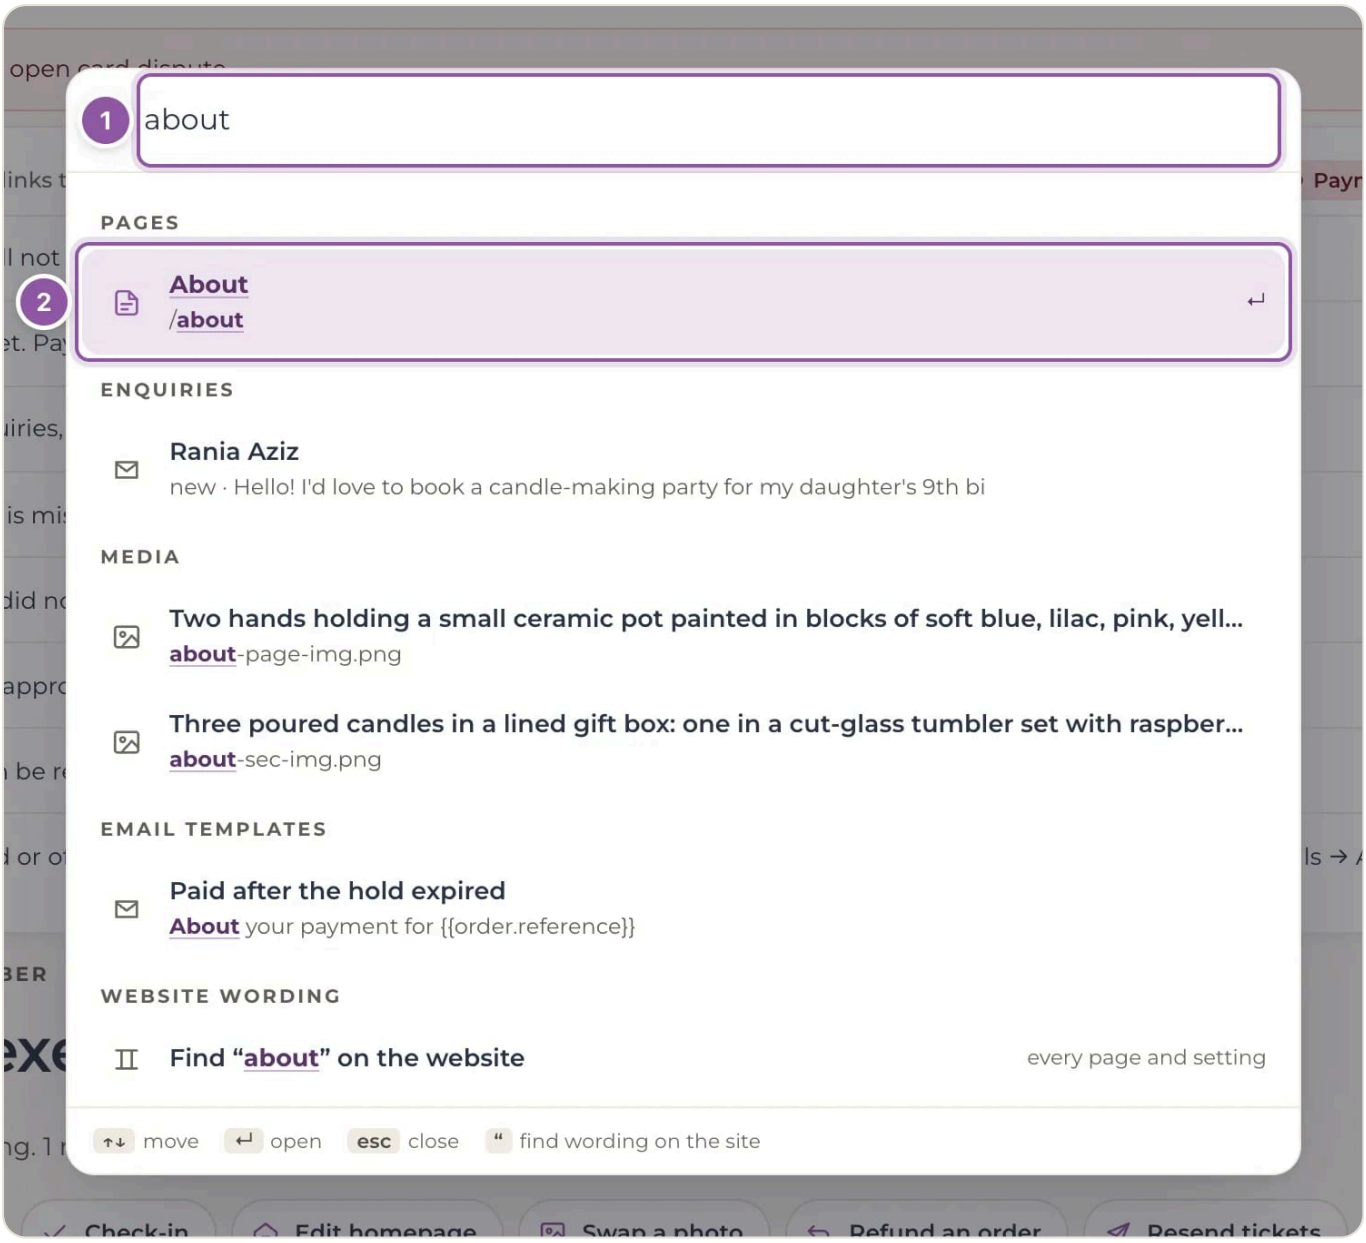

Press ⌘K on a Mac (Ctrl K on Windows) anywhere in the admin. The search box opens with shortcuts to common jobs, including Write a journal post and Open the guide.

1. Type here — a page, an order number, an email, a sentence
2. Shortcuts — press Enter to open the highlighted one
3. Keyboard help: arrows to move, Enter to open, Esc to close
4. Write a journal post
5. Open the guide — this handbook

Find a page or an experience

1. Type part of its name 1.
2. Results are grouped: pages, experiences, sessions, journal posts and more. Open the one you want 2.

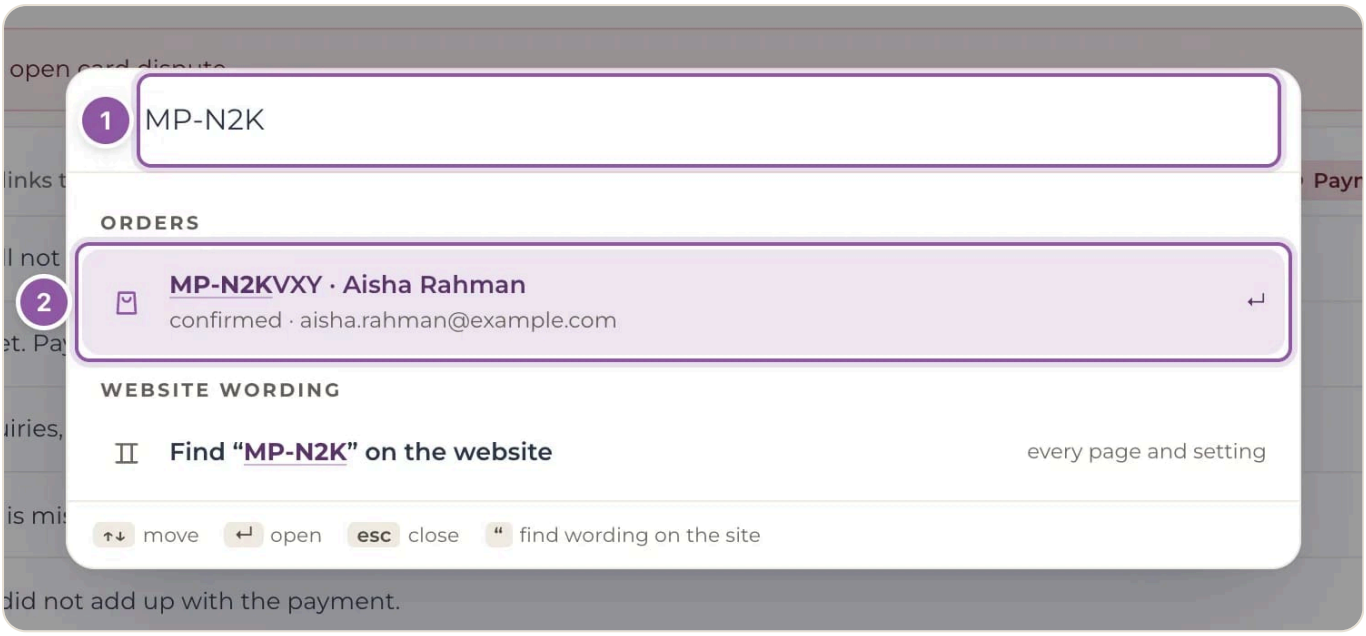

Find a page: type part of its name. Results are grouped — pages, experiences, sessions and more.

1. What you typed
2. The matching page — press Enter or click to open it

> **TIP**
>
> Journal posts show under **Journal**, with their address (`/journal/…`). Type "journal" to jump straight to **Content › Journal** or **Content › Journal categories**, and "guide" for this handbook.

Find a booking

1. Type the booking reference (it starts `MP-`) or the customer's email 1.
2. Click the order 2. It opens straight onto that booking.

Find an order: type the booking reference (it starts MP-) or the customer's email.

1 Booking reference or email

2 The order — opens straight onto it

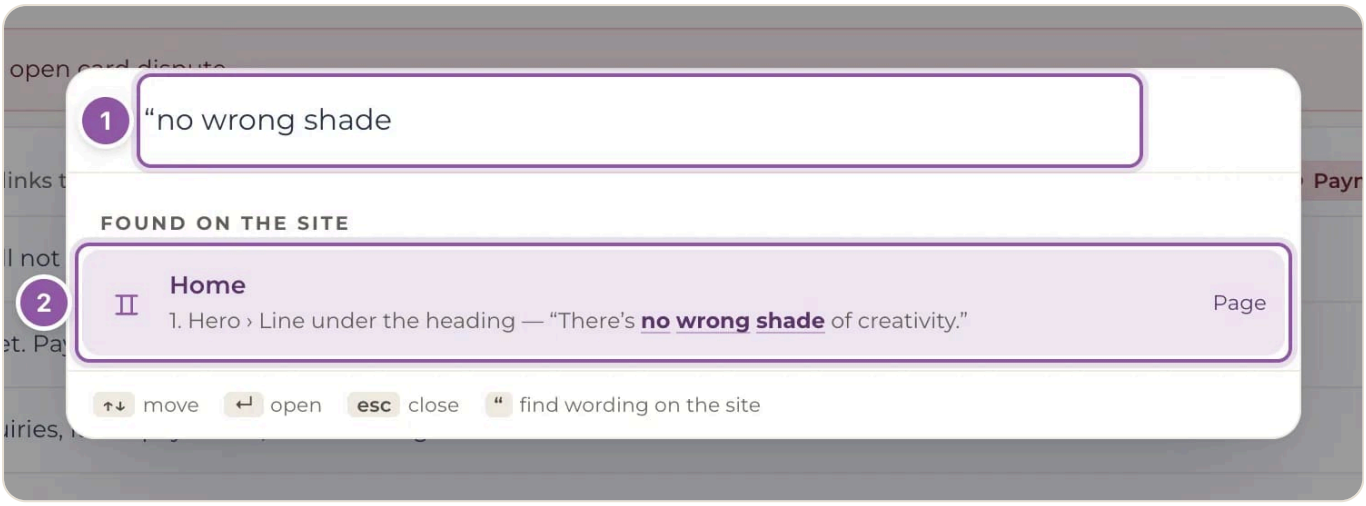

TIP

On the phone with a customer? Ask for the email they booked with. It is quicker to spell than a reference.

Where does this sentence live?

You can see a sentence on the website and want to change it, but which page holds it? Some wording is shared across several pages, so this saves a lot of hunting. It looks through pages, settings, journal posts and journal categories.

1. Type a quote mark, then a few words exactly as they appear on the website 1. The ordinary " key on your keyboard works; you don't need a curly one.
2. The search shows where that wording is kept 2. Click to open it there and edit.

Where does this sentence live? Start with a quote mark (“) and type a few words you can see on the website. The palette shows which page or setting holds them.

1. Start with “ then type words from the website
2. Where that wording is kept — click to edit it there

TIP

It searches every page and setting, so give it a few seconds. While it works it says **Searching…**.

CHAPTER 03

Editing the website

Pages are built from sections stacked top to bottom. You change the words and photos; the design stays beautiful by itself.

IN 30 SECONDS

- Open **Content › Pages**, pick a page, and open a section to change its words or photo.
- Everything you type saves itself as a **draft**. Visitors see nothing until you press **Publish changes**.
- In the live preview, point at any part of the page and press **Edit** to jump straight to it.
- Changed your mind? **Revert to published**, or restore any of the last 25 versions.

IN THIS CHAPTER

Change the words or photo in a section	27	Click to edit, straight from the preview	28
Move, copy or remove a section	31	Add a new section to a page	32
Latest from the Journal	32	Drafts and publishing	33
Schedule a change for later	35	Brand wording: shared sentences	36
Menus and footer	37	Undo: revert to published	40
History: see and restore older versions	41		

HOW A CHANGE REACHES THE WEBSITE

1 · YOU TYPE	2 · AUTOMATIC	3 · YOU CHECK	4 · YOU DECIDE
Edit a field Change any words, photo or order of sections.	**Draft saved** Every second or so. Status shows ● Changed	**Preview** The preview shows your draft. The public site does not change yet.	**Publish changes** Live on the website within a second or two. Status: ● Published

Schedule Publish: instead of step 4, pick a date and time and it goes live by itself.
Revert to published: throw the draft away and go back to what is live.

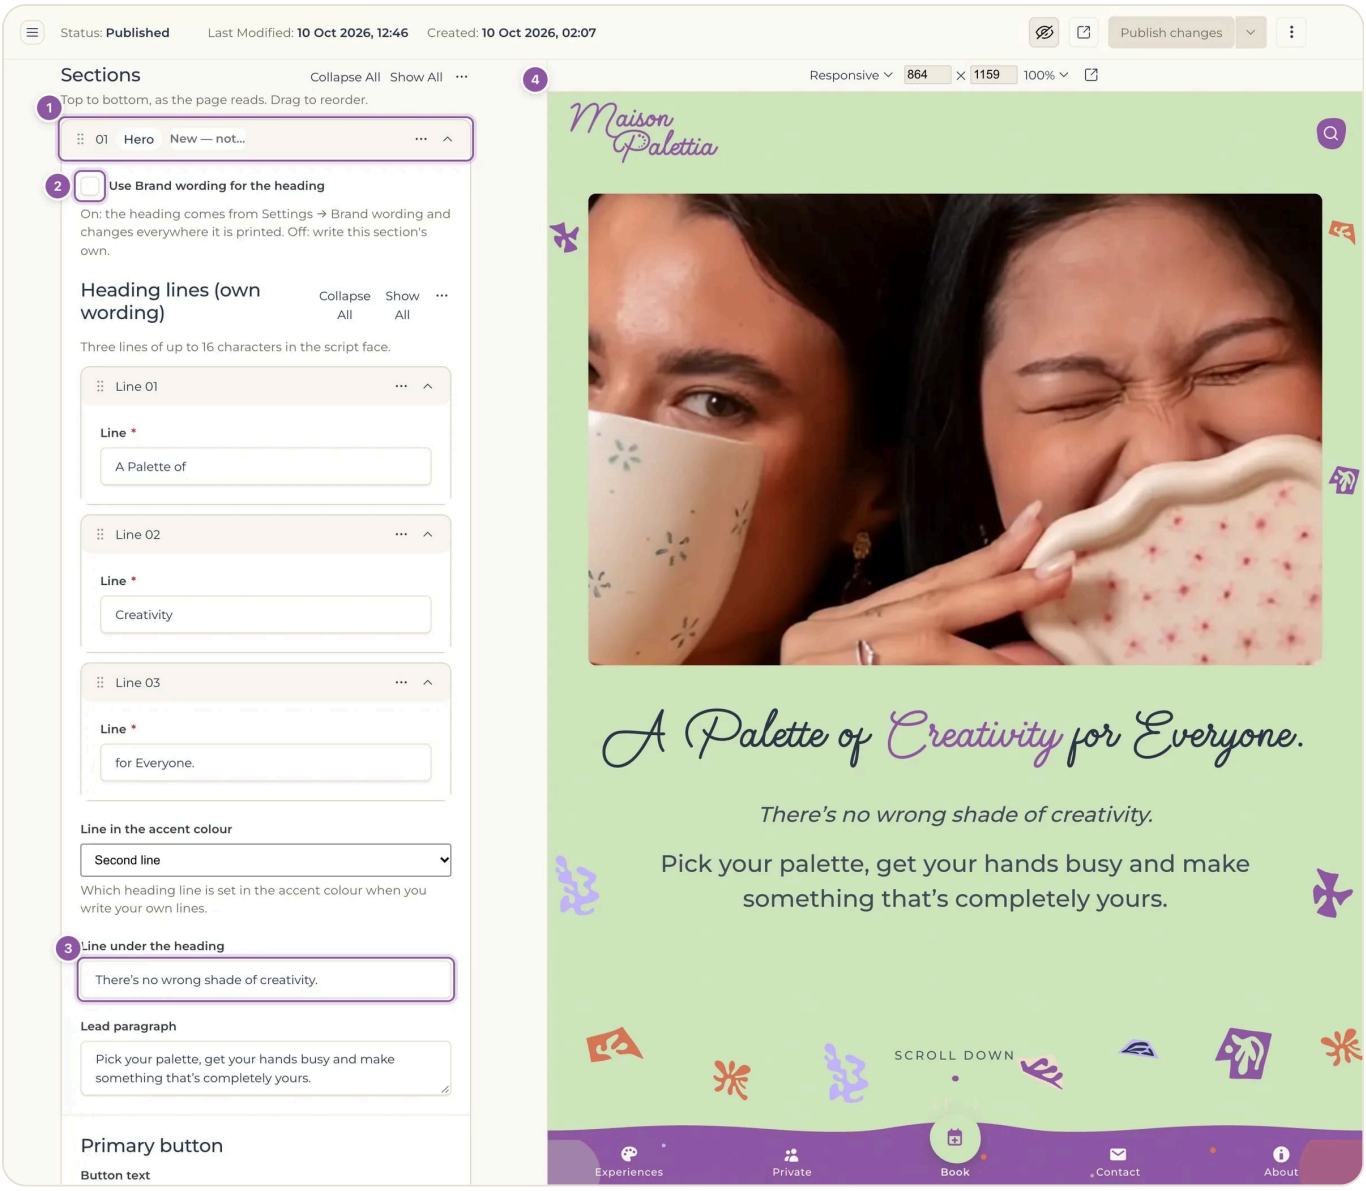

⚠ **GOOD TO KNOW**

Settings work differently. Pages, experiences, workshop types, sessions, journal posts, programmes, FAQs, policies, passes and testimonials have drafts and **Publish changes**. Music tracks, journal categories, venues and the pages under **Settings** (Site details, Menus & footer, Brand wording and the rest) have a plain **Save**, and a save goes live straight away. Read twice, then save.

Change the words or photo in a section

Content › Pages › Home Admin · Editor

1. Open the page. Its sections are listed top to bottom, in the same order as on the website.
2. Click a section's bar 1 to open it.
3. Some sections can use shared Brand wording (p. 36) or their own words. Choose which 2.
4. Change any words 3. The preview on the right updates as you type 4.
5. Press **Publish changes** when you are happy.

Content → Pages → Home. The page is a list of sections, top to bottom. Click a section's name to open it and change its words or photo.

1. The section's bar — click to open or close it
2. Choose: use the shared Brand wording, or write this section's own words
3. Change any words here
4. The preview updates as you type

> **GOOD TO KNOW**
>
> On the Events page, the **Events browser** section no longer holds its own door titles, chips or group lines. Those words now live in one place for the whole site: Mode labels (p. 142) under **Settings › Booking & checkout wording**, Event page tab.

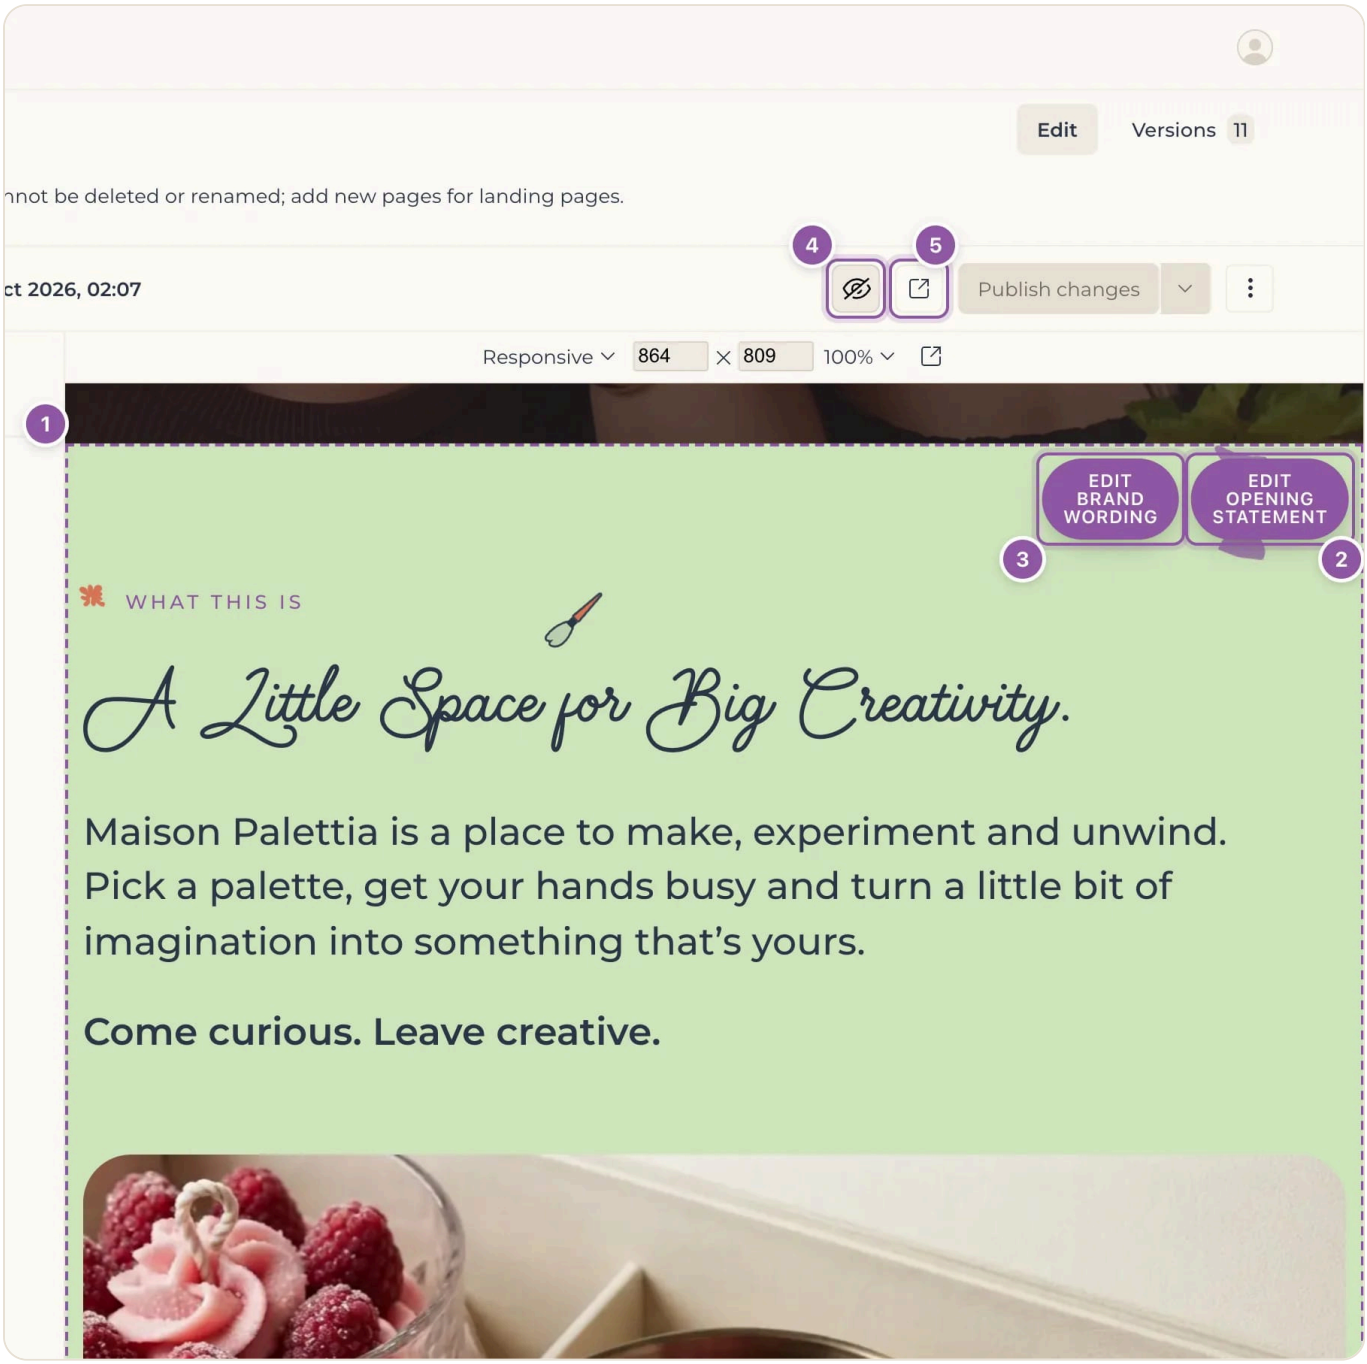

Click to edit, straight from the preview

This is the quickest way to change something you can see.

1. Open any page. The live preview sits on the right.

2 Point at a section 1. A dashed outline and purple buttons appear.

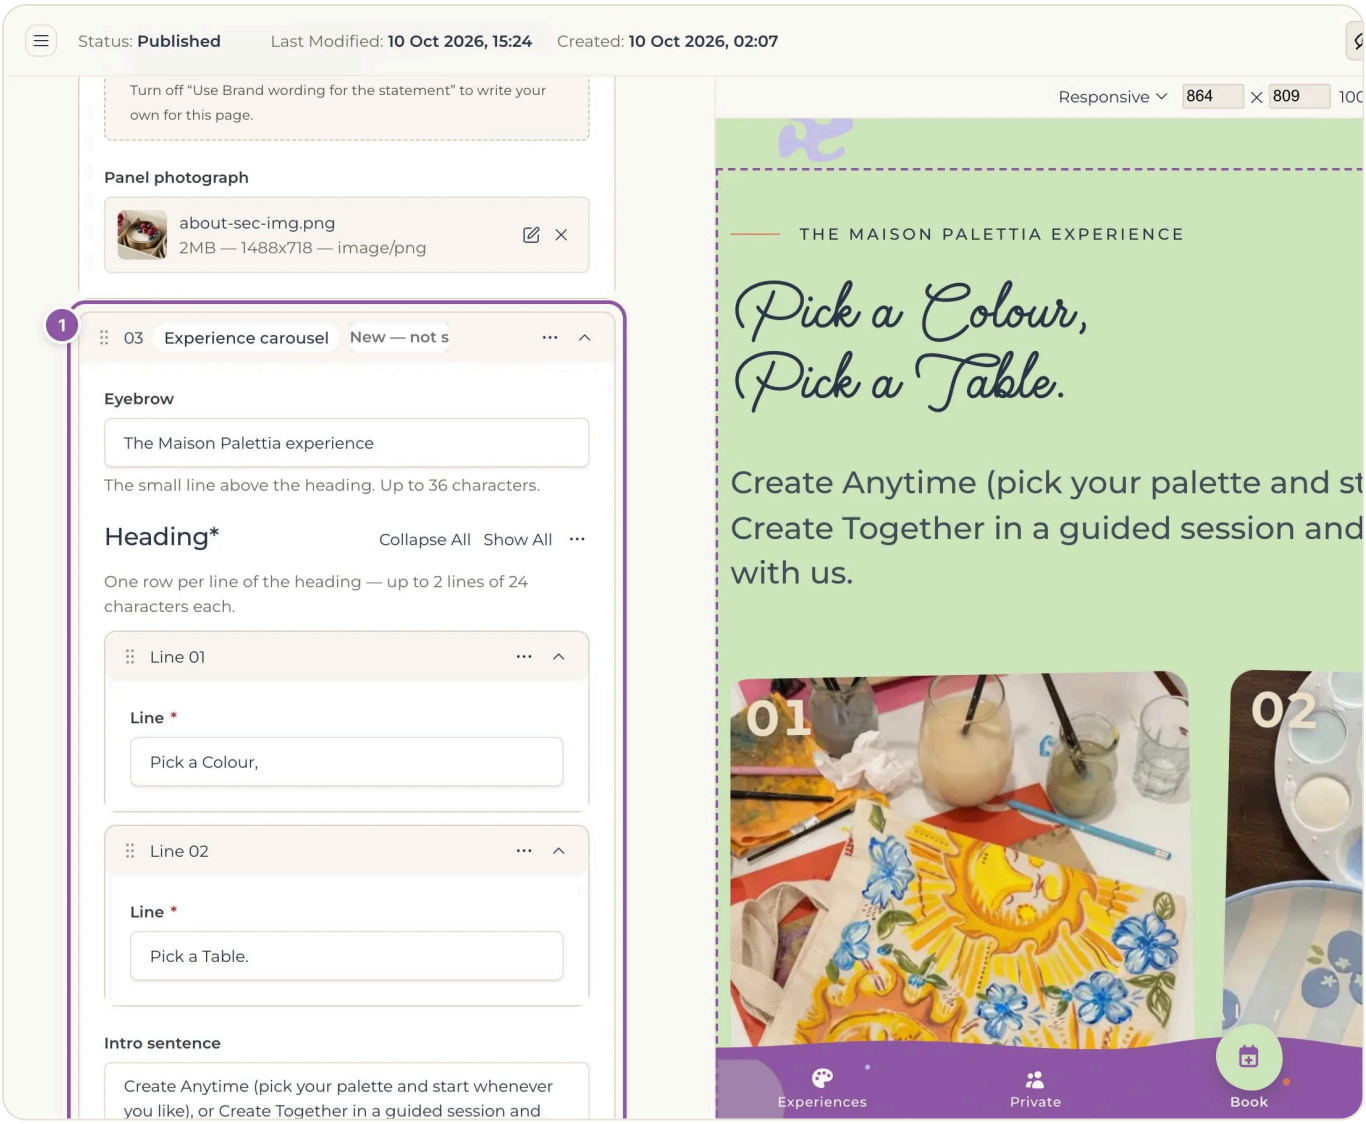

3 Press **Edit** 2. If the words are shared across the site, a second button 3 takes you to Brand wording instead.

On the right is a live preview of the page. Point at any section: it gets a dashed outline and purple Edit buttons appear.

1. The section you are pointing at
2. Edit this section (its photo, buttons and layout)
3. Edit Brand wording — this section's words are shared across the site and kept there
4. Hide or show the preview
5. Open the preview in its own tab

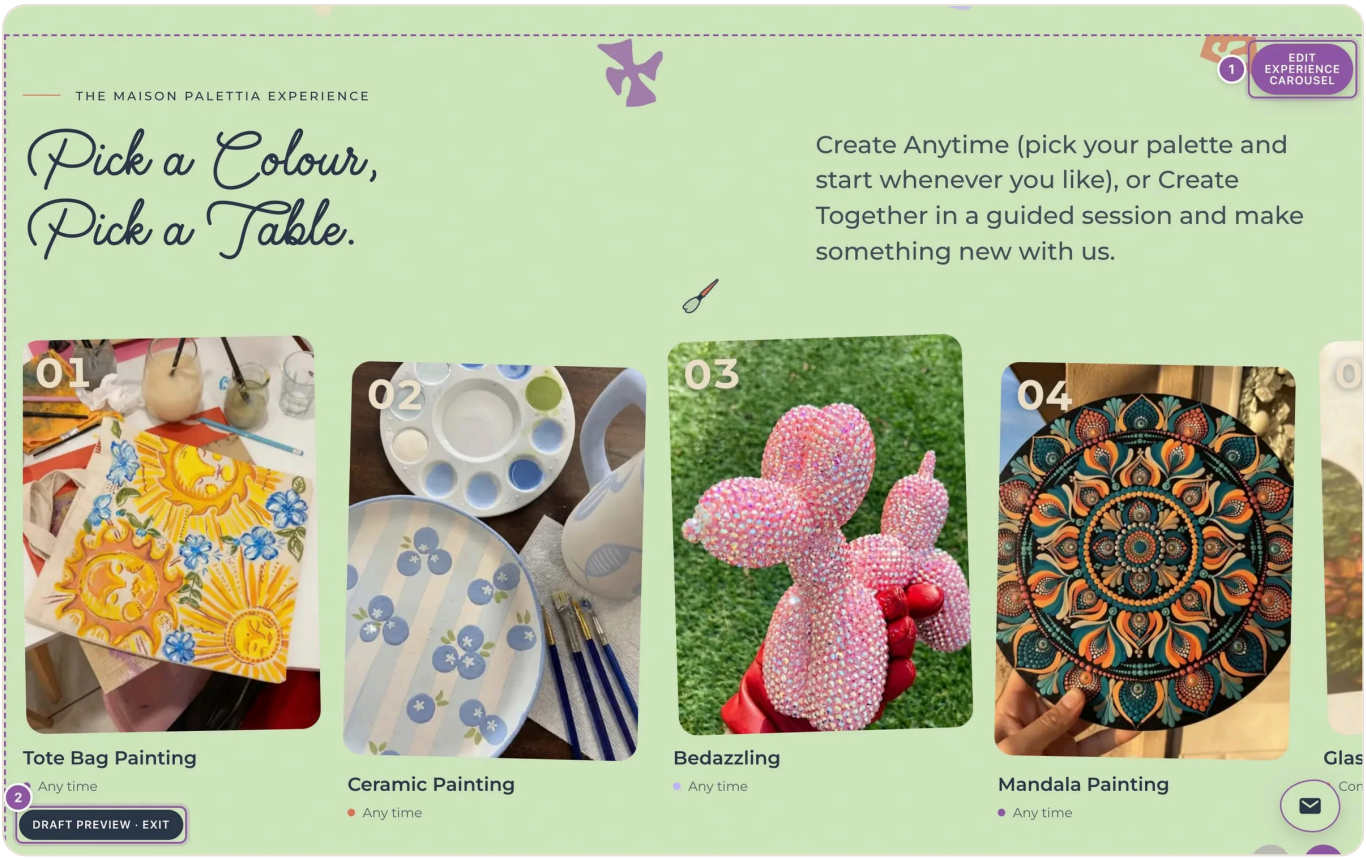

The form on the left scrolls to the section you clicked, opens it and flashes it 1, ready for your changes.

After you click Edit, the form on the left scrolls to that section, opens it and flashes it, ready for your changes.

1. The section you clicked (here 03 Experience carousel), opened and highlighted in the form

Want more room? Open the preview in its own tab with the button at the top of the preview. The website then looks exactly as visitors see it, with **Edit** pills on every section 1 and a small badge 2 that reminds you that you are previewing.

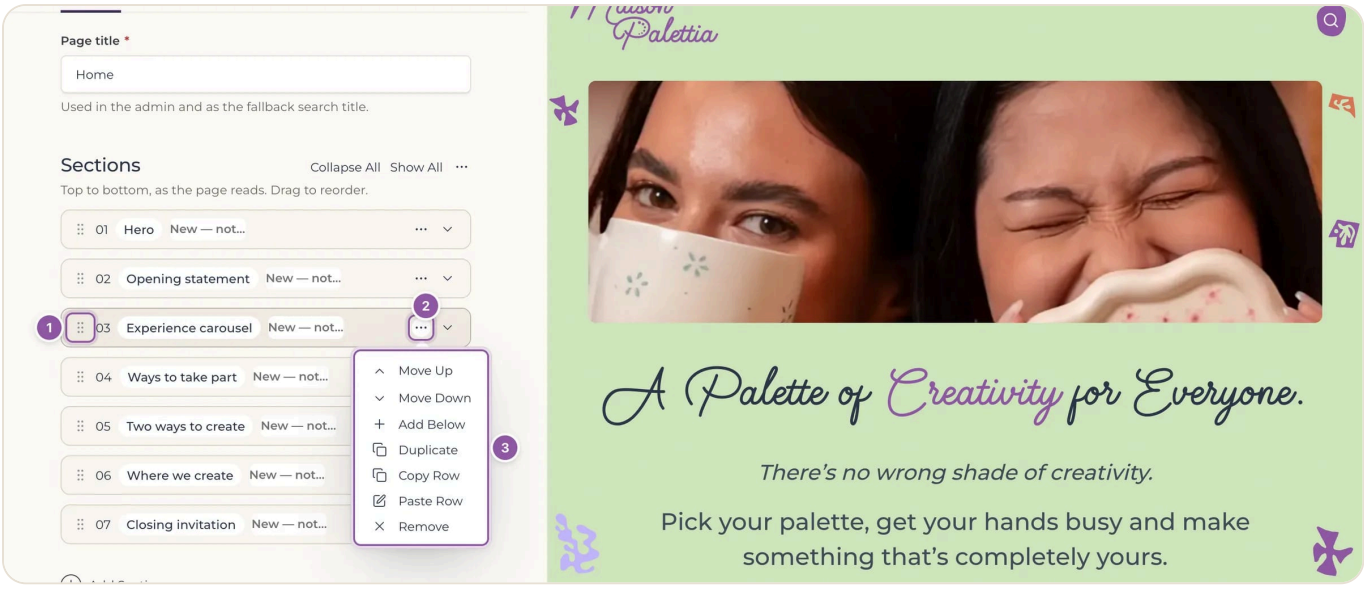

In a preview tab the website looks exactly as visitors see it, with Edit pills on every section and a small badge reminding you that you are previewing.

1. Edit pill — opens this section in the admin
2. Preview badge — click to leave preview

Move, copy or remove a section

1. Hold the dotted handle 1 on a section's bar and drag it up or down.
2. Or open its ... menu 2 and choose **Move Up**, **Move Down**, **Duplicate** or **Remove** 3.
3. Check the preview, then **Publish changes**.

To change the order, drag a section by its dotted handle — or open its … menu and choose Move Up or Move Down.

1. Drag handle — hold and drag up or down
2. The … menu for this section
3. Move up / Move down, Duplicate, Remove

> **NEVER DO THIS**
> Don't remove a section just to rewrite it. Open it and edit instead. A removed section loses its photo and settings. If it happens by accident, press **Revert to published** before you publish.

Add a new section to a page

1. Open the page and scroll to the end of its sections.
2. Press **Add Section**. A panel opens with every kind of section, in groups.
3. Type a word to search, or open a group such as **Page sections**, and click the one you want.
4. It is added at the bottom. Drag it into place by its dotted handle (see Move, copy or remove a section (p. 31)).
5. Fill in its words, check the preview, and press **Publish changes**.

Latest from the Journal

Content › Pages › (a page) › Add Section › Page sections Admin · Editor

This section shows your newest Journal (p. 82) stories as a row of cards, with a button to the Journal. It isn't on any page yet; add it where you would like it, for example on the homepage or the About page.

1. Open the page and press **Add Section** under its sections. Type “journal” in the search box (1); it is in the **Page sections** group (2). Click **Latest from the Journal** (3).

2. Leave the heading empty to use “Latest from the Journal”, or write your own (two short lines at most). Add a lead sentence if you like.
3. **How many stories**: 1 to 6. Three fills a row on a computer.
4. **Only this category**: leave empty for the newest stories from every category, or pick one, such as *New themes*.
5. **Button**: leave empty for “Read the Journal”, which goes to the Journal page.
6. Drag it into place, check the preview, and **Publish changes**.

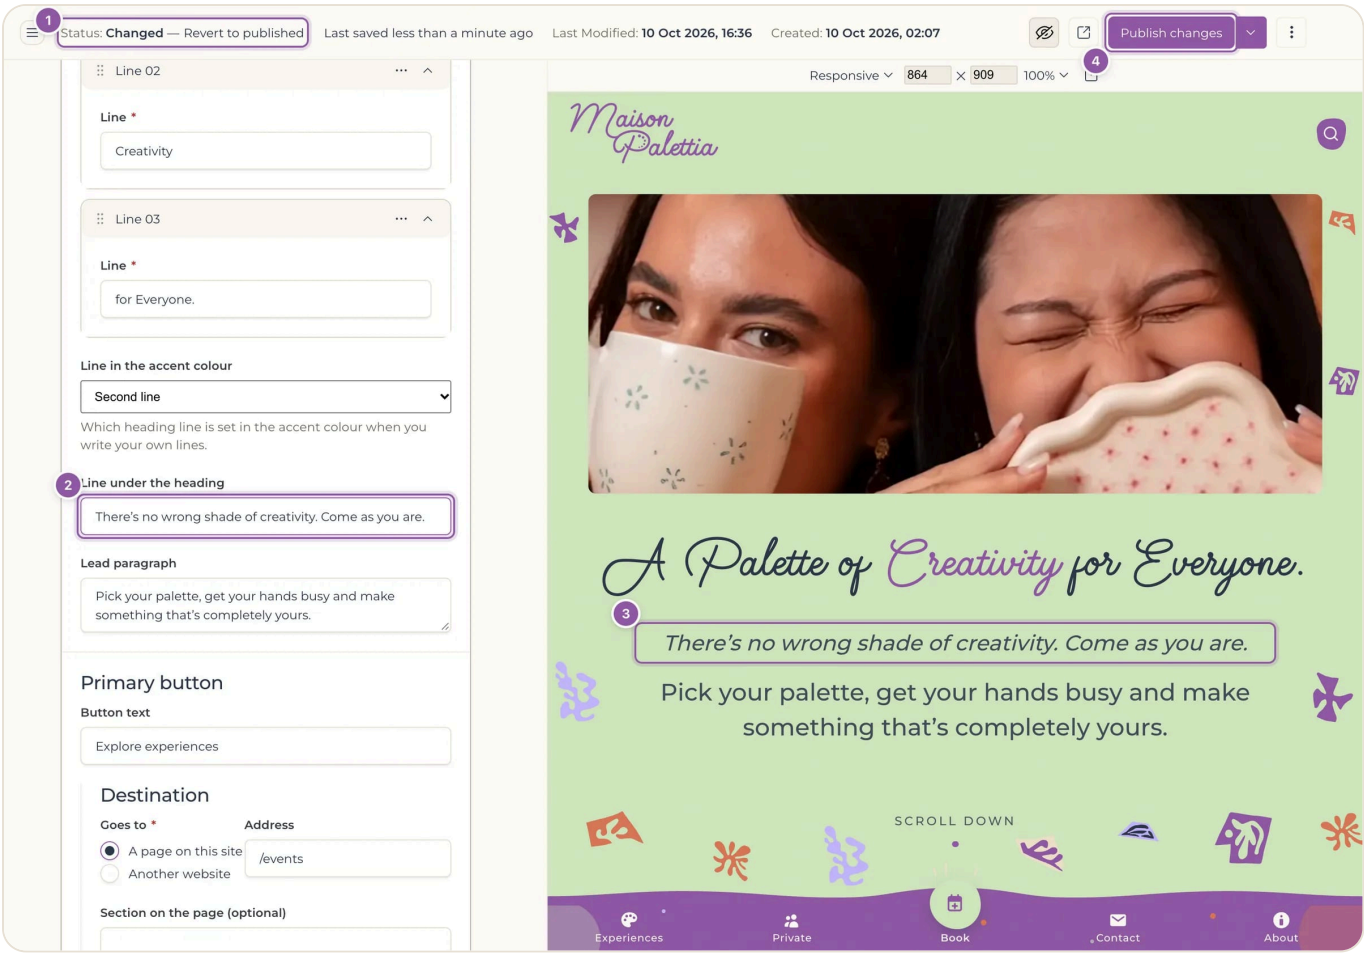

Add Section opens every kind of section. Type “journal” to find Latest from the Journal, in the Page sections group, and click it.

1. Search the sections
2. The group it is in: Page sections
3. Latest from the Journal — click to add it

> **TIP**
> The cards fill themselves in. When you publish a new journal post, every page with this section shows it within a second or two.

Drafts and publishing

1. Make your change 2. It is saved as a draft automatically, and the status changes to **Changed** 1.
2. Check the preview 3. Only you and your team can see it.
3. Press **Publish changes** 4. The website updates within a second or two.

As you type, your change is saved as a draft every second or so. The preview shows the draft; the public website still shows the published version until you press Publish changes.

1. Status — "Changed" means there is an unpublished draft
2. Your edit (saved automatically as a draft)
3. The preview shows your draft
4. Publish changes — puts the draft on the public website

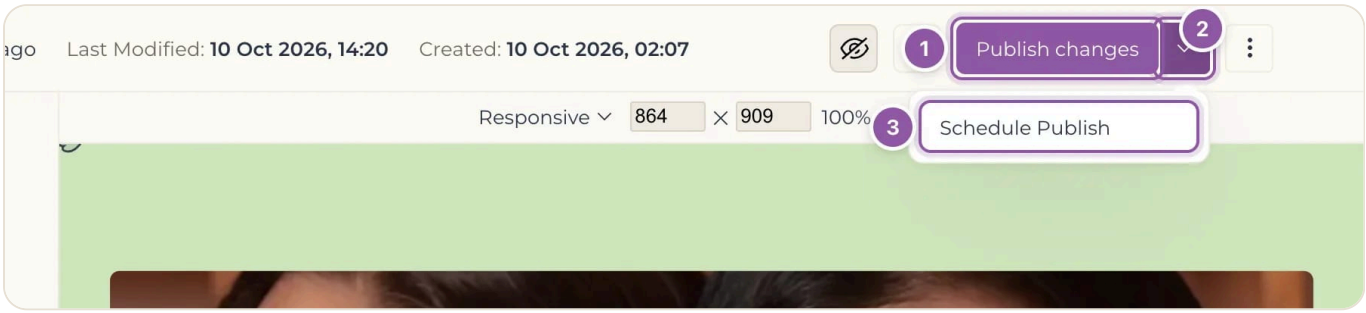

> **TIP**
>
> You can close the browser half-way through an edit. The draft waits for you, and the dashboard lists it under **Drafts & scheduled** so nothing is forgotten.

> **CAREFUL**
>
> Pressing `Create New` on Pages, Experiences, Workshop types, Journal, Programmes, Policies, FAQ, Passes or Testimonials saves an empty **Untitled** draft straight away, before you type anything. (Sessions are the exception: nothing is saved until you press a button.)
>
> An abandoned Untitled draft is harmless and never public. To keep the dashboard tidy, the owner can delete it: in the list, tick its box, then press `Delete`.

Schedule a change for later

Perfect for a new season's prices or a holiday notice that should appear at midnight.

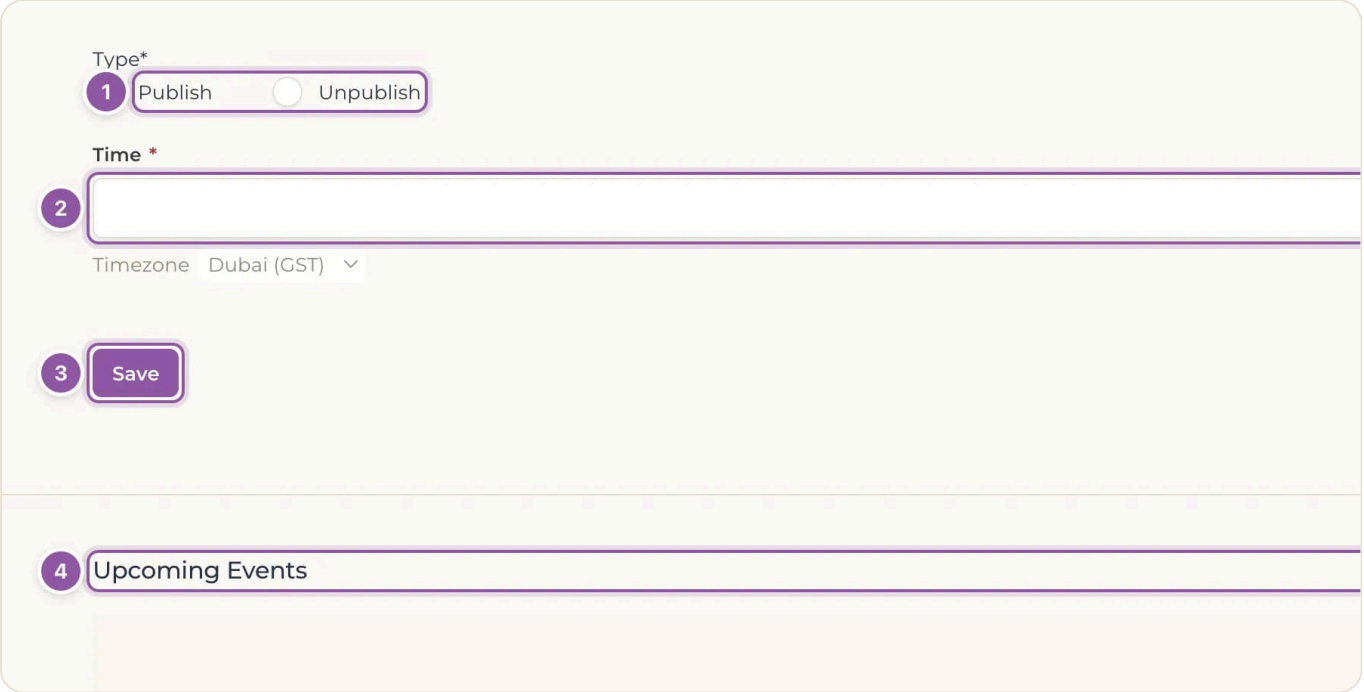

1. Make your change as normal, but don't publish.
2. Click the small arrow next to **Publish changes** 2 and choose **Schedule Publish** 3.

The small arrow next to Publish changes holds Schedule Publish — choose a date and time and the page goes live by itself.

1. Publish changes — live now
2. The arrow opens more options
3. Schedule Publish — pick a date and time

1. Choose **Publish** (or **Unpublish**) 1.
2. Pick the date and time 2. Times are Dubai time.
3. Save the schedule 3. Upcoming schedules are listed below 4, where you can also cancel them.

Schedule Publish: choose when this draft should go live (Dubai time). You can see and cancel upcoming schedules in the same panel.

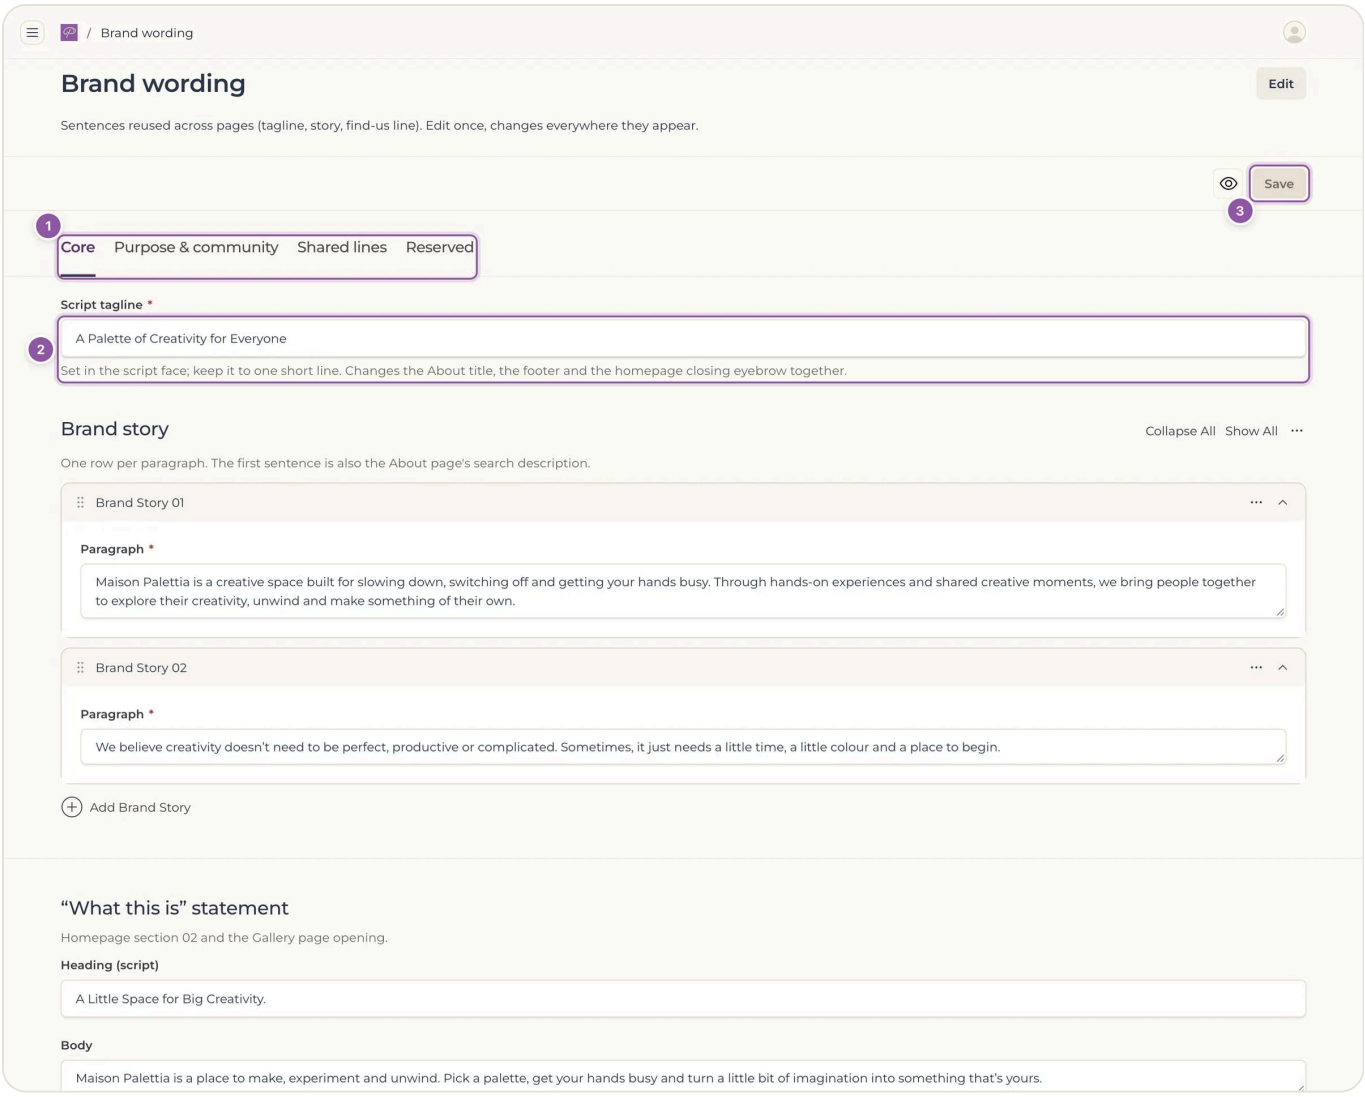

1. Publish or Unpublish
2. Date and time it should happen
3. Save the schedule
4. Upcoming schedules for this page

Brand wording: shared sentences

Settings › Brand wording Admin · Editor

Your tagline, mission, vision and a few other lines appear in several places. They are kept once, here. Change them once and every page that uses them updates.

1. Pick a tab 1: Core, Purpose & community, or Shared lines.
2. Change the sentence in its box 2.
3. Press Save 3. This goes live straight away.

Settings → Brand wording holds the sentences used in several places — the tagline, mission, vision and shared lines. Change them once here and every page that uses them updates.

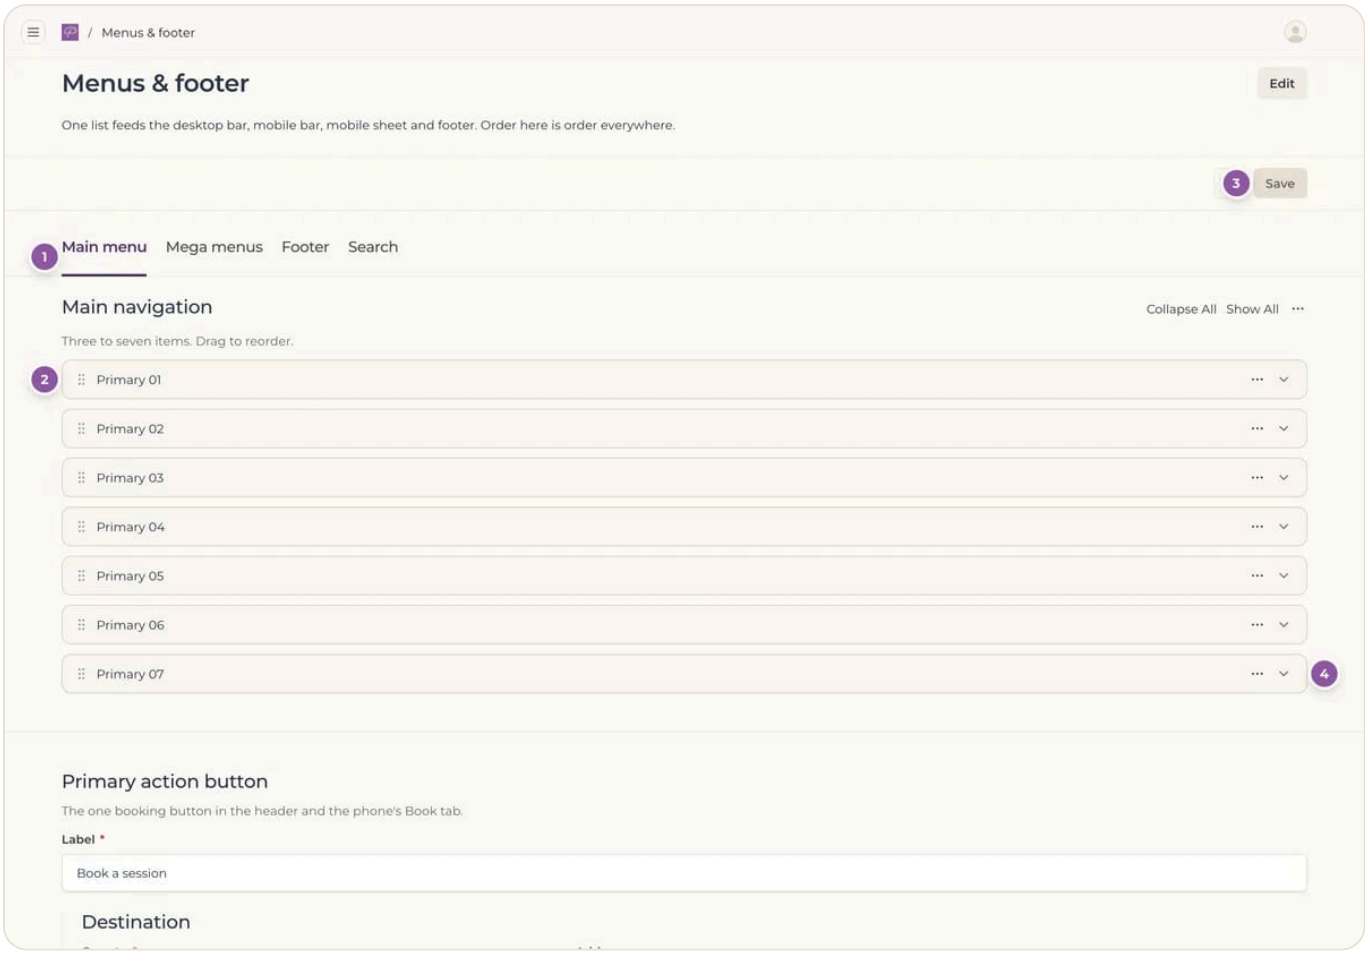

1. Tabs: Core, Purpose & community, Shared lines
2. Each box is one shared sentence or paragraph
3. Save

Menus and footer

Settings › Menus & footer Admin · Editor

One list feeds the desktop menu, the phone's bottom bar, the phone menu and the footer. The order here is the order everywhere.

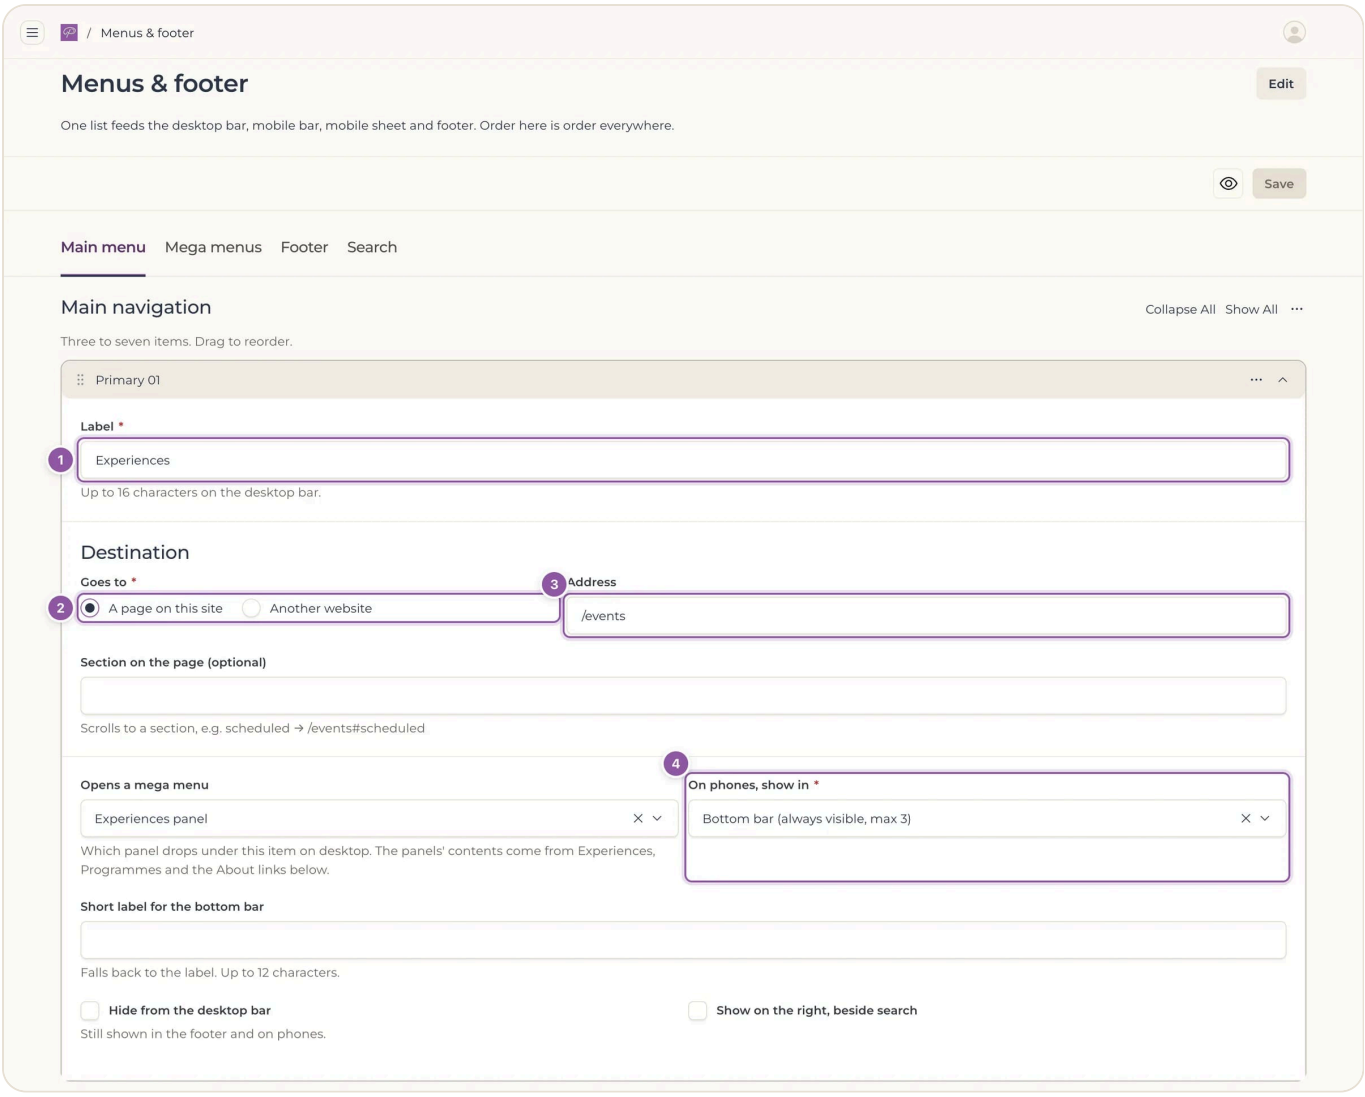

1. Choose a tab 1: Main menu, Mega menus, Footer or Search.
2. Drag the dots to reorder items 2. Three to seven items fit; there are seven now, the last being **Journal** 4, so remove one before you add another.
3. Press **Save** 3.

Settings → Menus & footer. One list feeds the desktop bar, the phone bar, the phone menu and the footer — the order here is the order everywhere. Seven items is the most it takes.

1. Tabs: Main menu, Mega menus, Footer, Search
2. Menu items — drag the dots to reorder
3. Save — the site updates within a moment
4. Journal — the seventh item

Open an item to change its label 1, whether it goes to a page on your site or another website 2, its address 3, and how it shows on phones 4.

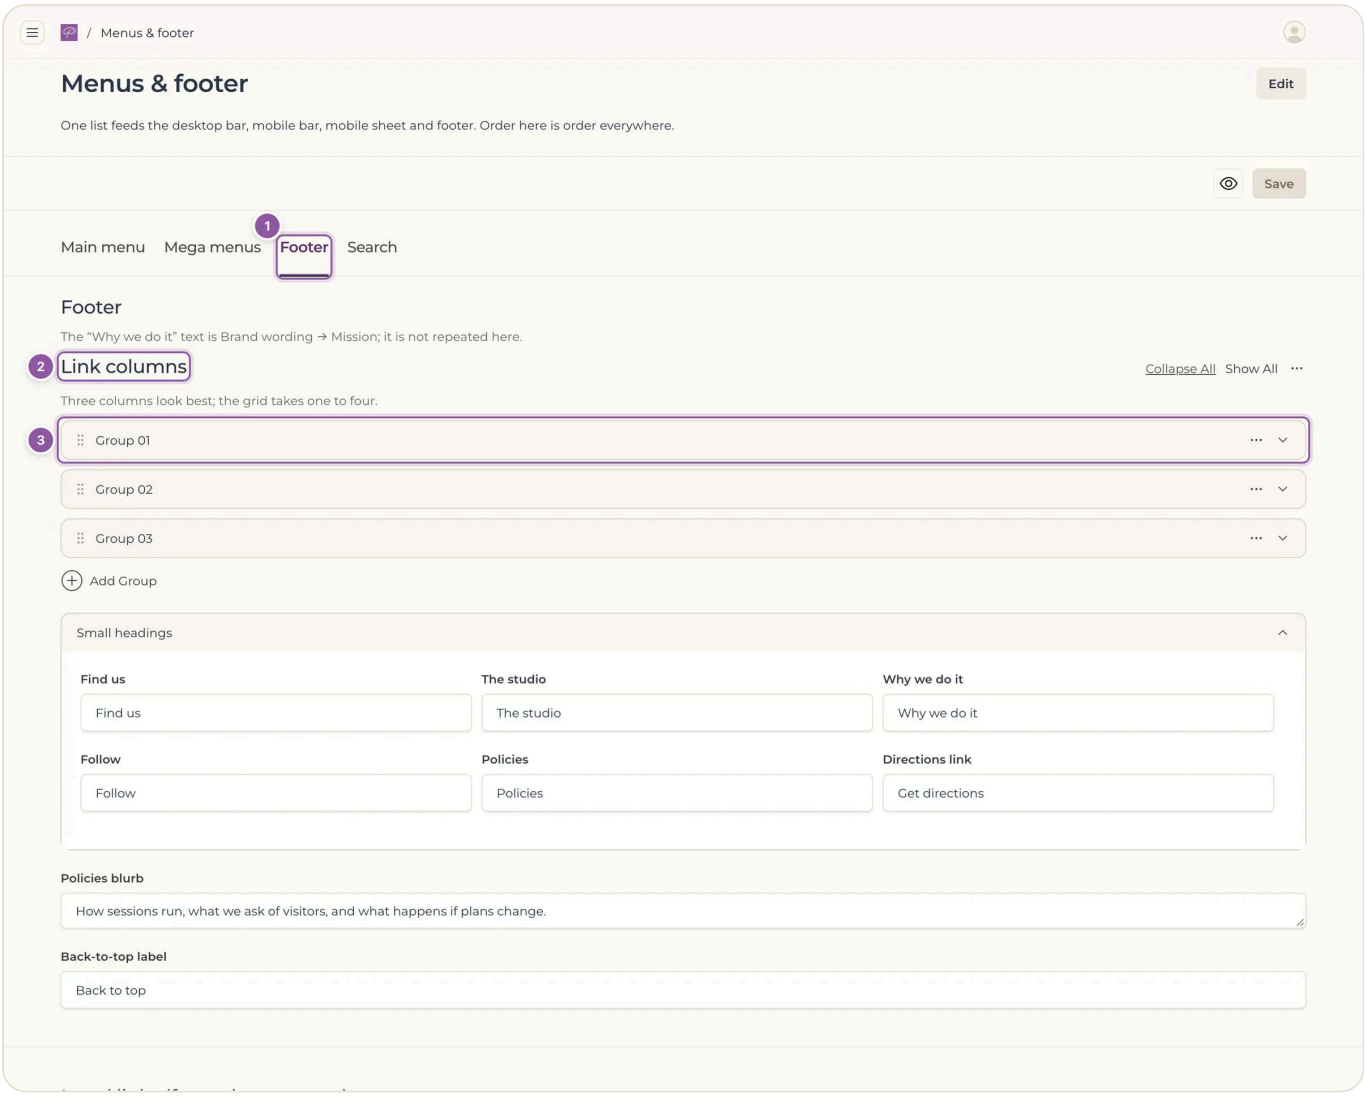

Open an item to change its label, where it goes, and how it shows on phones.

1. Label shown in the menu
2. Goes to a page on this site, or another website
3. The address, e.g. /events
4. On phones: bottom bar or the menu sheet

The **Mega menus** tab holds the panels that open from the menu. The **About** panel's **Links** list takes up to five: today About the Maison, Locations, Gallery, Journal and Contact.

The **Footer** tab 1 holds the footer's own wording and link columns 2; the second column now includes Journal. Open a column 3 to edit its title and links. Policies join the footer's legal row by themselves when “Show in footer legal row” is ticked on the policy.

The Footer tab holds the footer's own wording and link columns. Policies appear in the footer's legal row when “Show in footer legal row” is ticked on the policy.

1. Footer tab
2. Link columns — one group per column (three look best)
3. Each column — open it to edit its title and links

Undo: revert to published

Made a mess of a draft? Throw it away and go back to exactly what is live.

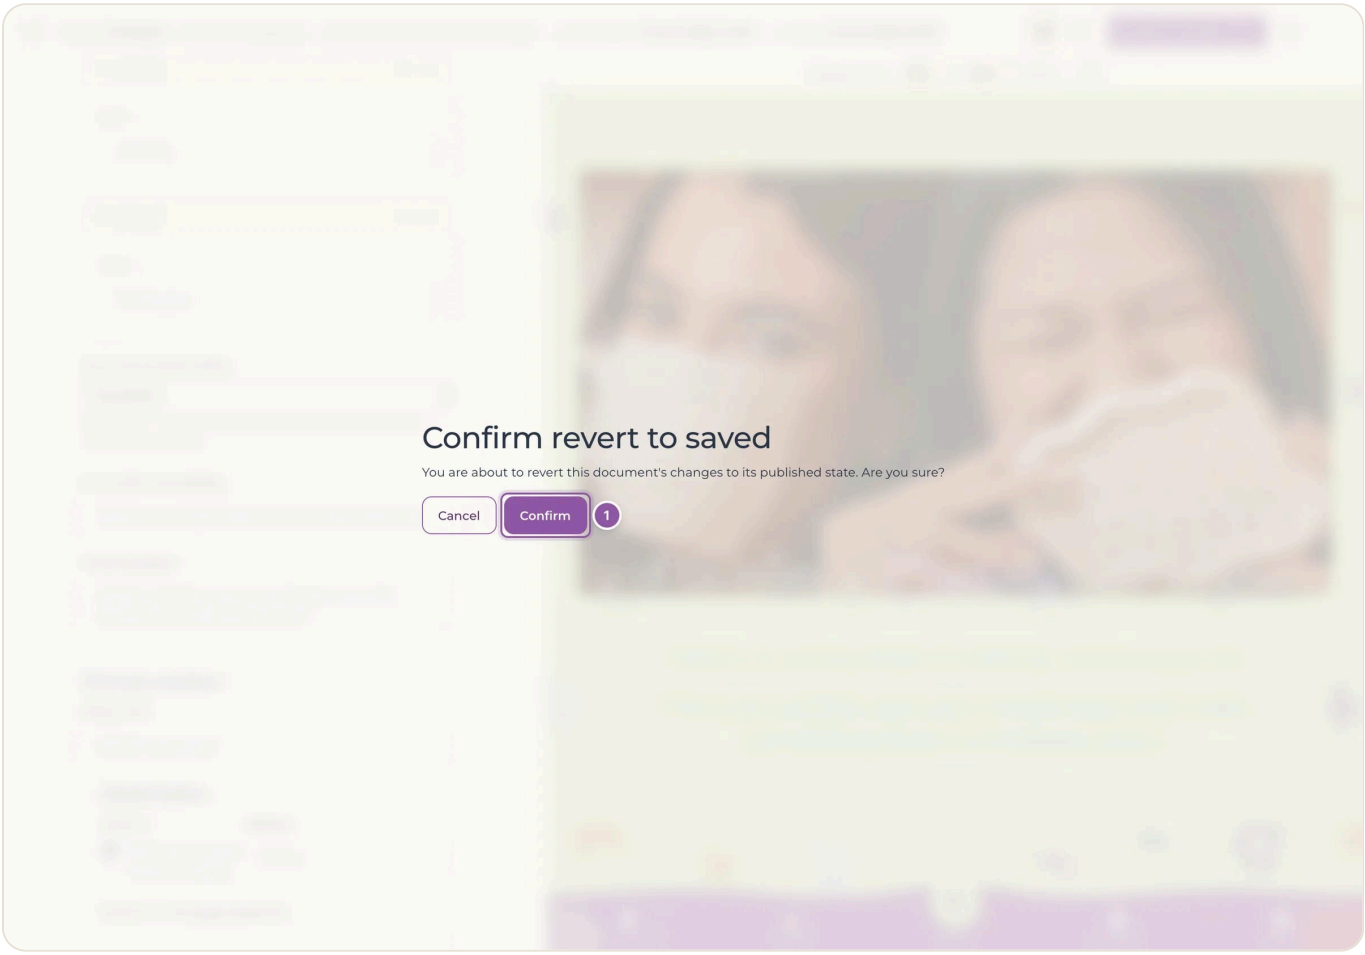

1. Next to the status **Changed** 1, press **Revert to published** 2.

Changed your mind before publishing? Next to the status there is Revert to published — the draft is thrown away and the page goes back to what is live.

1. Status: Changed — there is a draft
2. Revert to published — discard the draft

1. Confirm 1. The draft is thrown away. The website never changed.
2. If the page still shows your old draft, reload the page (⌘ R on a Mac, F5 on Windows). The published version comes back.

You are asked to confirm before anything is thrown away.

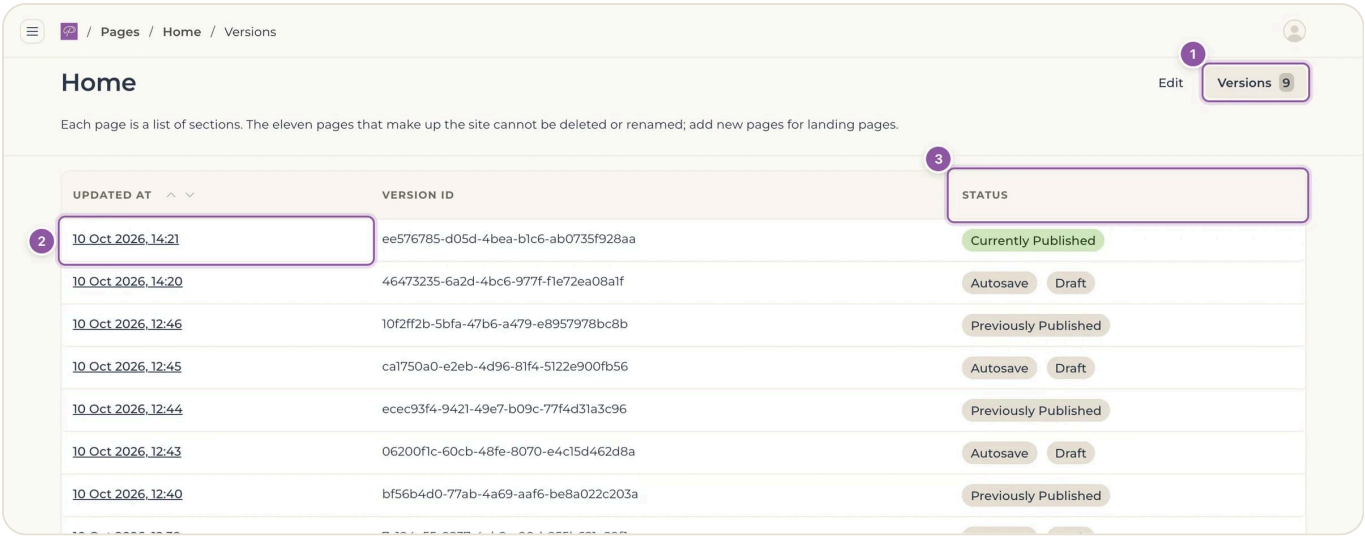

1. Confirm to go back to the published version

History: see and restore older versions

Every page, experience, workshop type, session and journal post keeps its last 25 versions, with who changed what and when.

1. Open the **Versions** tab 1. The number shows how many are kept.

2 Each row is a saved version ② with its status ③. Click a date to open it.

Every page keeps its last 25 versions. Open the Versions tab to see who changed what, and when.

① Versions tab — the number is how many are kept

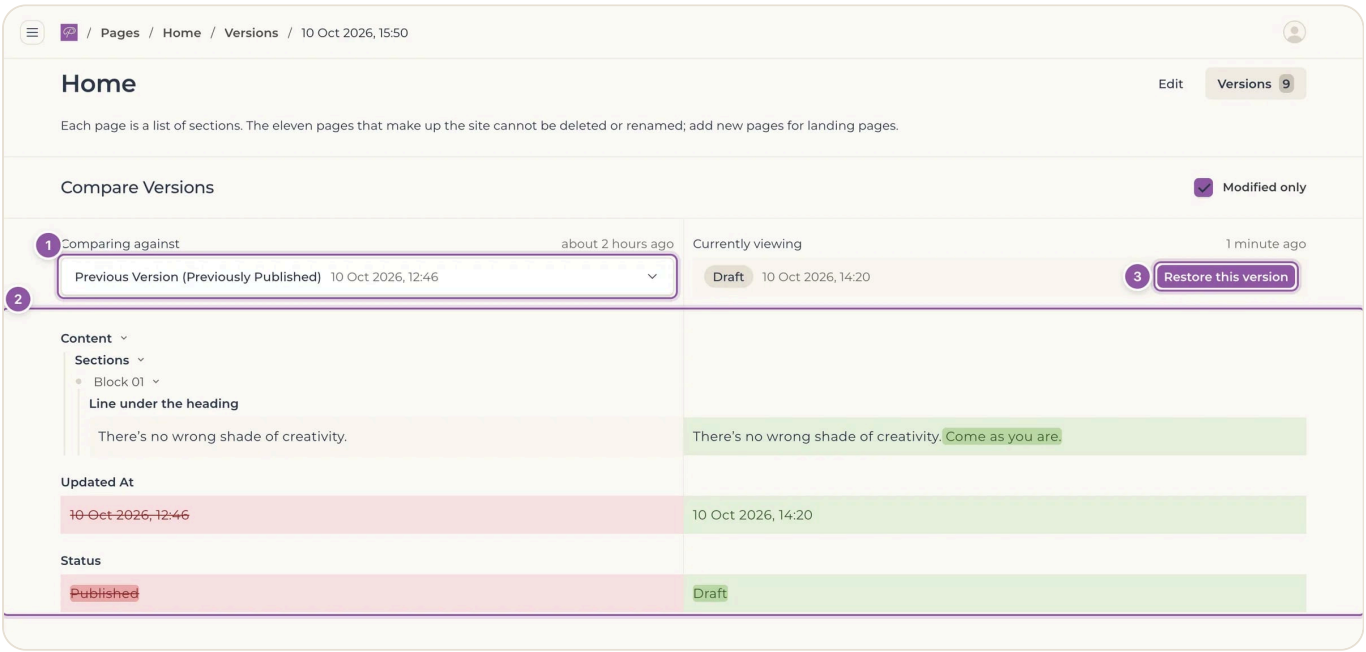

② Each row is a saved version — click its date to open it

③ Status: Published, Draft or Autosave

1 The changes are highlighted ②: red was removed, green was added, compared with ①.

2 Press **Restore this version** ③. It comes back as a draft, so you can check it first.

3 Press **Publish changes**.

Opening a version shows exactly what changed compared with the current one. Restore this version brings it back (as a draft you can check before publishing).

① Which version you are comparing against

② Changes are highlighted — red removed, green added

③ Restore this version

CHAPTER 04

Photos & media

Every photograph, the studio film, logos and fonts live in one library. Change a photo once and every page that uses it updates.

IN 30 SECONDS

- **Content › Media** holds every photo. Search by name or description, or browse by folder.
- Every photo needs a short description of what is in it (**alt text**). It helps blind visitors and Google.
- Replace a photo's file and every page using it updates at once.
- A photo that is still in use can't be deleted. The message tells you where it is used.
- Music files are not kept here: they have their own place, **Content › Music** (see Background music (p. 87)).

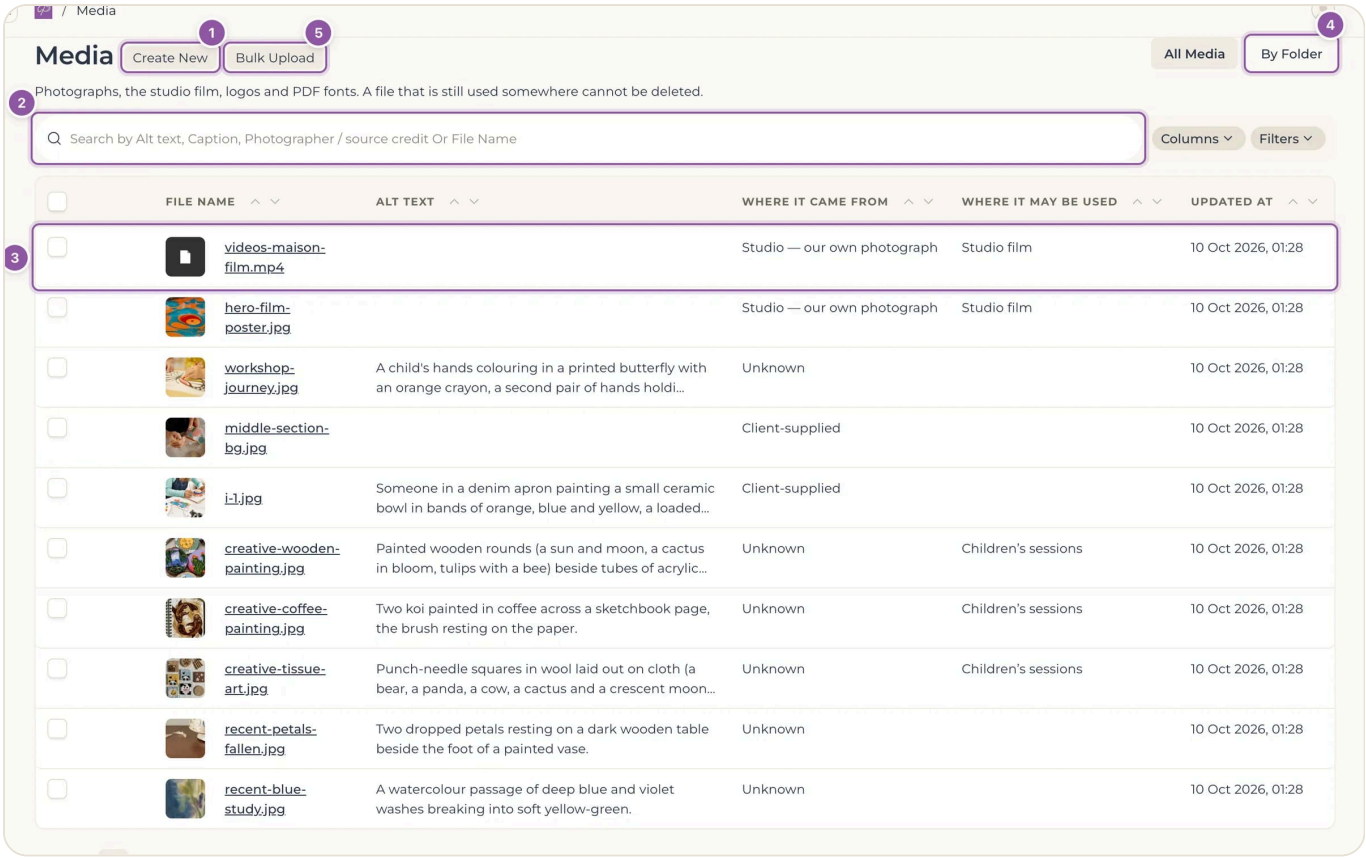

IN THIS CHAPTER

The media library 43
Describe a photo (alt text) 45
Swap a photo everywhere at once 48
Photos you may use 51
Upload a photo 44
Keep the important part in view (focal point) 47
Why a photo won't delete 50

The media library

Content › Media Admin · Editor

1. **Create New** 1 uploads one photo. **Bulk Upload** 5 takes several photos at once.
2. Search 2 by name or description, or press **By Folder** 4 to browse by folder.
3. Click a photo 3 to open it.

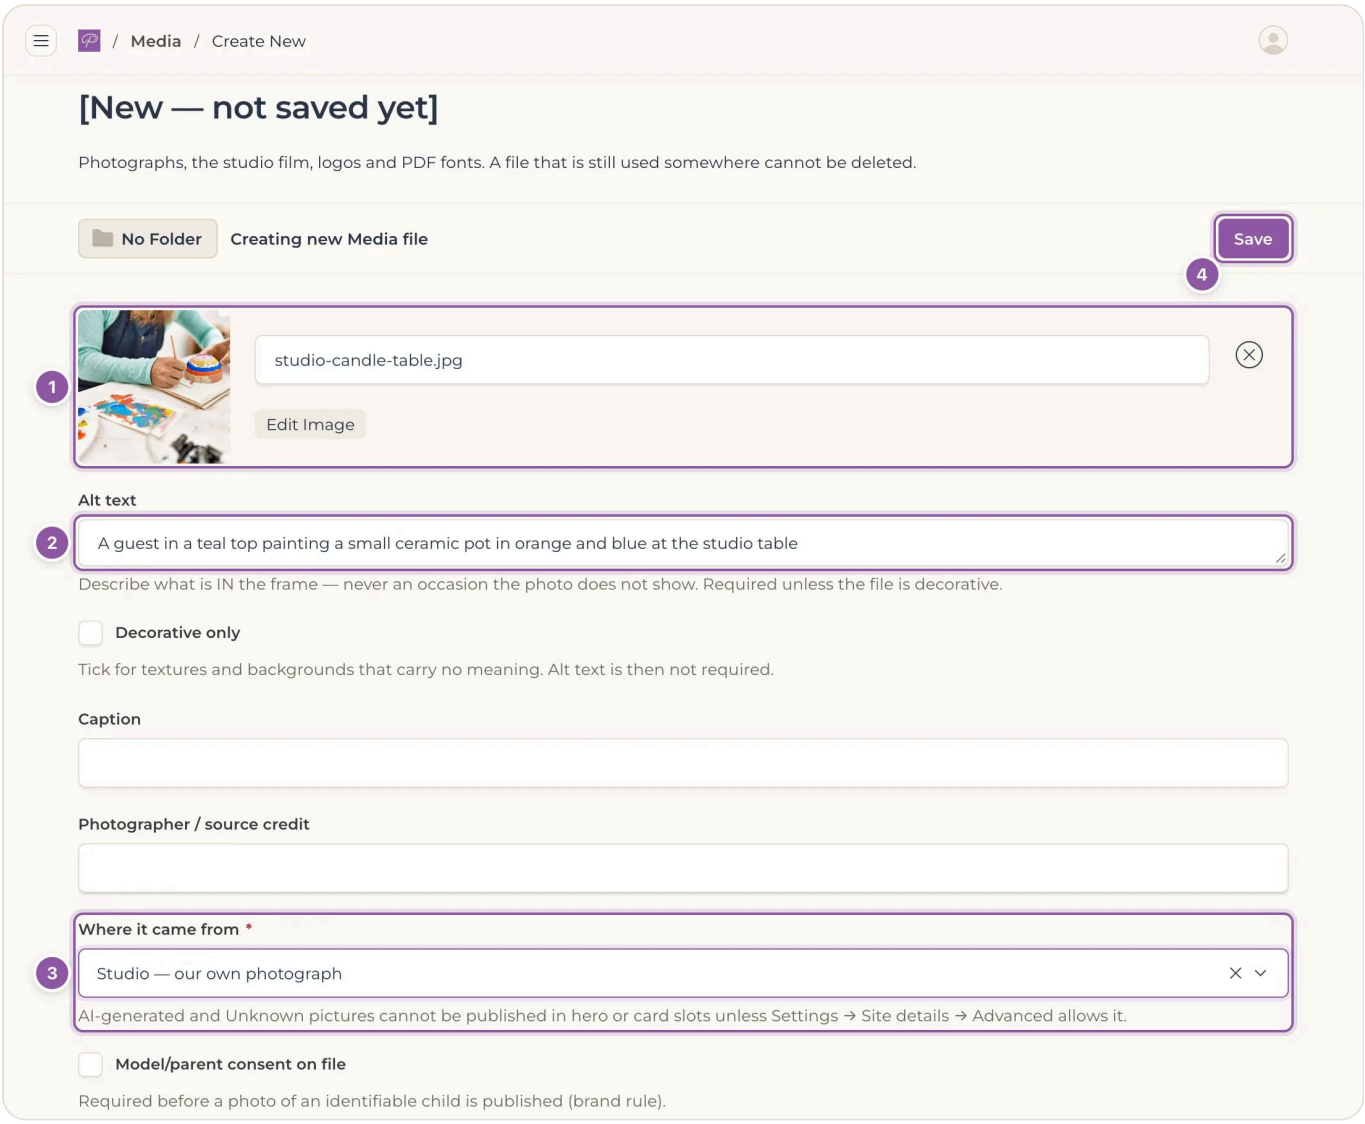

Content → Media holds every photo, the film, logos and fonts. Create New uploads one photo; Bulk Upload takes several at once. Search by name or description, or browse by folder.

1. Create New — upload a photo
2. Search
3. Click a photo to open it
4. By Folder — browse your photos by folder
5. Bulk Upload — several photos at once

Upload a photo

1. Press **Create New**, then drag a photo in or click to choose one 1. Up to 25 MB.
2. Describe what is in the picture 2.
3. Say where it came from 3: **Studio** for your own photos.
4. Press **Save** 4.

Uploading: drag a photo in (or click to choose one), describe what is in it, say where it came from, then Save.

1. The photo you chose (up to 25 MB)
2. Alt text — describe what is in the picture
3. Where it came from — Studio for your own photos
4. Save

> **TIP**
>
> Use photos at least 2000 pixels wide for big hero spaces. The admin warns you about anything under 1000 pixels. Square or landscape photos crop most gracefully on phones.

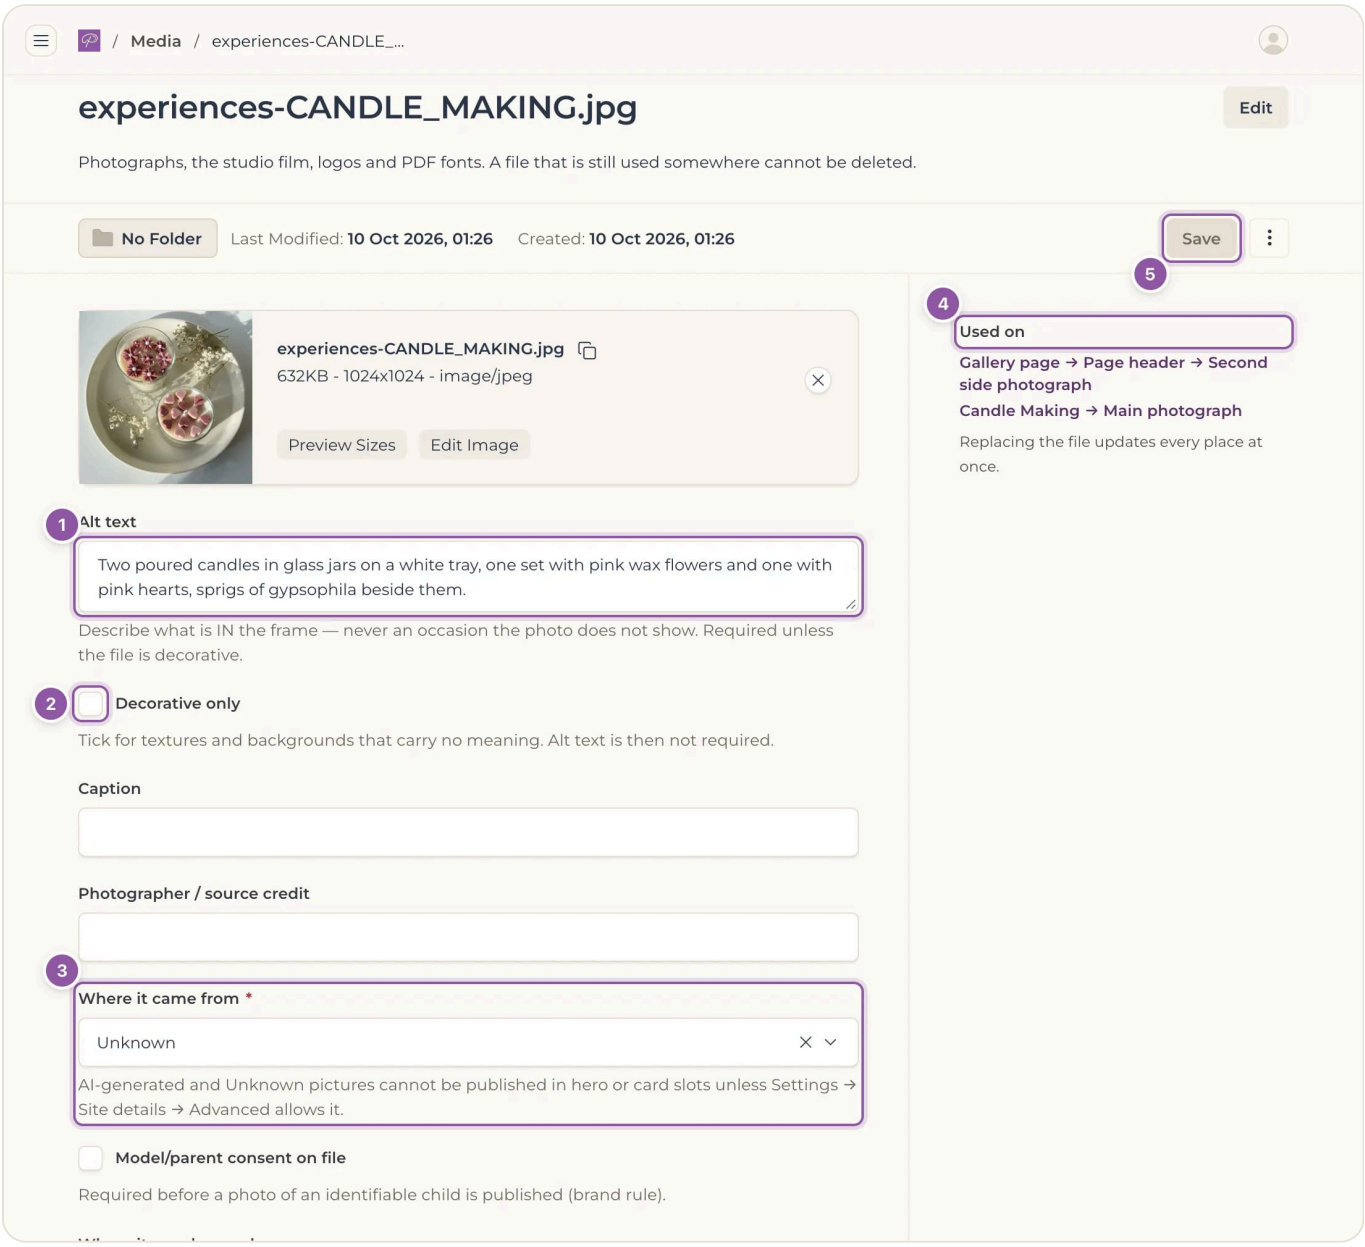

Describe a photo (alt text)

Alt text is a short sentence that describes the picture. Screen readers read it aloud to blind visitors, and Google uses it to understand your site.

1. Open the photo. Write what is in the frame 1.
2. Only for textures and backgrounds with no meaning, tick **Decorative only** 2 instead.

3 Check where it came from ③. **Used on** ④ lists every place it appears, including journal posts (as the cover, the author's photo, or a photo inside the text).

4 Press **Save** ⑤. The website updates within a moment.

Open a photo to change its description (alt text). “Used on” lists every place it appears. Save, and the website updates within a moment.

1. Alt text — what is in the frame
2. Decorative only — for textures with no meaning
3. Where it came from (Studio, Stock, AI-generated, Unknown)
4. Used on — every place this photo appears
5. Save

ALT TEXT, GOOD AND WEAK

Good

“Two guests painting ceramic plates with blue glaze at a long studio table.”

Says who, what and where in one sentence.

Weak

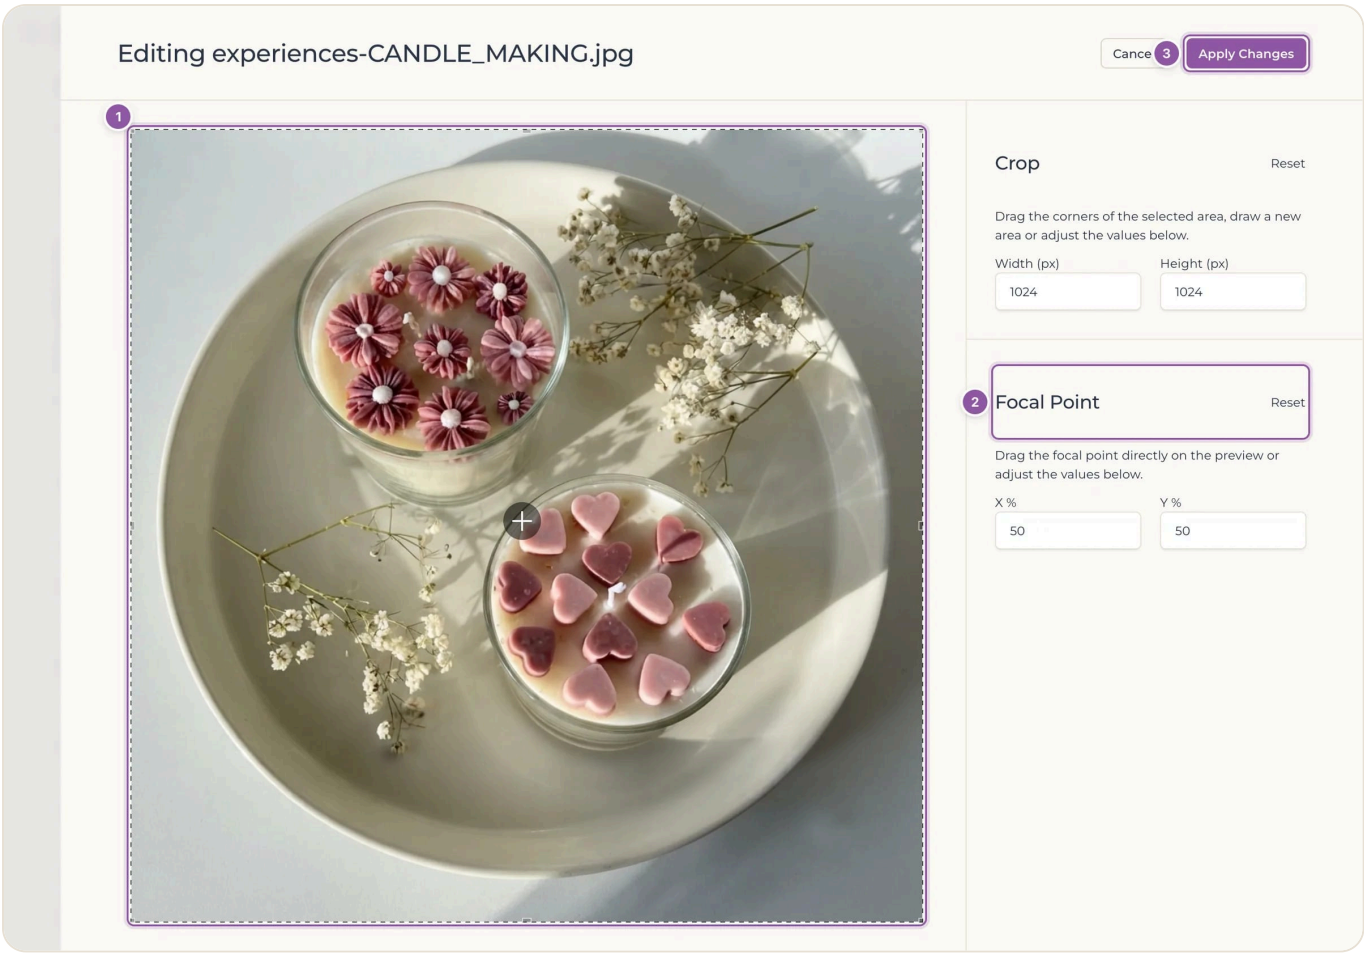

“IMG_4821” or “beautiful photo of our amazing workshop”

A file name, or words that describe nothing.

Keep the important part in view (focal point)

The site crops photos differently for a wide card or a tall phone screen. The focal point tells it which part must always stay in view, such as a face or a pair of hands.

1. Open the photo and press **Edit Image**.
2. Drag the dot onto the most important spot (1), or type the position (2).
3. **Apply changes**, then **Save** the photo (3).

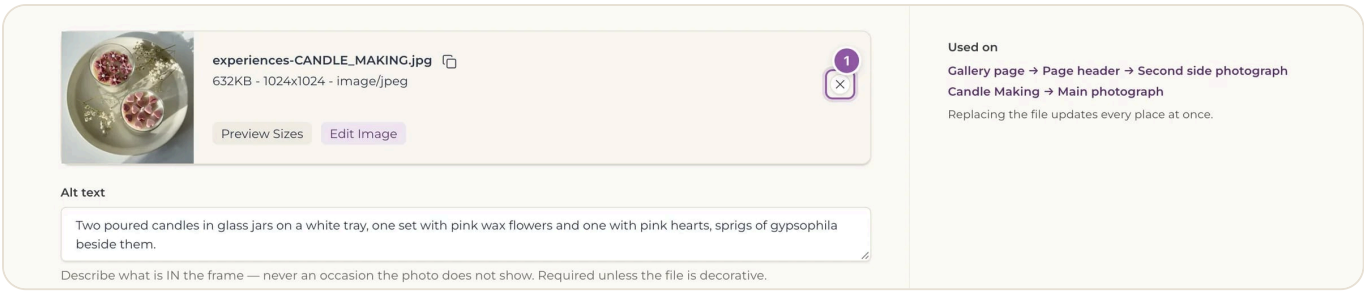

Edit Image → drag the focal point onto the most important part of the picture. When the site crops the photo for a card or a phone screen, it keeps that spot in view.

1. Drag the dot to the important spot
2. Or type the position (X and Y, in %)
3. Apply changes, then Save the photo

Swap a photo everywhere at once

New photograph of the candle table? Replace the file and every page that used the old one shows the new one.

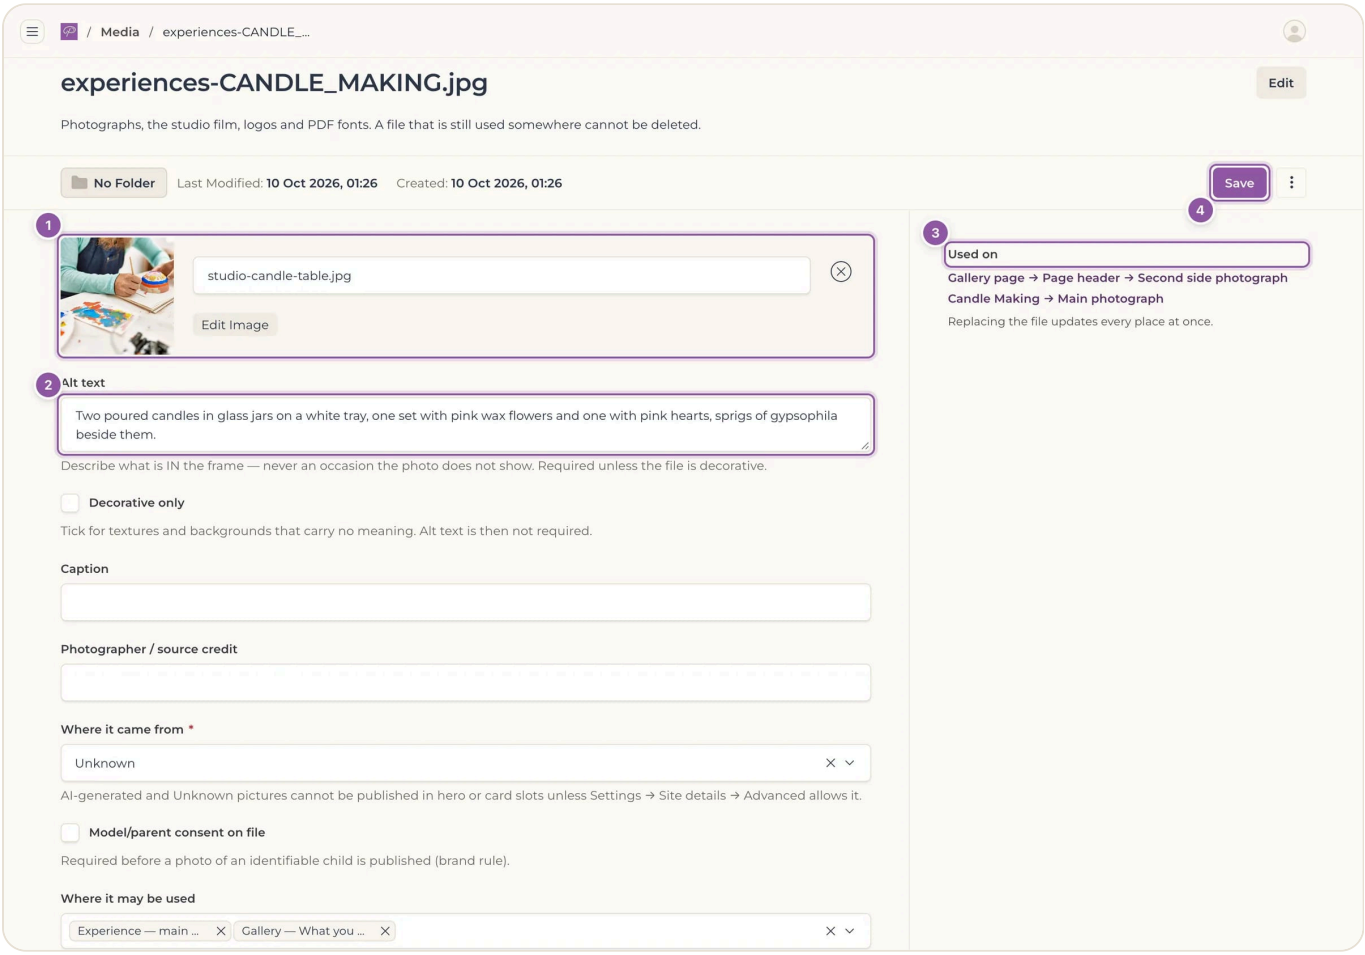

1. Open the photo and press the × on the file 1. Nothing changes until you save.

Swap a photo everywhere at once, step 1: open the photo and press the × on the file.

1. × — take this file out (nothing changes until you Save)

1. Drop in the new picture 1.
2. Check the alt text still describes it 2.
3. Every place listed under **Used on** 3 gets the new photo when you press **Save** 4.

Step 2: drop in the new picture, check the alt text still describes it, and Save. Every page that used the old photo now shows the new one.

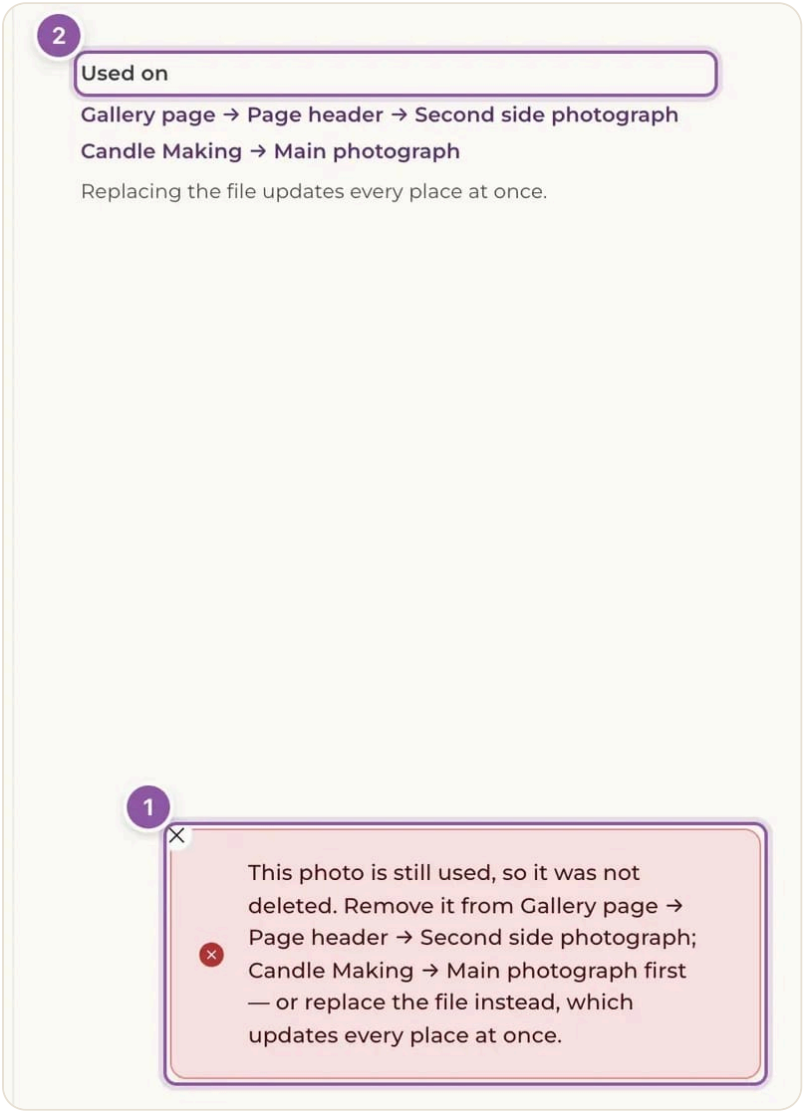

1. The new file, waiting to be saved
2. Check the alt text still describes it
3. Every place it is used gets the new photo
4. Save

Why a photo won't delete

Delete: Admin only

A photo that is still used somewhere can't be deleted, so the website never shows a broken picture. The message lists every place it is used 1, journal posts included, and the same list is always on the photo's page 2.

1. Replace the photo on each of those pages first (or swap the file, above).
2. Then delete it. Only the owner (Admin) can delete photos; Editors don't see the Delete option.

A photo that is still used somewhere cannot be deleted — the message says exactly where. Replace it on those pages first (or swap the file instead), then delete.

1. The message lists every place the photo is used
2. The same list is always shown here

Photos you may use

NEVER DO THIS

Never upload a photo you don't have the right to use, and always set “Where it came from” honestly. Photos marked *AI-generated* or *Unknown* can't appear in the big hero and card spaces unless the owner allows it under **Settings › Site details › Advanced**.

Children: tick **Model/parent consent on file** only when you really have it. Otherwise replace the photo.

CHAPTER 05

Experiences, workshop types & sessions

An experience is the class itself, such as Candle Making. A workshop type is one theme or level of it, such as Sculptural Forms. A session is one date and time, with its own price and number of seats.

IN 30 SECONDS

- **Content › Experiences** describes each class: name, one line, About paragraphs and photos.
- **Content › Workshop types** holds the themes and levels a class runs in. A customer picks the type, then a date.
- **Content › Sessions** holds every dated class. **Save Draft** keeps a new session hidden; **Publish changes** puts it on sale.
- The **Actions** button on a session holds the bigger jobs: repeat weekly, desk booking, reschedule, cancel and refund everyone.
- All times are Dubai time. Seats can never drop below what is already sold.
- After **Repeat weekly…**, open each copy and set its **Workshop type** before you publish it.

IN THIS CHAPTER

EXPERIENCE, WORKSHOP TYPES AND SESSIONS (TODAY'S)

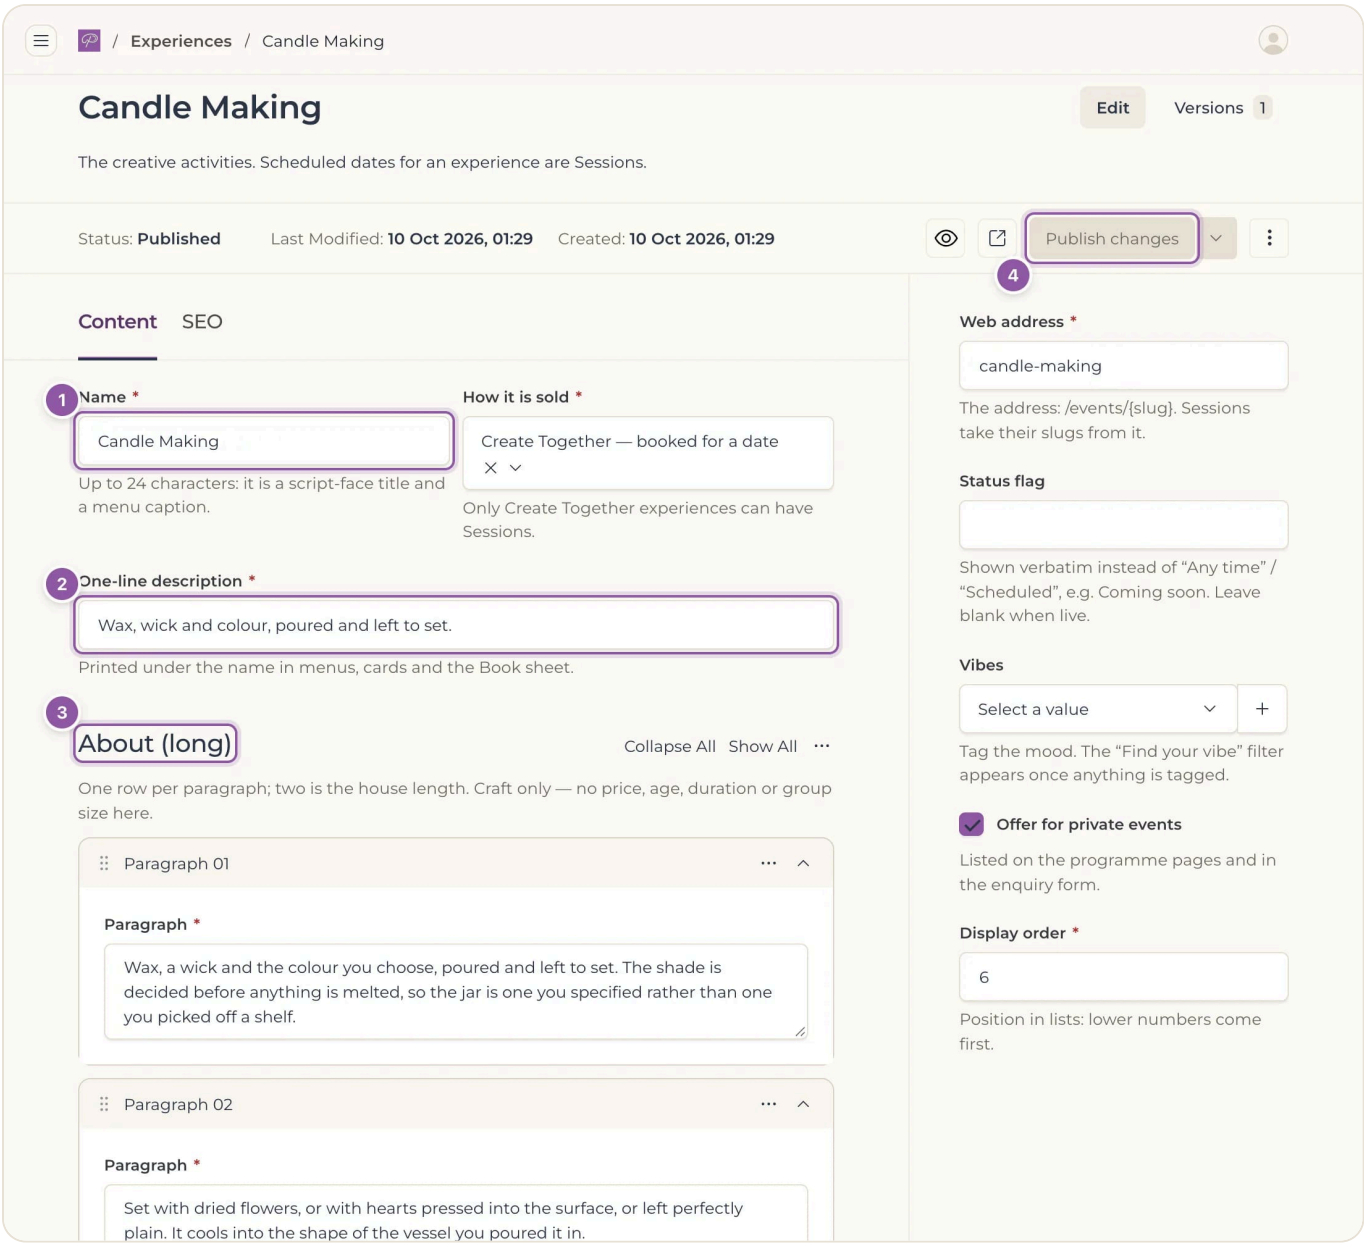

EXPERIENCE	WORKSHOP TYPES	SESSIONS
Candle Making The class: its name, description and photos. Written once.	**Sculptural Forms · The Cheesecake Collection** The themes it runs in. Each has its own page listing its dates.	**Thu 19 Nov · 11:00 and 18:30** One dated sitting of a type, with its own price (AED 240) and seats (6).

Crocheting works the same way, with levels instead of themes: Crochet — Beginners, Beginner Basics, Returning Learners, Beginner Project.
An experience with no types still works: its sessions hang straight off it.

Edit an experience's words

Content › Experiences Admin · Editor

1. Open an experience. The name (1) is printed in the script font, so keep it to 24 characters.
2. The one-line description (2) shows under the name in menus and cards.
3. **About** (3) has one box per paragraph. Add Paragraph for another.
4. Publish changes (4) when you are happy.

Content → Experiences → pick one. The name, the one-line description and the About paragraphs are all here. Changes save as a draft until you publish.

1. Name (up to 24 characters — it is printed in the script font)
2. One-line description — under the name in menus and cards
3. About — one box per paragraph; Add Paragraph for another
4. Publish changes when you are happy

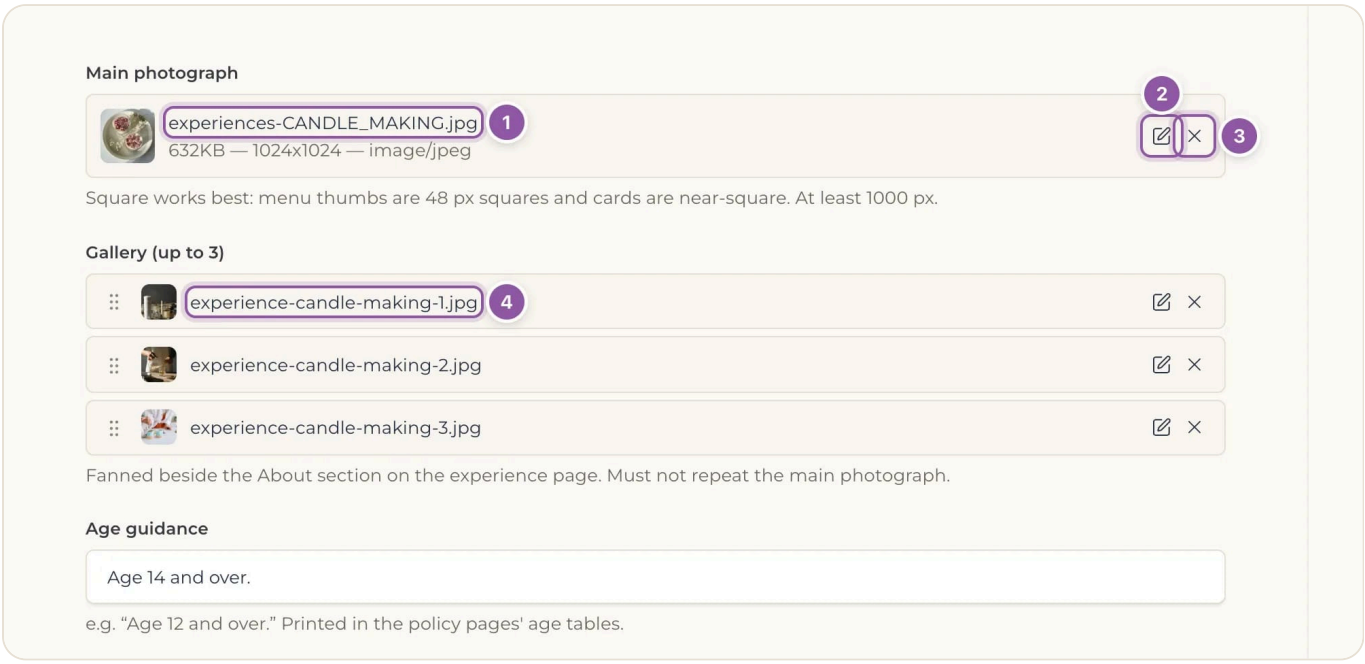

> **GOOD TO KNOW**
>
> An experience can't be deleted while workshop types belong to it. The message says, for example, "2 workshop types belong to this experience…". Unpublish it instead, or move the types first.

An experience's photos

1. Further down, set the main photograph 1. Square works best.

2 The pencil 2 edits the photo's alt text and focal point. The × 3 removes it from here only; it stays in Media.

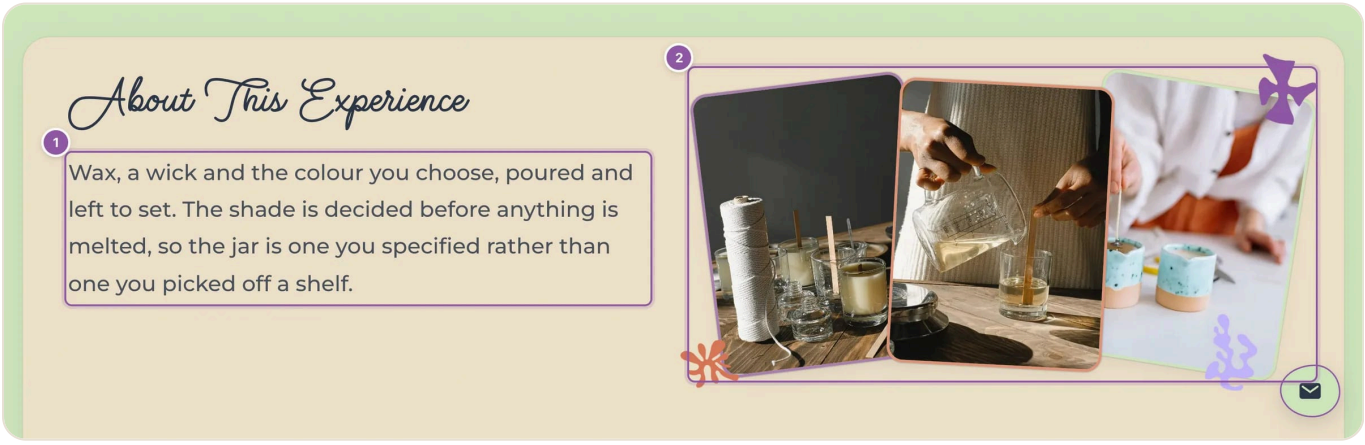

3 Add up to three gallery photos 4 and drag the dots to change their order.

Further down: the main photograph and up to three gallery photos — the cards fanned beside the About text on the experience page.

1 Main photograph — square works best
2 Pencil: edit this photo (alt text, focal point)
3 ×: remove it from here (the photo stays in Media)
4 Gallery cards — drag the dots to reorder

On the website, the gallery photos appear as fanned cards 2 beside the About text 1, in the same order.

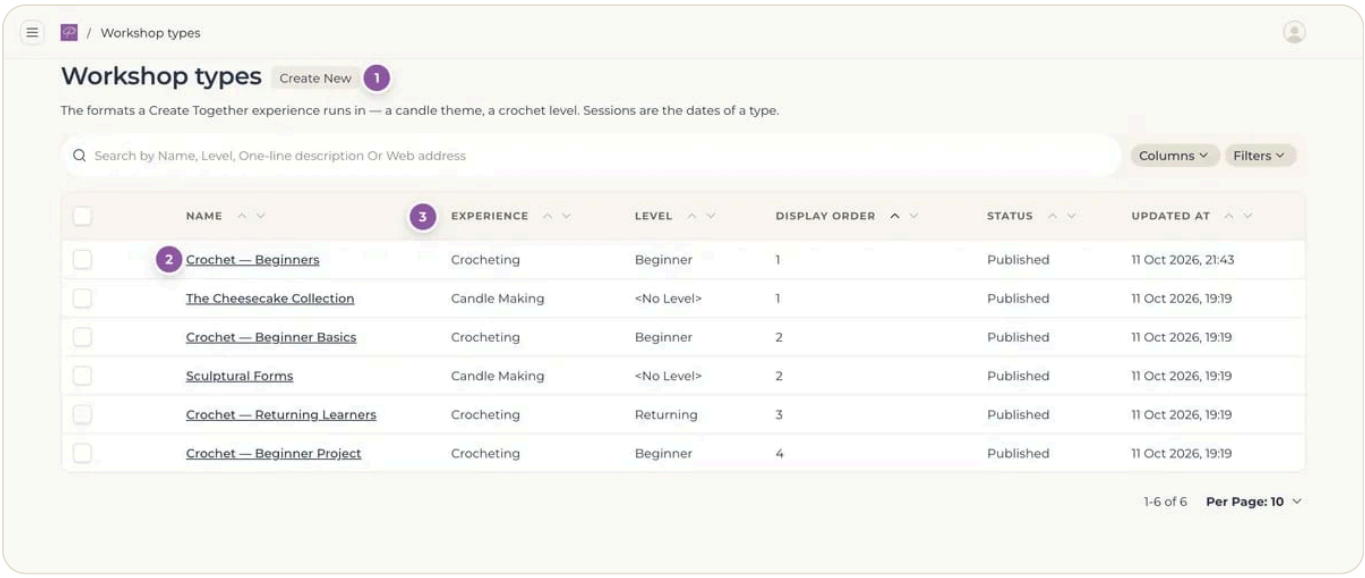

On the website, the gallery photos appear as fanned cards beside the About text. The order in the admin is the order of the cards.

1 About paragraphs
2 Gallery cards (up to three)

Workshop types: themes and levels

Content › Workshop types | Admin · Editor (Front desk can look)

A workshop type is the format a booked (Create Together) experience runs in: a monthly candle theme such as *Sculptural Forms*, or a crochet level such as *Crochet — Beginners*. On the website a customer first picks the type, then a date. Each type has its own page at `/events/…` listing its dates, and the experience's page lists every published type that has dates ahead.

Content → Workshop types: every theme and level, with the experience it belongs to, its level and its order.

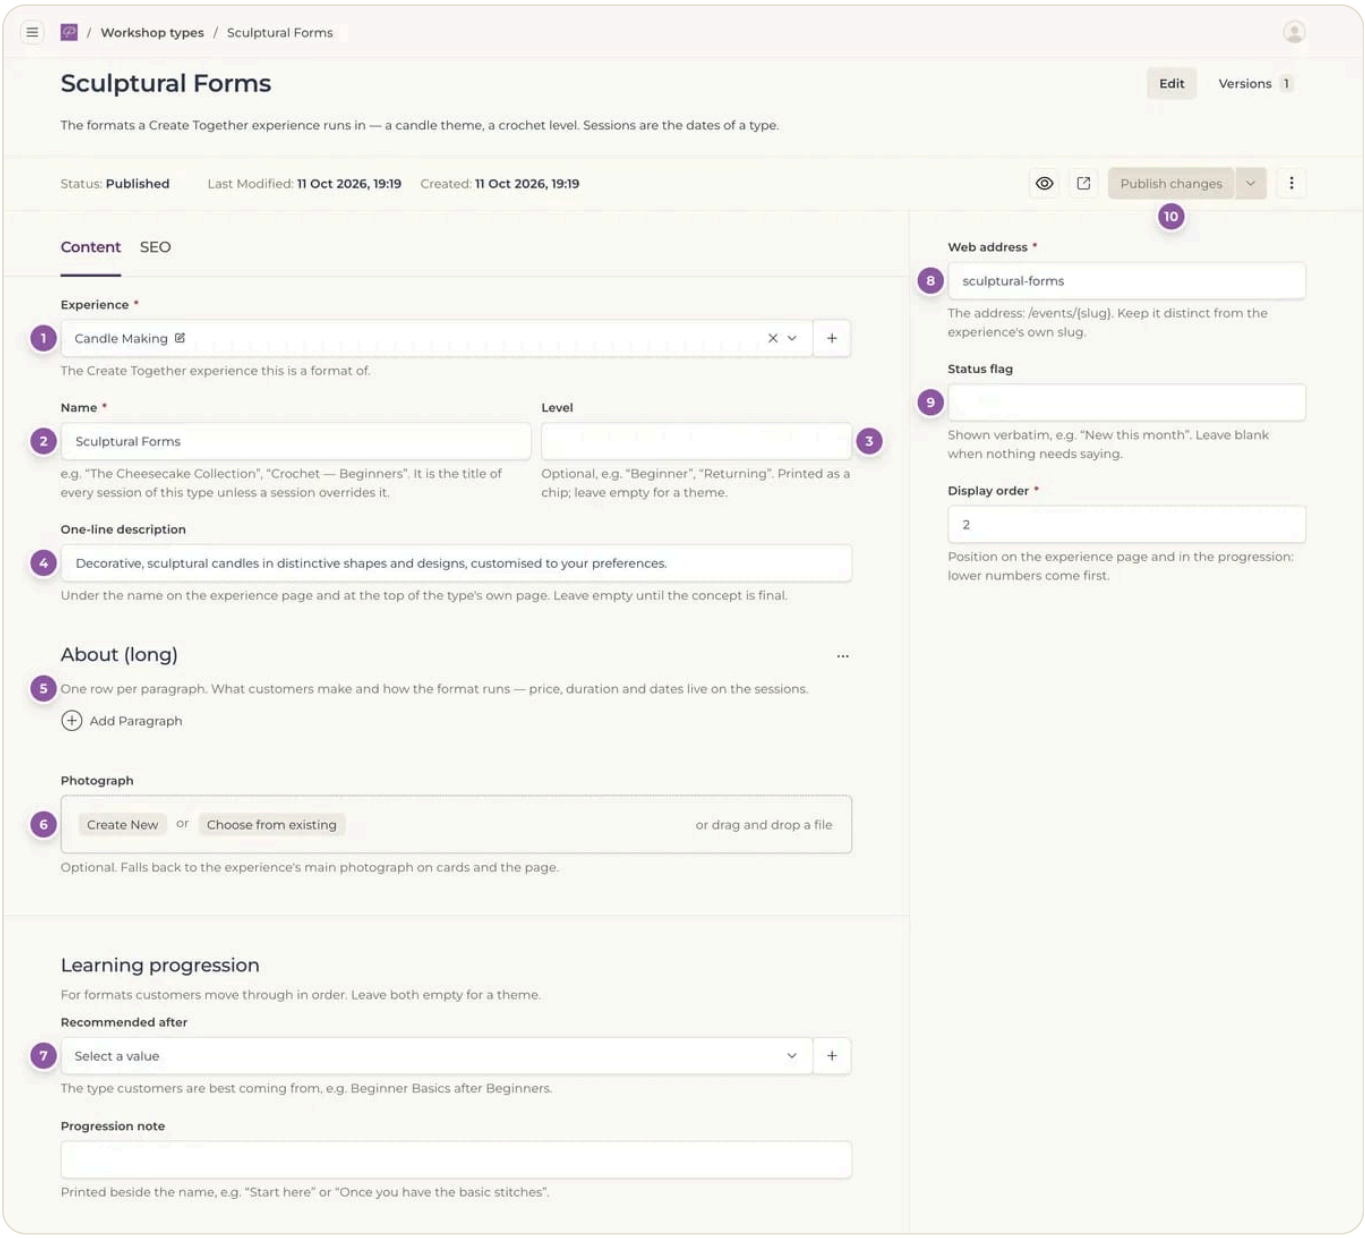

1. Create New — add a theme or level
2. Click a type to open it
3. The experience it belongs to

Today there are six: **Sculptural Forms** and **The Cheesecake Collection** (Candle Making), and **Crochet — Beginners**, **Beginner Basics**, **Returning Learners** and **Beginner Project** (Crocheting). Press **Create New** 1 to add one, or click a name 2 to change it.

What a workshop type holds

- **Experience** 1: the class it belongs to. Required; only booked (Create Together) experiences are offered.
- **Name** 2: up to 40 characters. It becomes the title of every session of this type, unless a session has its own.
- **Level** 3: a small chip such as *Beginner* or *Returning*. Leave it empty for a theme.
- **One-line description** 4 and **About** 5, one box per paragraph: what customers make and how the session runs. Price, length and dates stay on the sessions.
- **Photograph** 6: optional. Without one, the experience's photo is used.
- **Learning progression** 7: for levels taken in order. *Recommended after* picks the type that comes before (Beginner Basics after Beginners), and *Progression note* prints beside the name, such as “Start here”. Leave both empty for a theme.

- **Web address** 8: `/events/…`. It must differ from every experience and session address; if it clashes, the admin refuses and suggests one, such as `sculptural-forms-theme`.
- **Status flag** 9: a few words shown as they are, such as “New this month”. **Display order**: its place on the experience page.
- Press **Publish changes** 10. Workshop types have drafts, Schedule Publish, versions and an **SEO** tab, just like pages.

A workshop type: which experience it belongs to, its name and level, its words and photo, and (for levels) what comes before it.

1. Experience — the Create Together class it belongs to
2. Name — the title of every session of this type
3. Level — a chip such as Beginner; empty for a theme
4. One-line description
5. About — one box per paragraph
6. Photograph (optional — else the experience's)
7. Learning progression — for levels taken in order
8. Web address — /events/…
9. Status flag, e.g. New this month
10. Publish changes

Add next month's candle theme

Admin · Editor

1. Content › Workshop types › Create New.
2. **Experience**: choose Candle Making.
3. Name the theme, for example *Winter Botanicals*.
4. Write the one line and the About paragraphs.
5. Add a photograph of the finished candles.
6. Press Publish changes (or Schedule Publish for the first of the month).
7. Now the dates: Content › Sessions › Create New.
8. Choose **Candle Making**, then the new **Workshop type**.
9. Set the date, price and seats, then Publish changes. For more dates, see Add a session (p. 59) and Repeat weekly (p. 65).

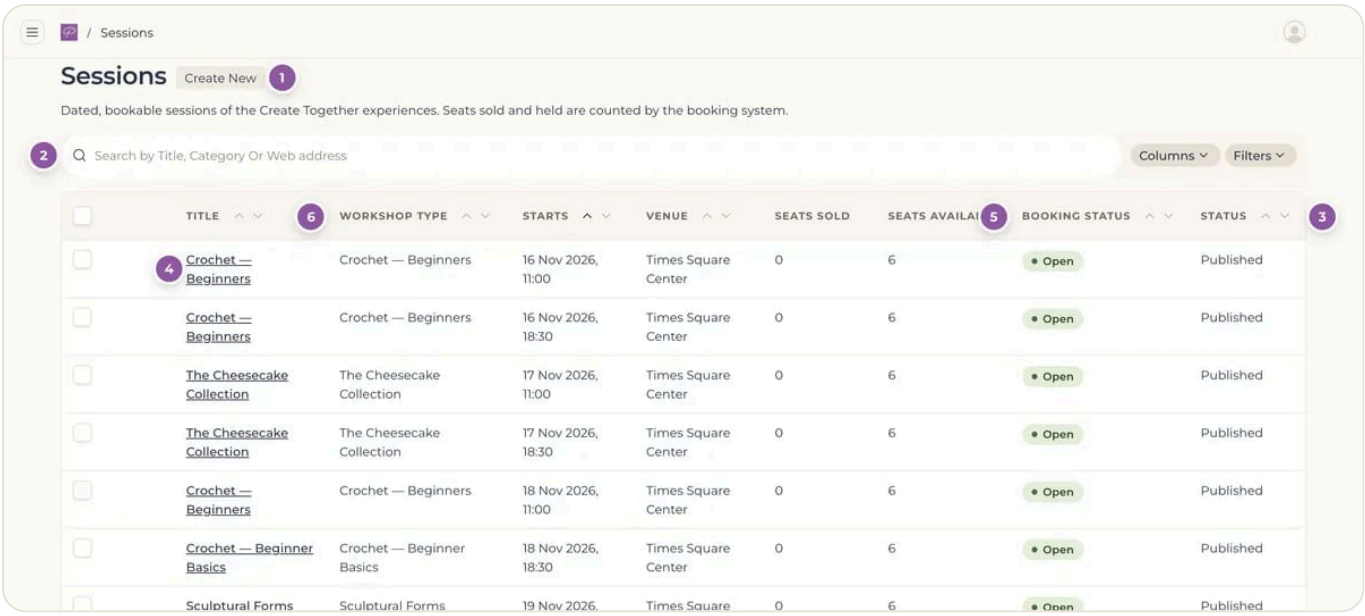

> **TIP**
> Retiring a theme? Unpublish it from the ⋮ menu. A type can't be deleted while sessions belong to it, and that is a good thing: past bookings keep their history.

> **CAREFUL**
> Create New on Workshop types saves an empty draft straight away. If you leave without filling it in, delete the empty row (shown as *<No Name>*) from the list.

All your sessions

Content › Sessions Admin · Editor

1. Create New 1 adds a session.
2. Search and filter 2 to find a date. The **Workshop type** column 6 shows the theme or level of each date.
3. **Status** 3: **Draft** is not on the website, **Published** is. “Draft (has published version)” means it is live, with unpublished changes waiting.
4. **Booking status** 5: Open, Waitlist, Closed or Cancelled. This says whether it can be booked.
5. Click a session 4 to open it.

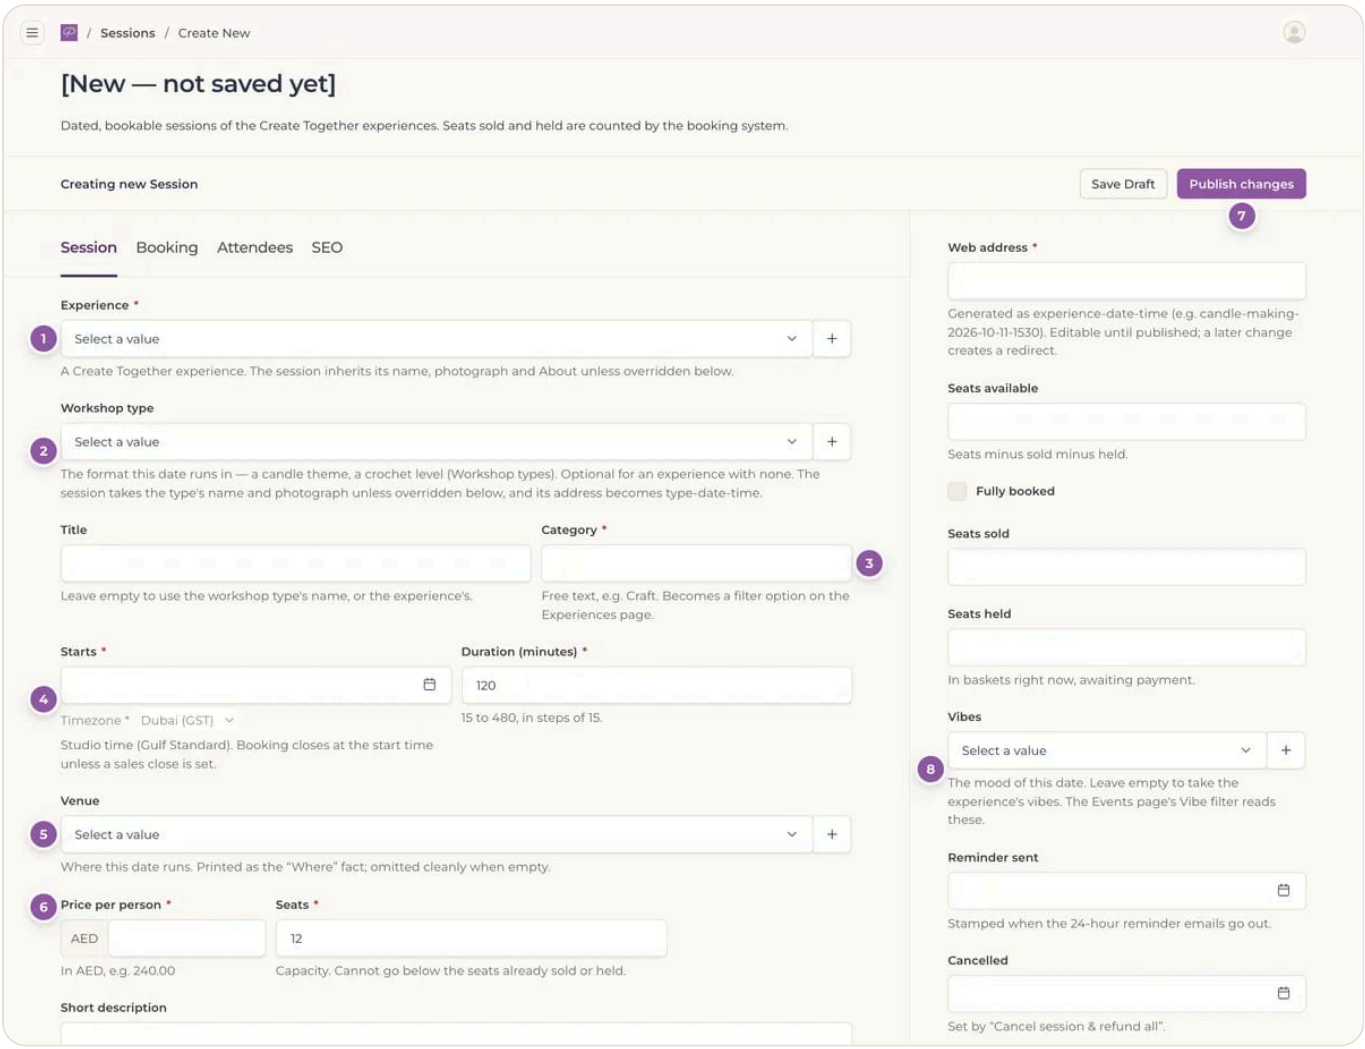

Content → Sessions lists every dated class with its workshop type, start, venue and seats. Status says whether it is on the website (Draft or Published); Booking status says whether it can be booked.

1. Create New — add a session
2. Search and filters
3. Status — Draft or Published (on the website or not)
4. Click a session to open it
5. Booking status — Open, Waitlist, Closed or Cancelled: whether it can be booked
6. Workshop type — the theme or level this date belongs to

Add a session

1. Choose which experience this is a date of 1.
2. Choose its **Workshop type** 2. Only that experience's types are offered; leave it empty for an experience with none. The session then takes the type's name and photo, and its web address becomes type-date-time, such as `sculptural-forms-2026-12-05-1830`.
3. Leave **Title** empty to use the type's name. Type **Craft** in **Category** 3: it is required, and only shows as a small label on the homepage.
4. Pick the date and start time 4, in Dubai time.
5. Choose where it runs 5.
6. Set the price per person and number of seats 6.
7. Optional: choose this date's **Vibes** 8 in the right-hand column. Leave it empty to use the experience's vibes.
8. Press **Publish changes** 7 to put it on sale, or **Save Draft** to finish later.

A new session: choose the experience and its workshop type, type Craft as the category, then the date and time (Dubai time), the venue, the price and the number of seats. Publish changes puts it on sale; Save Draft keeps it for later.

1. Which experience this is a date of
2. Workshop type — the theme or level (only this experience's types)
3. Category — required; type Craft (a small label)
4. Date and start time (Dubai time)
5. Where it runs
6. Price per person and number of seats
7. Publish changes puts it on sale (Save Draft finishes later)
8. Vibes — the mood of this date (optional)

TIP

For a regular weekly class, set up one session perfectly, then use Repeat weekly (p. 65). It saves a lot of typing.

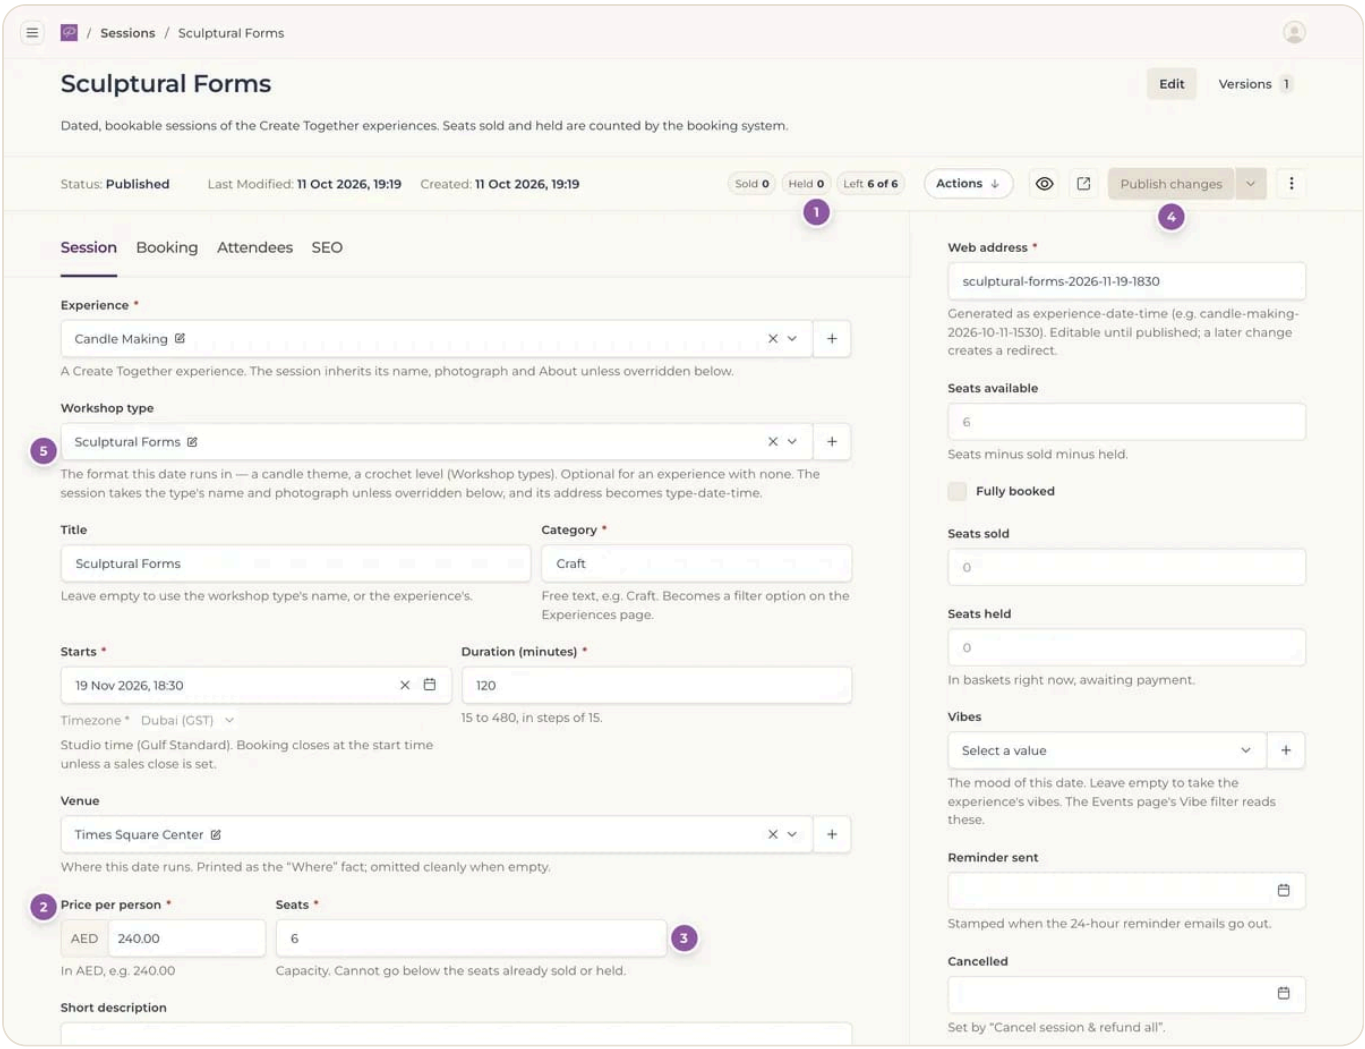

GOOD TO KNOW

The hint under Category still says it “becomes a filter option on the Experiences page”. It no longer does: the Events page filters by date, event, theme (workshop type), vibe and venue. Category is only a small label on the homepage's session cards, shown when it differs from the title.

Picking a workshop type from another experience is refused: “This workshop type belongs to a different experience…”. Choose the experience first.

Change the price or number of seats

1. Open the session. The live counts at the top 1 show seats sold, held (someone is paying right now) and left.
2. Change the price per person 2. Prices include VAT.
3. Change the total seats 3. It can't go below what is already sold.
4. Press **Publish changes** 4.

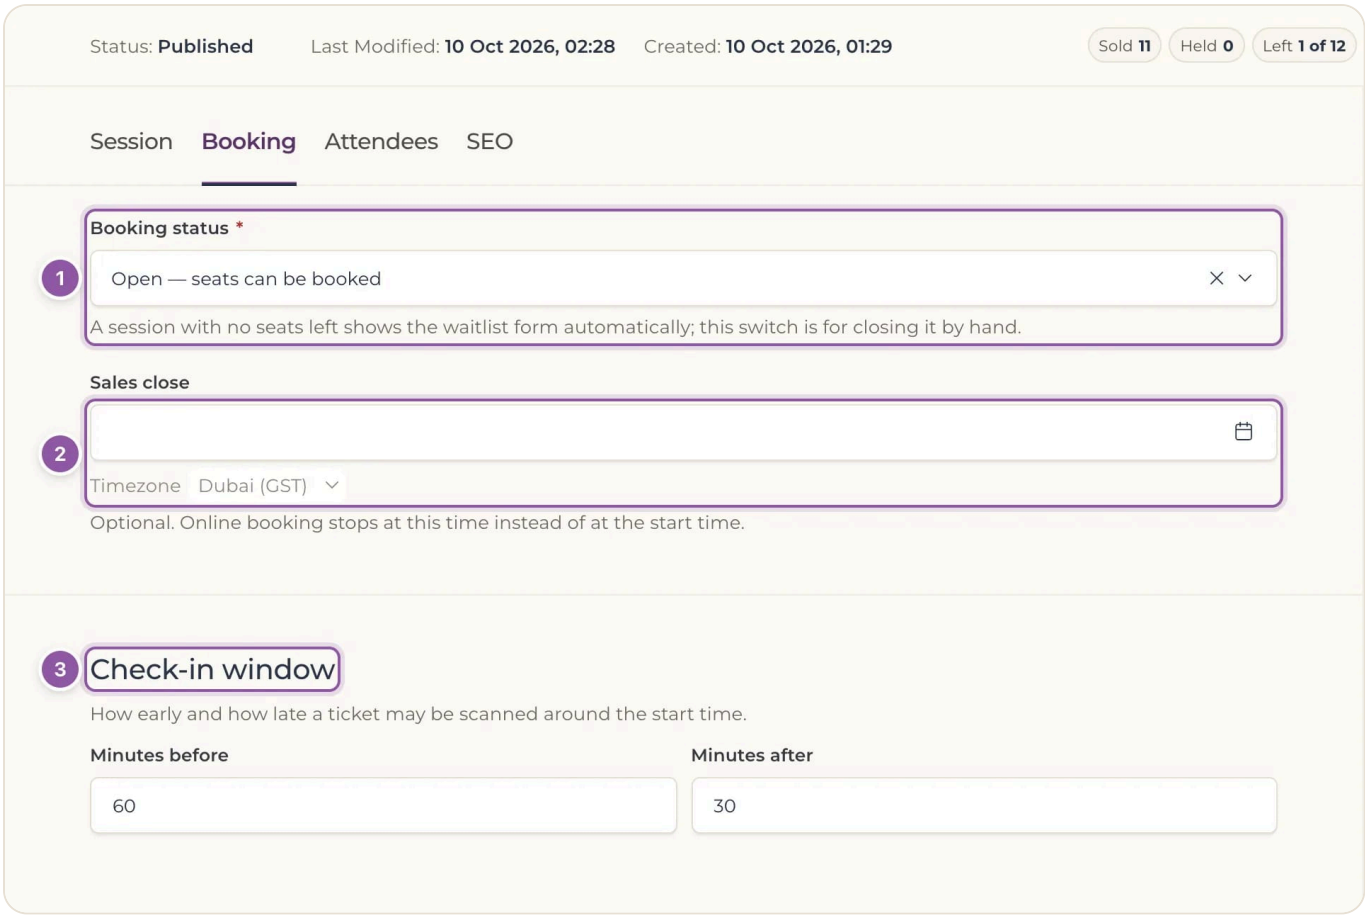

A Sculptural Forms session. To change the price or the number of seats, change the numbers and press Publish changes. Seats can never go below what is already sold. The workshop type gives the session its name and photo.

1. Sold / Held / Left — live seat counts
2. Price per person (AED, VAT included)
3. Seats — the total for this date
4. Publish changes
5. Workshop type — gives the session its name and photo

> ⚠ **GOOD TO KNOW**
>
> A new price applies to new bookings only. People who already booked keep the price they paid.

Open, close or waitlist a session

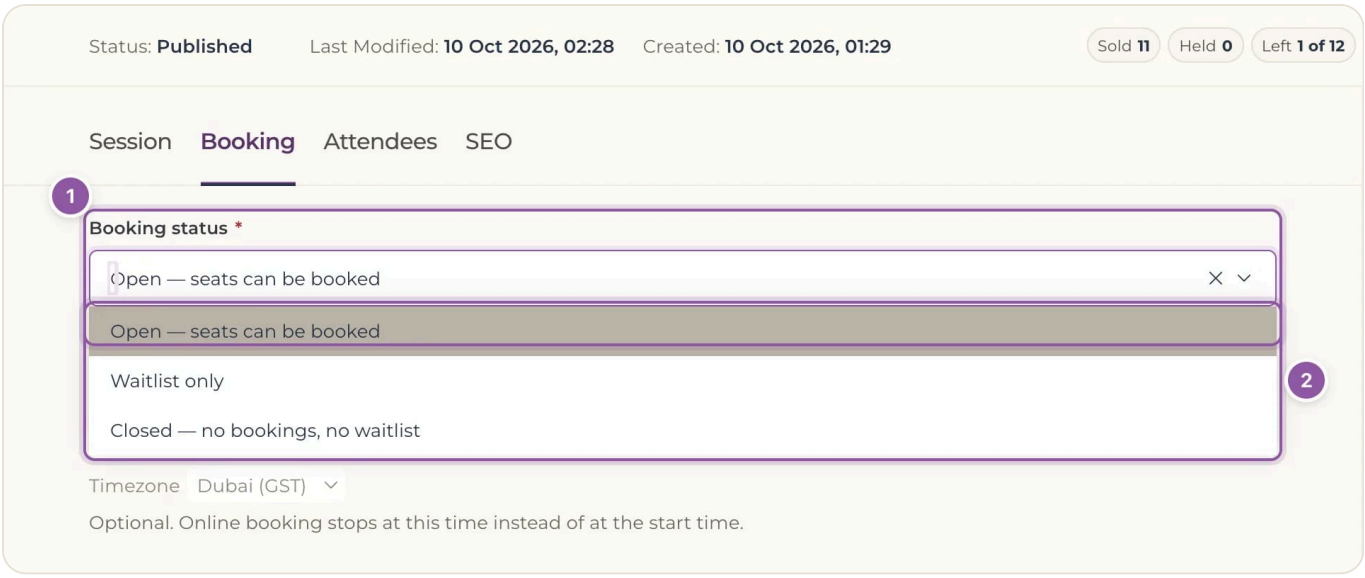

On the session's **Booking** tab, **Booking status** 1 switches online sales on or off for this date. **Sales close** 2 stops online booking earlier than the start time, for example two hours before. The **Check-in window** 3 sets how early and late tickets will scan.

Booking tab: Booking status switches online sales on or off for this date. Sales close stops online booking at an earlier time than the start.

1. Booking status
2. Sales close — optional earlier cut-off (Dubai time)
3. Check-in window — how early and late tickets scan

1. To close sales by hand, open **Booking status** 1.
2. Pick **Closed — no bookings, no waitlist** or **Waitlist only** 2. **Open — seats can be booked** puts it back on sale.
3. Press **Publish changes**.

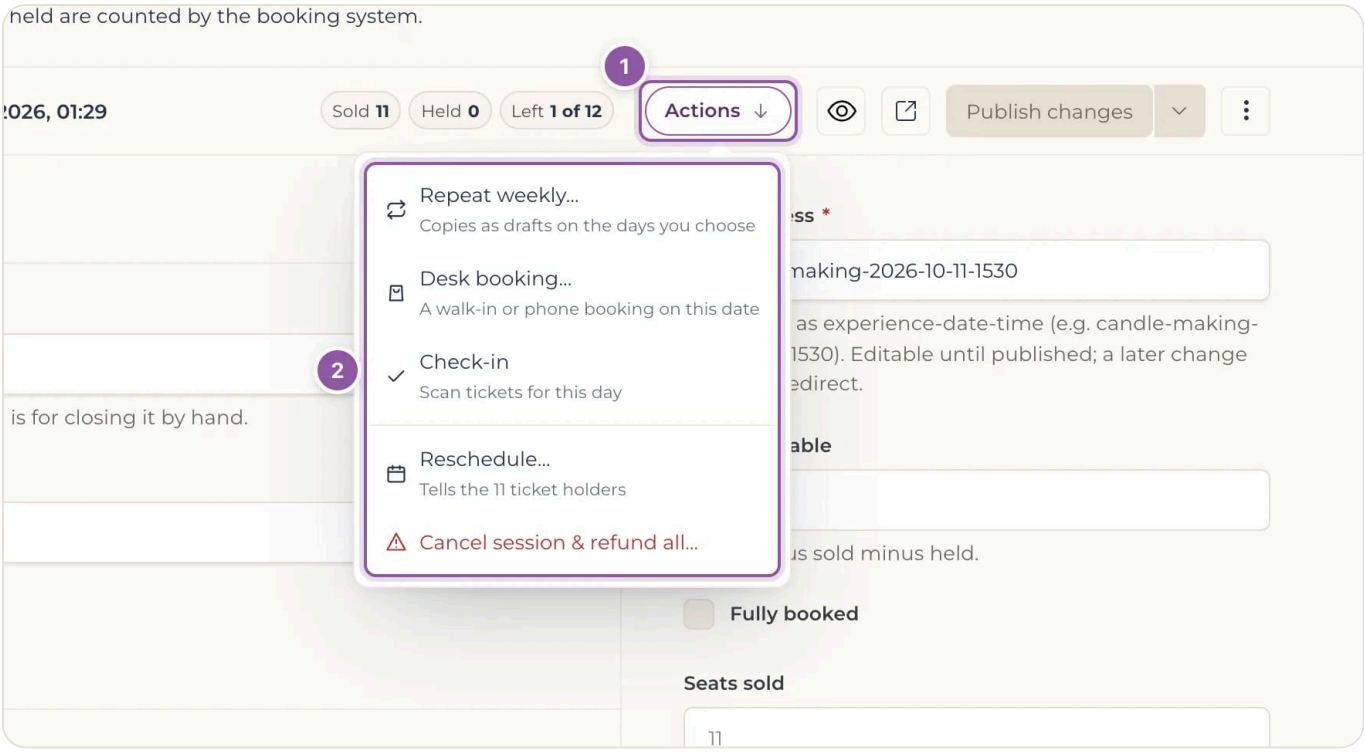

To close sales by hand, pick “Closed — no bookings, no waitlist” or “Waitlist only”, then Publish changes. “Open — seats can be booked” puts it back on sale. A full session switches to the waitlist by itself.

1 Booking status — Open, Waitlist only or Closed 2 Choose one of these

> **TIP**
> A full session switches to the waitlist by itself. You don't need to do anything.

The Actions menu

Bigger jobs live under **Actions** 1 on a session 2: repeat it weekly, take a desk booking, open check-in, reschedule, or cancel and refund everyone.

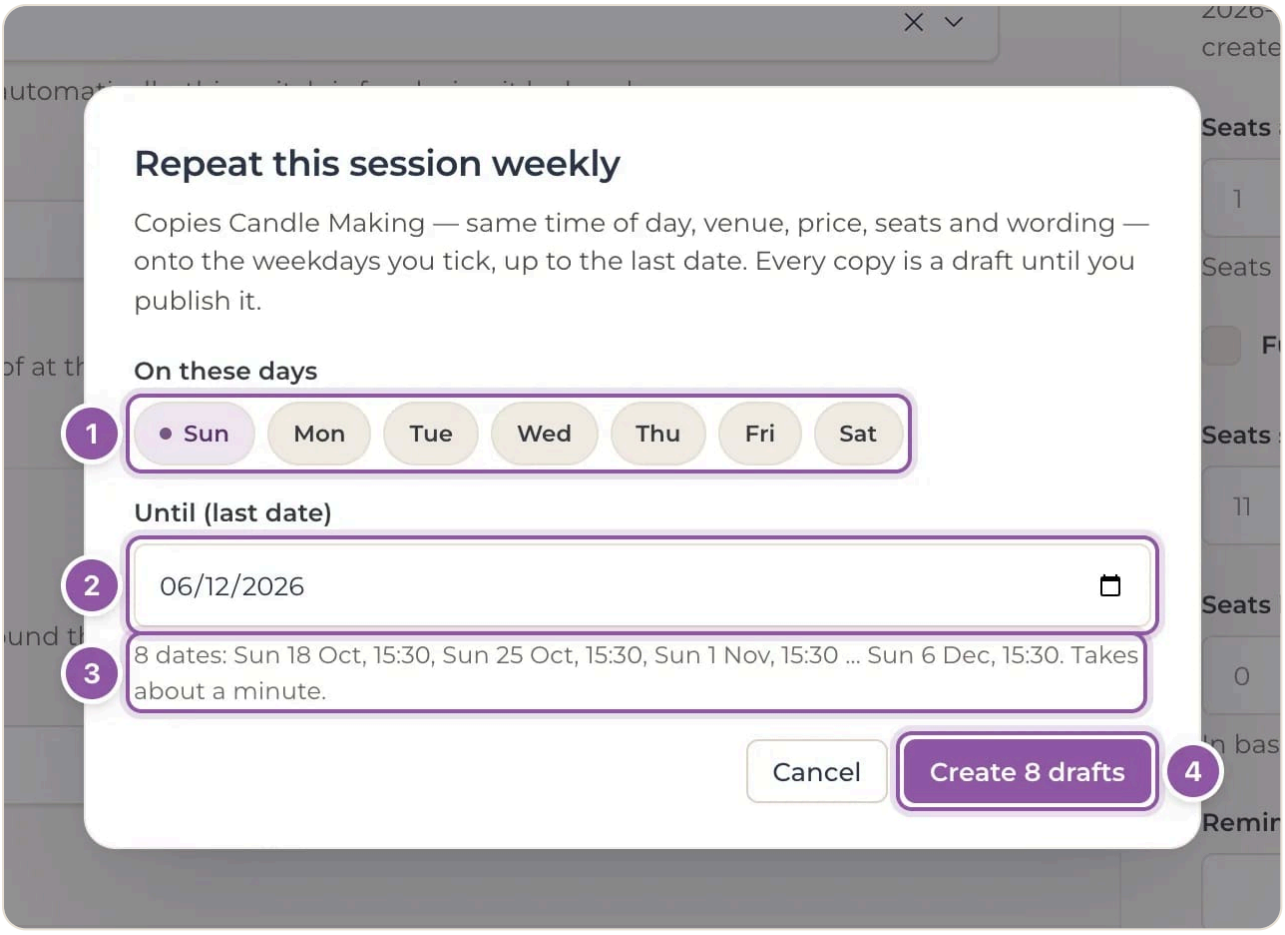

The Actions button on a session holds the bigger jobs: repeat it weekly, take a desk booking, reschedule, or cancel and refund everyone.

1. Actions
2. Repeat weekly · Desk booking · Check-in · Reschedule · Cancel & refund all

Repeat a session weekly

Admin · Editor

1. Open a session you are happy with. **Actions** › **Repeat weekly…**.
2. Tick the weekdays 1 and choose the last date 2.
3. Check the list of dates it will create 3.
4. Press the button to create them 4. The copies are **drafts**.
5. Open each copy, set its **Workshop type** (and **Vibes**, if the original had them), then **Publish changes**.

Repeat weekly… makes copies of this session on the same weekday and time for as many weeks as you choose. The copies are drafts — publish the ones you want.

1. Tick the weekdays
2. Until — the last date
3. The dates it will create
4. Create the drafts

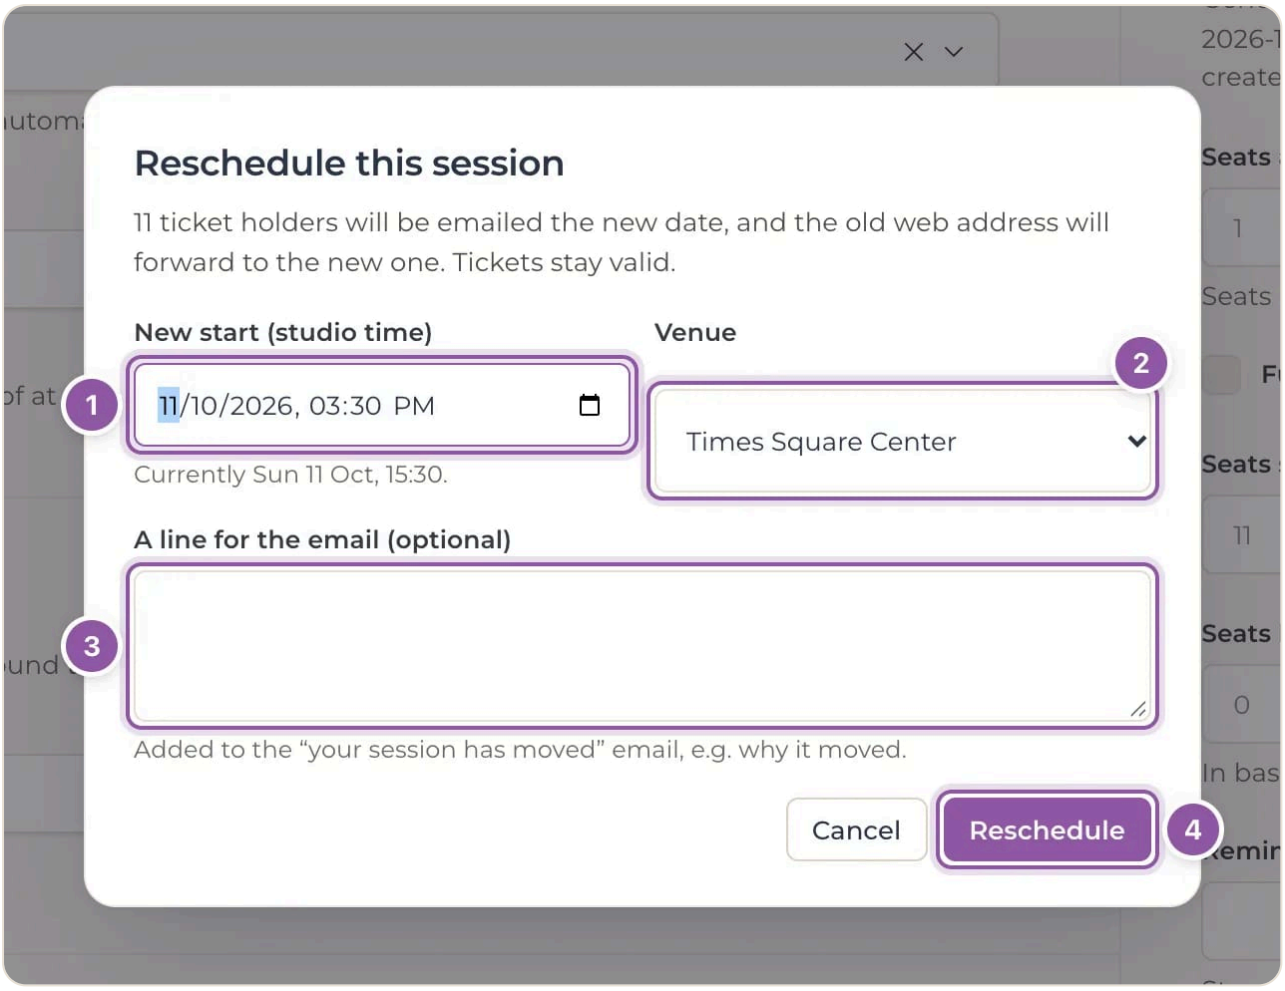

> ⚠ **CAREFUL**
>
> Repeat weekly doesn't copy the **Workshop type** or the **Vibes** yet. A copy left as it is becomes a plain Candle Making date: it doesn't show on the theme's page or under the Theme filter. Set the workshop type on every copy before you publish it. (Nexeor has been told.)

Reschedule a session

Admin only

Once seats are sold, the date can only be changed this way, so that everyone holding a ticket hears about it.

1. Actions › Reschedule….
2. Choose the new date and time 1, and the venue 2 if it moves too.
3. Add an optional line for the email 3, such as “Sorry for the change — see you there!”
4. Press the button 4. Every ticket holder is emailed the new date.

Reschedule… moves the session to a new date and time and emails everyone holding a ticket. (Once seats are sold the date can only be changed this way.)

1. The new date and time
2. Venue (change it if it moves)
3. Optional line for the email to customers
4. Reschedule and email the ticket holders

NEVER DO THIS

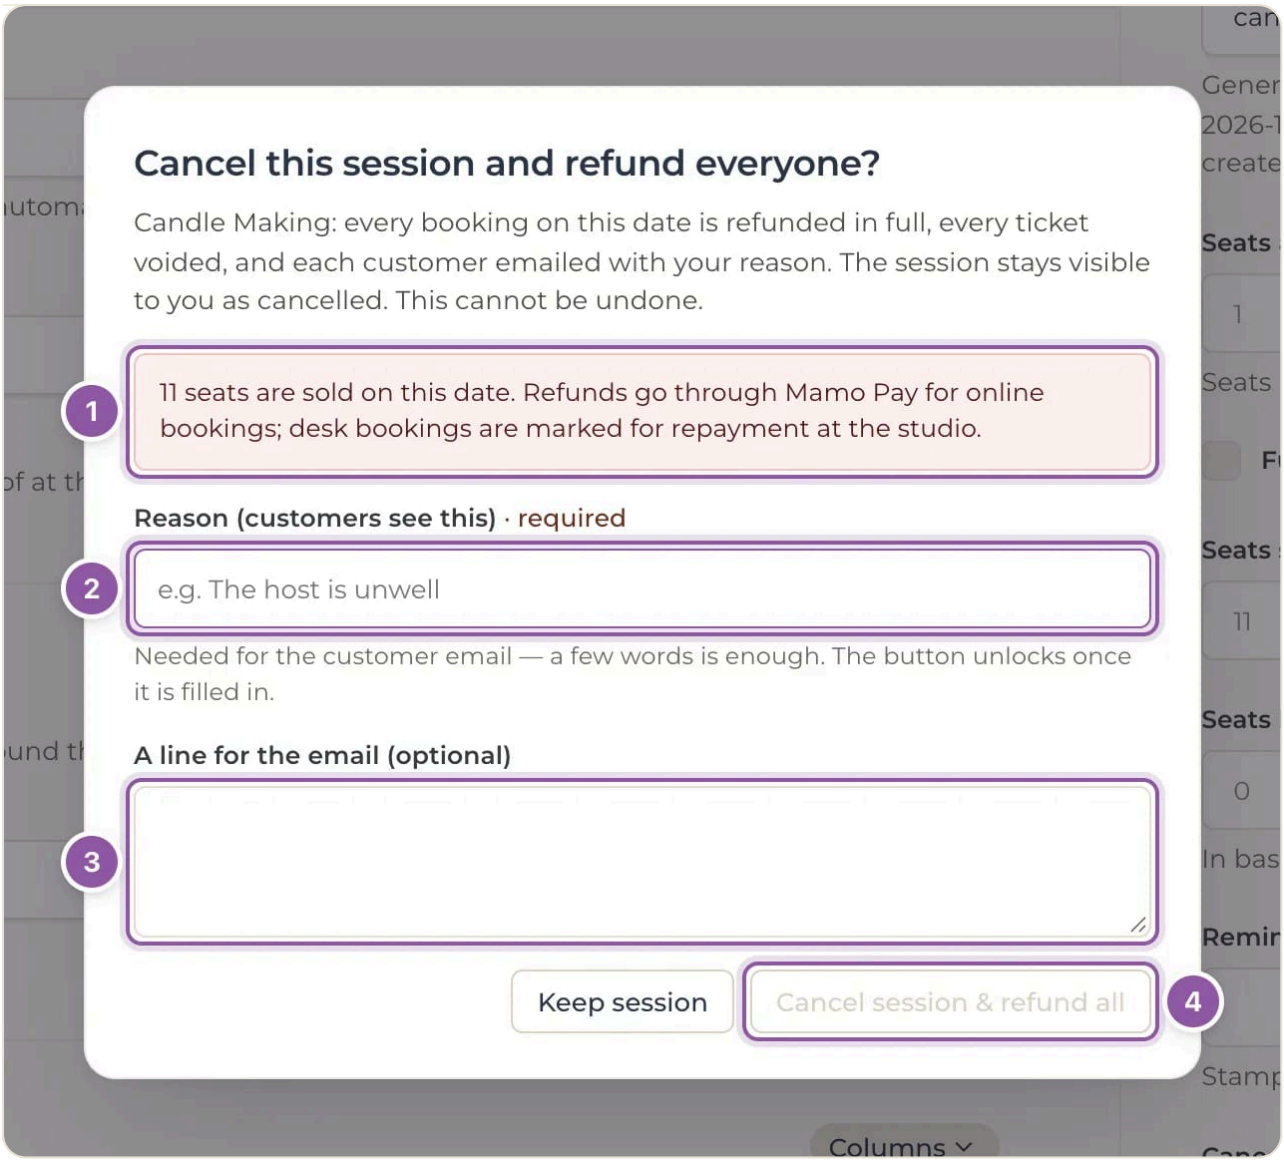

Never tell customers about a new date only by phone or WhatsApp. Use Reschedule, so their tickets, reminders and the website all show the right time.

Cancel a session and refund everyone

Admin only

This takes the session off sale, refunds every paid booking through Mamo Pay, and emails each customer. You see exactly who is affected before you confirm.

1. **Actions** › **Cancel session & refund all…**. Check how many seats are affected 1.
2. Write the reason 2. It is required, and customers see it.
3. Add an optional extra line for the email 3.
4. Press **Cancel session & refund all** 4. It unlocks once the reason is filled in.

Cancel session & refund all… takes the session off sale, refunds every paid booking through Mamo Pay and emails each customer. You are shown exactly who is affected before you confirm.

1. How many seats are affected
2. Reason — required; customers see it
3. Optional extra line for the email
4. Cancel session & refund all — unlocks once the reason is filled in

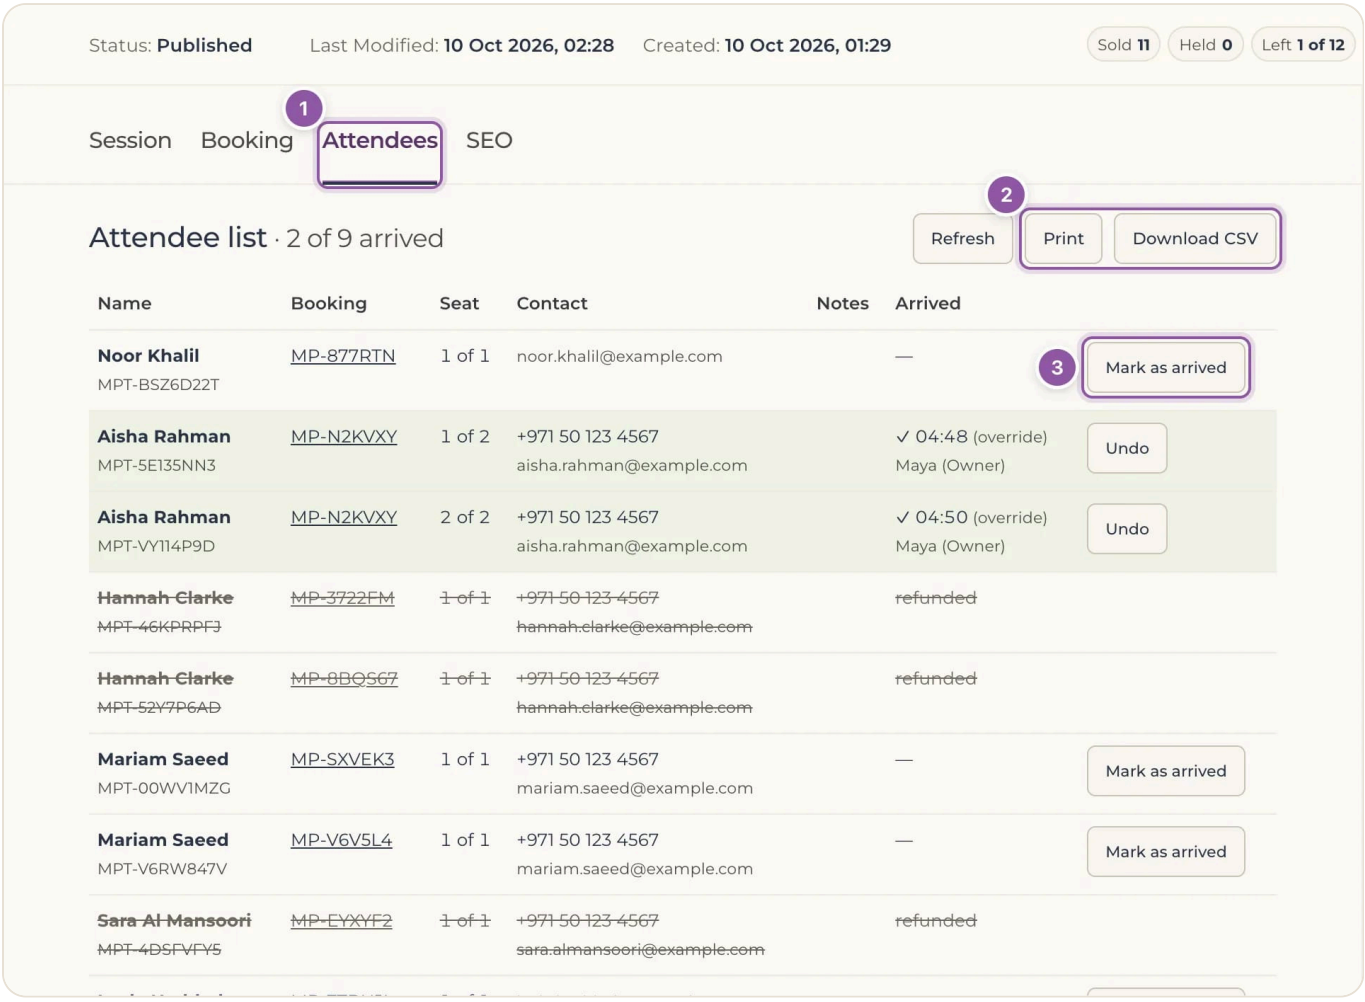

> ⚠ **GOOD TO KNOW**
> This can't be undone. Refunds go back to customers' cards straight away. People who paid at the desk are listed for you to repay in person.

The attendee list

Admin · Front desk

1. Open the session's **Attendees** tab 1 and press **Show attendee list**.
2. **Print** it or download it as a spreadsheet 2.

3 Press **Mark as arrived** ③ as each guest comes in, if you are not scanning.

Attendees tab → Show attendee list: everyone booked on this date, with Print and CSV buttons and a Mark as arrived button on each line.

1. Attendees tab
2. Print or download the list
3. Mark as arrived — press it as each guest comes in

The waitlist

Bookings › Waitlist Admin · Front desk

When a session is full (or set to **Waitlist only**), the website offers a “join the waitlist” form instead of Book. If seats free up, for example after a refund, the people waiting are emailed in the order they joined. Seats aren't reserved for them: the first to book gets the seat, and the email says so.

A WAITLIST ENTRY'S JOURNEY

• **Waiting** → • **Notified — seat offered** → • **Converted — booked**

Or: • **Expired — did not book in time** after 24 hours, and the next person is offered the seat.
• **Cancelled** if the session is cancelled.

TIP

Someone rings to join the waitlist? Front desk can add them directly in **Bookings › Waitlist**.

CHAPTER 06

Private events, venues, FAQs, policies, passes

These all work like experiences: open, change, publish. Here is what each one is for.

IN 30 SECONDS

- **Programmes** are your private-event offers: birthdays, corporate, schools and more.
- **Venues** are the places sessions happen; a map pin gives each one a map in the Maison's colours. **FAQs** fill the FAQ page.
- **Policies** are your terms and privacy pages. Tick where each should appear.
- **Passes** are multi-session bundles. **Testimonials** only appear with written permission.

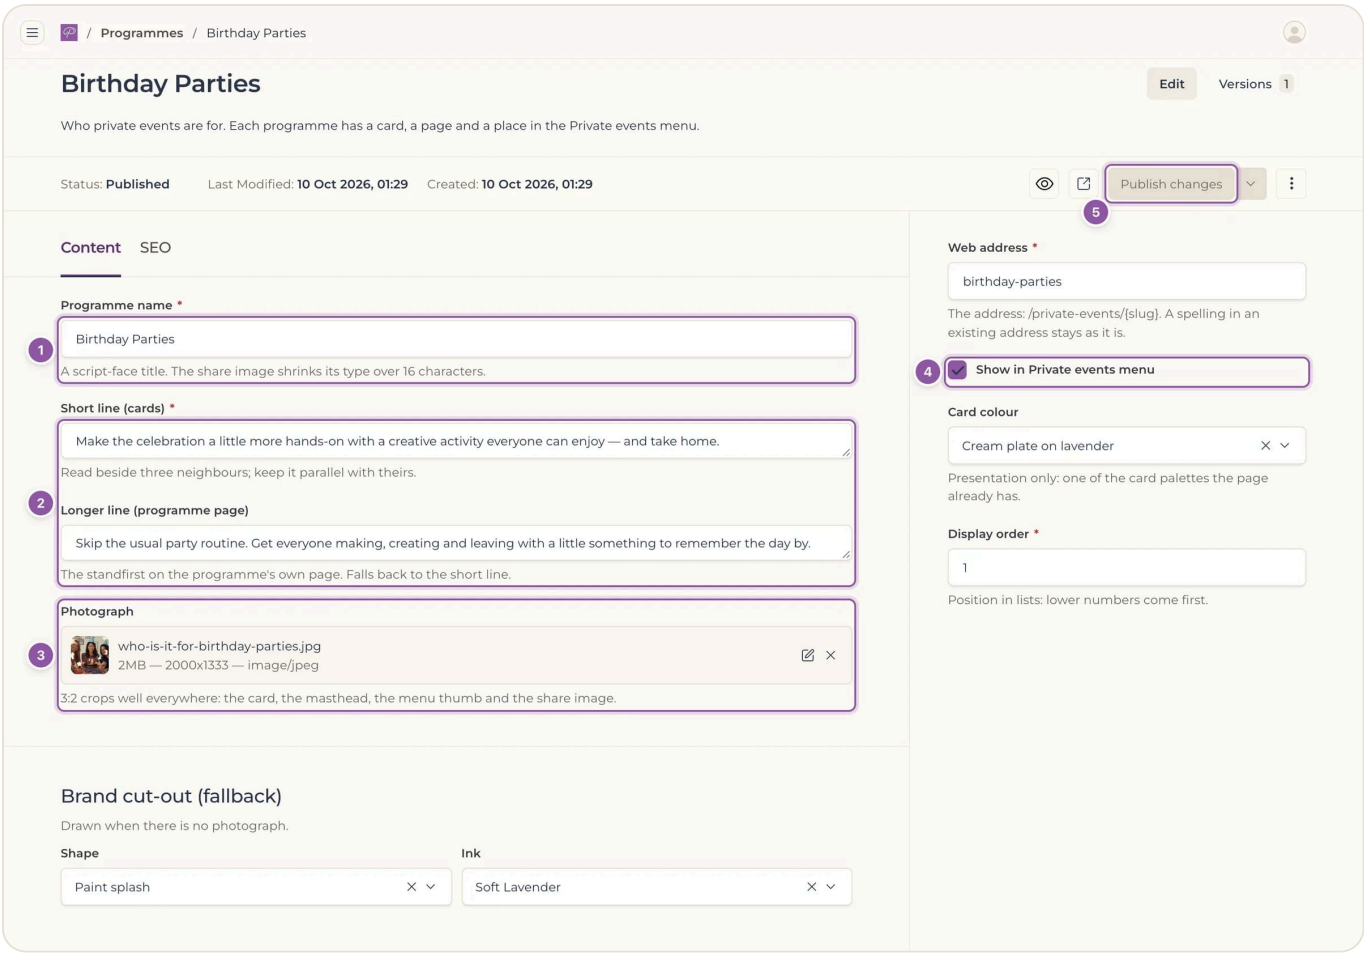

IN THIS CHAPTER

Programmes (private events) 71
FAQs 73
Passes 76
Other things in the menu 78
Venues 72
Policies 75
Testimonials 77

Programmes (private events)

Content › Programmes Admin · Editor

1. Name the programme 1.
2. Write the short line for cards and the longer line for its own page 2.
3. Choose a photograph 3 and whether it shows in the Private events menu 4.
4. Publish changes 5.

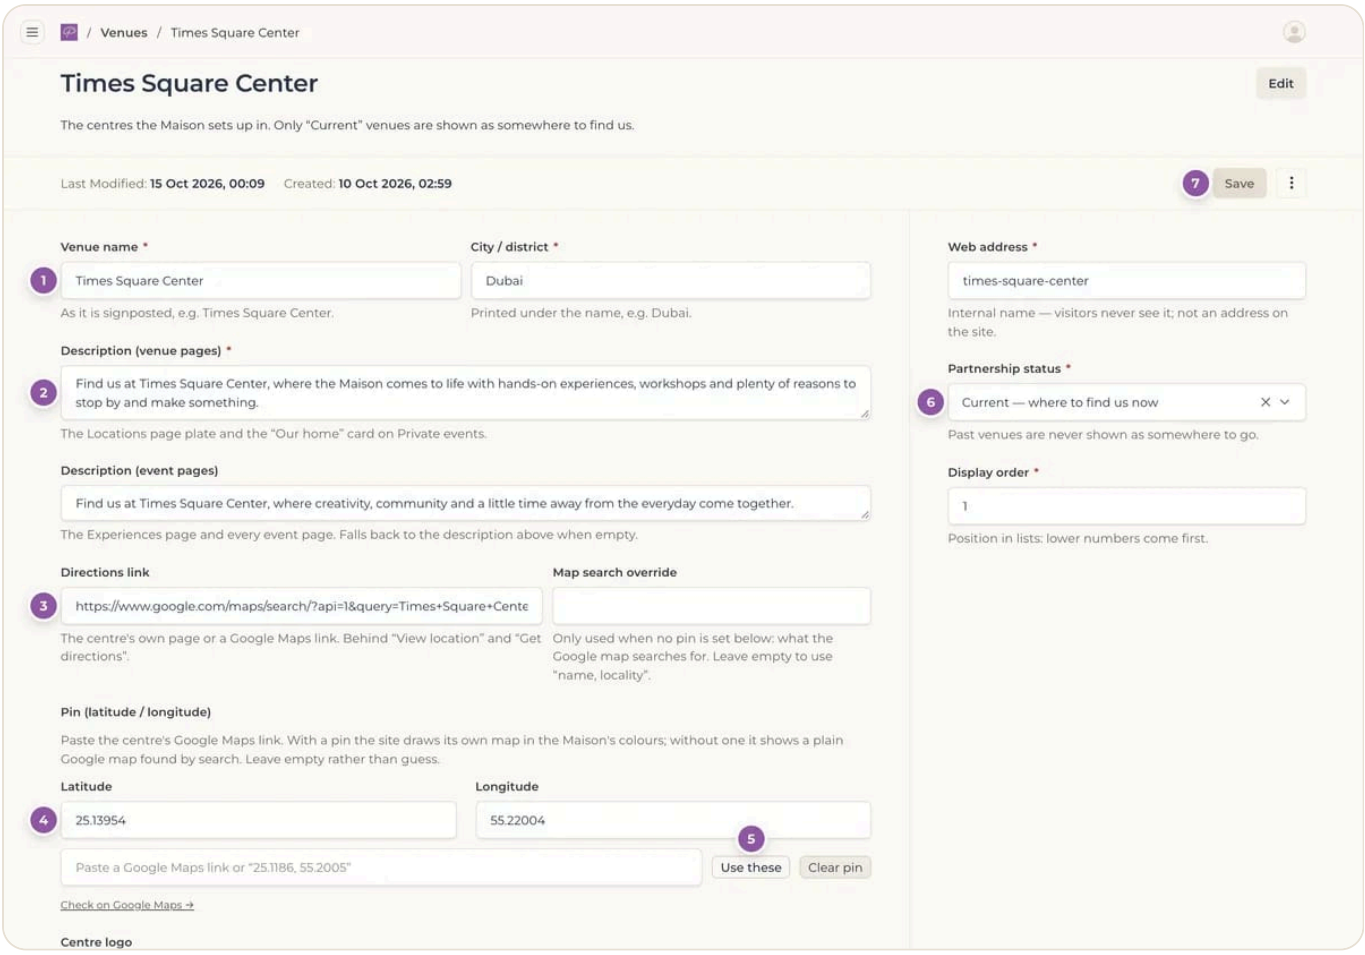

Content → Programmes: birthday parties, corporate events, schools and more — each with a short card line, a longer line and a photograph.

1. Programme name
2. Short line (cards) and longer line (its page)
3. Photograph
4. Show in the Private events menu
5. Publish changes

Venues

Content › Venues Admin · Editor

1. The venue name and area 1 print on session pages.
2. Descriptions 2 appear on the venue and event pages.
3. The directions link 3 opens maps on the customer's phone. Paste a Google Maps link.
4. Set the **Pin** 4 so the site draws its own map in the Maison's colours: paste the centre's Google Maps link into the box under Latitude and Longitude, and press **Use these** 5. Check it with **Check on Google Maps →**. **Clear pin** removes it.
5. Partnership status 6: current or past. Then **Save** 7.

Content → Venues: where sessions take place. The name and area print on session pages; the directions link opens maps on the customer's phone; the pin draws the site's own map.

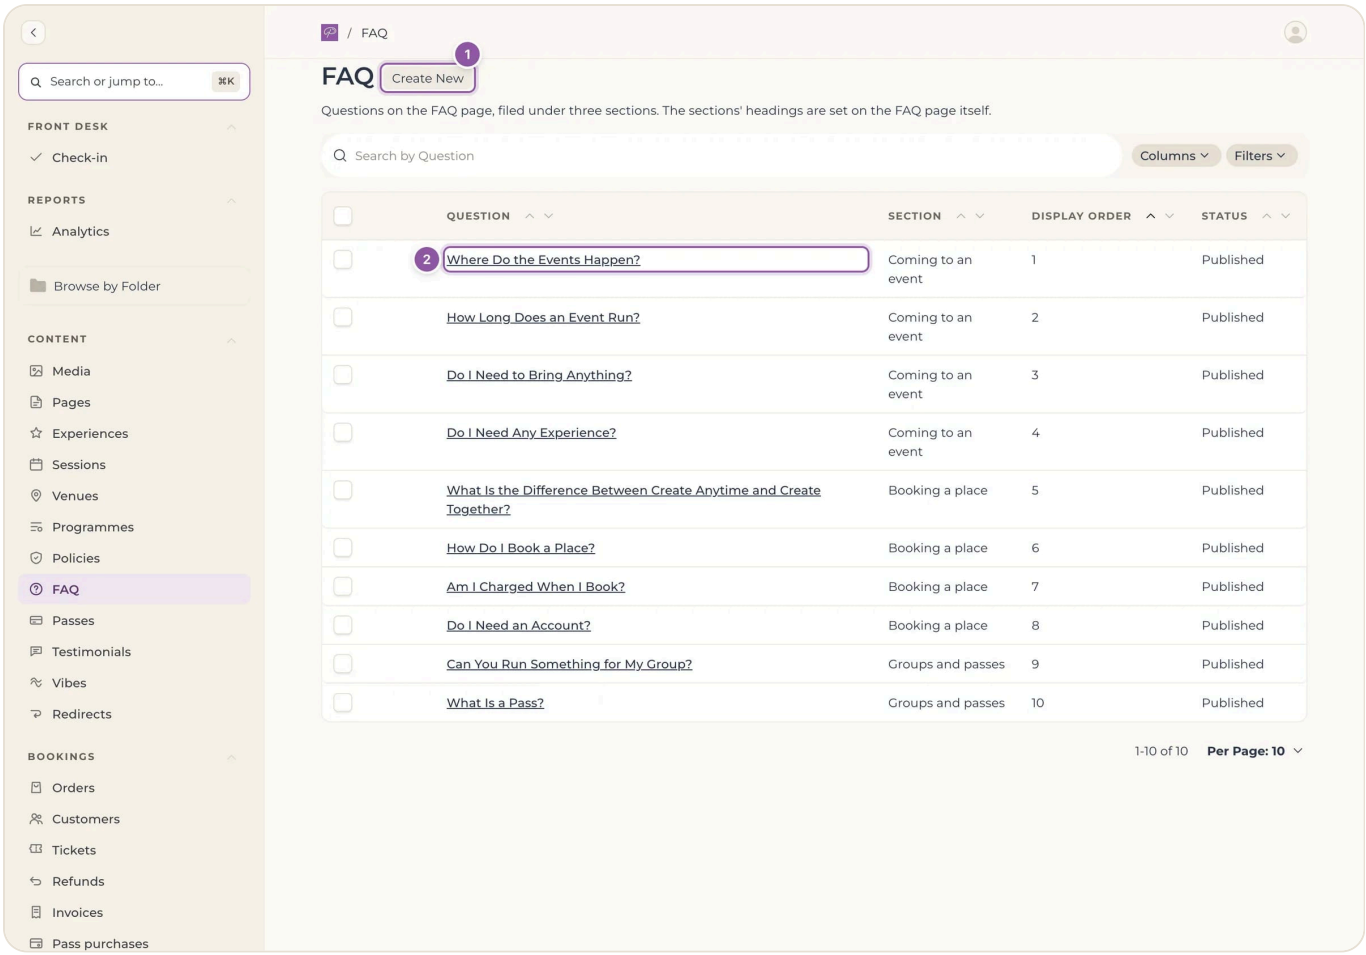

1. Venue name and city / district
2. Descriptions for the venue and event pages
3. Directions link
4. Pin — paste the Google Maps link in the box under it
5. Use these · Clear pin · Check on Google Maps →
6. Partnership status — current or past
7. Save

> **GOOD TO KNOW**
> With a pin, the site draws its own map in the Maison's colours. Without one it shows a plain Google map found by searching the name. **Map search override** is only used when there is no pin. Times Square Center already has its pin.

FAQs

Content › FAQ Admin · Editor

1 **Create New** 1 adds a question. Click a question 2 to edit it.

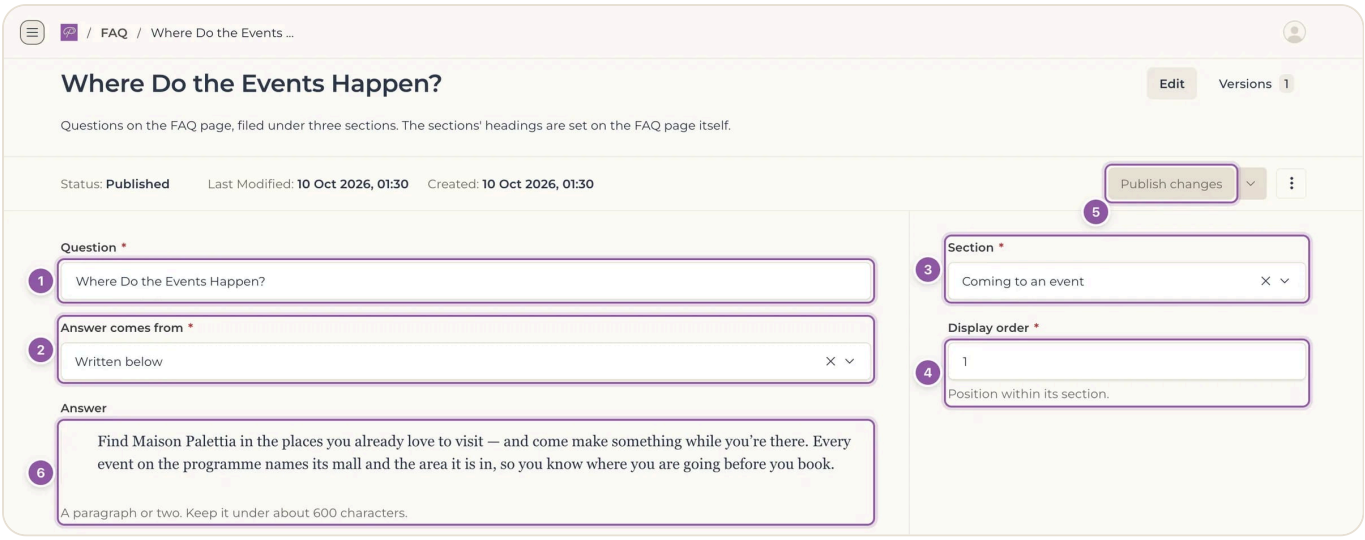

Content → FAQ lists every question. Create New adds one; click a question to edit it.

1 Create New — add a question

2 Click a question to edit it

1. Write the question 1.
2. Choose where the answer comes from 2: written here, or shared wording. Then type the answer 6.
3. Pick its section of the FAQ page 3 and its position 4. Lower numbers come first.
4. **Publish changes** 5.

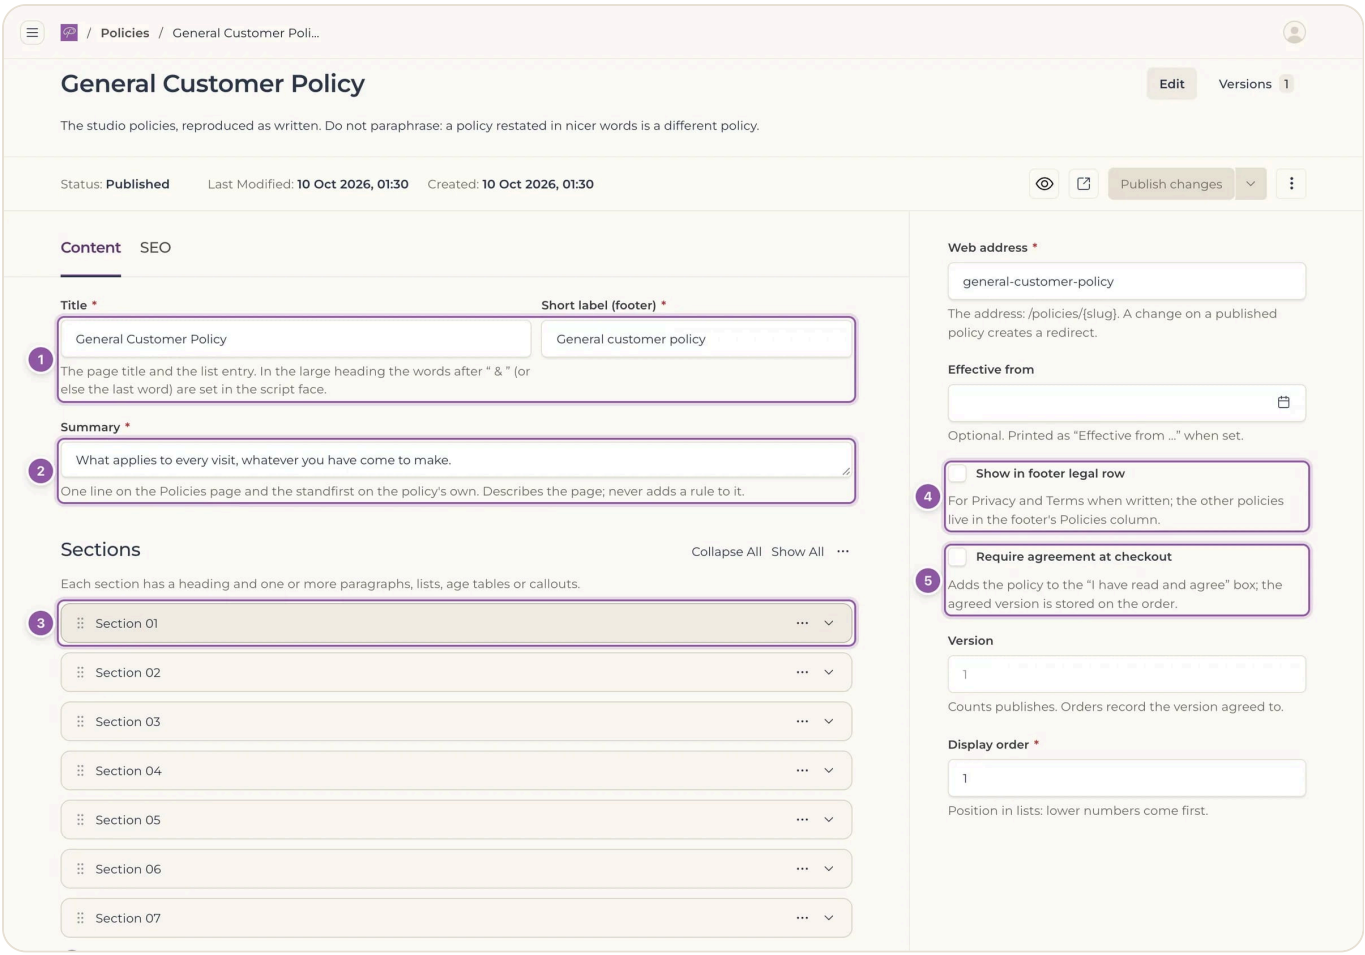

An FAQ: the question, its answer, which section of the FAQ page it sits in, and its position. Publish changes to update the site.

1. The question
2. Where the answer comes from — written here, or shared wording
3. Section of the FAQ page
4. Display order — lower numbers first
5. Publish changes
6. The answer — type it here

Policies

Content › Policies Admin · Editor

1. Each policy has a title and a short label for the footer 1, and a summary 2.
2. Open a section 3 to edit its paragraphs.
3. Tick **Show in footer legal row** 4 for Privacy and Terms.
4. Tick **Require agreement at checkout** 5 if customers must accept it before paying.

Content → Policies: each policy has a title, a short footer label, a summary and sections of paragraphs. The tick boxes on the right decide where it appears.

1. Title and short footer label
2. Summary
3. Sections — open one to edit its paragraphs
4. Show in footer legal row
5. Require agreement at checkout

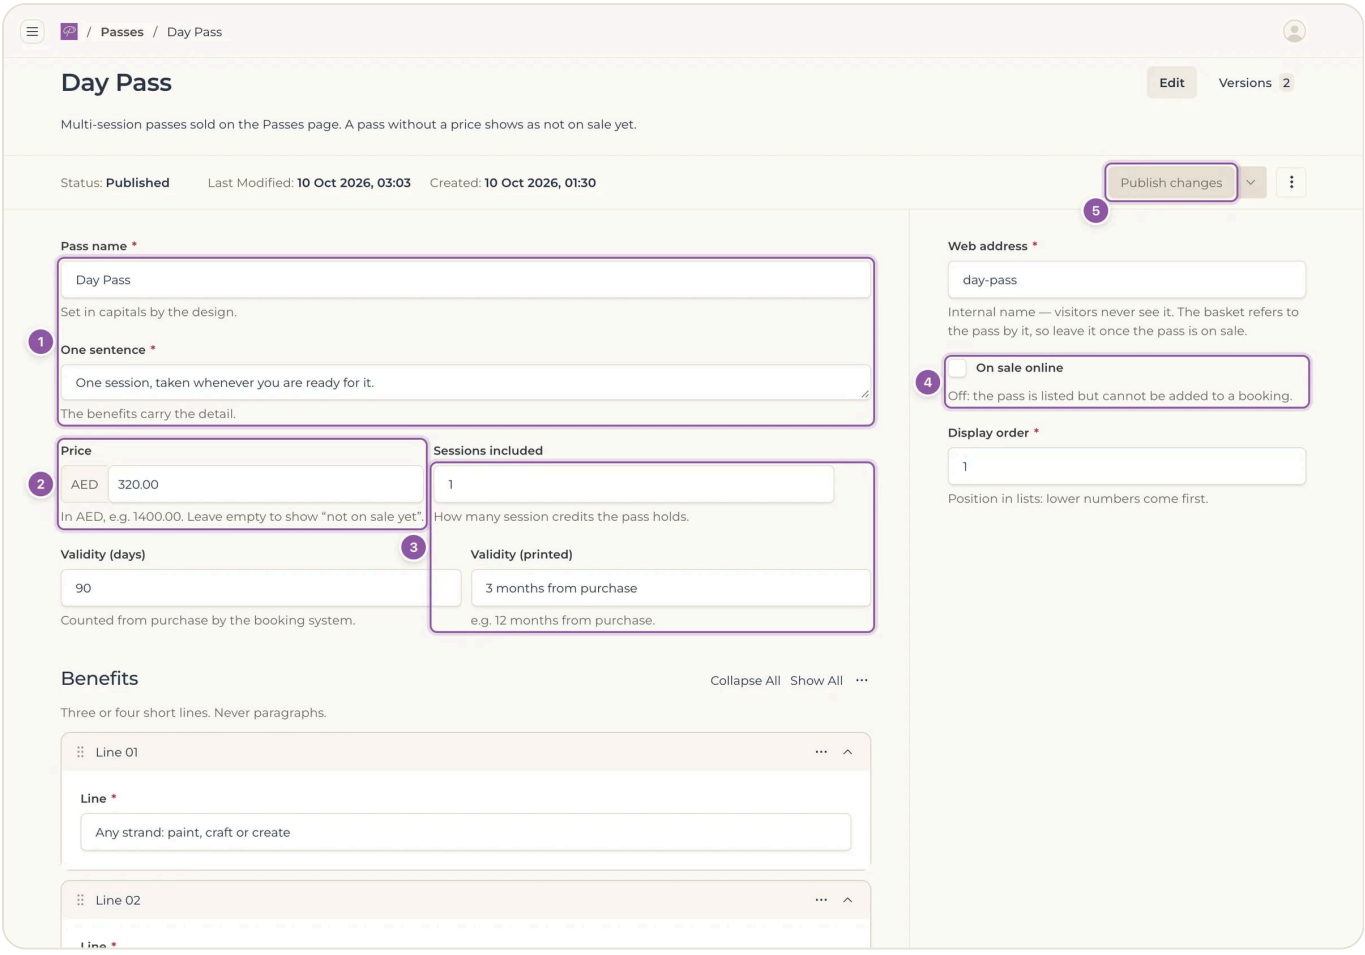

> ⚠ **GOOD TO KNOW**
>
> Policies are legal promises. Ask your adviser before changing refund or cancellation terms, and make sure the "Ready for you" wording matches what your DIY policy says about materials. You find it under **Settings › Booking & checkout wording › Event page tab**, in the "Ready for you" body.

Passes

Content › Passes Admin · Editor

1. Name the pass and describe it in one sentence 1.
2. Set the price 2, how many sessions it includes and how long it is valid 3.
3. Untick **On sale online** 4 to show a pass without selling it.

4 **Publish changes** 5. Drafts stay hidden, and the loyalty page shows a friendly “coming soon”.

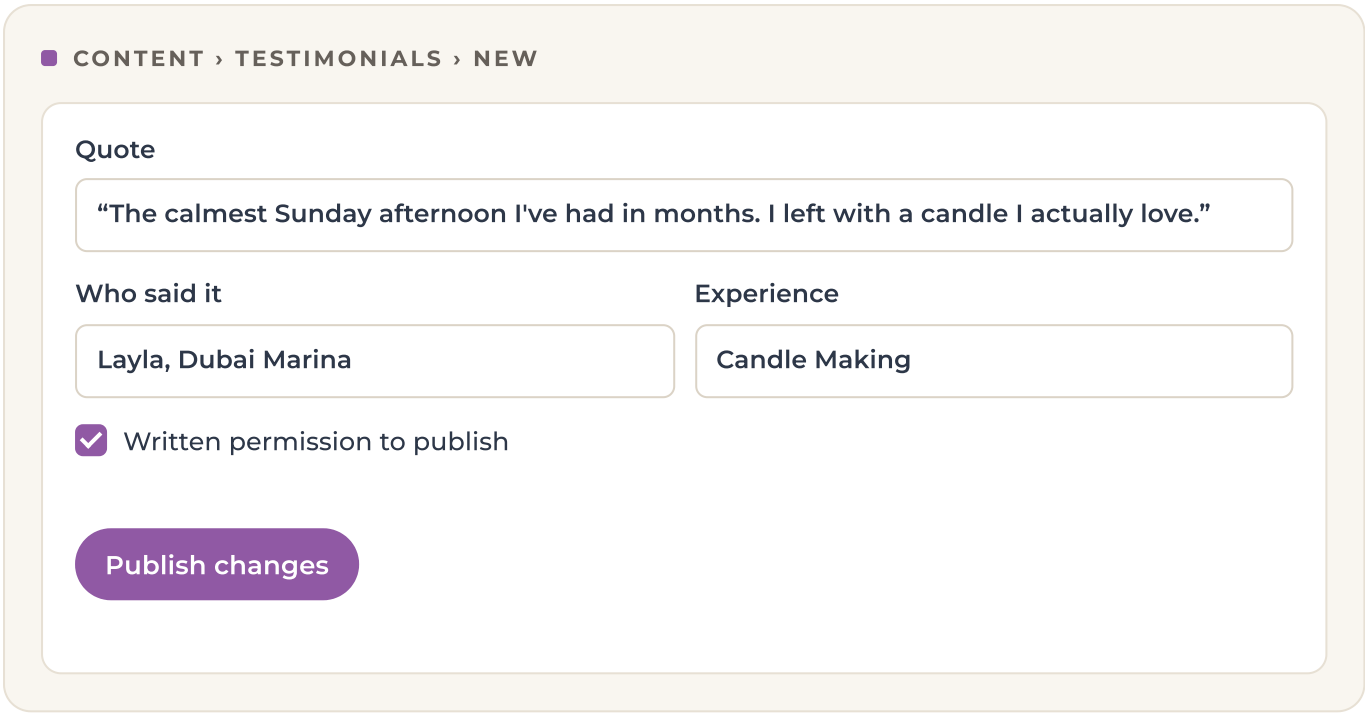

Content → Passes: name, one sentence, price, how many sessions it includes and how long it is valid. Untick “On sale online” to show it without selling it.

1. Pass name and one-sentence description
2. Price (AED)
3. Sessions included and validity
4. On sale online
5. Publish changes

Testimonials

Content › Testimonials Admin · Editor

Short quotes from guests, shown wherever a page asks for them. Only quotes with permission ticked are published.

NEVER DO THIS

Never invent or polish a quote. Only real words from real guests, and only after they have agreed in writing (an email or message is fine).

Other things in the menu

A few menu items and fields are not covered elsewhere. Here is what each is for, so you know whether to touch it.

IN THE MENU	WHAT IT IS
Content › Vibes	Moods such as “Mindful & Chill”. Tag an experience with a vibe (on the experience, in the right-hand column), or a single session (in its right-hand column; empty means it takes the experience's). The Events page then offers a **Vibe** filter and “Find your vibe”. Until something is tagged, there is nothing to filter by.
On an experience: **How it is sold**	**Create Anytime** (walk in, no booking) or **Create Together** (booked for a date). Only Create Together experiences can have sessions.
On an experience: **Status flag**	A short word shown instead of “Any time” or “Scheduled”, such as *Coming soon*. Leave it empty when the class is running.
Content › Workshop types	The themes and levels of a booked experience. See Workshop types (p. 56).

IN THE MENU	WHAT IT IS
Content › Music and **Settings › Music**	The background music and its credits. See Background music (p. 87).
Content › Journal and **Content › Journal categories**	The studio's blog. See The Journal (p. 82).
Display order (many items)	Its position in lists. Lower numbers come first.
Settings (admin) › Settings changes	A read-only list of who changed which important setting, and when. Look here if a setting changed and nobody remembers why.
The **System** group (Seat counters, Payment events, Seat holds, Invoice PDFs, Background jobs and more)	The machinery behind bookings and payments. It is for Nexeor: look if you are curious, but don't change anything.
System › Background jobs	Where the dashboard's **See tasks →** link goes when a background task failed. Send Nexeor a screenshot; Nexeor handles the retries.

CHAPTER 07

The Journal

The Journal is the studio's blog: stories, new themes, behind the scenes. You write a post like a short letter, add a cover photo, and publish.

IN 30 SECONDS

- **Content › Journal** holds your posts. **Content › Journal categories** holds the sections they sit in.
- Every post needs a **title**, a **cover photograph** and some text. Everything else is optional.
- Posts are drafts until you press **Publish changes**, just like pages. Categories have a plain **Save**.
- Tick **Feature at the top of the Journal** to show a post large at the top of the Journal page.
- Add the **Latest from the Journal** section to any page to show your newest stories there.

IN THIS CHAPTER

Make your categories first 81
Write a journal post 82
Headings, photos and links inside a post 85
Publish, schedule or feature a story 85
Show your newest stories on another page 86
Rename, move or delete 86

WHERE THE JOURNAL SHOWS ON THE WEBSITE

maisonpalettia.com/journal

The Journal page

The featured post large at the top, then every other post as a card, newest first. A row of category buttons filters them.

Each post

- **/journal/three-scents** its own page
- **/journal/category/studio-notes**

one page per category

- **Menu · Footer** linked under About

TODAY

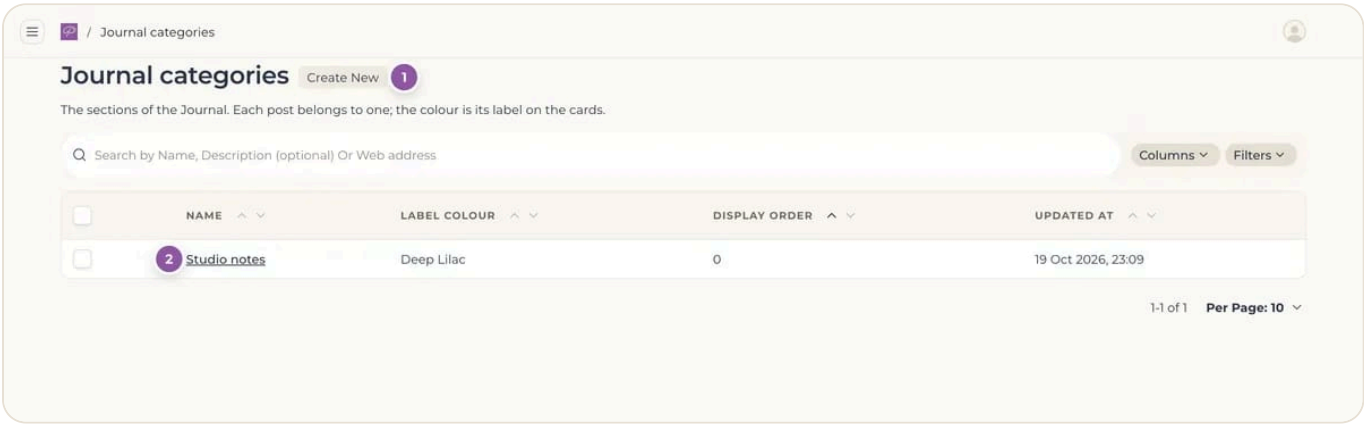

The Journal is ready but empty: no categories and no published posts yet. Until the first post is published, the Journal page shows a short note instead of cards.

Make your categories first

Content › Journal categories Admin · Editor

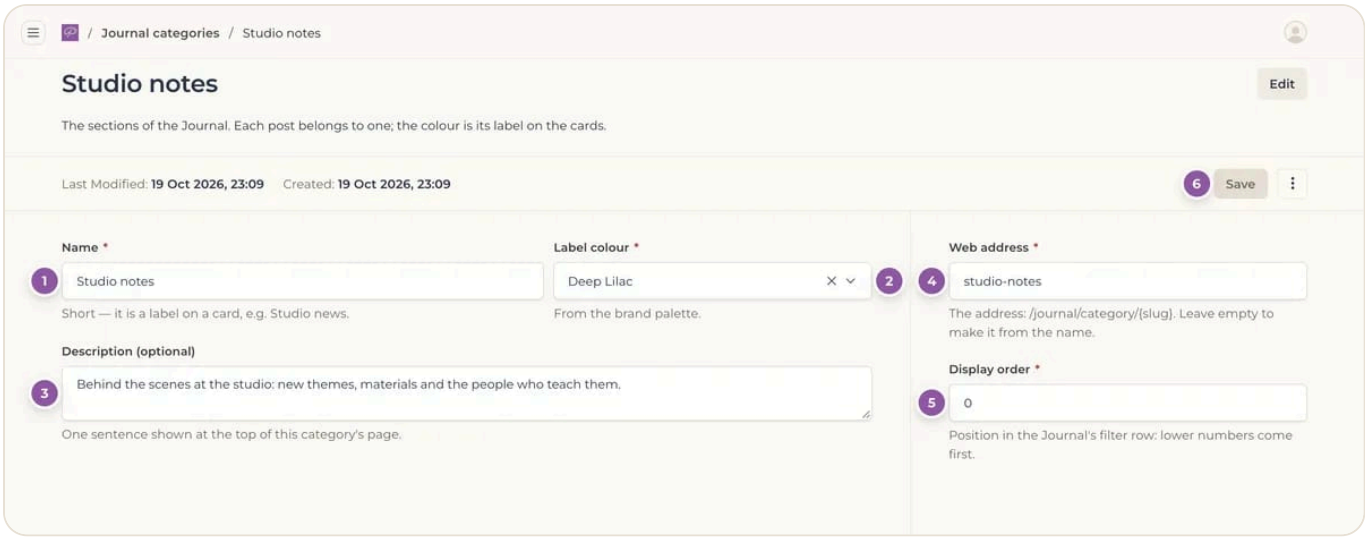

Categories are the sections of the Journal, such as *Studio notes*, *New themes* or *Gift ideas*. Two to four is plenty. Each post sits in one, and the category's colour becomes the little label on its card.

1. Open Content › Journal categories and press Create New (the first picture).
2. Type the name 1: short, because it is a label on a card.
3. Choose a **Label colour** 2: Deep Lilac, Light Sage, Warm Terracotta, White Rock (cream) or Soft Lavender.
4. Write one sentence for the top of the category's own page 3. Optional.
5. Leave the **Web address** 4 empty: it is made from the name. **Display order** 5 sets its place in the filter row.
6. Press Save 6. Categories have no drafts.

Content → Journal categories. Create New adds one; click a name to change it.

1. Create New — add a category
2. Click a category to open it

A category: its name, the colour of its label, one sentence for its page, and its place in the filter row. Save puts it live, but a category only appears on the website once it has a published post.

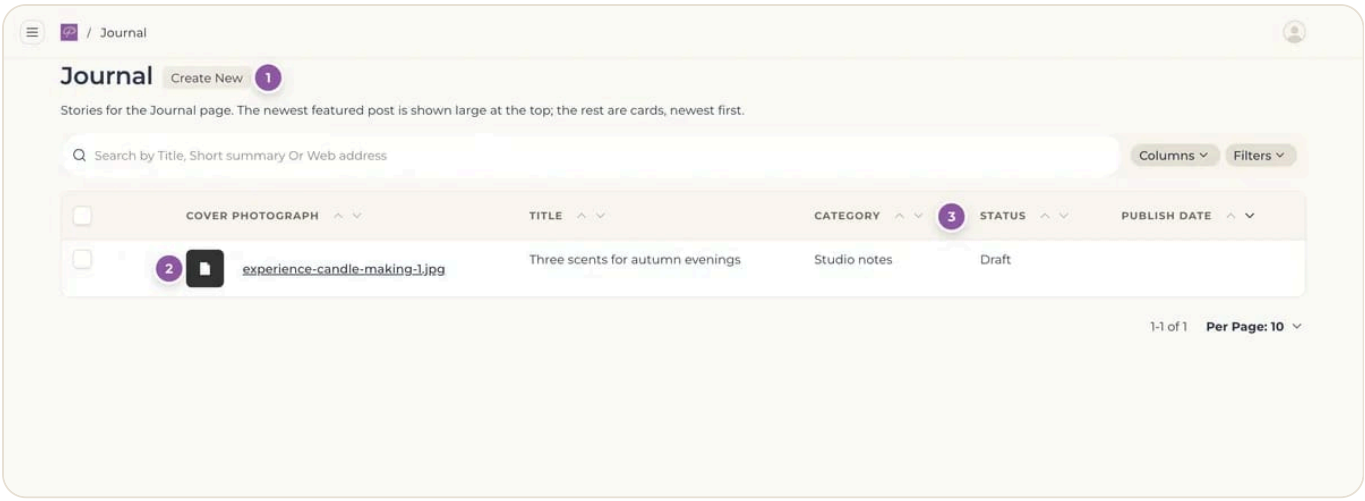

1. Name — short, it is a label on a card
2. Label colour
3. Description — one sentence for the category page
4. Web address — /journal/category/...
5. Display order in the filter row
6. Save — no drafts here

> **TIP**
>
> A category with no published posts stays hidden on the website, so you can set them all up before your first story is ready.

Write a journal post

Content › Journal › Create New Admin · Editor

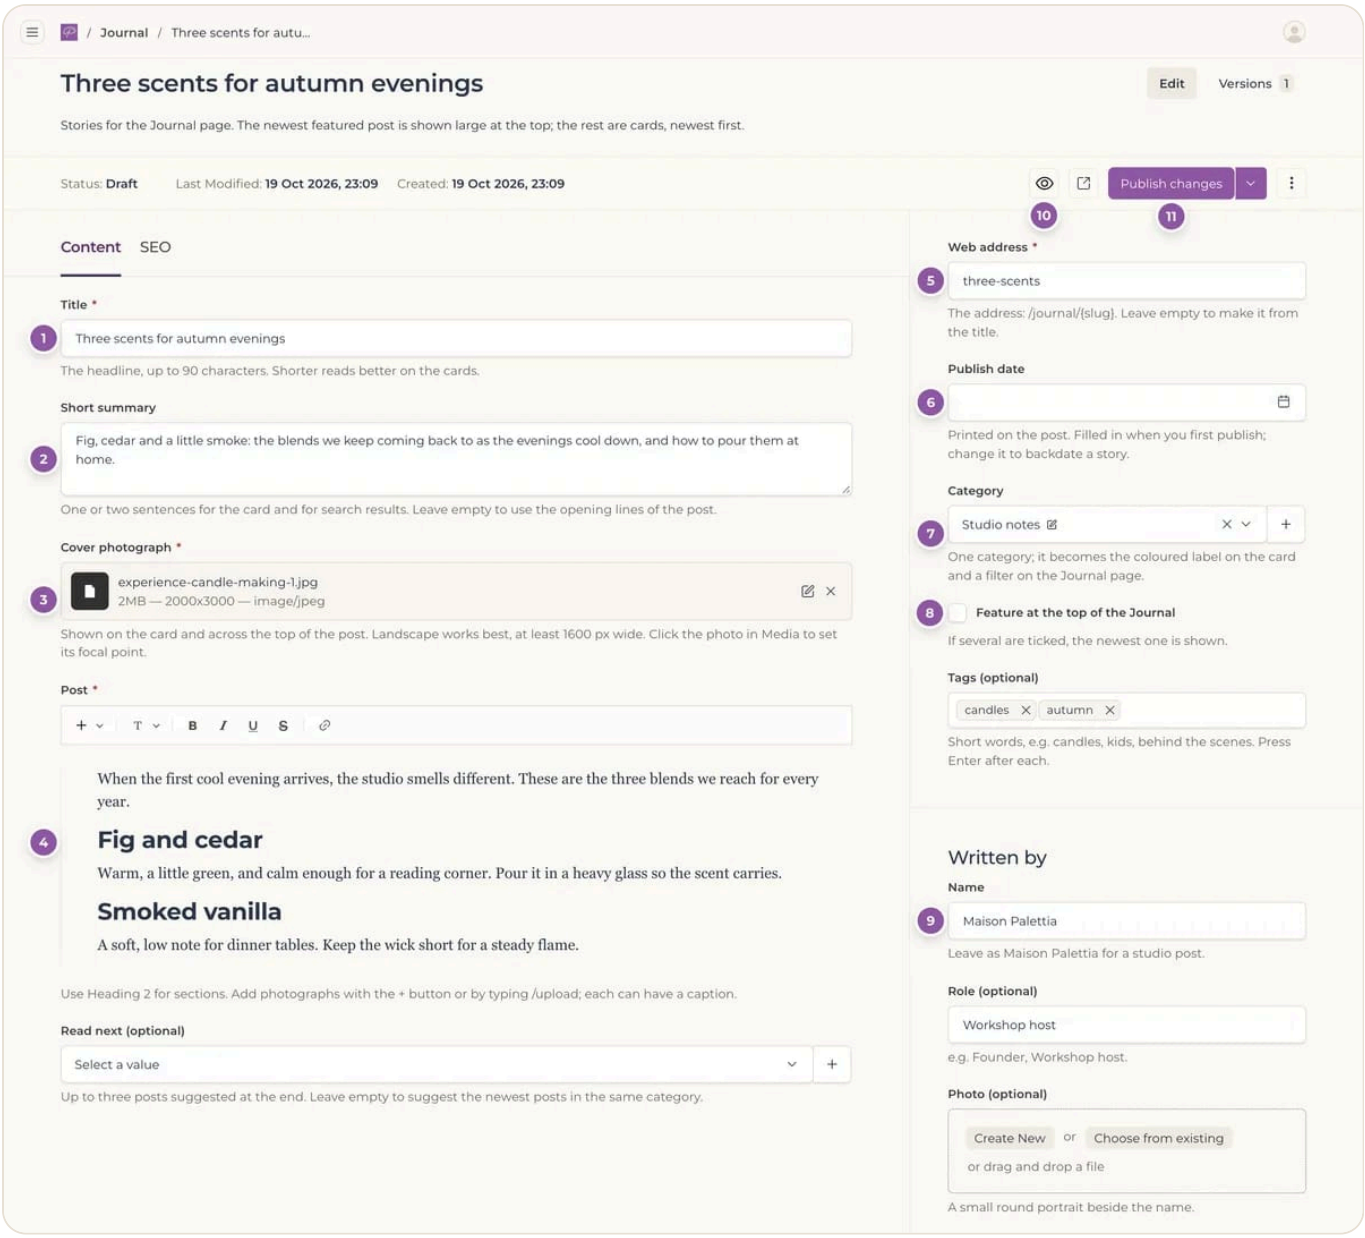

Start from **Content › Journal** and press **Create New** 1, or use **Write a journal post** on the dashboard or in ⌘K (p. 21).

Content → Journal lists every post with its cover, category and status. Click a post to open it.

1. Create New — write a post
2. Click a post to open it
3. Status — Draft or Published

1. Type the **Title** 1. Up to 90 characters; shorter reads better on the cards.
2. Write a **Short summary** 2 for the card and for Google, or leave it empty to use the opening lines of the post.
3. Choose a **Cover photograph** 3: landscape, at least 1600 pixels wide. It is required.
4. Write the post 4. Use **Heading 2** for each part of the story.
5. In the right-hand column choose a **Category** 7. The **Web address** 5 is made from the title, and the **Publish date** 6 fills itself in when you publish.
6. Tick **Feature at the top of the Journal** 8 if this is the story to show first.
7. Check **Written by** 9. It says *Maison Palettia* unless you change it; add a role and a round photo for a personal post.
8. Press the eye 10 to preview, then **Publish changes** 11.

A journal post: title, short summary, cover photograph and the text on the left; web address, publish date, category, featured, tags and the author on the right. It saves as a draft until you press Publish changes.

1. Title
2. Short summary (optional)
3. Cover photograph — required, landscape
4. The post — headings, lists, quotes, links and photos
5. Web address — /journal/...
6. Publish date — filled in when you publish
7. Category — one per post
8. Feature at the top of the Journal
9. Written by — name, role, photo
10. Preview
11. Publish changes

> ⚠ **GOOD TO KNOW**
>
> **Careful:** pressing **Create New** saves an empty *Untitled* draft straight away. If you change your mind, the draft is harmless and never public; delete it from the list (tick its box, then **Delete**) to keep the dashboard tidy.

> **TIP**
>
> **Tags** (in the right-hand column) are short words such as *candles* or *kids*. Press **Enter** after each one. **Reading time** works itself out when you save.

Headings, photos and links inside a post

- **Headings:** select a line and choose Heading 2 (a new part of the story), Heading 3 or Heading 4 from the **T** menu.
- **Bold, italic, links:** select words and use the small toolbar. A link to another page of your site can start with `/`, for example `/events`.
- **Lists, a quote or a divider:** press **+** at the start of an empty line and choose one.
- **A photo:** press **+** on an empty line, or type `/upload`, then choose a photo from Media. Give it a caption if you like, and choose **Text width** or **Wide** (it breaks out of the text column).
- **Read next** (under the post): pick up to three posts to suggest at the end. Leave it empty and the newest posts in the same category are suggested.

> **TIP**
>
> Photos placed in a post come from **Content › Media**, so give them a good description there. “Used on” on the photo lists the post, and the photo can't be deleted while the post uses it.

Publish, schedule or feature a story

1. Press **Publish changes**. The post appears on the Journal page within a second or two, newest first.
2. Or use the arrow beside it and **Schedule Publish** to choose a date and time (see Schedule a change for later (p. 35)).
3. To show a post large at the top of the Journal, tick **Feature at the top of the Journal**. If several are ticked, the newest featured one is shown.
4. To backdate a story, change its **Publish date**. The date is printed on the post and decides its place in the list.
5. To take a post down, open the **⋮** menu at the top right and choose **Unpublish**. It goes back to being a draft.

> **GOOD TO KNOW**
>
> The cover photograph follows the same rule as hero photos: a photo marked AI-generated or of unknown origin can't be published as a cover unless AI imagery is allowed under **Settings › Site details** › Advanced. Use your own studio photos.

GOOD TO KNOW

Every published post gets its own share picture for WhatsApp and social media, made automatically. Renaming a published post adds a redirect (p. 94) from the old address for you.

Show your newest stories on another page

The page section **Latest from the Journal** shows your newest stories as cards on any page, such as the homepage or About. It is not on any page yet. See Latest from the Journal (p. 32) for how to add it.

Rename, move or delete

Admin · Editor (deleting a category: Admin)

- **Rename a category:** open it, change the name and Save. Its posts follow, and a redirect is added from its old address.
- **Delete a category:** only the owner (Admin) can, and only when no post uses it. Otherwise the message says, for example, “2 journal posts use this category. Move them to another category first.”
- **Delete a post:** tick it in the list and press Delete. Usually it is better to Unpublish it, so you can bring it back.
- The Journal also has an RSS feed (`/journal/rss.xml`) that news readers pick up by themselves. Nothing to set.

CHAPTER 08

Background music

A small music player sits in the corner of every page. You choose the tracks, give each one its proper credit, and switch the player on or off.

IN 30 SECONDS

- **Content › Music** holds the tracks. **Settings › Music** switches the player on or off and sets the volume.
- Music starts by itself when a visitor arrives (or on their first tap, where the browser insists). Visitors can pause it, and it stays off for them.
- Every track must be credited. Fill in the title, creator, where it came from and its licence; the site prints the credit for you.
- Never use a track whose licence says **NC** (non-commercial). This is a business website.

IN THIS CHAPTER

Add a track 87
Fill in the credit 88
Switch the player on or off 90

WHAT VISITORS SEE

● ♪ Studio sounds

A small round button in the corner of every page. Music starts when the visitor arrives, at the volume you chose.

● Pause One press stops it, and it stays off for that visitor until they press play again.

● Credits

The playing track is credited beside the player, and every track is listed on **/music-credits**.

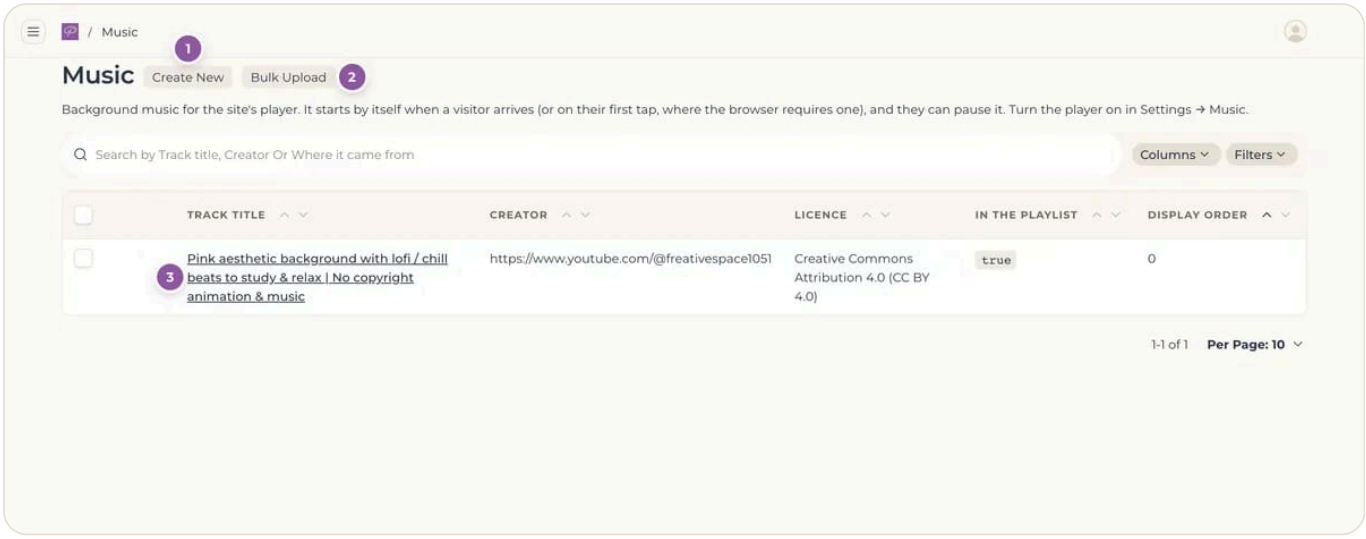

● Off Never on checkout and payment pages.

Add a track

Content › Music **Admin · Editor**

1 Open **Content › Music** and press **Create New** ❶. **Bulk Upload** ❷ takes several files at once; you then fill in each one.

2 Drop in the audio file: MP3, M4A, AAC or OGG.

Content → Music lists your tracks with their creator, licence and whether they are in the playlist.

1 Create New — add one track
2 Bulk Upload — several tracks at once
3 Click a track to open it

Fill in the credit

“Copyright-free” music almost always comes with a licence that asks you to say who made it. These fields build that credit for you.

1 Check the file 1 is the one you meant.

2 Type the **Track title** and the **Creator** 2, exactly as the source names them. Add the creator's page if they have one.

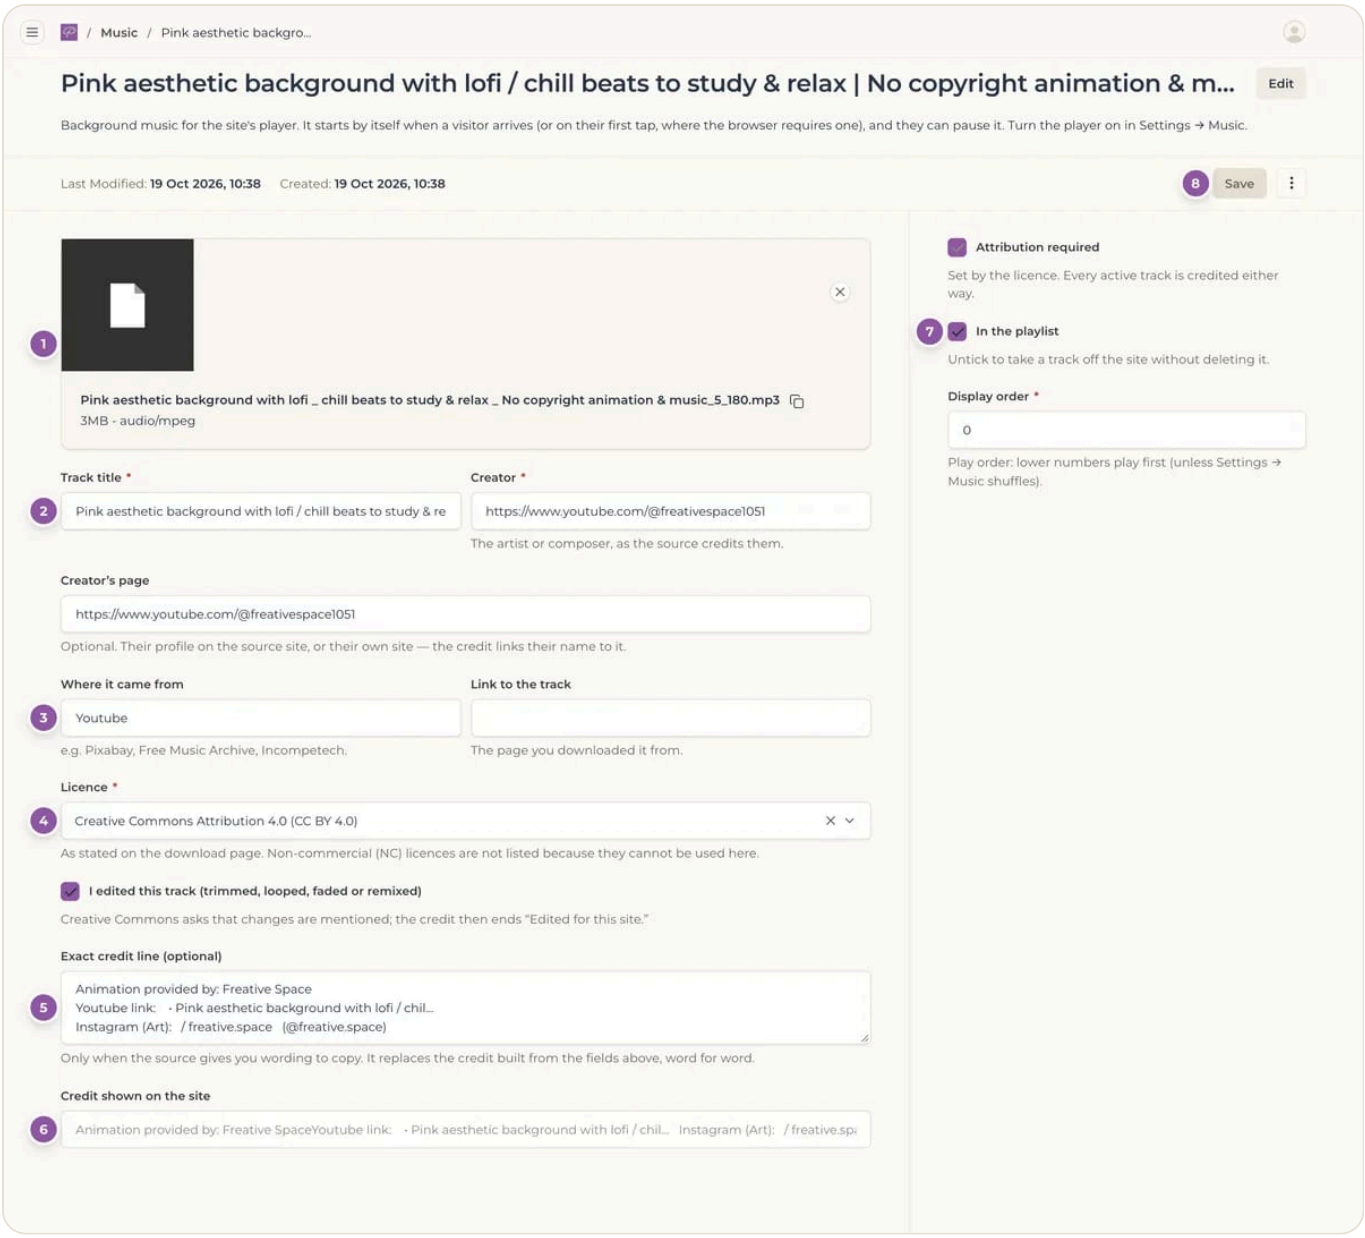

3 Say **Where it came from** and paste the **Link to the track** 3.

4 Choose the **Licence** 4 from the download page. Tick **I edited this track** if you trimmed, looped or faded it.

5 If the source gives you exact words to copy, paste them into **Exact credit line** 5. Otherwise leave it empty.

6 Read **Credit shown on the site** 6. This is exactly what visitors see; make sure it reads well.

7 Leave **In the playlist** 7 ticked, and press Save 8. There are no drafts: it plays on the site straight away if the player is on.

A track: the file, its title and creator, where it came from, its licence, and the credit the site prints. In the playlist (right) takes it off the site without deleting it.

1. The audio file (MP3, M4A, AAC or OGG)
2. Track title and Creator — required
3. Where it came from, and a link to the track
4. Licence
5. Exact credit line (optional)
6. Credit shown on the site — check it reads well
7. In the playlist — untick to take it off the site
8. Save

LICENCE IN THE LIST	WHAT IT MEANS FOR YOU
Creative Commons Attribution 4.0 or 3.0 (CC BY)	Free to use; the credit must be shown. The site does this.
Creative Commons Attribution-ShareAlike 4.0 (CC BY-SA)	The same, and an edited version must keep the same licence.
Public domain (CC0)	No credit needed, though the site still lists it.

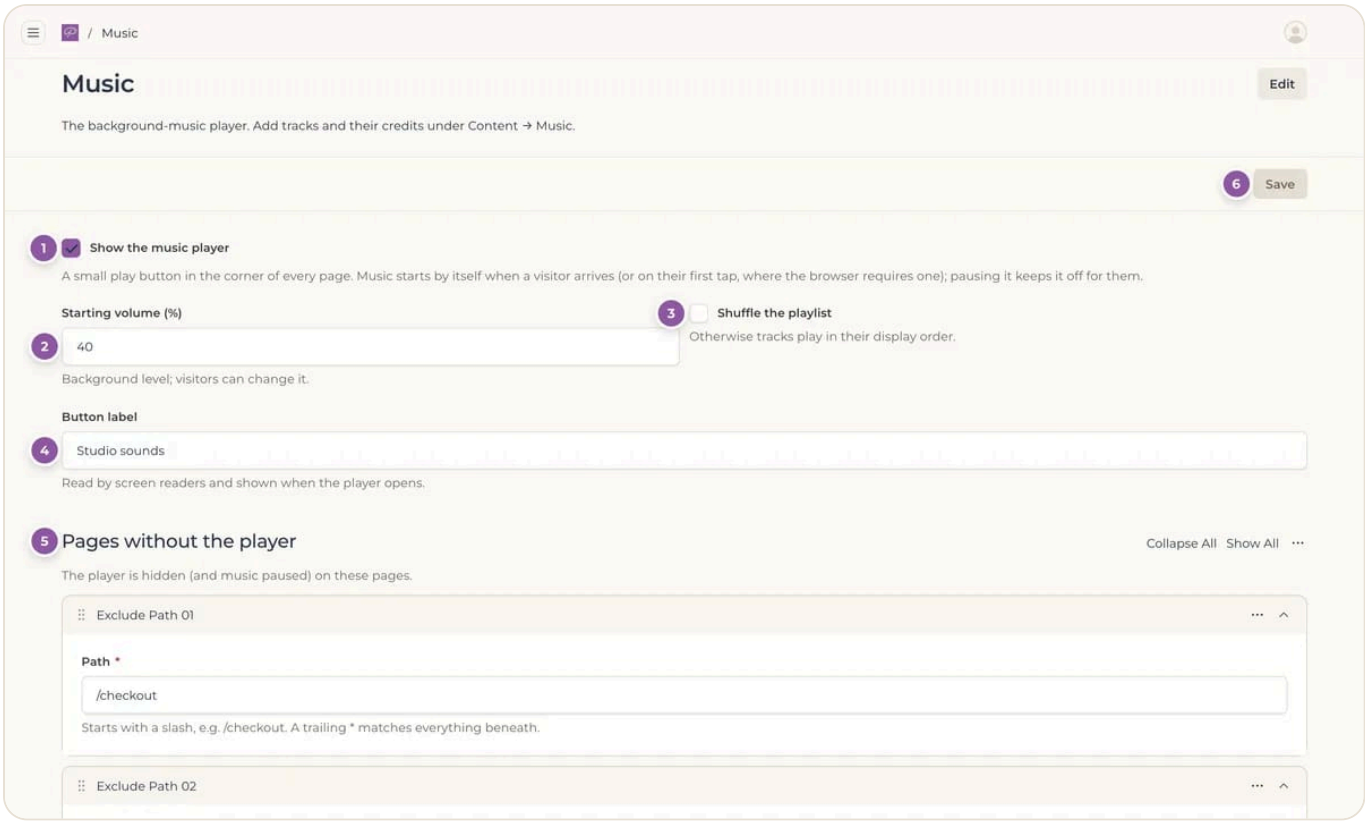

LICENCE IN THE LIST	WHAT IT MEANS FOR YOU
Pixabay Content License	Free to use from Pixabay; no credit needed.
Other	Give the licence's link, or paste the exact credit line the source asks for.

> **NEVER DO THIS**
>
> Never use a track marked **NC** (non-commercial) or one you found without a licence. NC licences are left out of the list on purpose: the studio's website is a business.

Switch the player on or off

Settings › Music · Admin · Editor

1. Tick **Show the music player** 1. The player appears only while this is ticked *and* at least one track is in the playlist.
2. Set the **Starting volume** 2, from 5 to 100%. 40% is a gentle background. Visitors can change it.
3. Tick **Shuffle the playlist** 3, or leave it to play tracks in their display order.
4. The **Button label** 4 is read aloud to blind visitors and shown when the player opens.
5. **Pages without the player** 5 keeps it off where it would distract. Checkout and payment pages are already listed. End an address with `*` to cover every page beneath it, for example `/journal/*`.
6. Press Save 6. It goes live straight away.

Settings → Music: whether the player shows, its starting volume, shuffle, its label, and the pages it stays off.

1. Show the music player
2. Starting volume (5–100%)
3. Shuffle the playlist
4. Button label
5. Pages without the player
6. Save

TODAY

The player is on at 40%, not shuffled, labelled “Studio sounds”, and off on checkout, payment and booking-status pages. There is one track in the playlist.

TIP

Want silence for a while? Untick **Show the music player** and Save. To drop a single track, untick **In the playlist** on that track instead of deleting it.

CHAPTER 09

SEO & sharing

SEO means “search engine optimisation”: helping Google show the right words for each page. You only need two short sentences and a picture.

IN 30 SECONDS

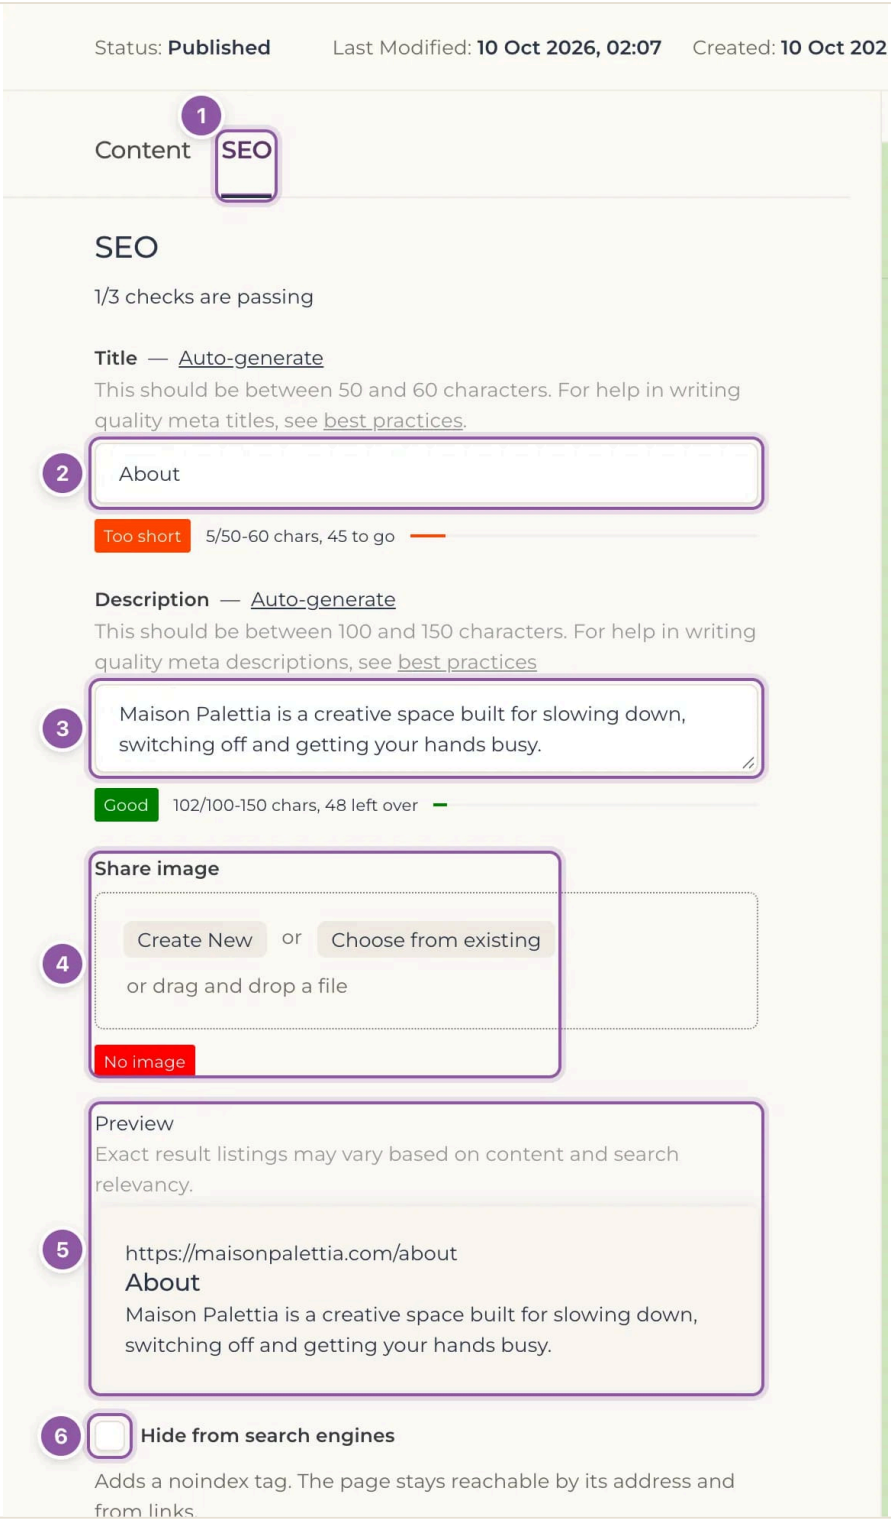

- Pages, experiences, workshop types, sessions, programmes, policies and journal posts each have an **SEO** tab.
- For booked classes, write the SEO words on the **workshop type** and the **experience**: Google treats the type's page as the main one for its dates.
- Title: 50–60 characters. Description: 100–150 characters. **Auto-generate** writes a first draft for you.
- The share image is the picture people see when your link is sent on WhatsApp or posted on social media.
- Redirects send an old address to a new one, which is handy for printed flyers.

IN THIS CHAPTER

The SEO tab 92
Redirects 94
What a shared link looks like 94

The SEO tab

1. Open the page and choose the **SEO** tab ❶.
2. Write the title ❷, or press **Auto-generate** and polish it.
3. Write the description ❸: one inviting sentence about the page.
4. Choose a share image ❹. Check the preview of the search result ❺.
5. Leave **Hide from search engines** ❻ unticked unless Nexeor asks.
6. **Publish changes**.

Pages, experiences, workshop types, sessions, programmes, policies and journal posts each have an SEO tab: the title and description Google shows, and the picture used when the link is shared on WhatsApp or social media.

1. SEO tab
2. Title — 50–60 characters; Auto-generate writes one for you
3. Description — 100–150 characters
4. Share image — shown when the link is shared
5. Preview of the search result
6. Hide from search engines (rarely needed)

GOOD TO KNOW

Google is always told your site is `https://maisonpalettia.com`. The `www.` address sends visitors there, and Nexeor's test copy is hidden from search engines automatically. Nothing to set.

A dated session tells Google that its workshop type's page is the main one, and dated sessions are left out of the list of pages Google is given. So put your best SEO title and description on the **workshop type** and the **experience**. A session's SEO tab mainly changes how its link looks when shared.

Journal posts get their own share picture automatically.

What a shared link looks like

When someone sends your page on WhatsApp, it shows the share image, the title and the start of the description. A good share image makes people tap.

EXAMPLE: YOUR LINK ON WHATSAPP

Candle Making Workshop in Dubai | Maison Palettia

Pour, scent and decorate your own candle in a calm two-hour session. All materials included.

maisonpalettia.com

Shall we do this on Sunday?

TIP

Choose share images that are landscape, bright, and have no words on them. Set a default for the whole site under **Settings › Search & sharing defaults**.

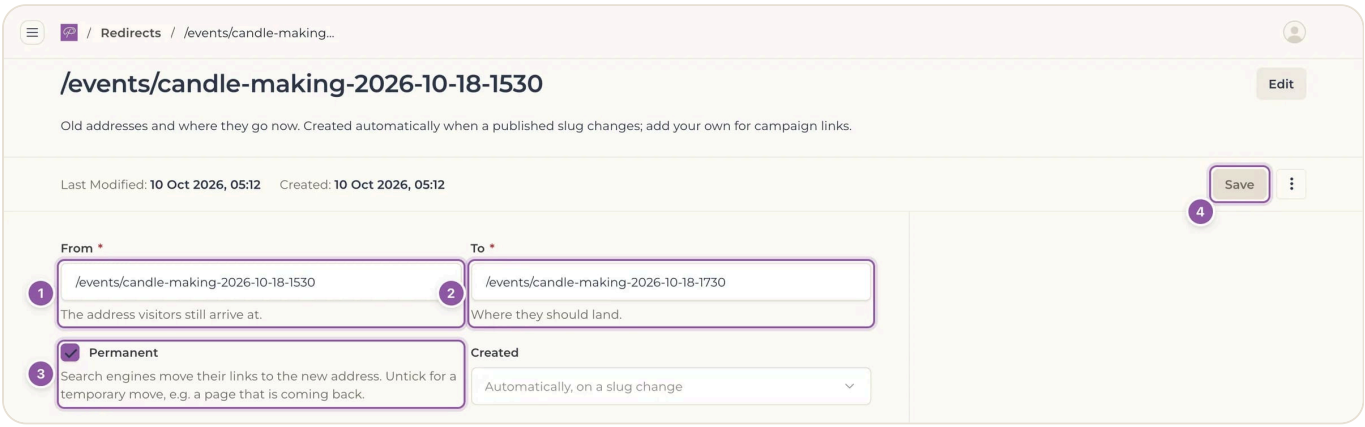

Redirects

Content › Redirects Admin · Editor

A redirect sends visitors from an old address to a new one. When you rename a published page,

workshop type, journal post or journal category, one is added for you automatically.

1. From 1: the old or short address, such as `/flyer`.
2. To 2: where visitors should land.
3. Tick **Permanent** 3 if the old address will never come back.
4. Save 4.

Content → Redirects send an old address to a new one — handy for a printed flyer. Renaming a published page adds one automatically.

1. From — the old address, e.g. /flyer
2. To — where visitors should land
3. Permanent — tick if the old address will never come back
4. Save

CHAPTER 10

Bookings & orders

Every booking is an order with a reference that starts MP-. Open it, and everything you can do with it is under Actions.

IN 30 SECONDS

- **Bookings › Orders** : search by reference (`MP-…`) or email. Coloured chips filter by status.
- Open an order. **Actions** holds refund, move to another date, resend tickets and more.
- Front desk can **request** a refund; only the owner (Admin) **approves** it, from **Bookings › Refunds** or the dashboard.
- All prices include 5% VAT. Walk-ins and phone bookings use **Create desk booking**.

IN THIS CHAPTER

Find an order	96	Read an order	97
Order actions	100	Refund an order	101
Approve a refund your team asked for	103	Move a booking to another date	103
Take a walk-in or phone booking	105	Customers	107
Promo codes	109		

AN ORDER'S STATUS CHANGES BY ITSELF

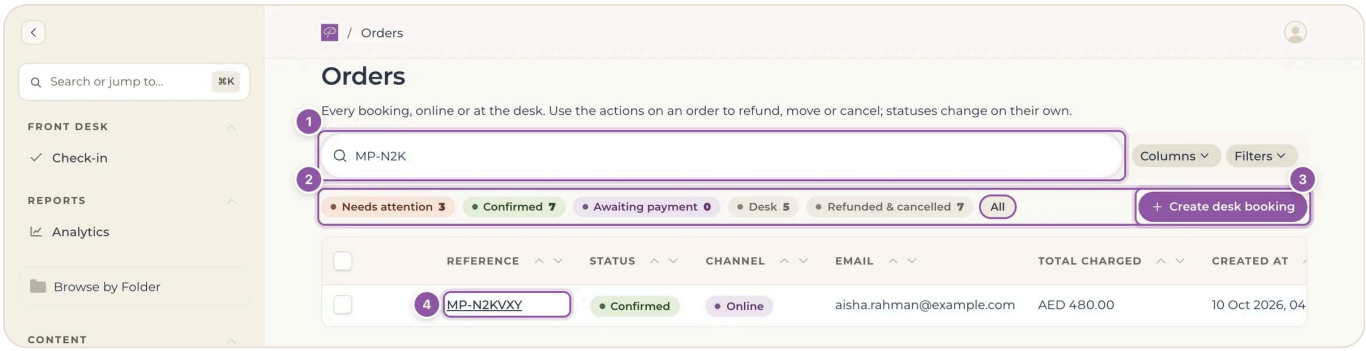

● Pending payment → ● Awaiting payment → ● Confirming → ● Confirmed → ● Completed

Other endings: ● Failed payment declined, the customer may try again · ● Expired the seat hold (15 minutes unless changed) ran out without payment · ● Cancelled · ● Refunded in full

Find an order

Bookings › Orders Admin · Front desk

1. Type a booking reference or an email ❶.
2. Or use the quick filters ❷: Needs attention, Confirmed, Refunded…
3. Click the reference ❹ to open the order. **Create desk booking** ❸ is up here too.

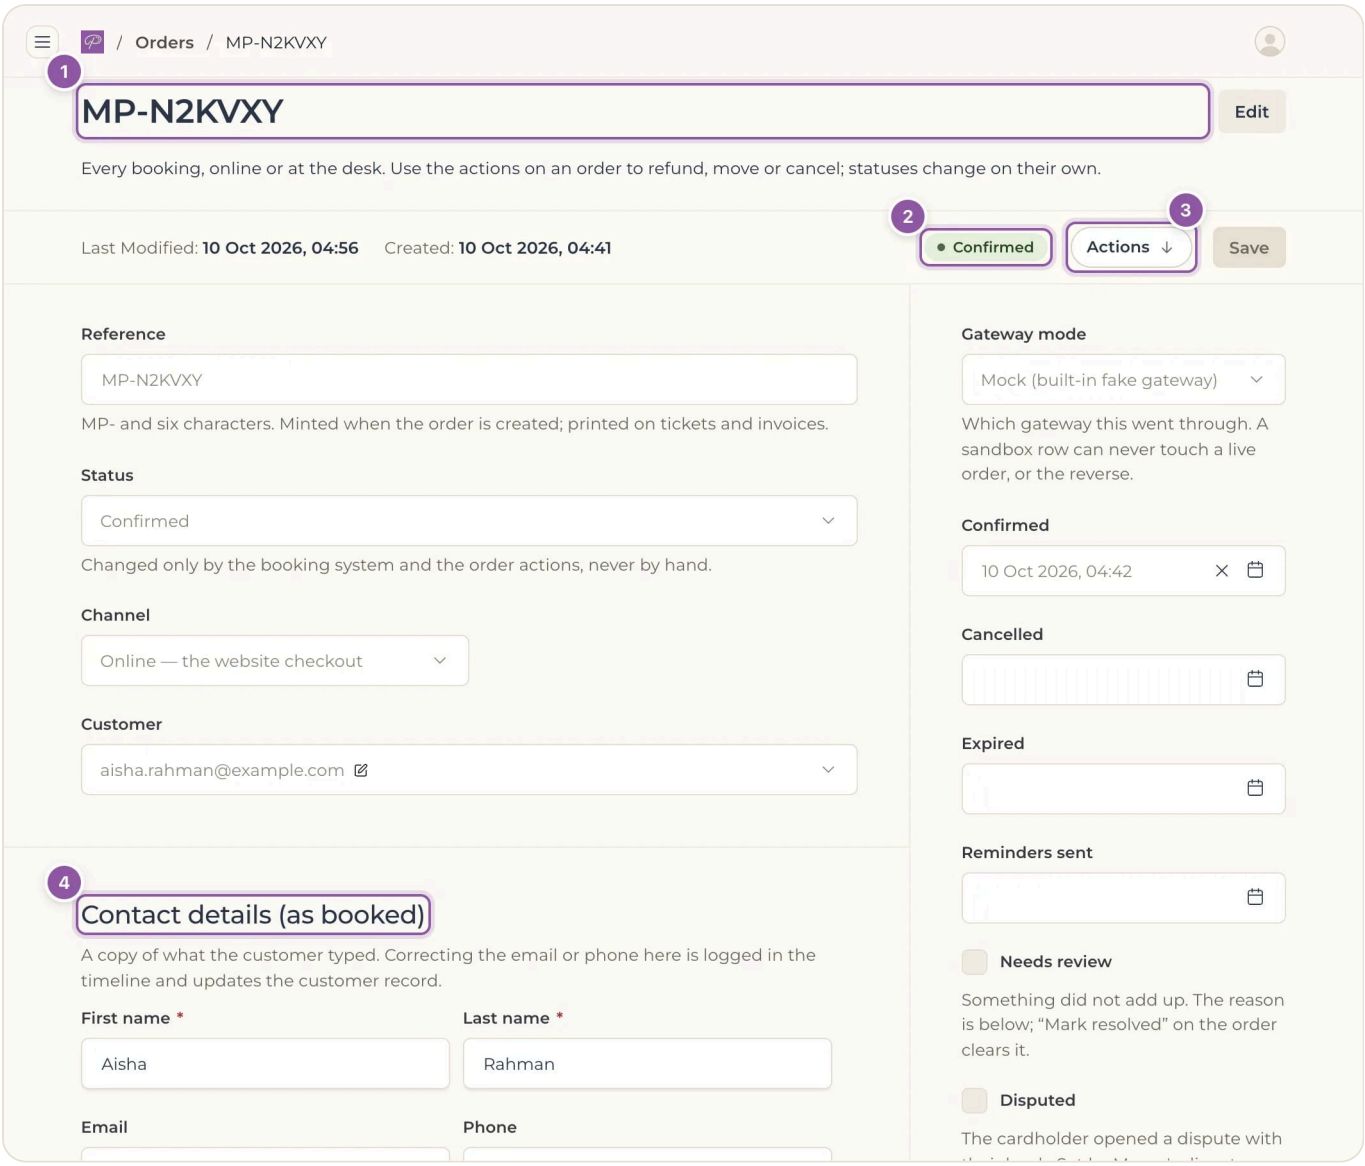

Bookings → Orders. Type a booking reference (MP-…) or an email into the search box. The coloured chips filter by status.

1. Search by reference or email
2. Quick filters: Needs attention, Confirmed, Refunded…
3. Create desk booking
4. Click the reference to open the order

Read an order

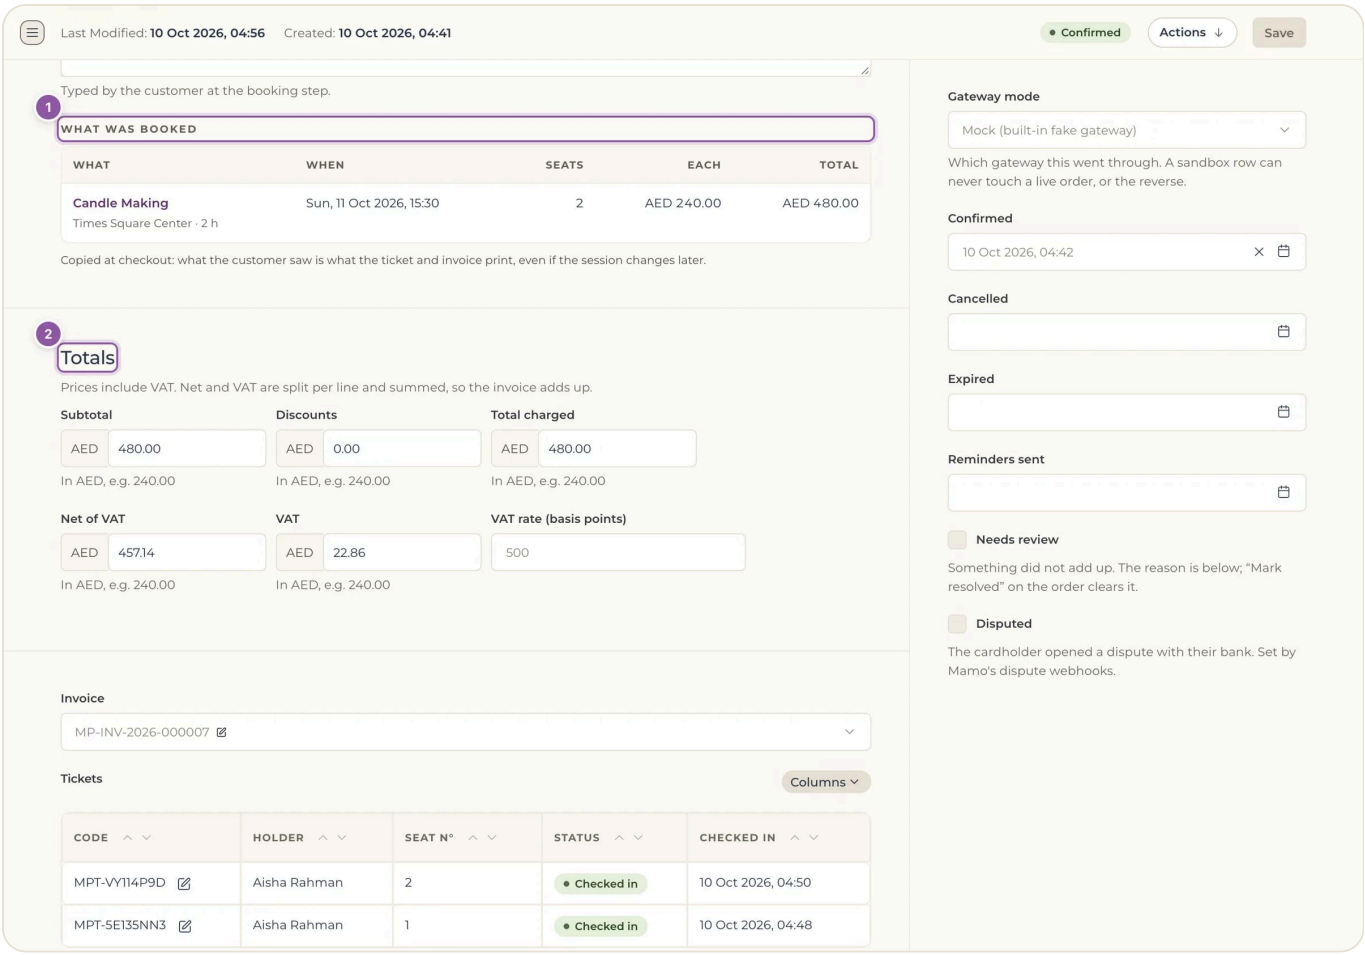

At the top: the booking reference 1, its status 2 (which changes by itself), the **Actions** button 3, and the customer's contact details 4. You may correct a mistyped email or phone number here.

An order shows its reference, its status, the Actions button and the customer's details. Everything you can do with it is under Actions.

1. Booking reference
2. Status (changes by itself)
3. Actions — refund, move, resend…
4. Contact details — you may correct email or phone

Further down: what was booked 1 and the totals with VAT 2, then the invoice, each ticket and its check-in.

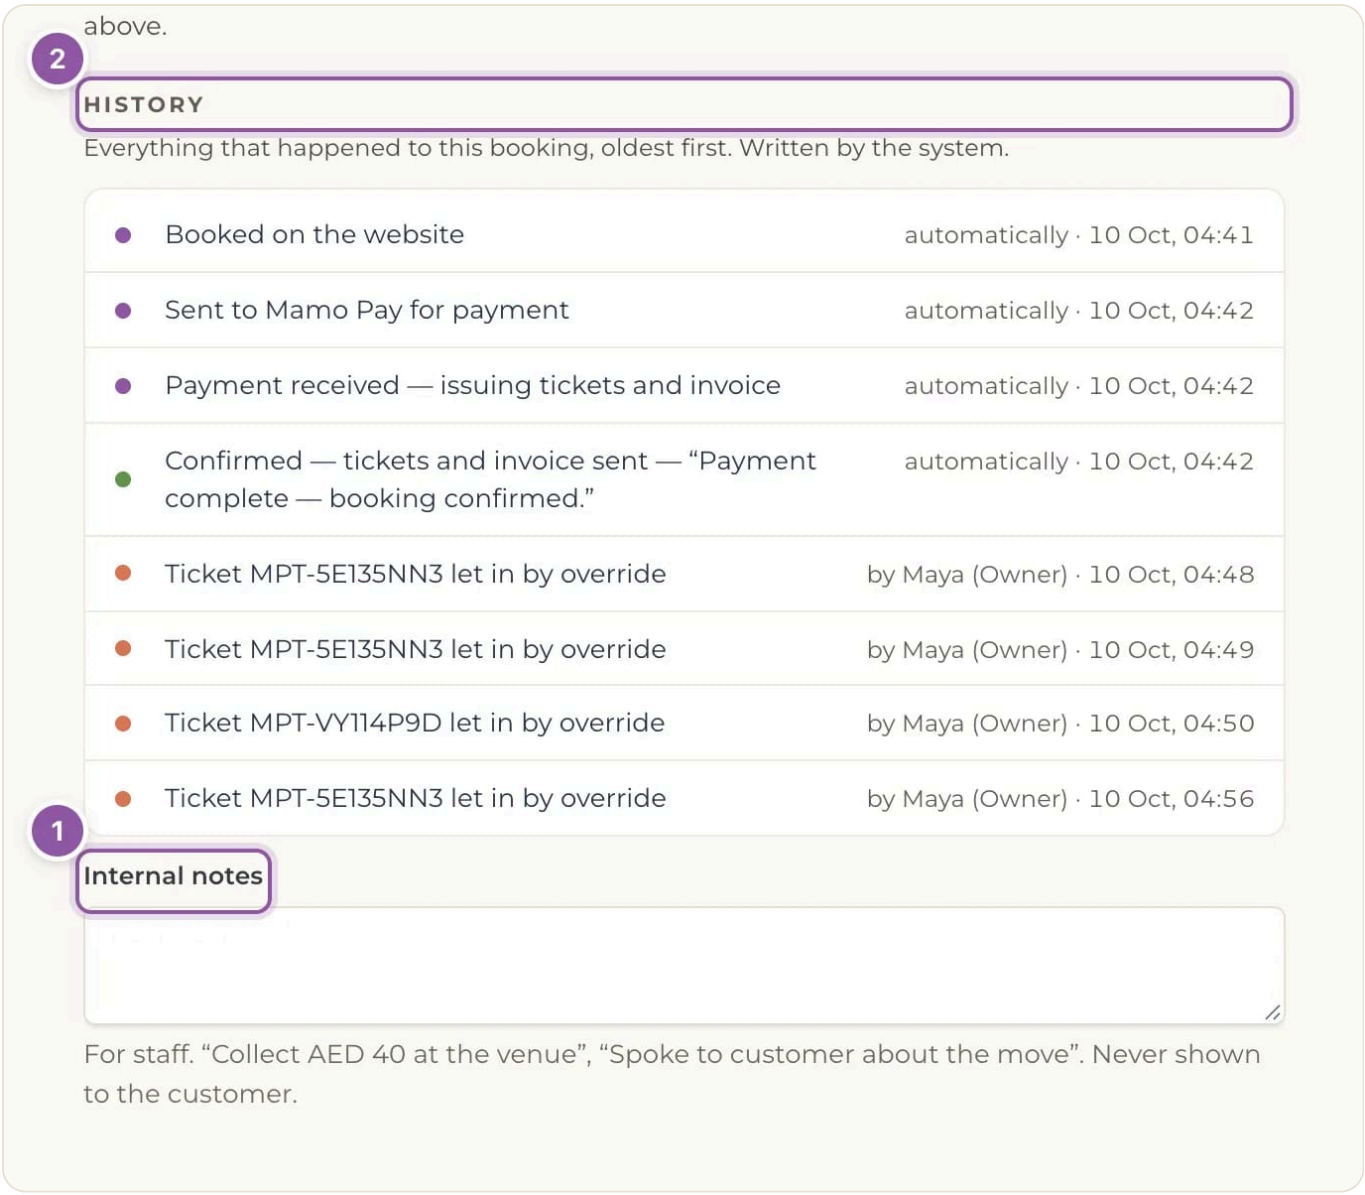

Further down: what was booked, the totals with VAT, the invoice, each ticket and its check-in, and the full history of the booking.

1 What was booked

2 Totals — prices include VAT

At the bottom, the history lists everything that happened to the booking, oldest first, and who did it 2. Internal notes 1 are for staff only. Customers never see them.

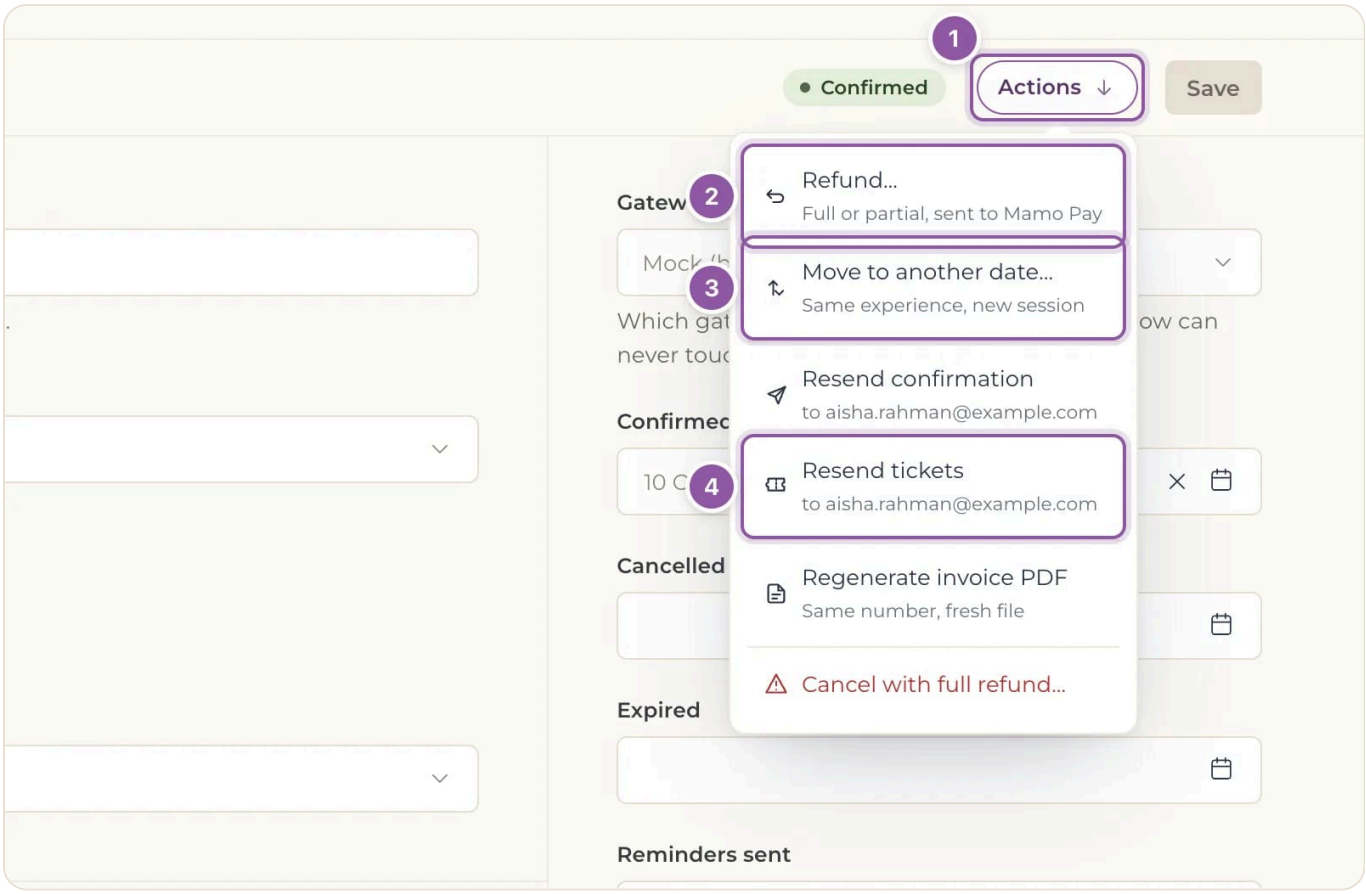

The History lists everything that happened to the booking, oldest first, and who did it. Internal notes are for staff only.

1. Internal notes — staff only
2. History — every step, with who did it

Order actions

Open **Actions** 1. Items ending in **…** open a window first, such as **Refund…** 2 and **Move to another date…** 3. **Resend tickets** 4 and **Resend confirmation** email the customer again; each asks you to confirm first.

Actions on an order. Items ending in … open a window first. Resend confirmation and Resend tickets ask you to confirm before the email goes. The owner also sees Regenerate invoice PDF and Cancel with full refund…

1. Actions
2. Refund… — full or part
3. Move to another date…
4. Resend tickets — emails them again

The owner (Admin) also sees these, when they apply:

- **Cancel with full refund…**: the whole order is cancelled and all the money goes back to the customer.
- **Regenerate invoice PDF**: a fresh file for the invoice, with the same invoice number.
- **Mark review resolved**: clears the **Needs review** label on an order once you have checked it.
- **Approve refund of AED …** or **Mark AED … repaid**: for a refund that is waiting. See below.

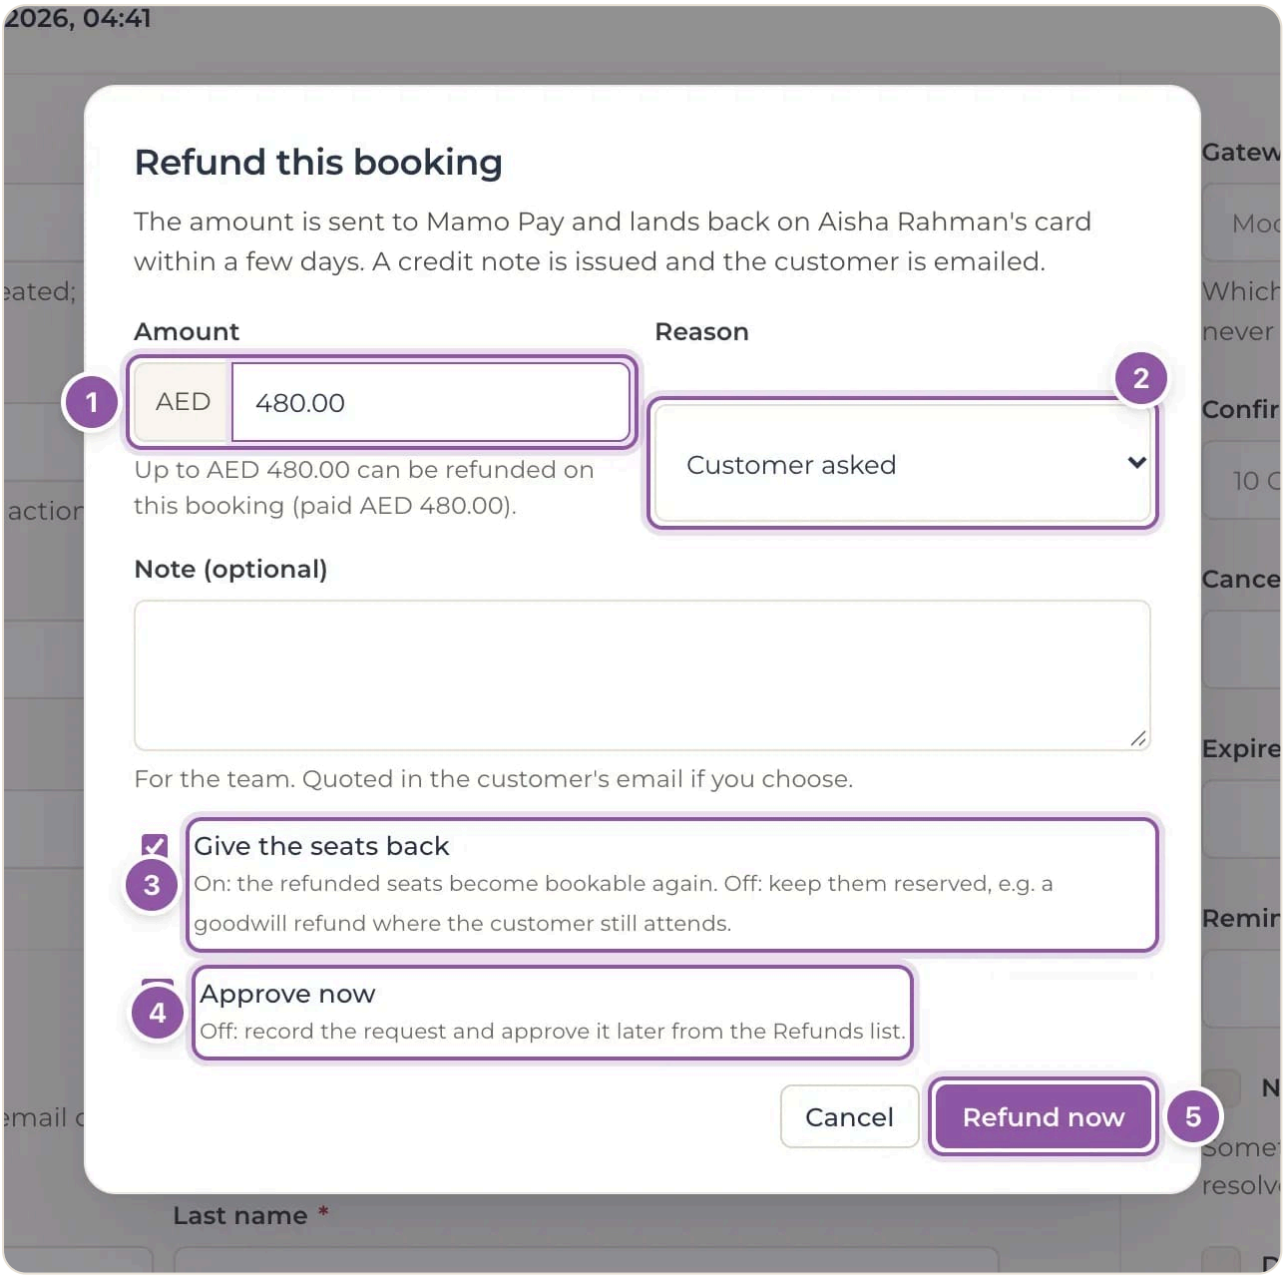

Refund an order

Request: Admin · Front desk

1. **Actions** › **Refund…**. The full amount is filled in; lower it for a part refund 1.
2. Pick a reason from the list 2. Add a note if it helps.
3. Tick **Give the seats back** 3 to make them bookable again.

4 Owner: tick **Approve now** 4. Front desk: you don't see this box. Your button says **Request refund**, and the owner approves it (see below).

5 Press **Refund now** 5. The money goes back to the customer's card through Mamo Pay and they get an email.

Refund…: the full amount is filled in; lower it for a part refund. Pick a reason, add a note if it helps, and confirm. The money goes back through Mamo Pay to the customer's card, and they get an email.

1. Amount — the full amount, or less for a part refund
2. Reason — pick one from the list
3. Give the seats back — makes them bookable again
4. Approve now — or leave it to approve later from Bookings › Refunds
5. Refund now

IN PLAIN WORDS

Paid at the desk? The window is called “Record a desk refund” and the button says **Record refund**. Hand the money back in person, then the owner opens the order and presses **Actions** › **Mark AED … repaid**.

Card refunds can take several working days to show on the customer's statement, depending on their bank.

Approve a refund your team asked for

Bookings › Refunds Admin only

When front desk asks for a refund, nothing is paid back until you approve it.

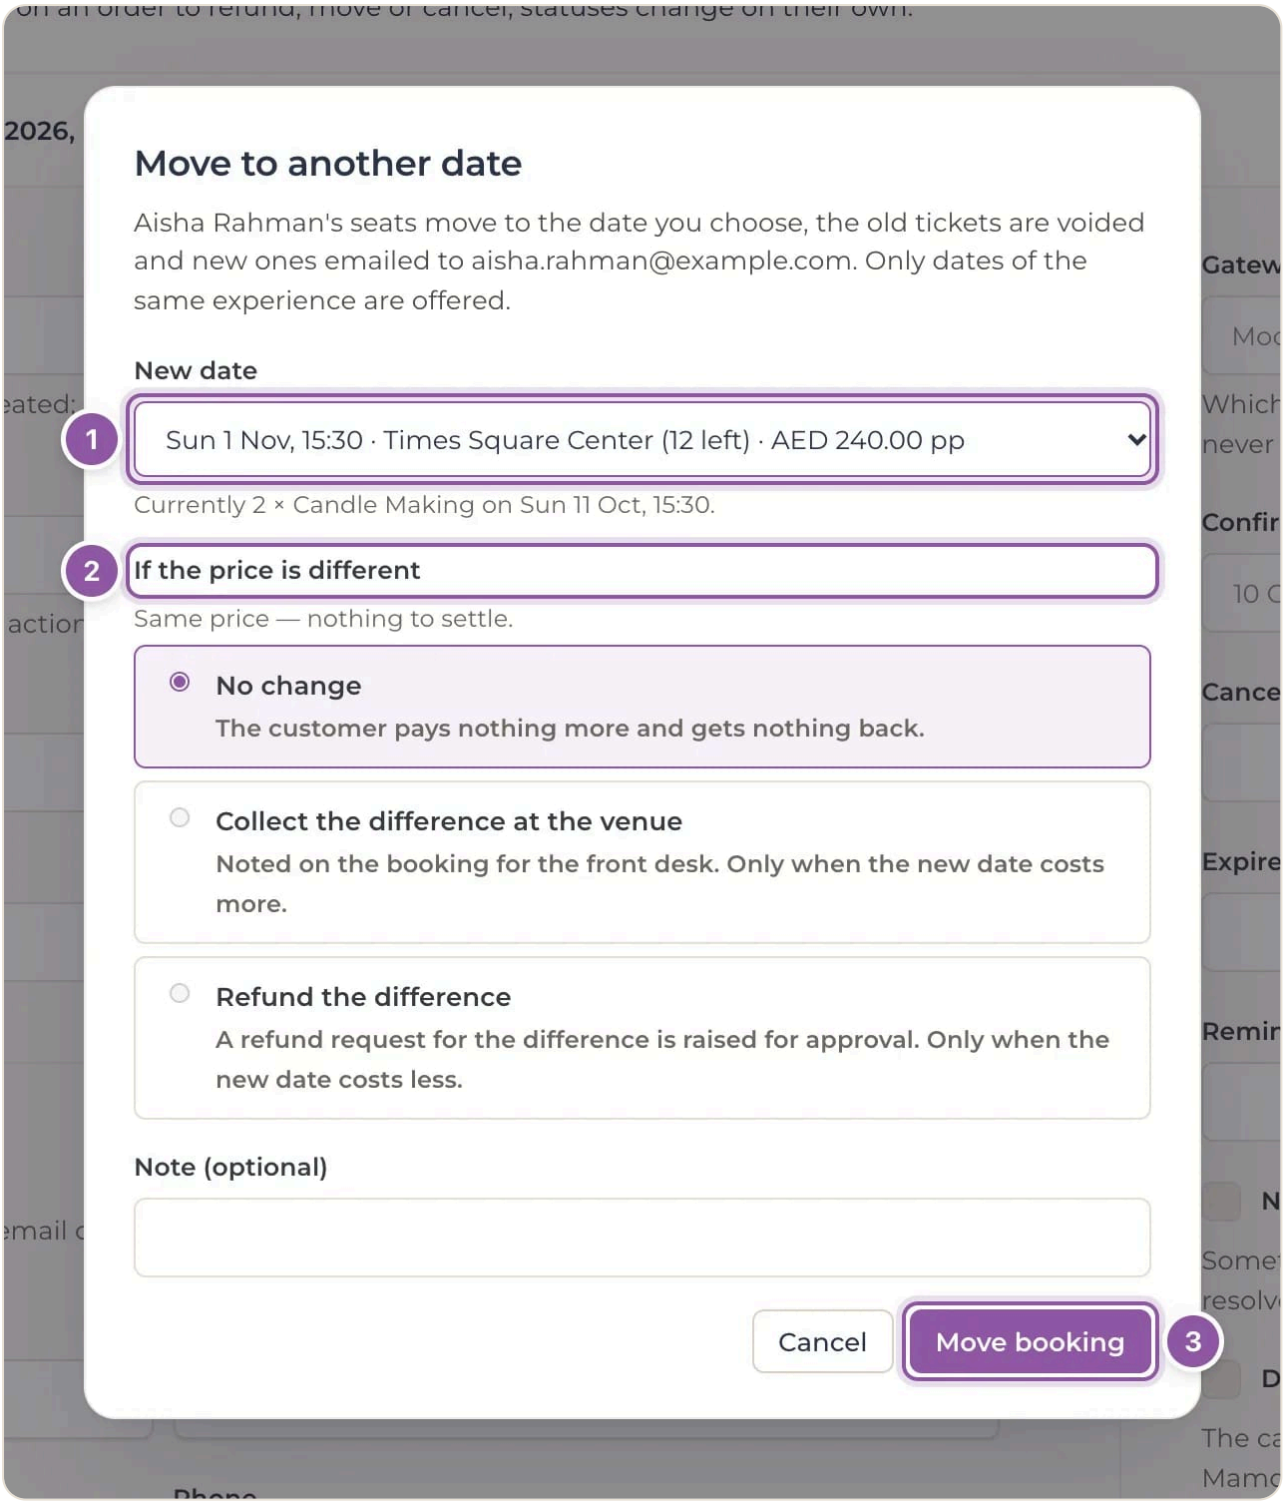

1. On the dashboard, press **Approve →** next to the waiting refund. Or open **Bookings › Refunds**: it shows the refunds that are waiting.
2. Open the order.
3. Press **Actions** › **Approve refund of AED …** (it shows the amount). Mamo Pay returns the money within a few minutes, and the customer is emailed.

TIP

There is no decline button. If you don't want to refund, tell the customer yourself and write why in the order's internal notes, so your team knows.

Move a booking to another date

1. **Actions** › **Move to another date…**. Pick a different session of the same experience 1.
2. If the price is different, choose what happens to the difference 2: no charge, collect at the studio, or refund it.
3. Press **Move booking** 3. The old tickets stop working and the customer is emailed new ones.

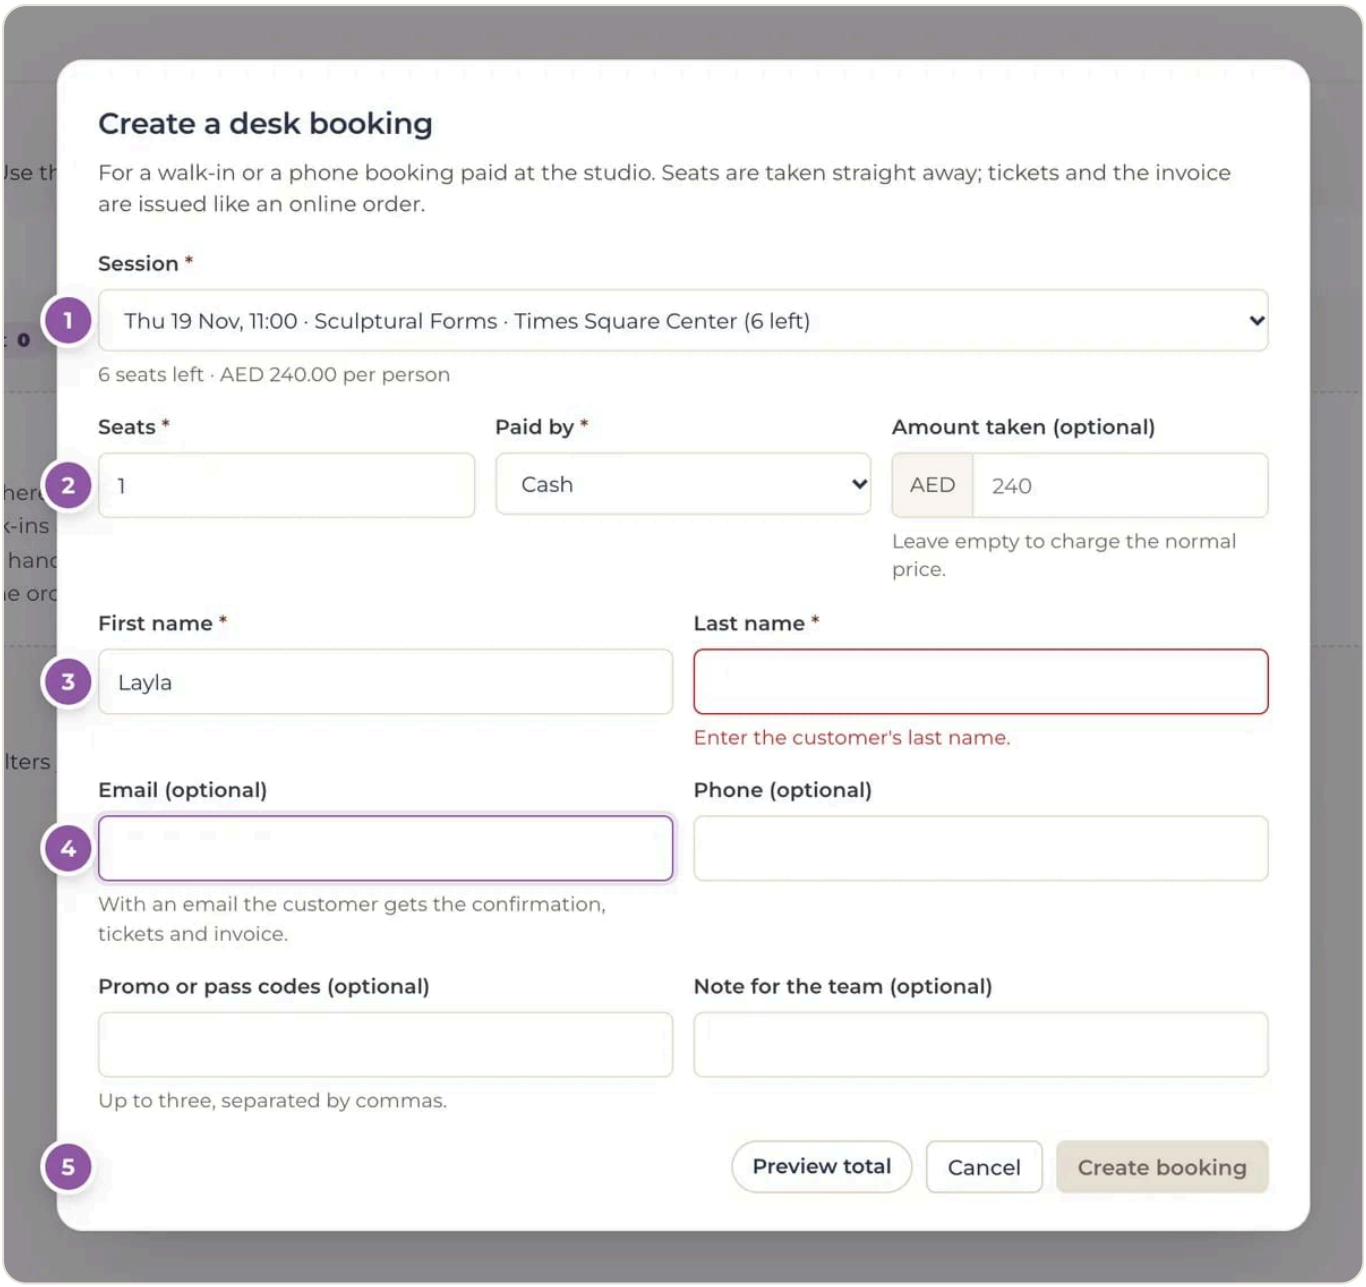

Move to another date…: pick a different session of the same experience. The tickets move with the booking and the customer is emailed the new date.

1. The new date
2. If the price is different — what happens to the difference
3. Move booking — the customer is emailed new tickets

Take a walk-in or phone booking

Bookings › Orders › Create desk booking
Admin · Front desk

1. Choose the session ❶. Each line shows the date, the workshop type (such as *Sculptural Forms*), the venue and the seats left.
2. Set the number of seats and how they paid ❷: cash, card terminal, bank transfer or complimentary. Leave **Amount taken** empty to charge the normal price.
3. Type the customer's **First name** and **Last name** ❸. Both are required (marked *); if one is missing, the box turns red and says, for example, “Enter the customer's last name.”
4. Add their email ❹ so they receive their confirmation, tickets and invoice. A phone number, codes and a note for the team are optional.
5. **Preview total** to check the price, then **Create booking** ❺. It stays greyed out until the session, seats, payment and both names are filled in.

Create a desk booking — for walk-ins and phone bookings paid at the studio. Pick the session, seats and how they paid, and the customer's first and last name; add an email so they get their tickets. Here the last name is still missing, so Create booking stays greyed out.

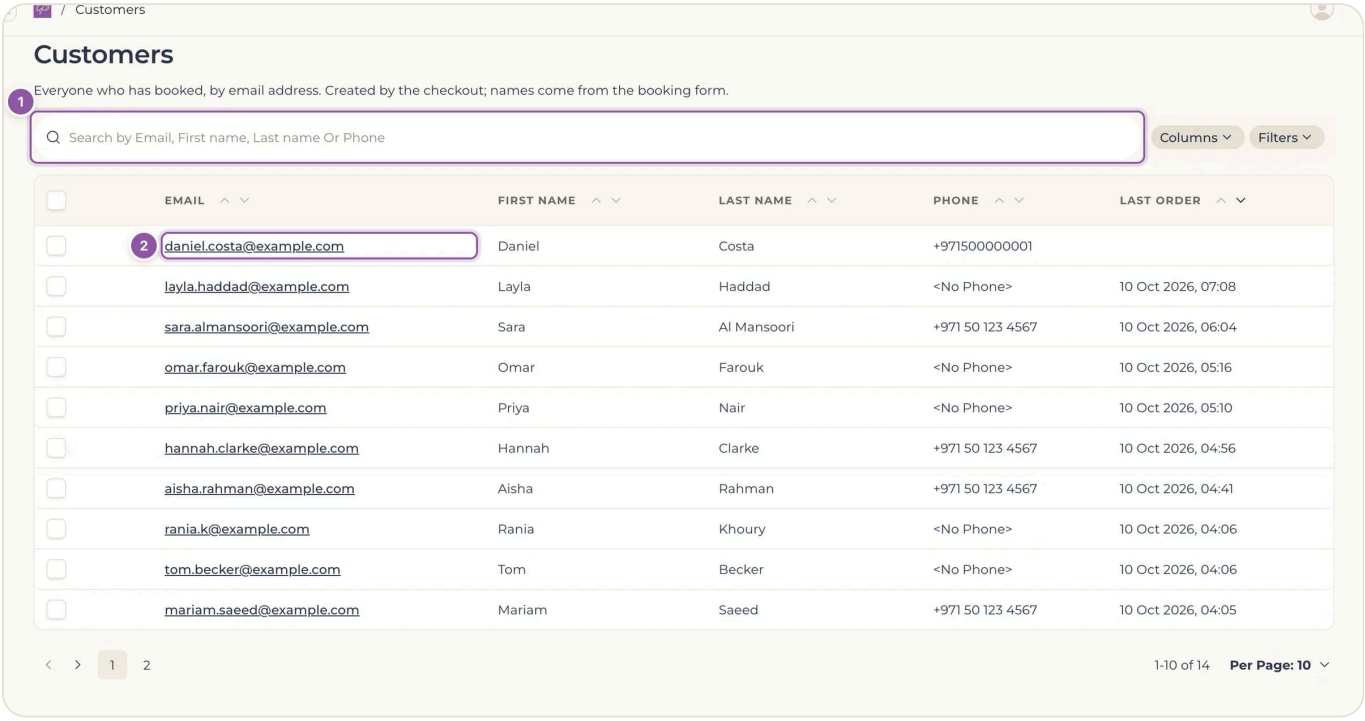

1. Which session
2. Seats and how they paid
3. First and last name — both required (*)
4. Email, so they receive their tickets
5. Preview total, then Create booking

> **TIP**
> Desk bookings work even while online bookings are closed, so you can take bookings in person from day one.

Customers

Bookings › Customers Admin · Front desk (view)

Everyone who has booked, one row per email address. Search by name or email 1 and click to open 2.

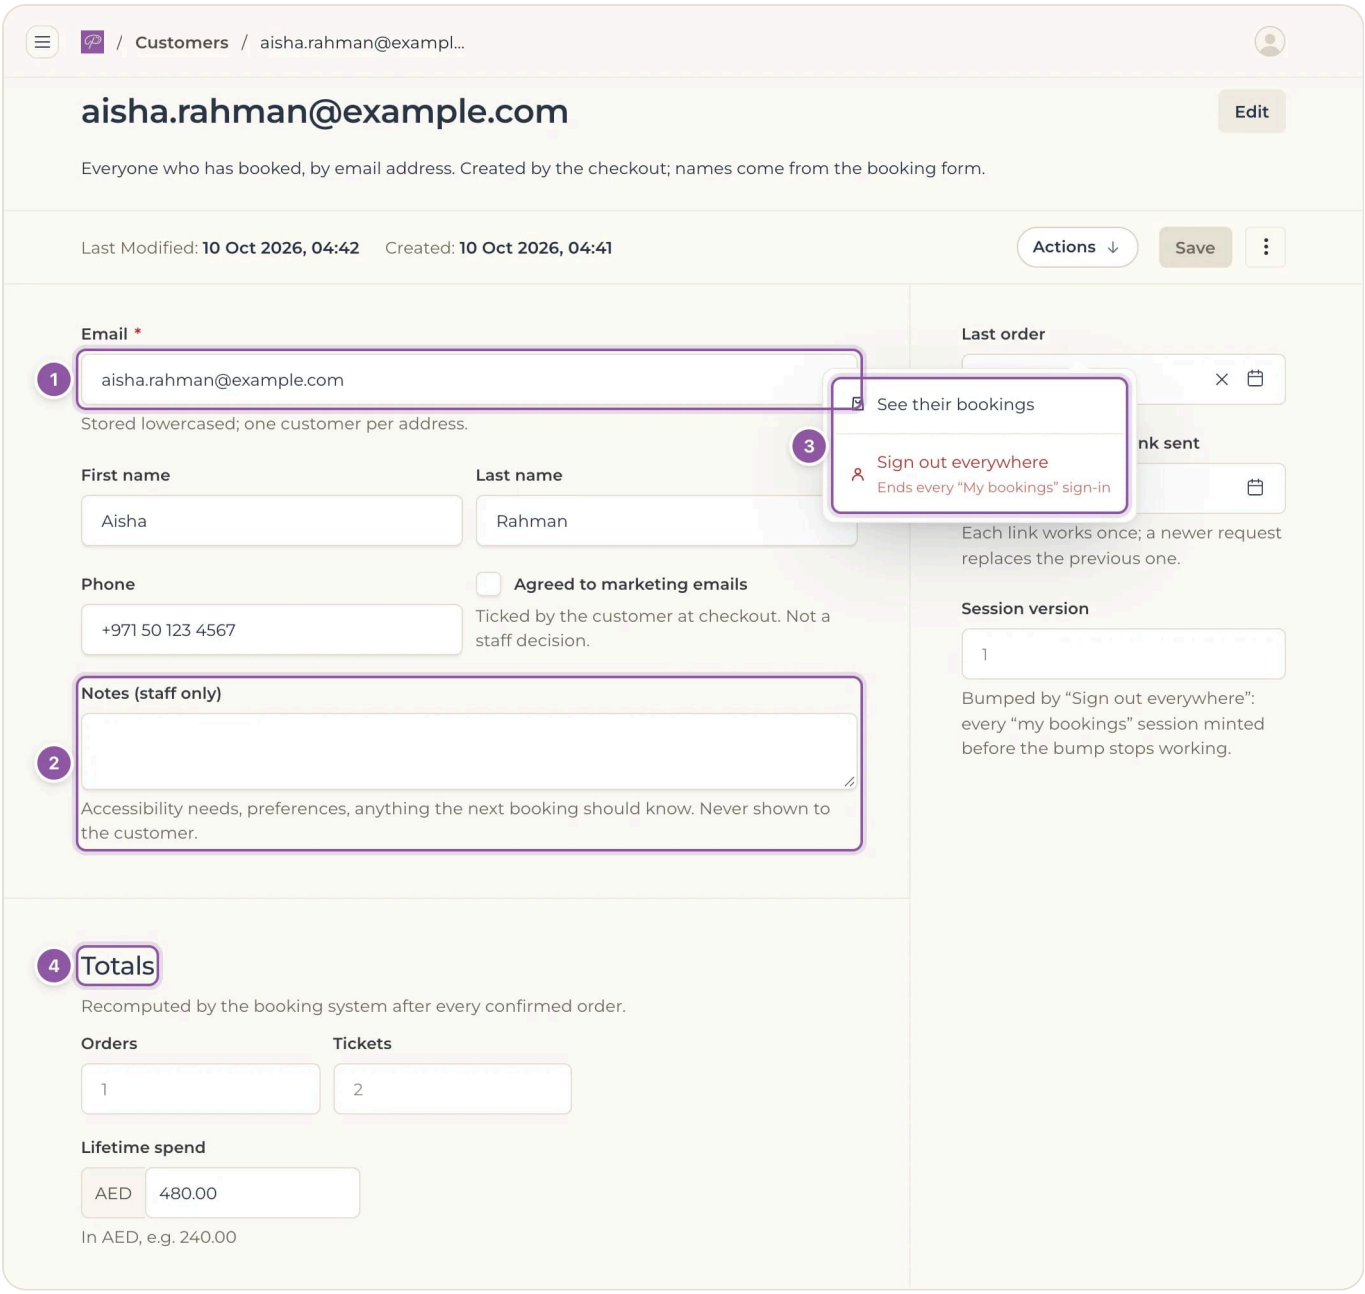

Bookings → Customers: everyone who has booked, one row per email address.

1 Search by name or email

2 Click a customer to open them

A customer shows their contact details 1, staff-only notes 2 such as allergies or preferences, totals 4, and their orders. Under Actions 3, **Sign out everywhere** logs them out of “My bookings” on every device, which is useful if they lose their phone.

A customer: contact details, staff-only notes (allergies, preferences), totals and their orders. Actions → Sign out everywhere logs them out of "My bookings" on every device.

1. Contact details
2. Notes (staff only) — never shown to the customer
3. Actions: See their bookings, or Sign out everywhere
4. Totals — orders, tickets, lifetime spend

IN PLAIN WORDS

Customers don't have passwords. They see their bookings with their reference and email, or with a one-time link sent to their inbox from the website's "My bookings" page.

Promo codes

Bookings › Promo codes Admin

A code gives a percentage or a fixed amount off at checkout: for everything, for chosen experiences, or only certain dates. One code per order.

BOOKINGS › PROMO CODES › NEW (EXAMPLE)

TIP

To stop a code early, untick **Active**. It is then refused at checkout, whatever its dates. How often each code was used shows in Analytics.

CHAPTER 11

Tickets & check-in

Every seat gets its own ticket with a QR code. At the door, your phone becomes the scanner.

IN 30 SECONDS

- Each seat has its own ticket. The code under the QR starts `MPT-`.
- On a phone or tablet open **Front desk › Check-in** and press **Start camera**.
- **Green**: welcome them in. **Amber**: stop and read. **Red**: don't let them in; look up the booking.
- No camera or the QR won't scan? Type the code instead.
- Sessions are listed by their workshop type, such as *Crochet — Beginners*.

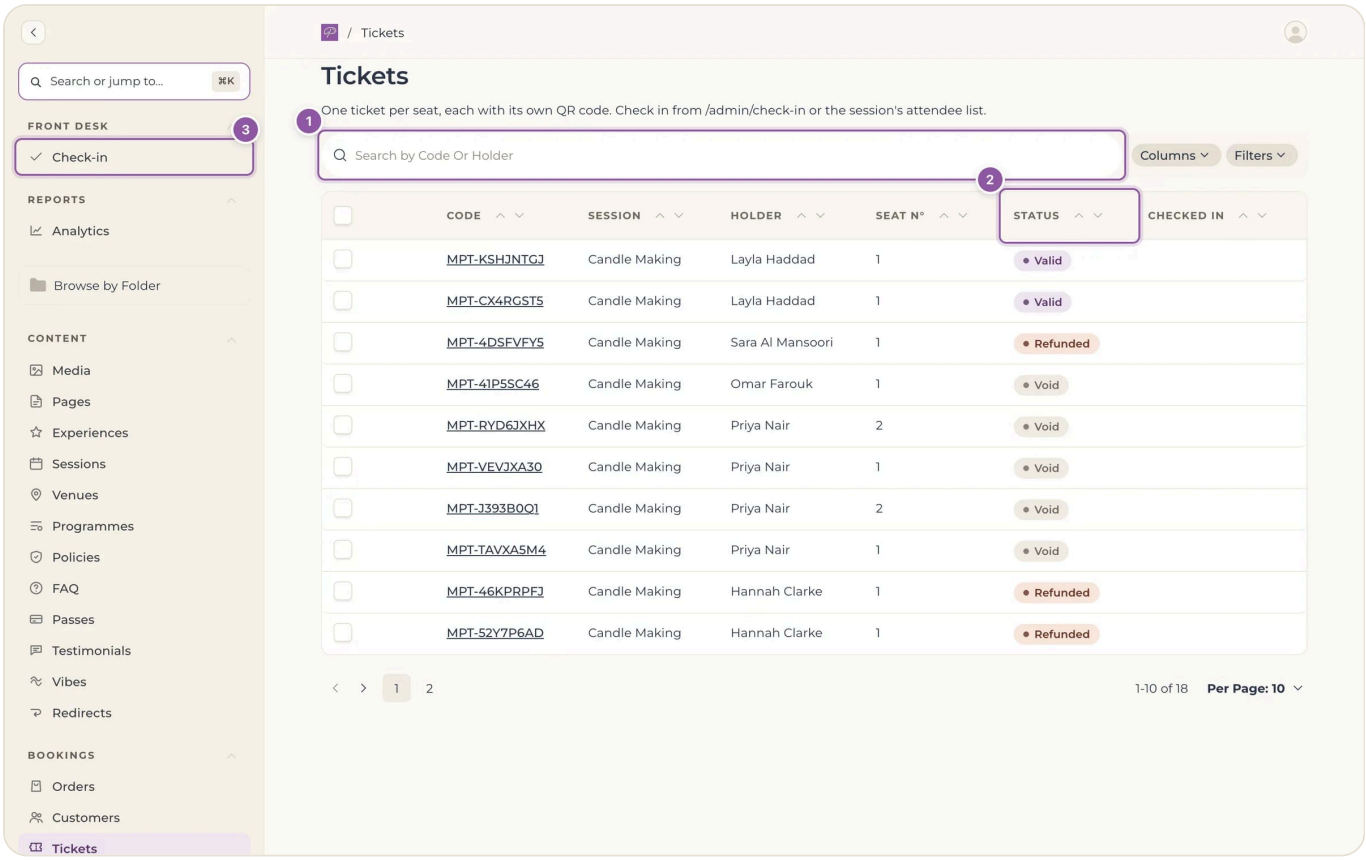

IN THIS CHAPTER

All tickets 110
Scan a ticket 113
Open check-in on your phone 111
What the colours mean 114

All tickets

Bookings › Tickets Admin · Front desk

1. Search by ticket code or holder (1).
2. Each ticket's status (2): Valid, Checked in, Refunded or Void.
3. **Check-in** (3) opens the door scanner.

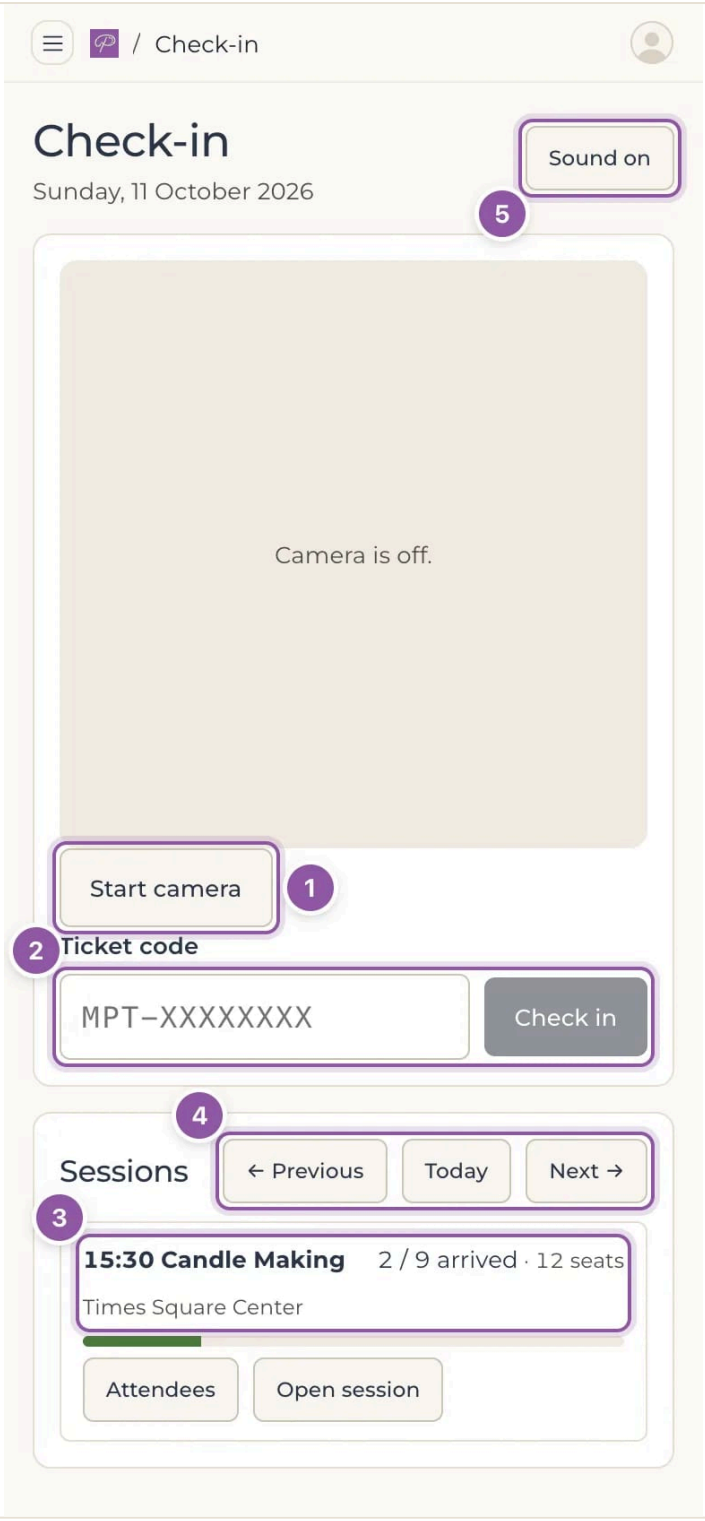

Bookings → Tickets: one ticket per seat, with its code, holder and status (Valid, Checked in, Refunded, Void). Search by code or name.

1. Search by ticket code or holder
2. Status of each ticket
3. Check-in — open the door scanner

Open check-in on your phone

1. On your phone, log in to the admin and open **Front desk › Check-in**.
2. Turn **Sound on** 5 for a beep on each scan.
3. Today's sessions are listed 3 with how many have arrived. **Previous** / **Next** 4 look at other days.
4. Press **Start camera** 1, or type a ticket code 2.

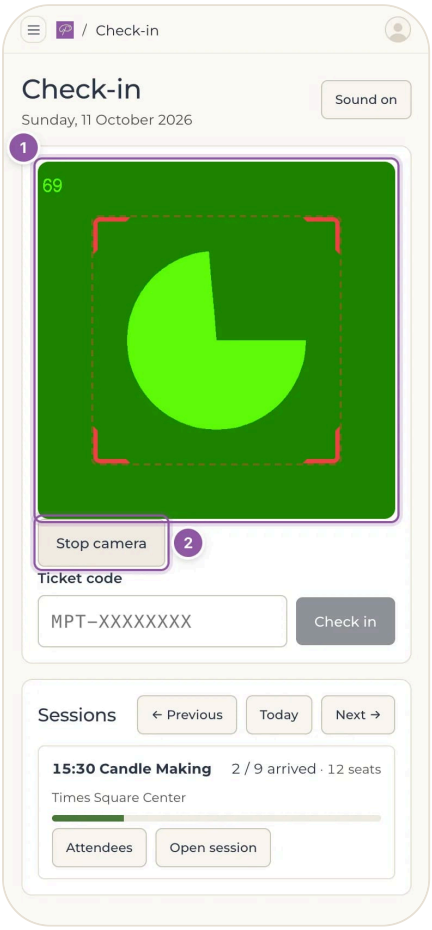

Front desk → Check-in, on a phone. Start the camera to scan tickets, or type the code printed under the QR. The day's sessions and arrivals are listed below.

1. Start camera
2. Or type the ticket code (MPT-…) and press Check in
3. Today's sessions — arrived so far, and the attendee list
4. Look at another day
5. Sound on — a beep for each scan

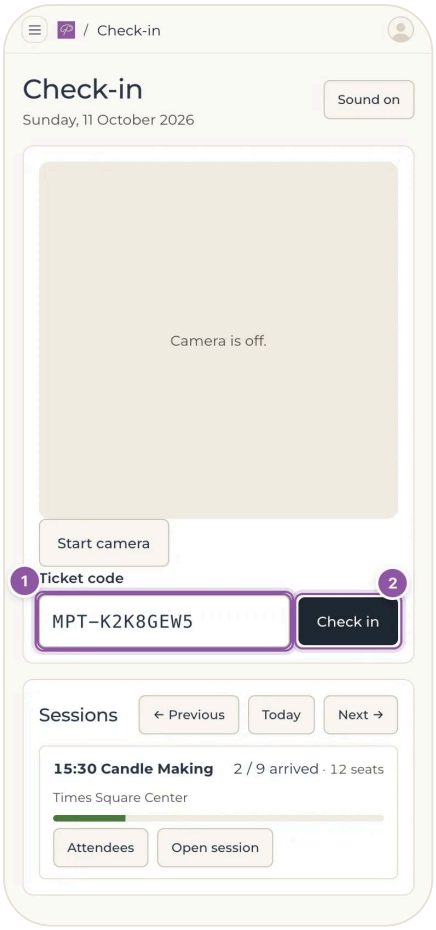

> **TIP**
>
> The first time, your phone asks to use the camera. Press **Allow**. Add the check-in page to your home screen so it opens like an app.

Scan a ticket

Scanning: hold the customer's ticket QR code (on their phone or printed) inside the frame. Each scan gives a big green, amber or red answer straight away. (This picture uses a test camera image.)

1. Hold the QR code inside the frame
2. Stop the camera when you are done

No camera, or a QR that will not scan? Type the code printed under it (it starts MPT-) and press Check in.

1. The ticket code
2. Check in

Left picture, scanning:

1. Hold the customer's QR code inside the frame 1, on their phone or on paper.
2. The answer appears straight away in large type.

3 Stop camera 2 when the session has started.

Right picture, no camera or a QR that won't scan:

1 Type the code printed under the QR 1. It starts `MPT-`.

2 Press Check in 2.

What the colours mean

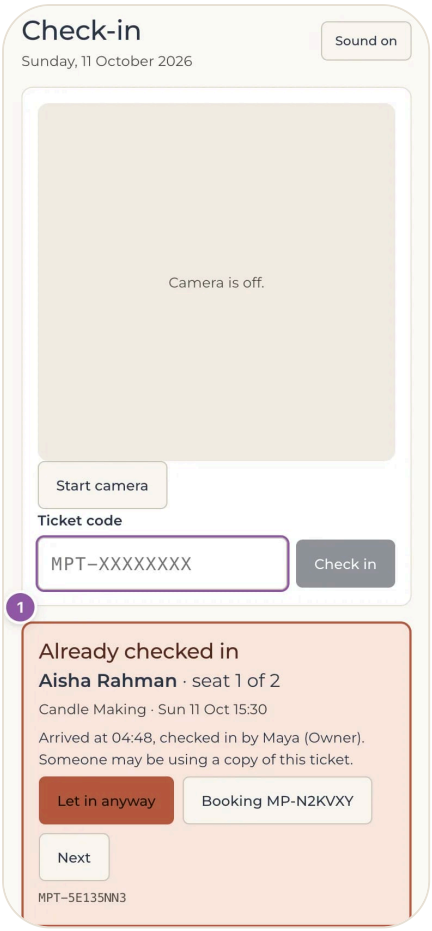

THE ANSWER AFTER A SCAN

Welcome — checked in
Layla Haddad · seat 1 of 2
Let them in.

Already checked in
Arrived at 15:21, checked in by Sara.
Stop and read. Ask, then decide.

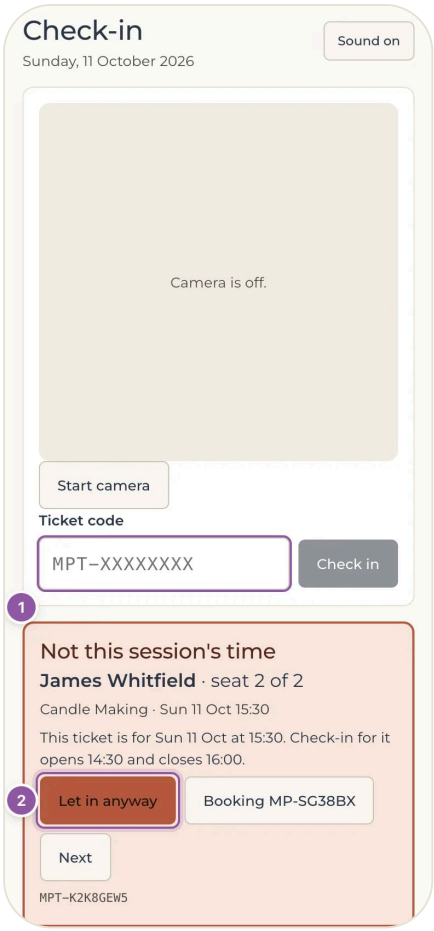

Ticket refunded — do not admit
This seat was refunded.
Don't let in. Look up the booking.

Amber answers are “already checked in” and “not this session's time”. Red answers are “ticket cancelled”, “ticket refunded” and “no ticket with this code”. Red can never be overridden.

Already checked in: the ticket was scanned before — the screen shows when and by whom, so a shared screenshot of a ticket cannot be used twice.

1. Who this ticket belongs to and when it was first used

A coloured box means “stop and look” — here the ticket is for a different time. You can still let them in on purpose with Let in anyway; that choice is written on the booking. A valid ticket shows a green welcome instead.

1. The answer, in large type
2. Let in anyway — only if you are sure

GOOD TO KNOW

Let in anyway appears only on amber answers. Use it when you are sure, for example a guest who came on the wrong day and you have space. Your choice is written on the booking with your name.

NEVER DO THIS

Never let someone in on a red answer without looking up their booking first. Ask for their booking reference or email and search for it with ⌘K.

CHAPTER 12

Enquiries

Every message sent through the website lands in one inbox, so nothing gets lost in someone's personal email.

IN 30 SECONDS

- Inbox › Enquiries holds every message from the contact and private-events forms.
- Statuses: **New → In progress → Closed**. **Possible spam** is set by the website itself for suspicious messages.
- Reply by email opens your own mail app with the reference in the subject.
- Assign each enquiry to a colleague so everyone knows who is answering.
- The website checks the name, email and phone before a form is sent, so enquiries arrive with contact details you can use.

IN THIS CHAPTER

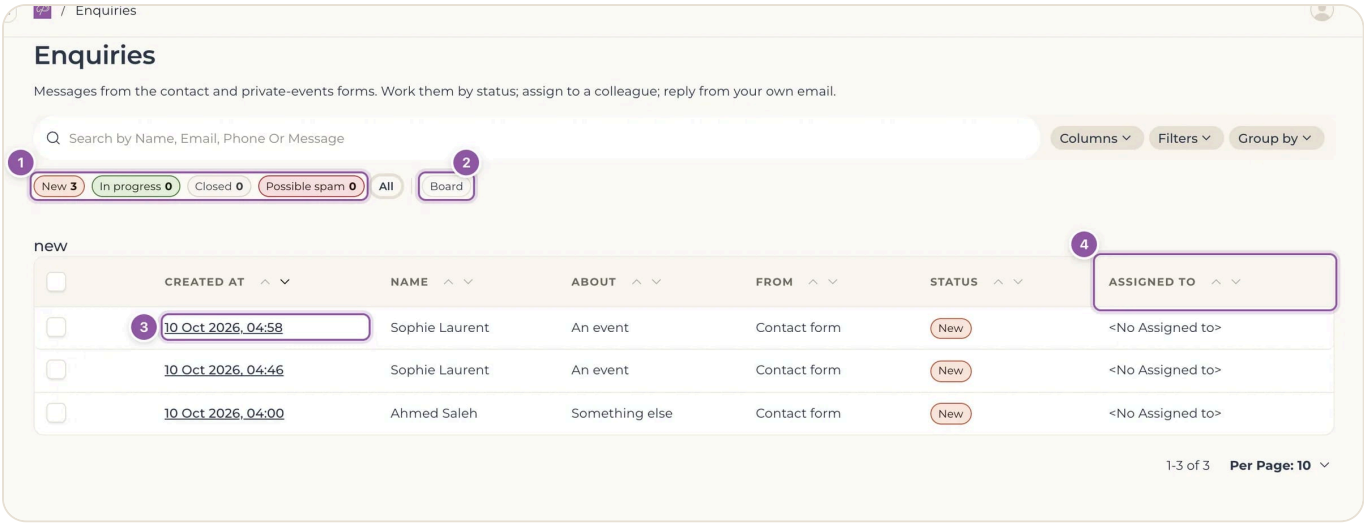

The inbox 116
Read and reply 117

The inbox

Inbox › Enquiries Everyone

1. Filter with the chips 1: New, In progress, Closed and Possible spam.
2. See who is looking after each one 4.
3. Click the date 3 to open an enquiry.
4. Prefer columns? Press Board 2.

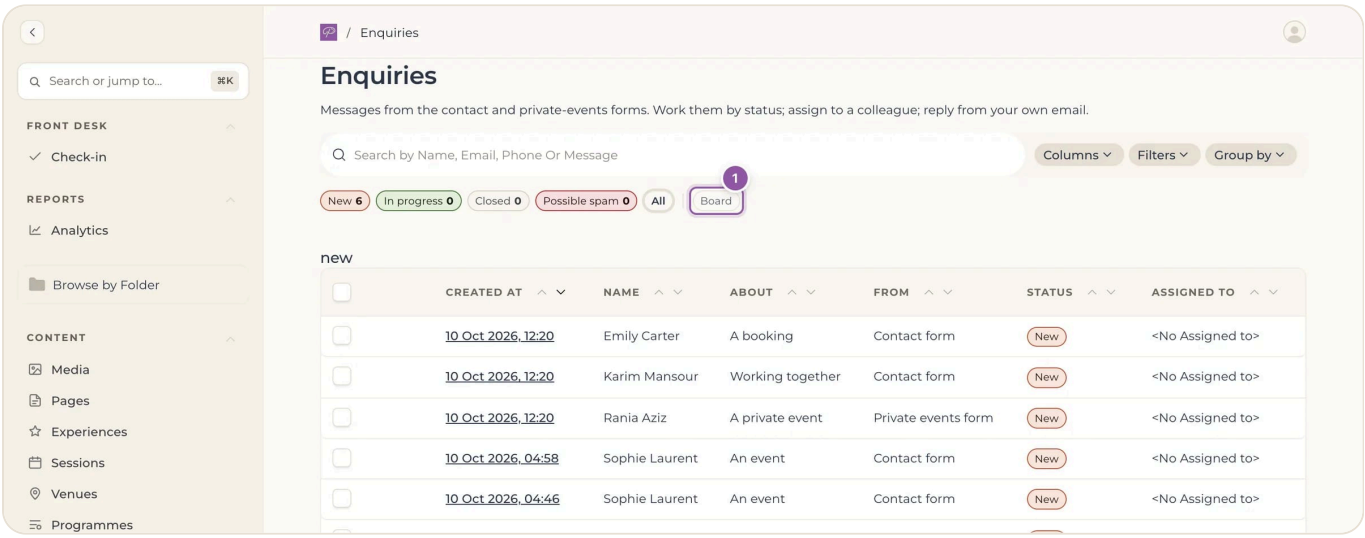

> **SPAM**
>
> **Possible spam** is set automatically for suspicious messages; you can't choose it yourself. Check that chip now and then in case a real message landed there. For junk that got through, set it to **Closed**.

Inbox → Enquiries: every message from the contact and private-events forms. The chips filter by status; Possible spam is set by itself for suspicious messages. Board shows them as columns.

1. Filter chips: New, In progress, Closed, Possible spam
2. Board view
3. Click the date to open an enquiry
4. Who is looking after it

The board groups enquiries by status 1, a quick way to see what still needs a reply. Click **Board** again to switch back.

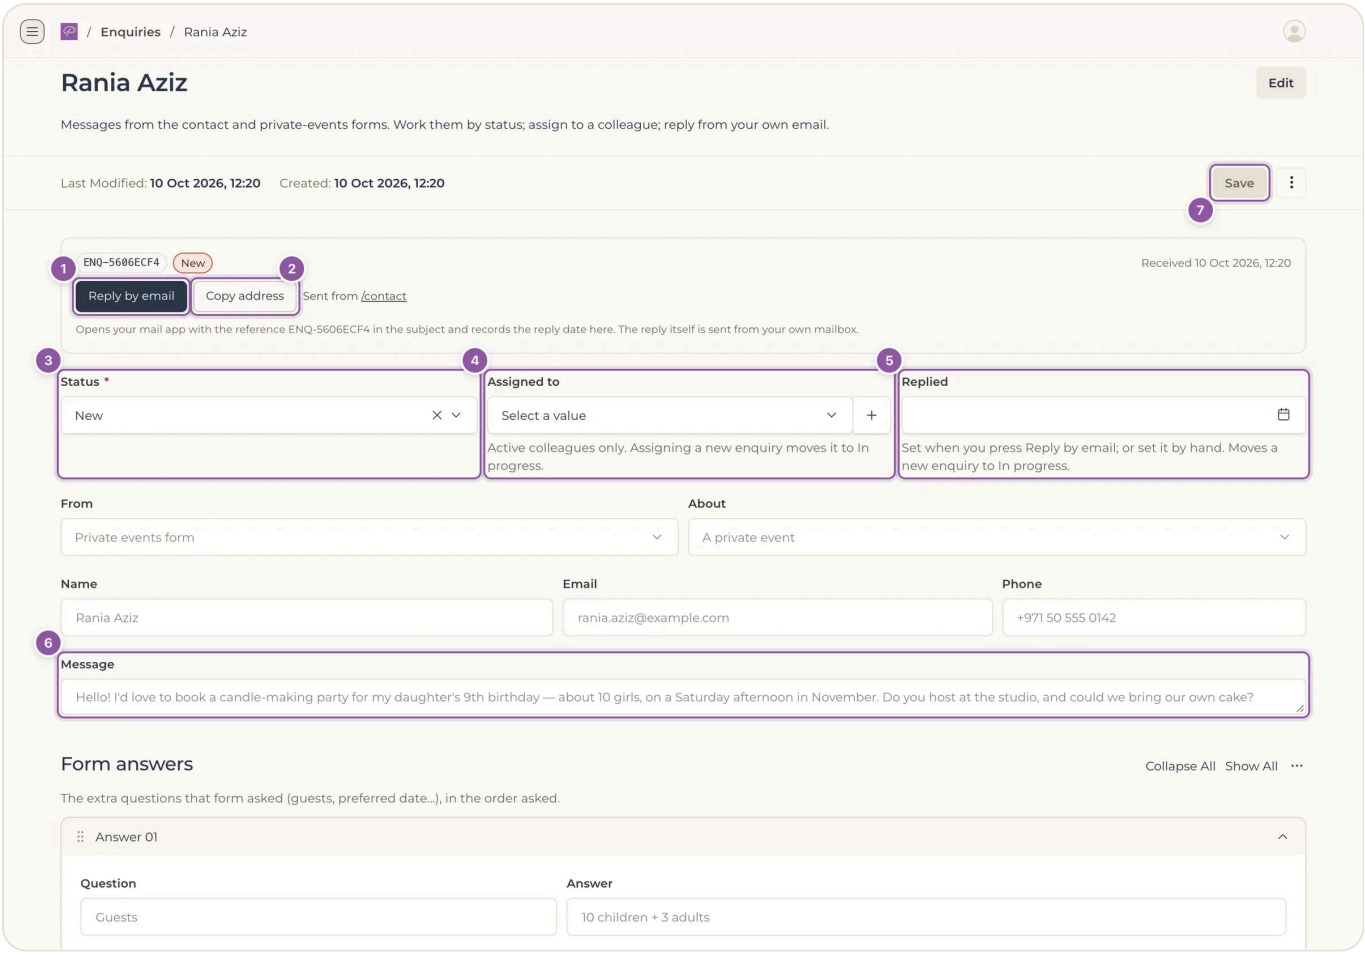

Board groups the enquiries by status — a quick way to see what still needs a reply. Click Board again to switch back.

1. Board is on

Read and reply

1. Read the message 6.
2. Press **Reply by email** 1. Your mail app opens with the address and reference filled in, and the reply date 5 is noted here.
3. If your mail app doesn't open, press **Copy address** 2 and paste it into a new email.

4 Set the status 3 and who is looking after it 4, then **Save** 7.

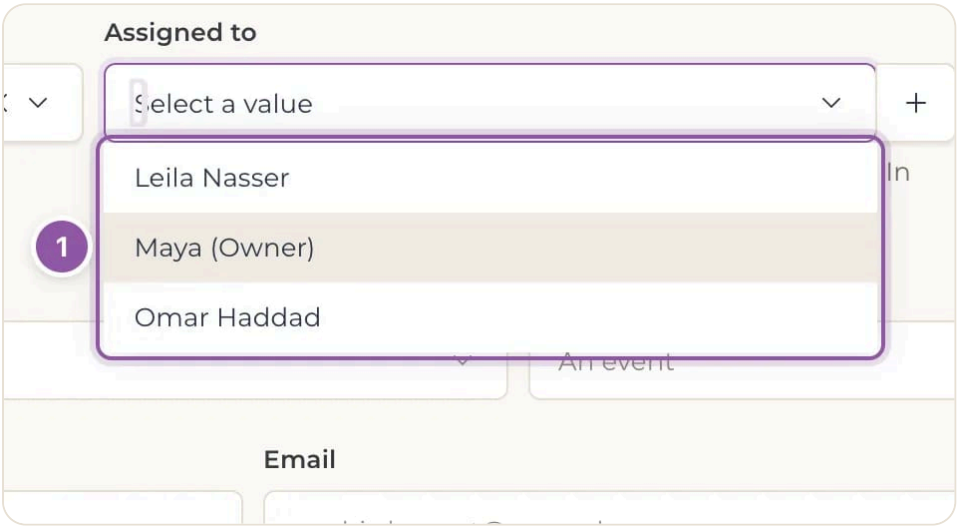

An enquiry. Reply by email opens your own mail app with the reference in the subject, and notes the reply date here. Set the status and who is looking after it, then Save.

1. Reply by email — opens your mail app
2. Copy address — if you prefer to paste it
3. Status — New, In progress, Closed
4. Assigned to — a colleague
5. Replied — filled in when you press Reply by email
6. The message
7. Save

Status: New → In progress → Closed. Possible spam is set by the website itself, never by hand; for junk that got through, choose Closed.

1 Pick the status, then Save

Assigning: pick a colleague from the list (only active staff are shown). Assigning a new enquiry moves it to In progress.

1 Choose who looks after it

> **TIP**
>
> Assigning a **New** enquiry moves it to **In progress** by itself. Aim to reply to new enquiries within one working day.

CHAPTER 13

Emails & notifications

The website sends booking confirmations, tickets, refunds, reminders and notes to your team. You choose the words, and you can always see what went out.

IN 30 SECONDS

- **Emails › Email templates** : the wording of every email the site sends.
- Words in `{{double braces}}` are filled in for each customer. Move them, but don't change them.
- **Emails › Sent emails** shows every email and whether it was delivered. Resend from there.
- **Settings (admin) › Who gets notified** decides who on your team is emailed about what.

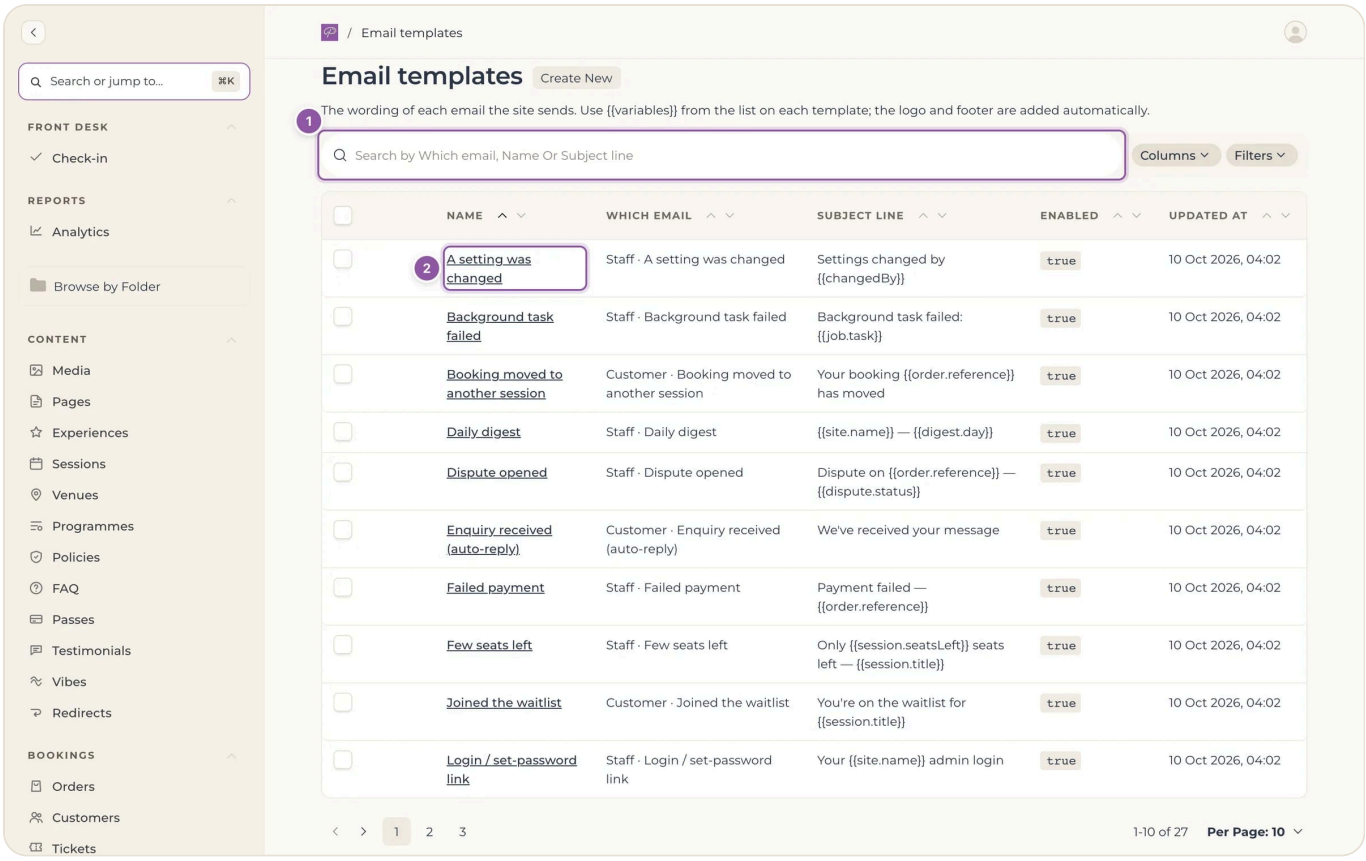

IN THIS CHAPTER

Change an email's wording 120
See what was sent 124
Who gets notified 125
Preview and send yourself a test 123
Resend an email 124

Change an email's wording

Emails › Email templates Admin · Editor

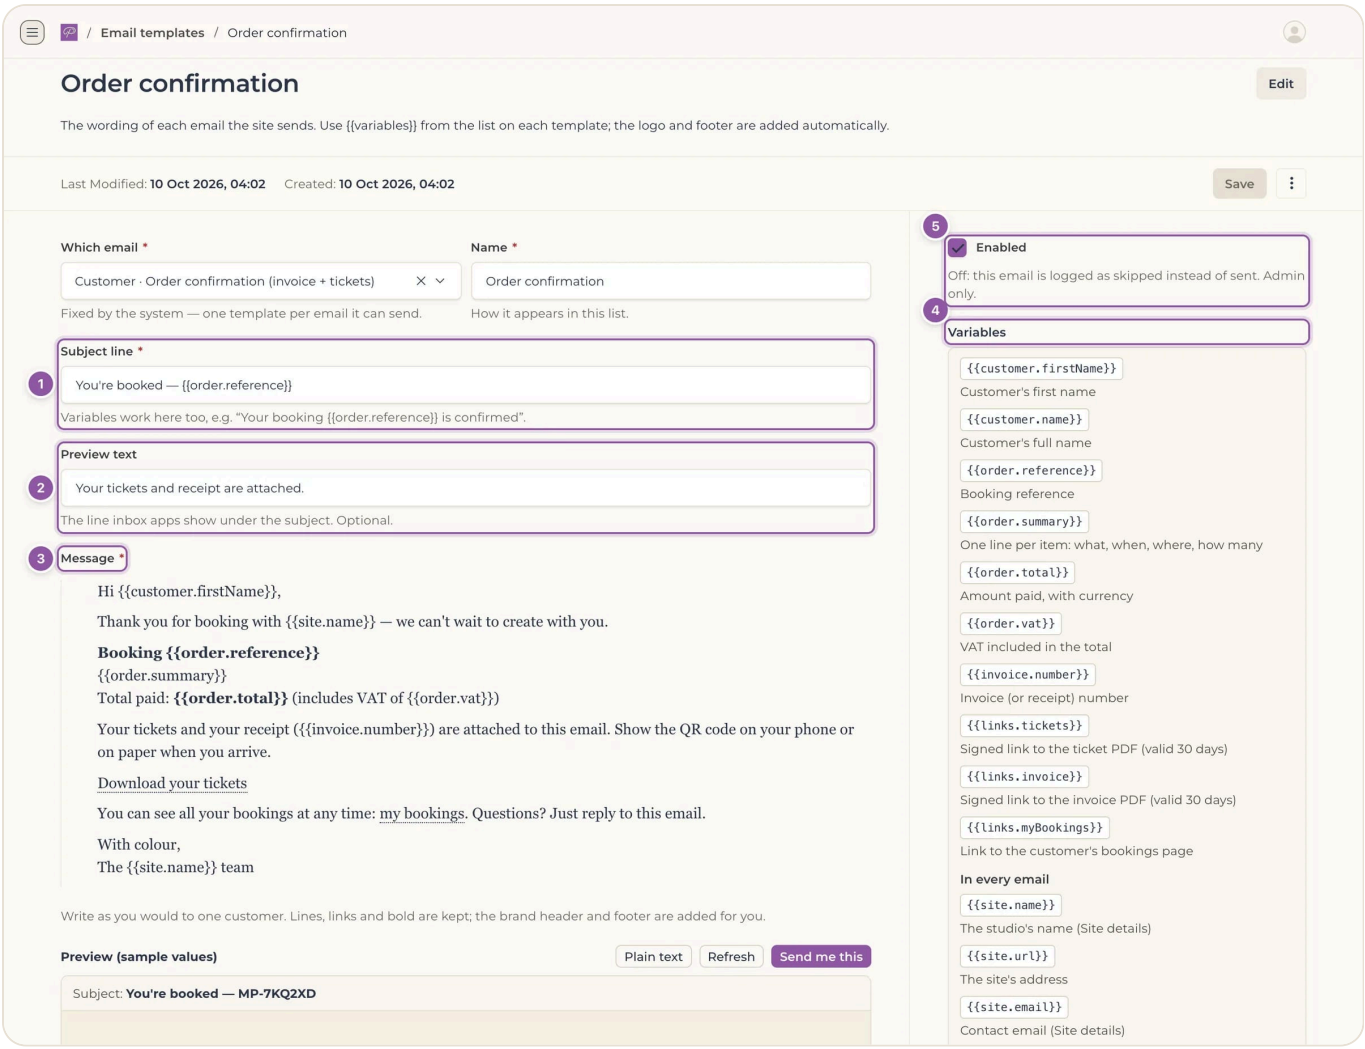

1 Search for an email by name ❶ and click it ❷.

Emails → Email templates: the wording of every email the site sends — booking confirmations, refunds, reminders, and the notes to your team.

1. Search for an email by name
2. Click one to change its wording

1. Write the subject line 1 and the preview text 2, the grey line under the subject in an inbox.
2. Write the message 3 as you would to one customer.
3. The list on the right 4 shows the `{{variables}}` you can use and what each becomes.
4. **Enabled** 5: untick to stop sending this email.

An email template: the subject, the preview line, and the message. Words in {{double braces}} are filled in for each customer — the list on the right says what each one becomes.

1. Subject line
2. Preview text — the grey line under the subject in inboxes
3. The message — write as you would to one customer
4. Variables you can use, and what they become
5. Enabled — untick to stop sending this email

WHAT THE CUSTOMER RECEIVES

You write	Layla receives
Hi `{{customer.firstName}}`, you're booked for `{{session.title}}` on `{{session.when}}`. Your reference is `{{order.reference}}`.	Hi Layla, you're booked for Sculptural Forms on Thursday 19 November at 18:30. Your reference is MP-7K2QX.

NEVER DO THIS

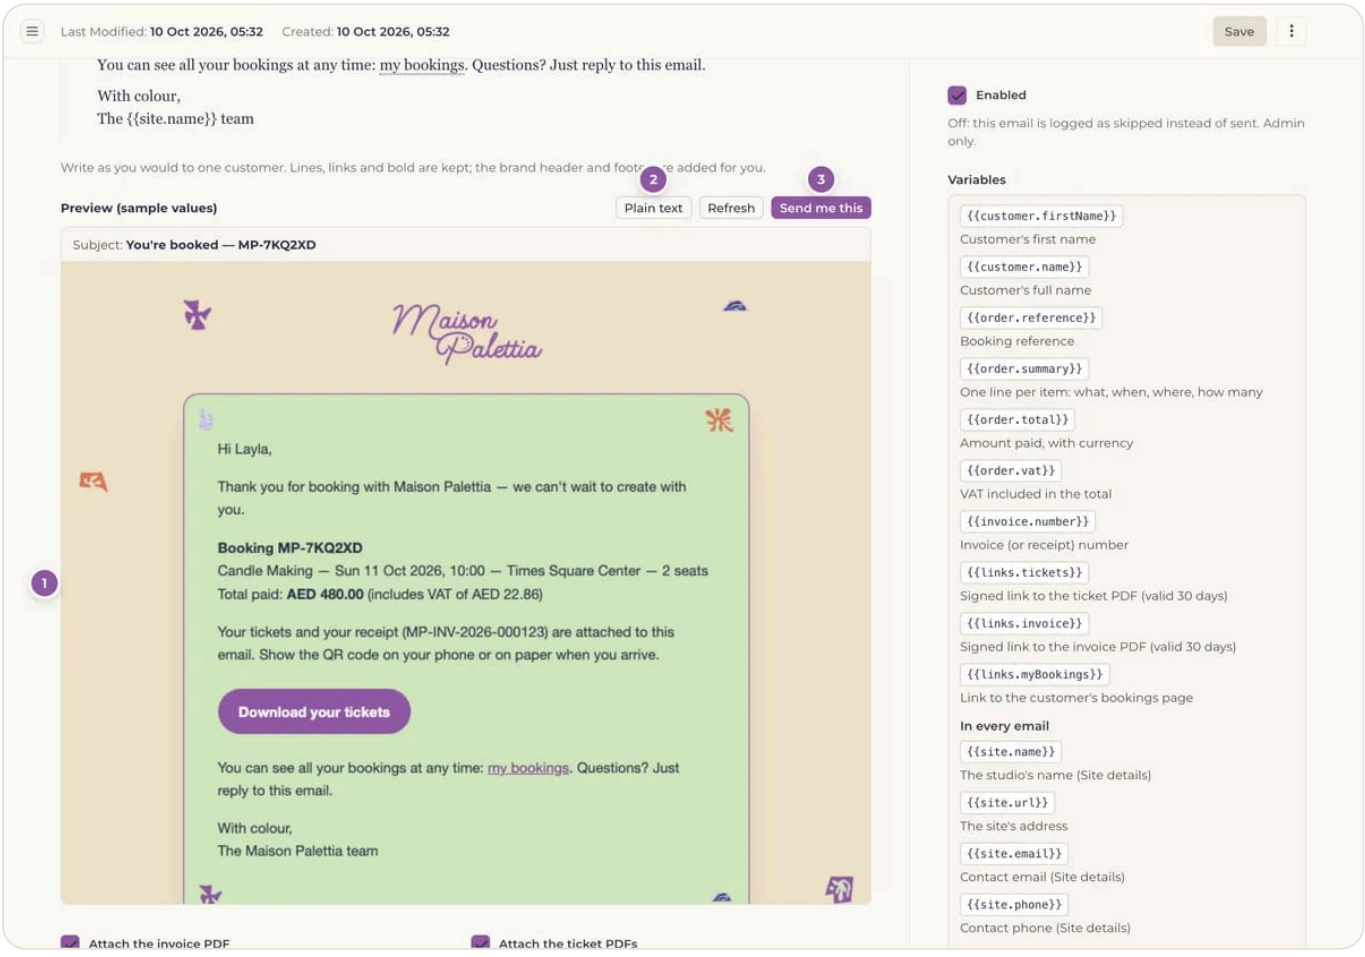

Never retype or rename the words inside `{{double braces}}`. A misspelt one prints as a blank. Copy them from the list on the right.

Preview and send yourself a test

1. Below the message, check the live preview with sample values (1) and the plain text version (2).
2. Press **Send me this** (3) for a test copy in your own inbox.

GOOD TO KNOW

Every email now wears the studio's look: a cream background with the logo, a soft green card with a lilac border, small hand-drawn doodles in the corners, a lilac pill button and a footer with your contact details. You only write the words; the design is added for you.

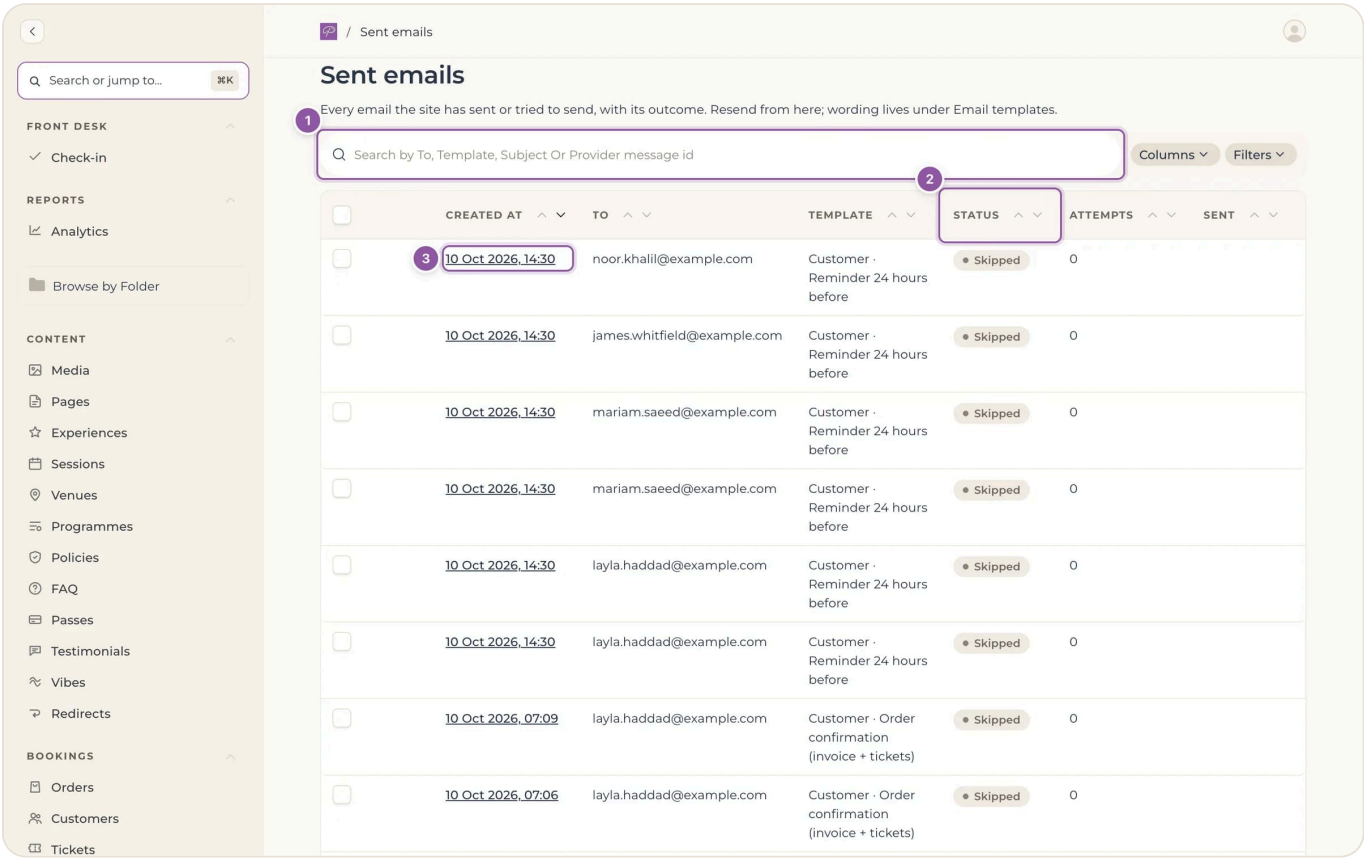

Below the message, a live preview with sample values shows exactly what the customer will receive: the cream background, the logo, the soft green card with a lilac border, small hand-drawn doodles and a lilac button. Send me this emails the preview to you.

1. Preview with sample values
2. Plain text version
3. Send me this — a test copy to your own inbox

See what was sent

Emails › Sent emails Admin · Front desk (view)

1. Search by email address or subject 1.
2. Check the status 2: **Sent**, **Failed** or **Skipped**.
3. Click a subject 3 to open it.

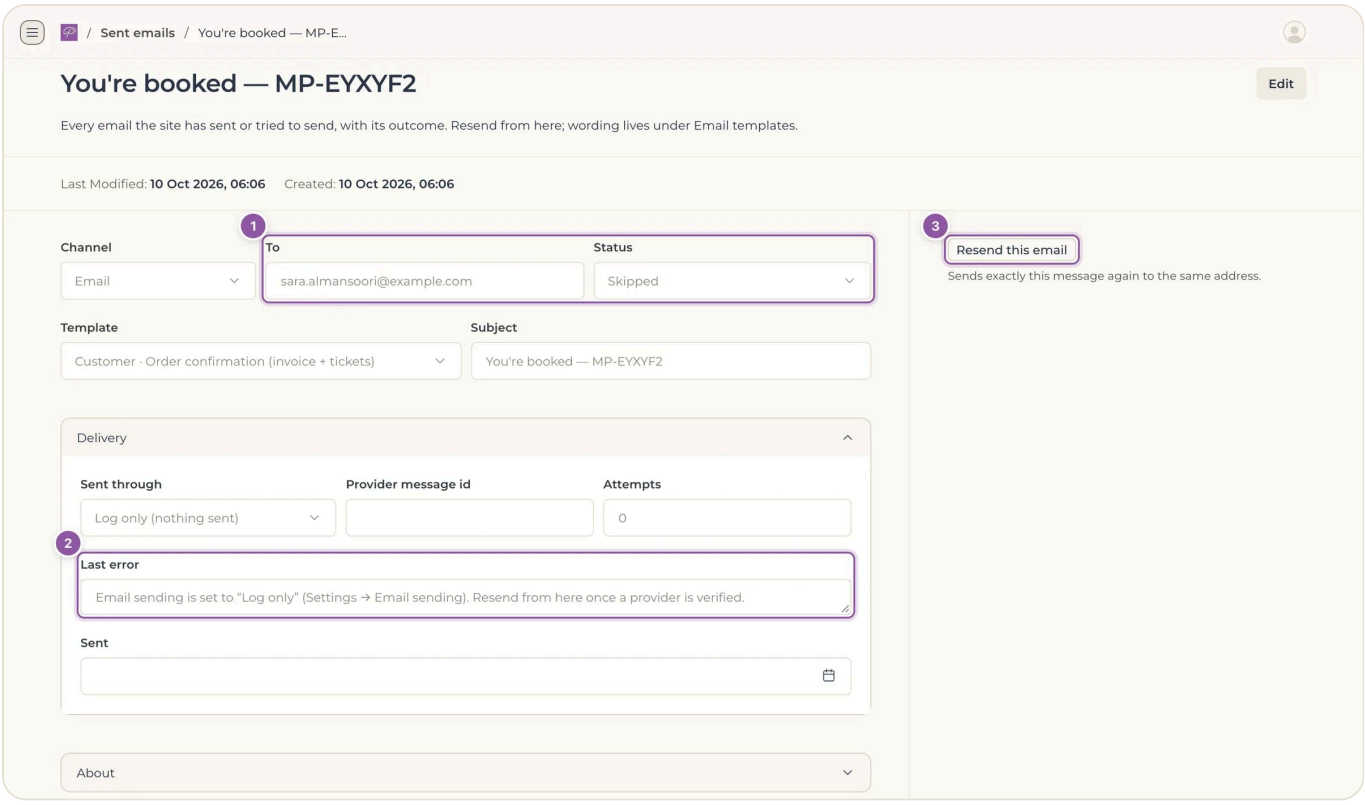

Emails → Sent emails: every email the site has sent or tried to send, with its outcome. Search by address or booking reference.

1. Search by email address or subject
2. Status — Sent, Failed or Skipped
3. Click a subject to open it

Resend an email

Admin

One email shows who it went to and what happened 1, and why it wasn't sent if it wasn't 2. **Resend this email** 3 sends the same message again.

One sent email: who it went to, which template, and what happened. Resend this email sends the same message again — useful when a customer says it never arrived.

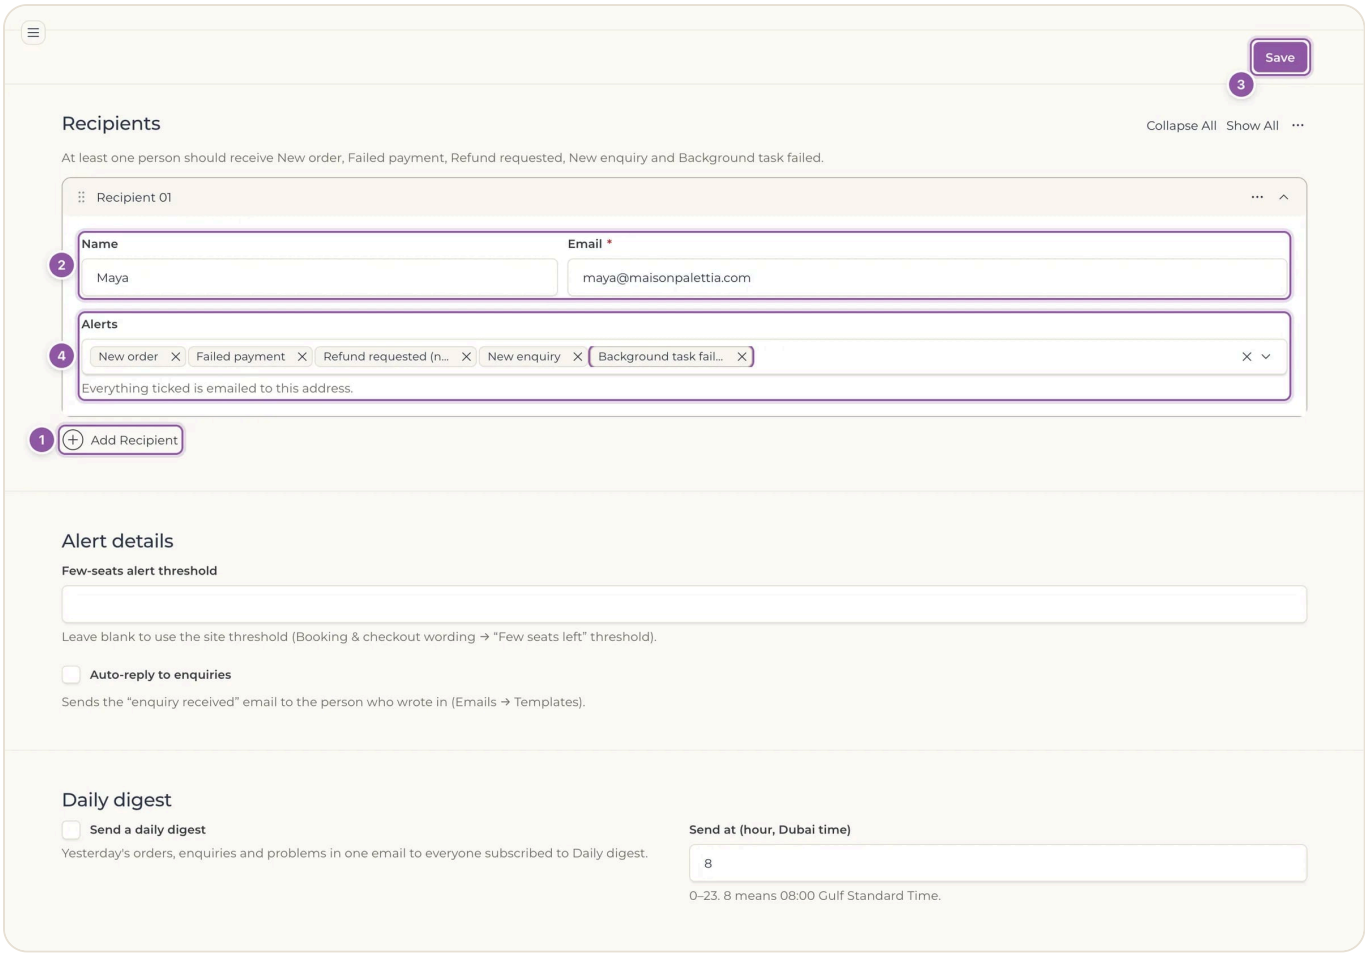

1. To, and the outcome
2. Why it was not sent (if it wasn't)
3. Resend this email

> **TIP**
>
> For tickets, the quickest way is the order itself: **Actions** › **Resend tickets**. Front desk can do that too. Emails older than 30 days can only be resent from the order.

Who gets notified

Settings (admin) › Who gets notified Admin only

1. **Add Recipient** 1: one row per person.
2. Their name and email 2.
3. Tick what they should be emailed about 4. At least: New order, Failed payment, Refund requested, New enquiry and Background task failed.
4. **Save** 3.

Settings (admin) → Who gets notified. Add a row per person and tick what they should be emailed about — at least New order, Failed payment, Refund requested, New enquiry and Background task failed.

1. Add Recipient — one row per person
2. Their name and email
3. Save
4. Alerts — everything ticked here is emailed to them

CHAPTER 14

Analytics & exports

See how the studio is doing, and give your accountant exactly what they need, in a couple of clicks.

IN 30 SECONDS

- **Reports › Analytics** : sales and website visits for the dates you choose.
- Pick 7, 30 or 90 days, or **Choose dates** for a month, quarter or VAT period.
- The VAT summary and invoice spreadsheet are ready for your accountant.
- Editors see visitor numbers only. Sales and downloads are for the owner.

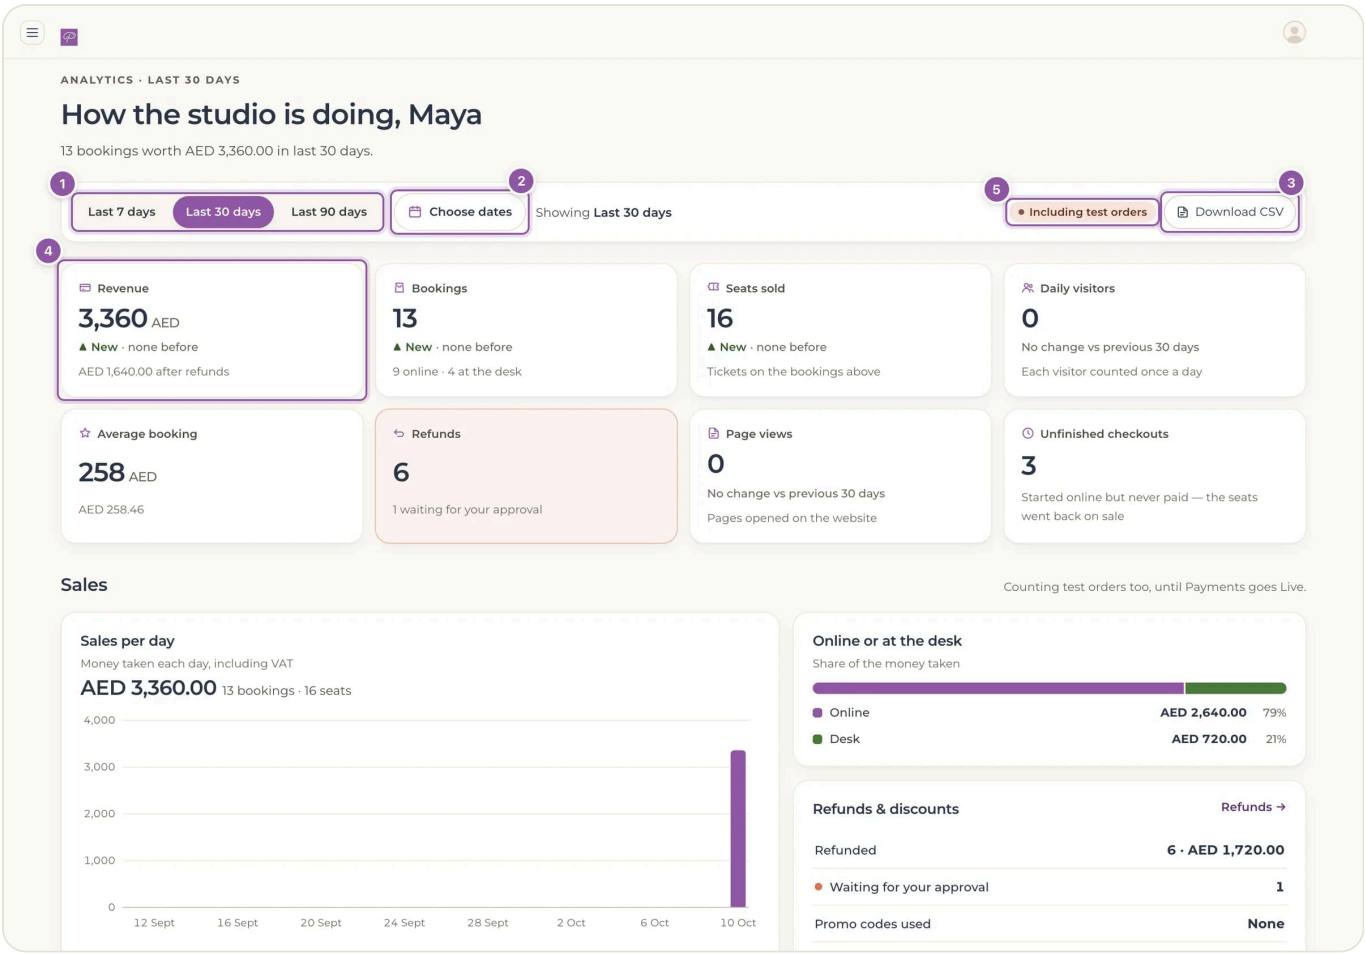

IN THIS CHAPTER

The overview 127
VAT summary and exports for your accountant 130
Sales 129
Visitor counting and tracking 131

The overview

Reports › Analytics **Admin · Editor (visitors only)**

1. Pick the last 7, 30 or 90 days ❶, or **Choose dates** ❷.
2. Read the headline numbers ❹, compared with the period before.
3. **Download CSV** ❸ for a spreadsheet of these figures.

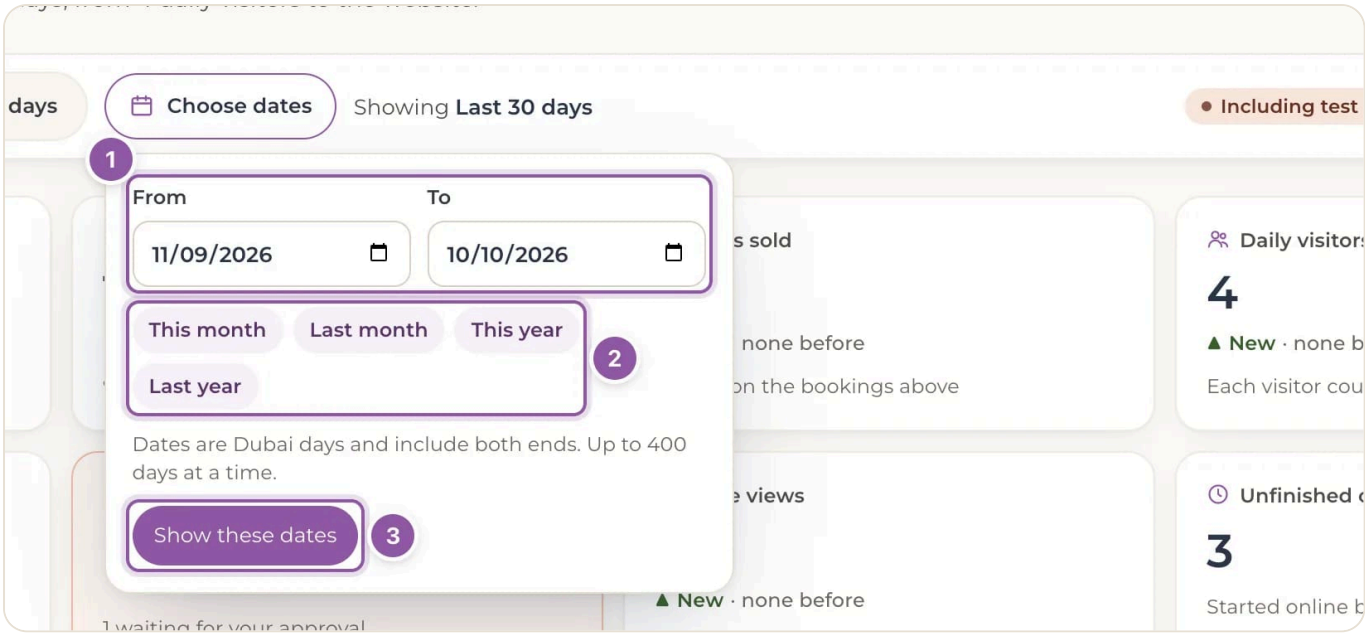

Reports → Analytics: sales and website visits for the dates you choose. The top row is the headline numbers.

1. Last 7, 30 or 90 days
2. Choose dates — any from/to
3. Download CSV of these figures
4. Headline numbers vs the period before
5. Shown while Payments is not Live — test orders are included

> ⚠ **GOOD TO KNOW**
>
> While payments are not **Live**, a note 5 reminds you that test orders are included in these numbers.

Choose dates opens a from/to picker 1. The shortcuts 2 fill in **This month**, **Last month**, **This year** or **Last year** for you, which is handy for VAT periods. Press **Show these dates** 3.

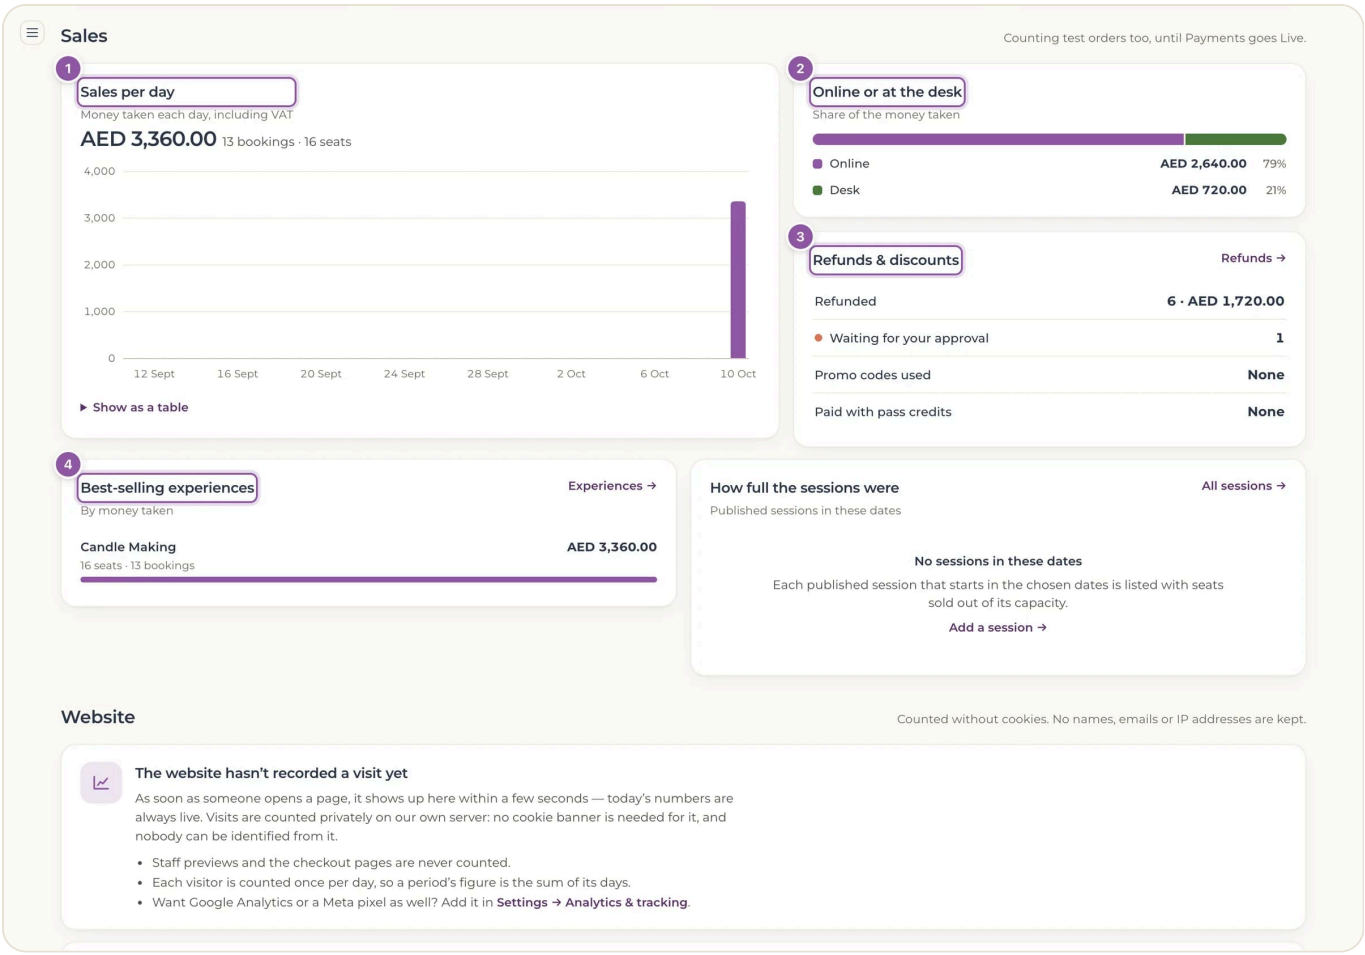

Choose dates opens a from/to picker — for a month, a quarter, or the dates of your VAT return. The shortcuts fill in This month, Last month, This year or Last year for you.

1. From and To dates
2. Shortcuts: This month, Last month, This year, Last year
3. Show these dates

Sales

Money taken per day 1 (press **Show as a table** for the numbers), online versus desk 2, refunds and discounts 3, best-selling experiences 4, and how full each session was.

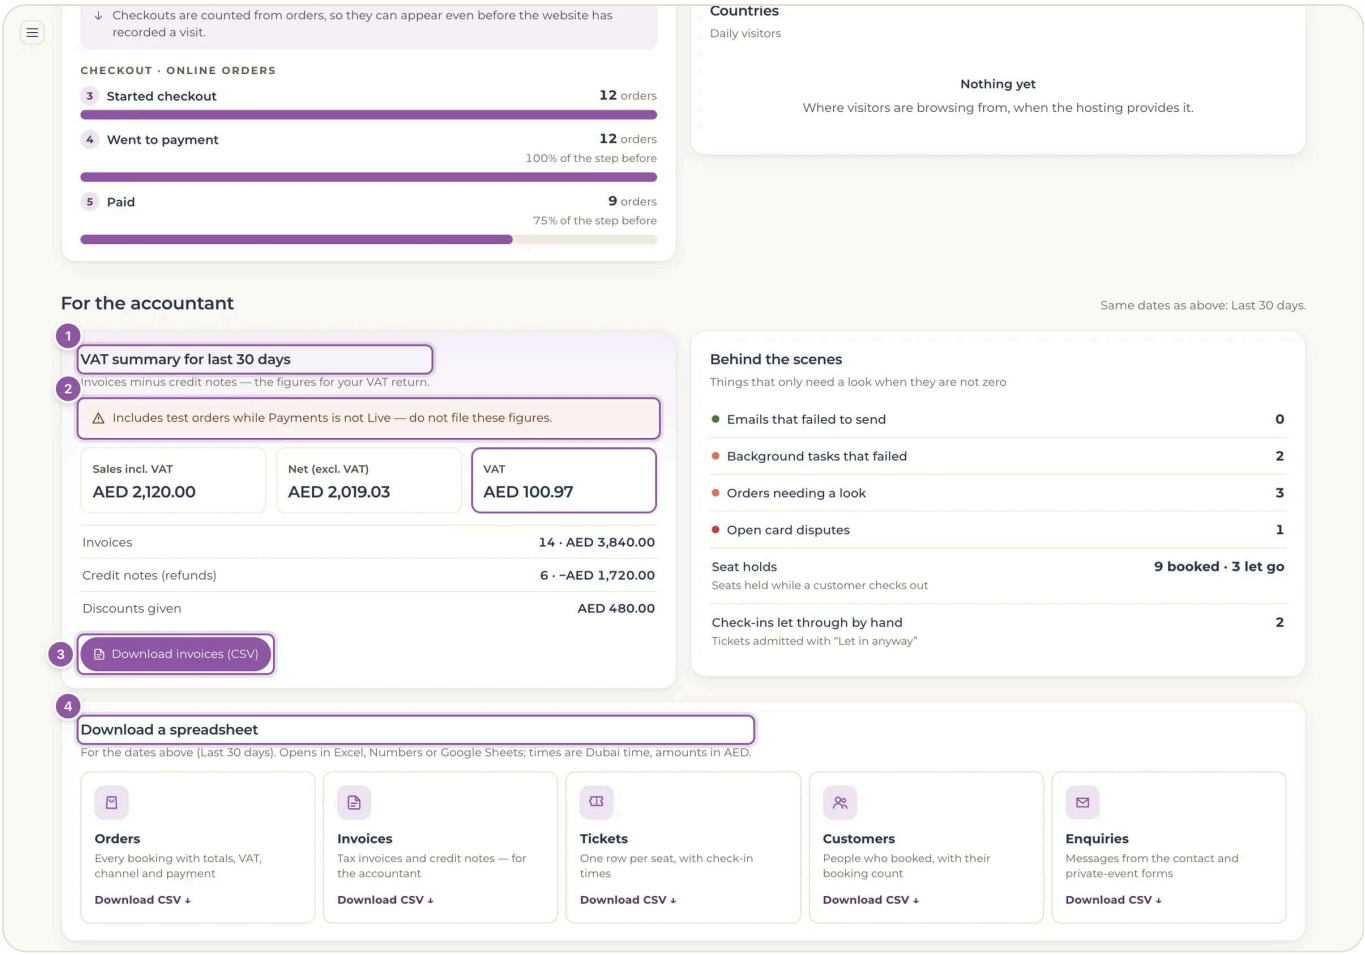

Sales: money taken per day, online versus desk, refunds and discounts, best-selling experiences and how full each session was.

1. Sales per day — Show as a table for the numbers
2. Online or at the desk
3. Refunds & discounts
4. Best-selling experiences

VAT summary and exports for your accountant

Admin only

1. **Choose dates** for your VAT period, such as a quarter, then **Show these dates**.
2. Read the VAT summary 1: sales including VAT, the net amount, and the VAT. Credit notes from refunds are already taken off.
3. **Download invoices (CSV)** 3, or any other spreadsheet 4: orders, tickets, customers, enquiries.
4. Send the files to your accountant.

For the accountant: the VAT summary for the chosen dates (invoices minus credit notes) and one-click spreadsheet downloads of orders, invoices, tickets, customers and enquiries.

1. VAT summary — sales incl. VAT, net, VAT
2. Warning while test orders are included — do not file these
3. Download invoices (CSV)
4. Download a spreadsheet of anything

NEVER DO THIS

Never file a VAT return while the warning 2 is showing. It means test orders are mixed into the figures.

Visitor counting and tracking

TRACKING

Visitor counting is built in and needs no cookies. If you also use Google Analytics, Plausible, Umami or a Meta pixel, the owner can add its ID under **Settings (admin) › Analytics & tracking**. Those load only after a visitor accepts the cookie banner.

CHAPTER 15

Payments (Mamo Pay): test, then live

Mamo Pay takes card payments for you. You practise first with pretend money, then switch to real cards when everything works.

IN 30 SECONDS

- **Mode** says where card payments go: **Test** (practice cards, no money moves) or **Live** (real cards). Start in Test.
- Mamo gives you two keys: a sandbox (test) key and a live key. A key is like a long password that lets your site talk to Mamo.
- The **webhook** is how Mamo tells your site “this payment went through”. **Register/Update webhook** sets it up for you.
- Keys are stored locked and only ever shown as **Set** or **Not set**.

IN THIS CHAPTER

Mode: Test or Live 132
Add your keys 133
Register the webhook 134
Practise with test cards 135
Switch to Live 136

THE ROAD TO LIVE PAYMENTS

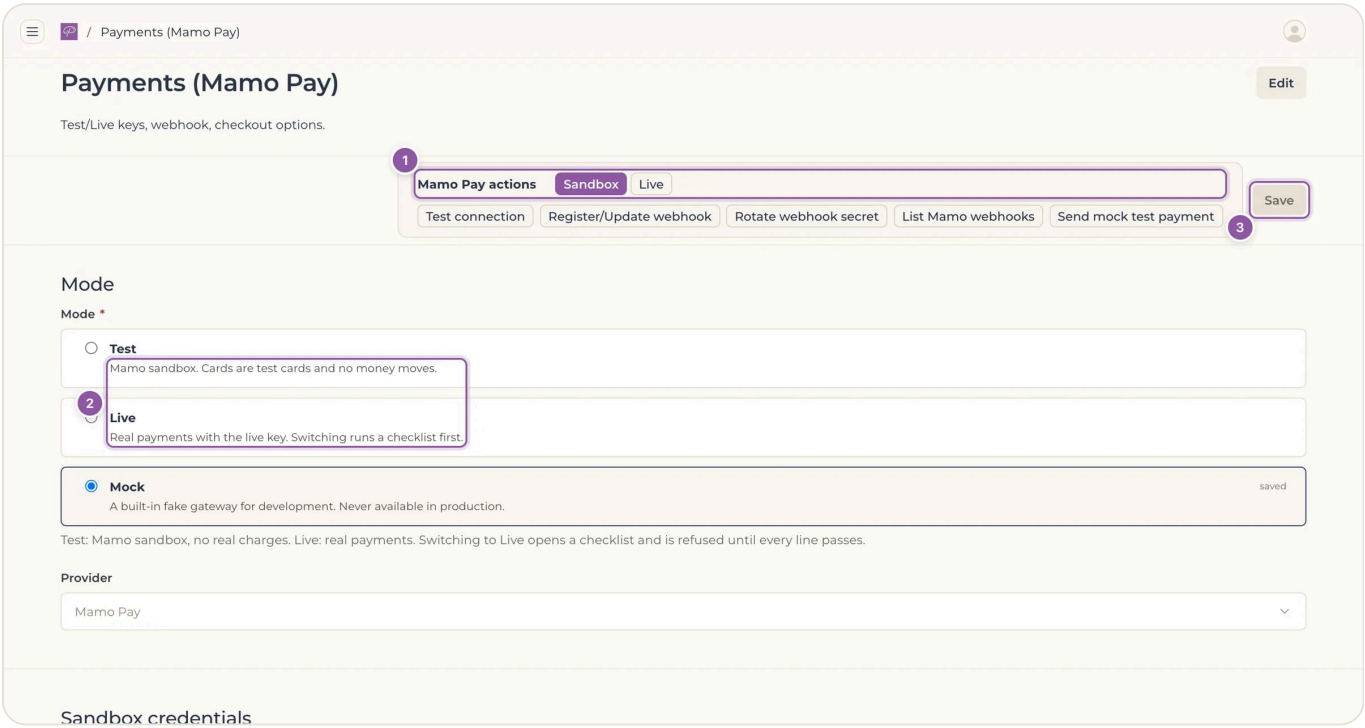

1. **Sandbox key** — Paste, Save, Test connection.
2. **Webhook** — Register/Update webhook in Sandbox.
3. **Practise** — Book with test cards. Check orders and emails.
4. **Live key** — Paste, switch actions to Live, test, register webhook.
5. **Mode: Live** — Checklist passes. Pay AED 2, then refund it.

Mode: Test or Live

Settings (admin) › Payments (Mamo Pay) · Admin only

1. Under **Mamo Pay actions** (1), choose Sandbox or Live, then use the buttons.
2. **Mode** (2) is Test or Live.

3 Save 3.

Settings (admin) → Payments (Mamo Pay). Mode says where card payments go: Test (Mamo's sandbox — practice cards, no money moves) or Live (real cards). Start in Test. (“Mock” is a developer setting and does not appear on the live site.)

1 Mamo Pay actions — Sandbox or Live, then the buttons

2 Mode — Test or Live

3 Save

> **IN PLAIN WORDS**
>
> On the developer's copy you may see **Mock**. It is a built-in pretend gateway for testing the website and never appears on the live site.

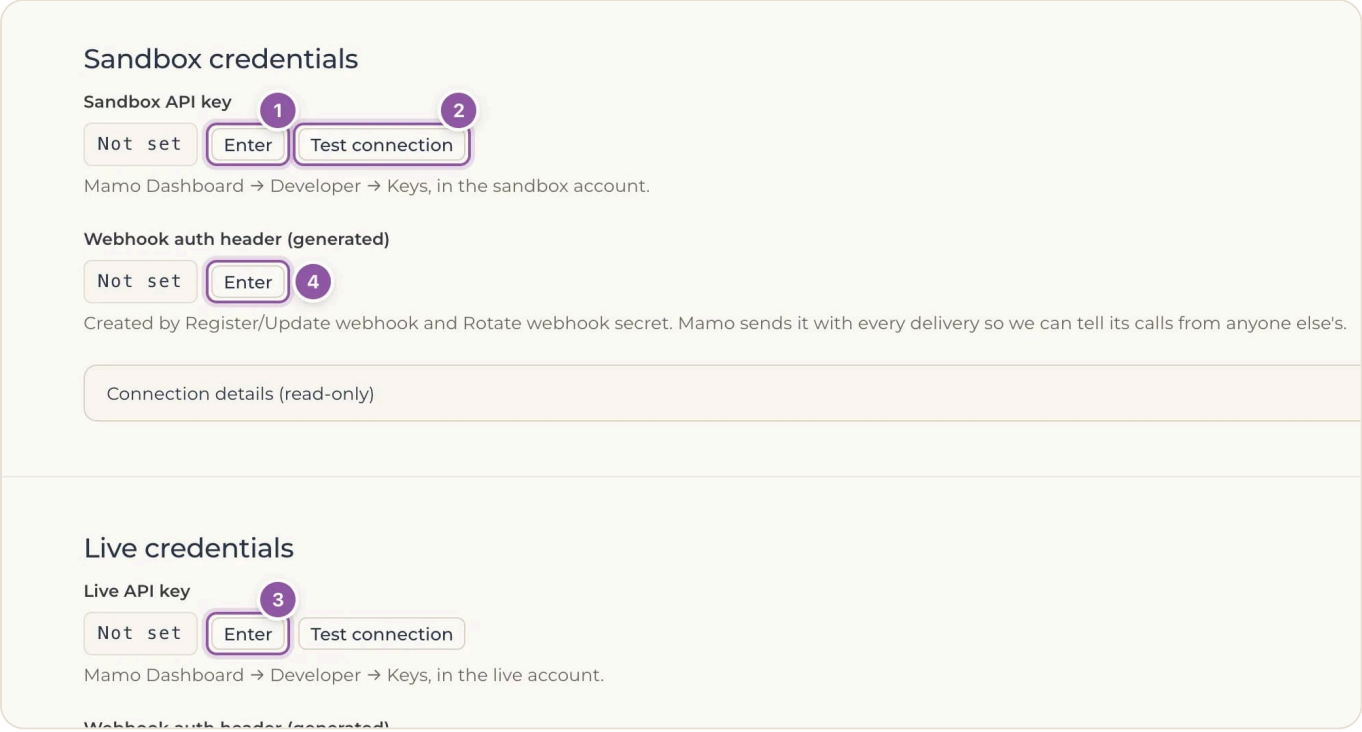

Add your keys

1 Under **Sandbox API key**, next to **Not set**, click the **Enter** button 1. Paste the key from Mamo into the box that opens, then press **Save** at the top right.

2 **Test connection** 2 and wait for the green confirmation.

3 Later, when Mamo gives it to you, add the live key the same way: **Enter** under **Live API key** 3, paste, **Save**.

4 The webhook header 4 is made for you by **Register/Update webhook**. Leave its Enter button alone.

Keys: next to Not set, click the Enter button, paste the key into the box that opens, then press Save. The sandbox key goes under Sandbox credentials; the live key, later, under Live credentials. Keys are stored locked and only ever shown as Set or Not set.

1. Enter button — click it, paste the sandbox key, then Save
2. Test connection for this key
3. Live API key — the same way, when Mamo gives it to you
4. Webhook header — made for you by Register/Update webhook; leave it

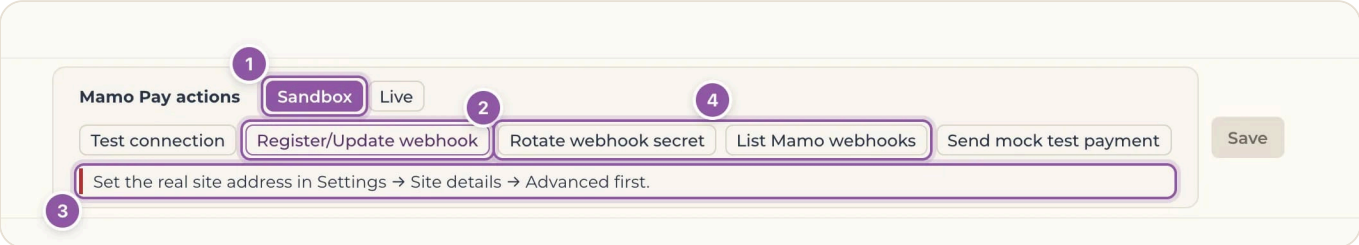

> **NEVER DO THIS**
>
> Never send keys by email or WhatsApp, and never paste the live key into the sandbox box. If a key may have leaked, ask Mamo for a new one and replace it here.

Register the webhook

1. Choose Sandbox or Live first 1.
2. Press **Register/Update webhook** 2. It shows the exact address and asks you to confirm.
3. Read the answer 3. Mamo first checks that it can reach your site, then saves the address. If it refuses, the message says exactly why, for example “Save the key first” or “Mamo answered 422: …”. Usually the key isn't saved yet, or the site address isn't a real `https://` address.

CAREFUL

Register the webhook only from `maisonpalettia.com/admin`, never from Nexeor's test copy. Both share one database (see Always work in maisonpalettia.com/admin (p. 14)), and a webhook registered from the test copy sends Mamo's payment messages to the test address. The dashboard then shows a red note: “The Mamo Pay webhook points at an old address (https://...)”. Press **Re-register →** on it from the live admin to put it right.

Register/Update webhook tells Mamo where to report payments. It first shows the exact address and asks you to confirm. It refuses, with a plain message, until the key is saved and the site address is a real https:// address. Rotate webhook secret and List Mamo webhooks are for Nexeor.

1. Choose Sandbox or Live first
2. Register/Update webhook
3. The answer appears here
4. Rotate webhook secret, List Mamo webhooks — for Nexeor; leave them alone

GOOD TO KNOW

Rotate webhook secret and **List Mamo webhooks** 4 are for Nexeor. Leave them alone. **Send AED 2 test order** (it says **Send mock test payment** on the developer's copy) is for practising, below.

Practise with test cards

In Test mode, book a session on your own website (or press **Send AED 2 test order**) and pay with Mamo's test cards. Expiry **01/28**, CVV **123**.

CARD NUMBER	WHAT HAPPENS
4659 1055 6905 1157	Payment succeeds
4242 4242 4242 4242	Succeeds after a security step (password `Checkout1!`)
4567 3613 2598 1788	Payment is declined

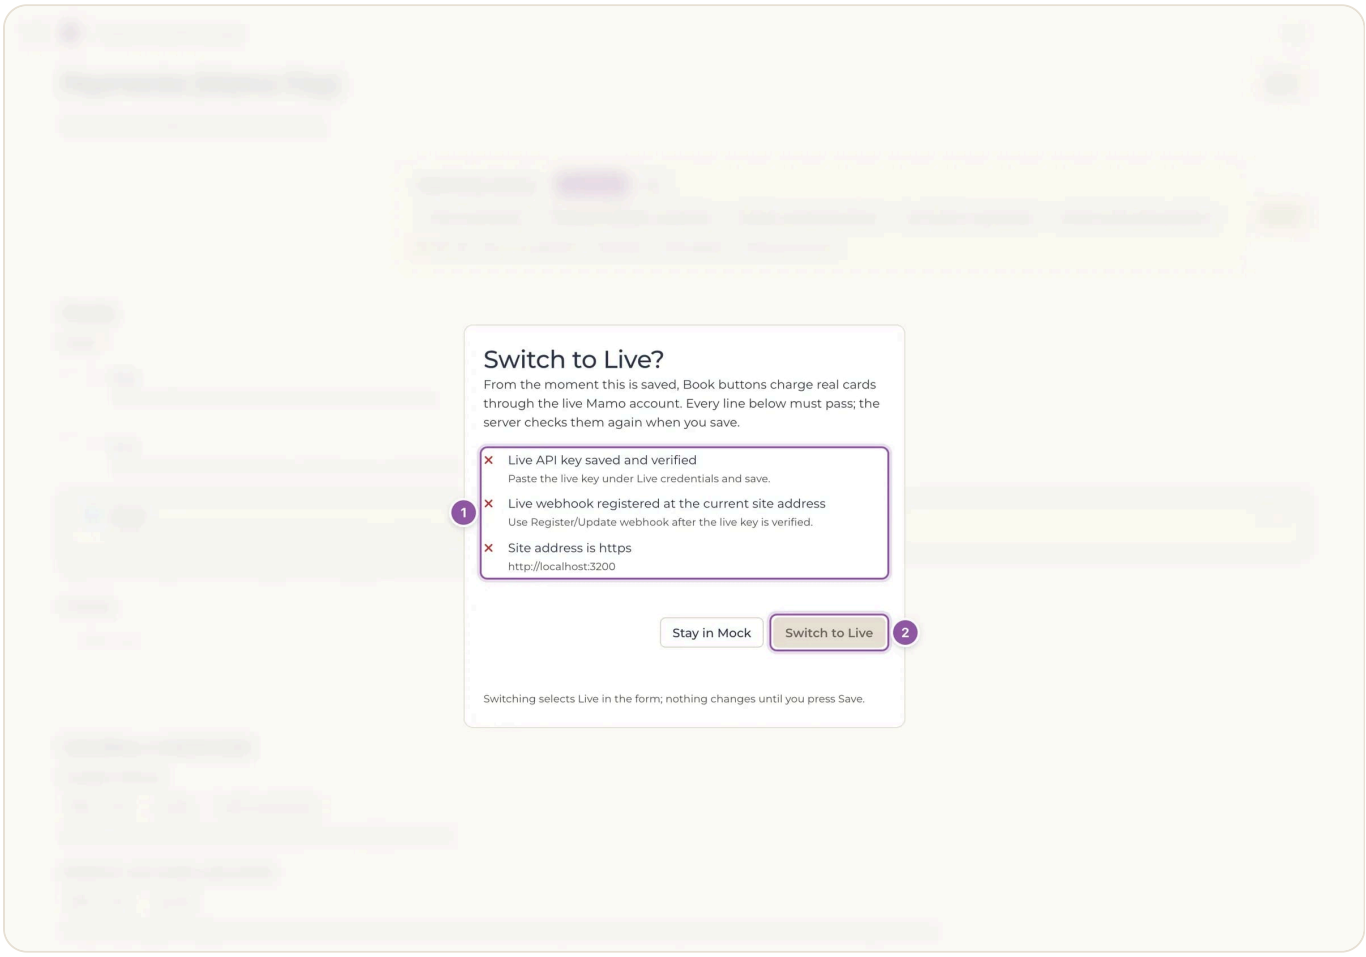

Then check **Bookings › Orders**: the paid ones show a ticket and an invoice, the declined one shows Failed, and the confirmation email arrived.

GOOD TO KNOW

Test cards work only in Test mode. Real cards work only in Live mode. If customers say every card is declined, check the Mode first.

Switch to Live

1. Paste and save the live key. Under Mamo Pay actions switch to **Live**, **Test connection**, then **Register/Update webhook**.
2. Set **Mode** to **Live**. A checklist opens 1. Each line passes or says what is missing. **Stay in Test** closes it and changes nothing.
3. When every line passes, **Switch to Live** 2 unlocks. Press it.
4. Press **Save** at the top right. Payments are only live after Save; until then nothing has changed.
5. Make one real AED 2 payment with your own card. Open that order and refund it. Money can now go both ways.

Switching Mode to Live opens a checklist. Every line must pass — live key saved and tested, webhook registered, email working — before Switch to Live unlocks. Switching only selects Live in the form: press Save at the top right to make it real.

1. The checklist — each line passes or says what is missing
2. Switch to Live — unlocks when every line passes; then press Save

CHAPTER 16

Settings

The things you set once and rarely touch. Settings save straight to the live site: there are no drafts here.

IN 30 SECONDS

- **Settings** are for Admin and Editor. **Settings (admin)** is for the owner only: payments, email, invoices, alerts and tracking.
- Save on a settings page goes live straight away.
- The site address must stay exactly `https://maisonpalettia.com`, and is changed only from the live admin.
- Bookings only open once email, the site address and payments are ready. The panel tells you what is missing.

Site details

Settings › Site details Admin · Editor

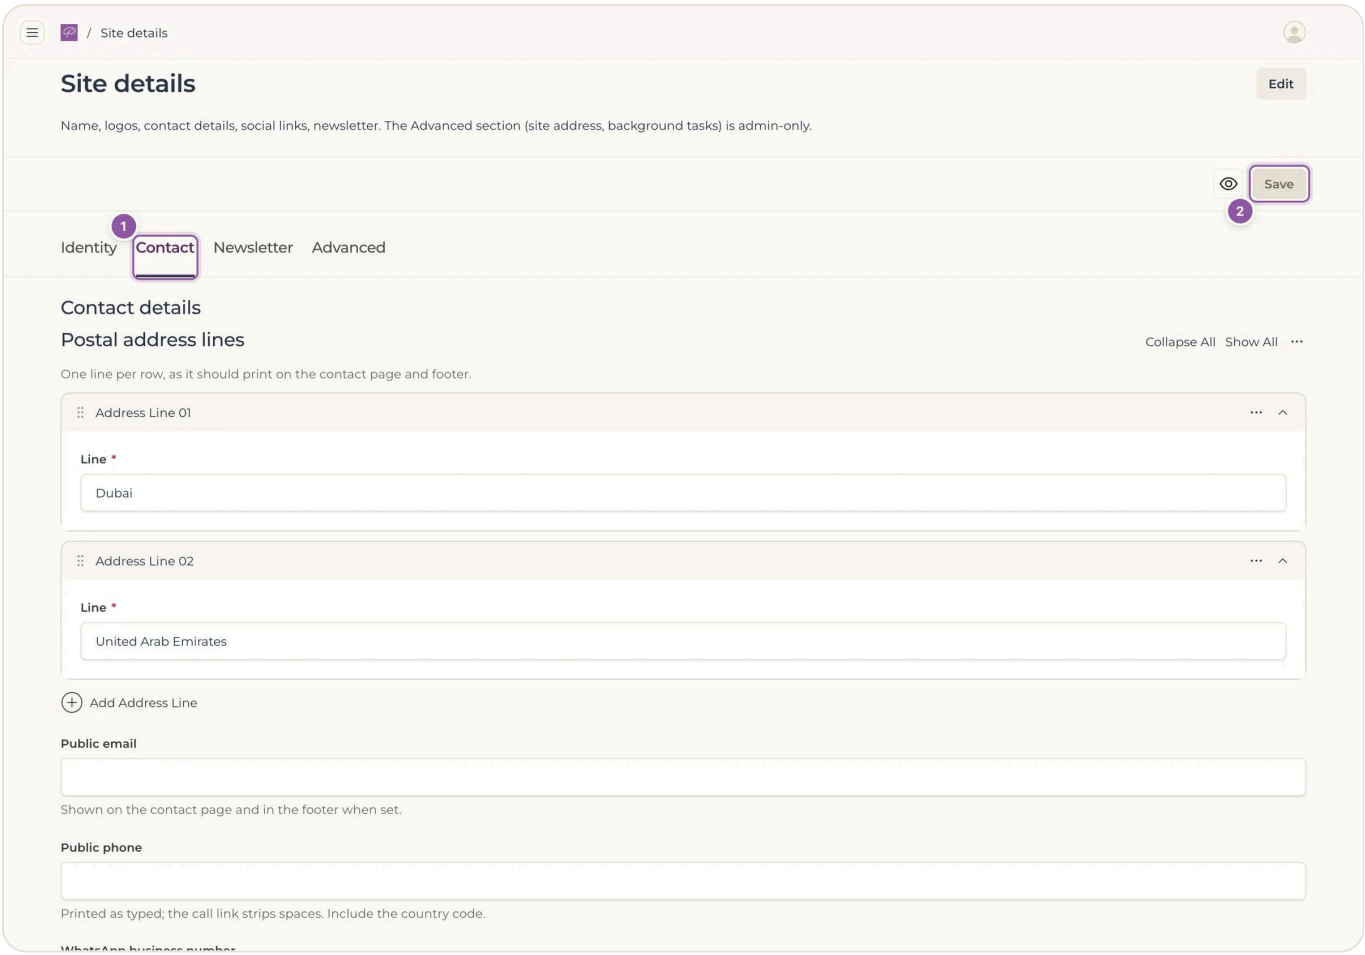

Four tabs 1: Identity (the studio's name and logos), Contact, Newsletter and Advanced. Save 2 after changes.

Settings → Site details. Identity: the studio's name and logos. Contact: public email, phone, WhatsApp, social links and address. Newsletter: the sign-up box.

1 Tabs: Identity, Contact, Newsletter, Advanced 2 Save

The **Contact** tab 1 holds the email, phone and WhatsApp number shown on the website, your social profiles and your address.

Contact tab: the email, phone and WhatsApp number shown on the website, your social links and your address.

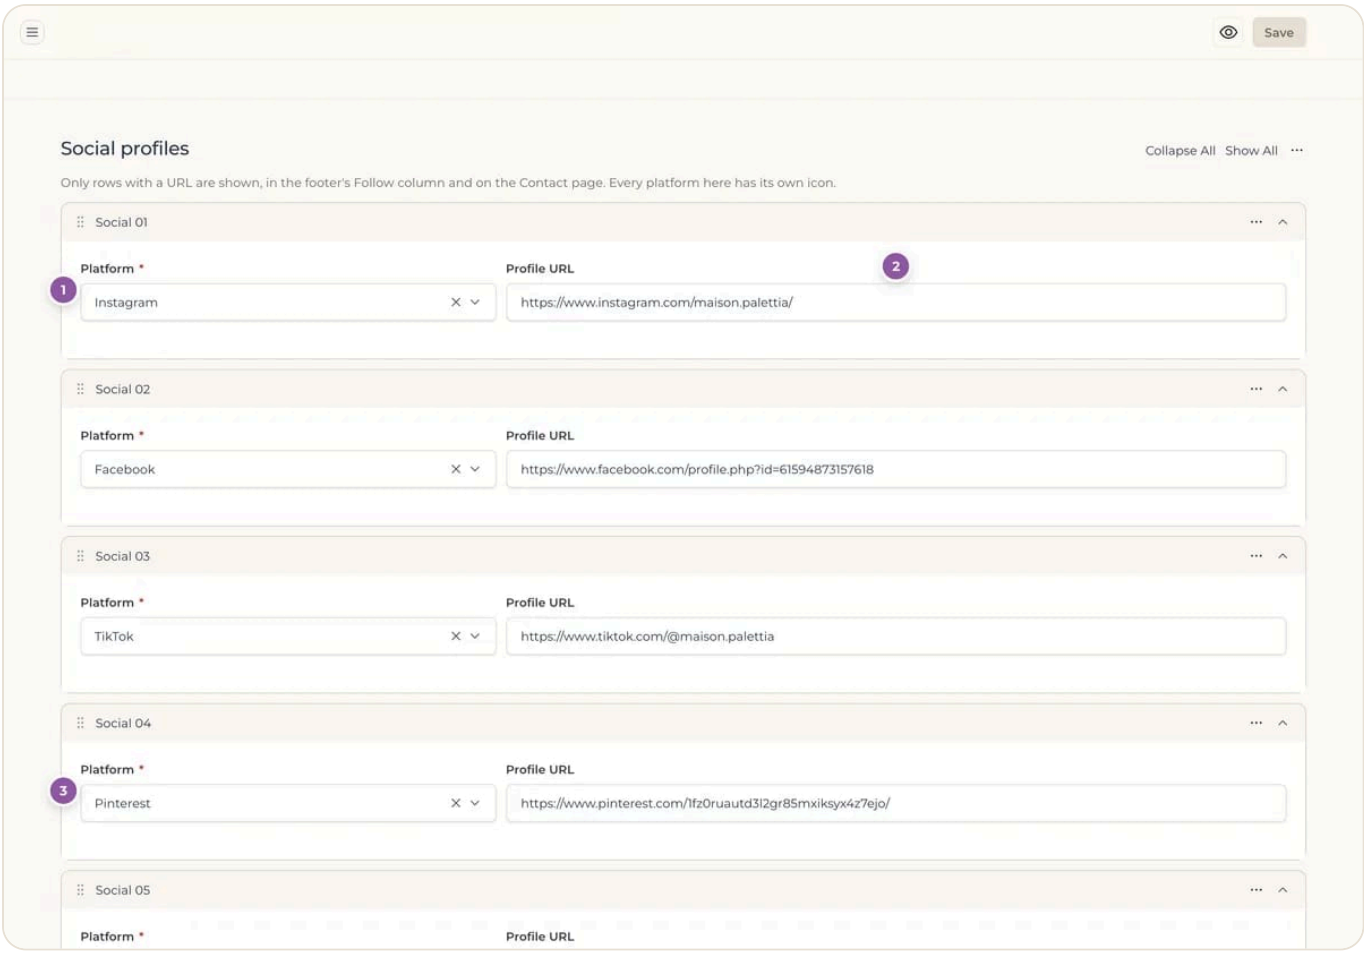

1 Contact tab

2 Save

Social profiles

Settings › Site details › Contact Admin · Editor

1. Scroll down the **Contact** tab to **Social profiles**.
2. For each one, pick the **Platform** 1 and paste the full address of your profile 2.
3. Add up to seven with Add Social. **Pinterest** 3 is one of the choices now.
4. Save. Only rows with an address are shown.

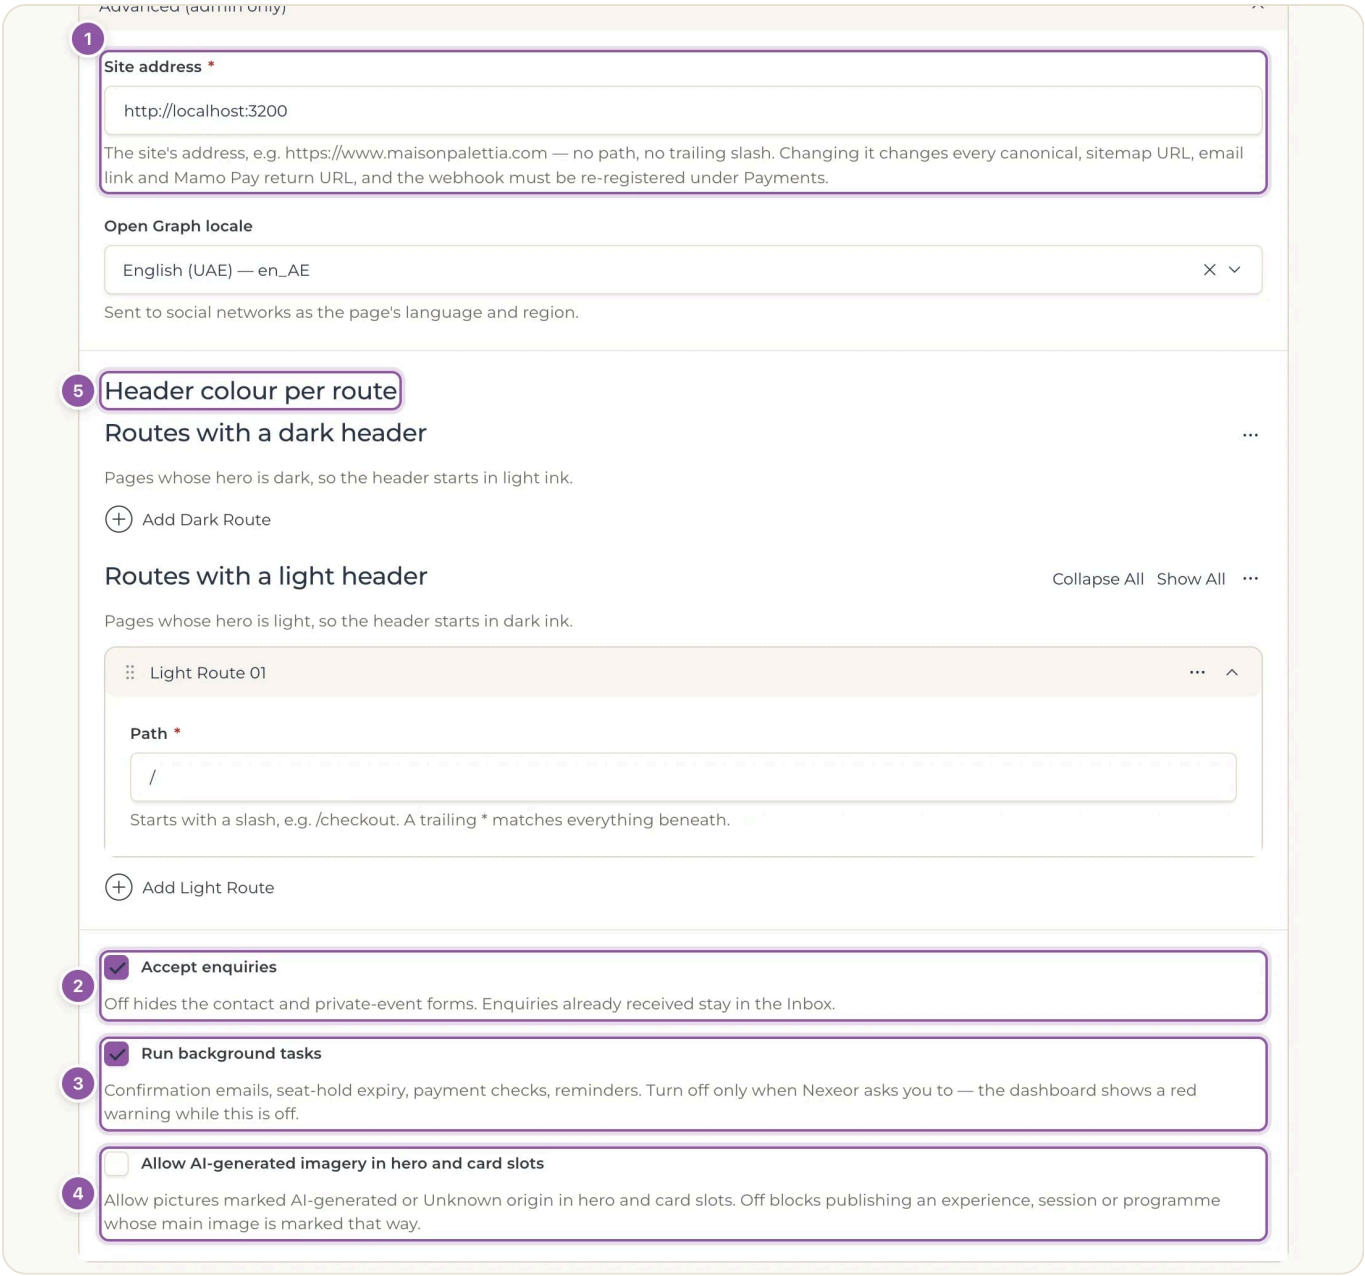

Social profiles, on the Contact tab: today Instagram, Facebook, TikTok, Pinterest and LinkedIn. Each shows with its own icon in the footer's Follow column and on the Contact page.

1. Platform — pick from the list
2. The full address of your profile
3. Pinterest — new; every platform gets its own icon

Advanced: site address and switches

Admin only

1. **Site address** 1: it must say `https://maisonpalettia.com`. Emails, payment returns and the webhook all use it. (Google is always pointed at maisonpalettia.com, whatever this says.)
2. **Accept enquiries** 2 switches the contact forms on or off.
3. **Run background tasks** 3: leave it on unless Nexeor asks. While off, emails and payments are not processed.
4. **Allow AI-generated imagery** 4 in the big hero and card spaces.
5. **Header colour per route** 5: leave it as it is. It sets the header's colour on pages with a dark or light hero.

Advanced tab (owner only): the Site address that emails, payment returns and the webhook use. Type it exactly, starting https:// with no / at the end. Further down are the switches for enquiries, background tasks and AI imagery. Leave Header colour per route as it is.

1. Site address — e.g. https://maisonpalettia.com
2. Accept enquiries — the contact forms
3. Run background tasks — leave on unless Nexeor asks
4. Allow AI-generated imagery in hero and card slots
5. Header colour per route — leave as it is

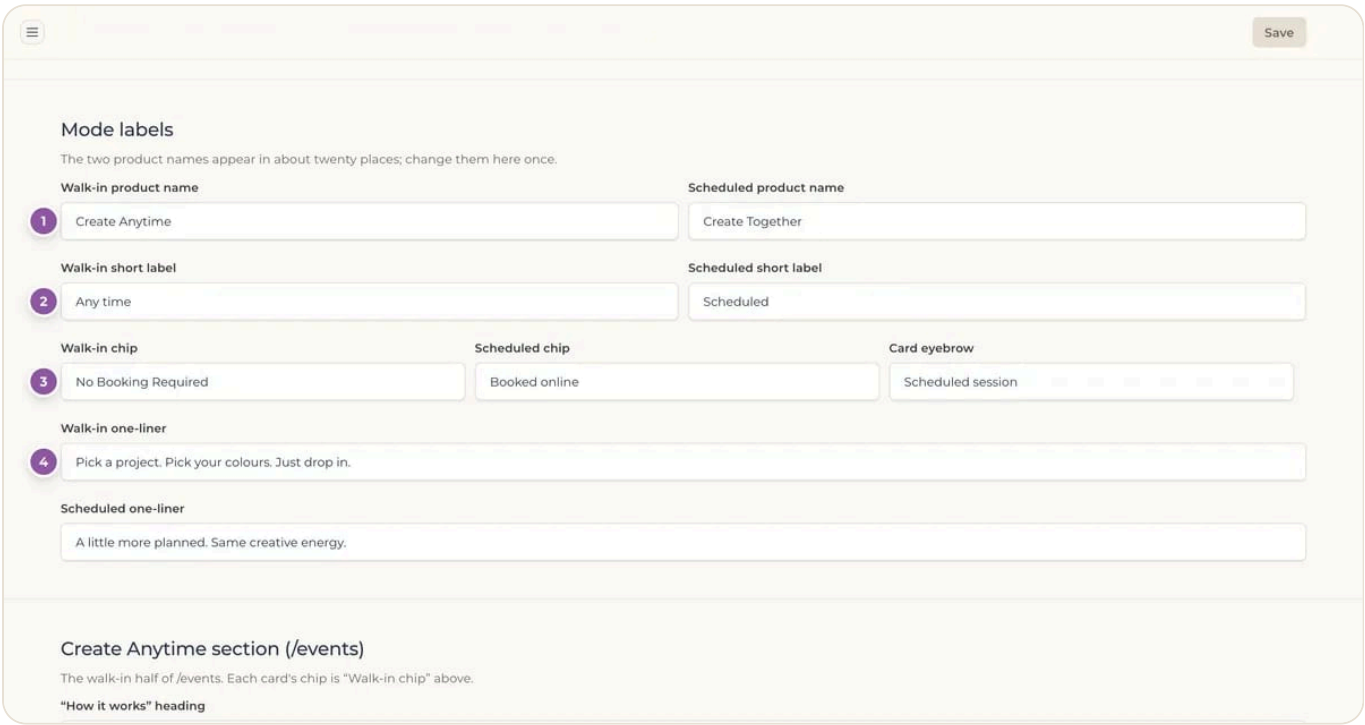

> ⚠ **CAREFUL**
>
> The live site and Nexeor's test copy share one database, so Site details is **one** setting for both. Change it only from `maisonpalettia.com/admin`; anything saved in the test copy's admin changes the live site. See Always work in maisonpalettia.com/admin (p. 14).

Events page wording: Mode labels

Settings › Booking & checkout wording › Event page · Admin · Editor

The two ways to take part, **Create Anytime** (walk in, no booking) and **Create Together** (booked for a date), are named in about twenty places. **Mode labels** is the one place for those words, including the doors on the Events page.

1. Open Settings › Booking & checkout wording and choose the **Event page** tab.
2. Scroll to **Mode labels**. Change the two product names 1, their short labels 2, the chips and card eyebrow 3, or the two one-liners 4.
3. Press Save. It goes live straight away, everywhere the words appear.

Mode labels: the product names, short labels, chips and one-liners used across the site, including the Events page doors.

1. The two product names
2. Short labels
3. Chips
4. The two one-liners

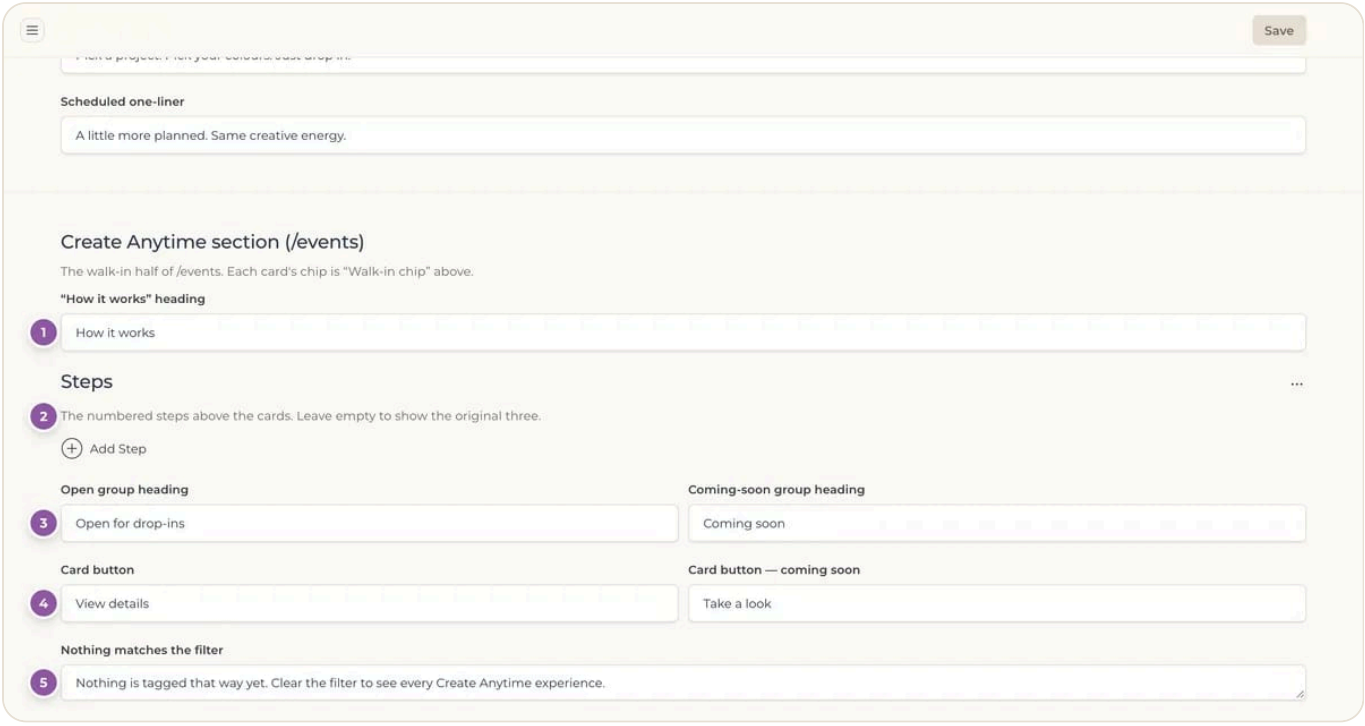

The Create Anytime part of the Events page

Settings › Booking & checkout wording › Event page · Admin · Editor

Just below Mode labels, **Create Anytime section (/events)** holds the words of the walk-in half of the Events page.

- The **"How it works" heading** 1 and up to four numbered **Steps** 2. Leave the steps empty to show the original three.
- The two group headings 3: "Open for drop-ins" and "Coming soon".

- The card buttons 4: “View details”, and “Take a look” for one that is coming soon.
- The note shown when nothing matches the visitor's filter 5.

The Create Anytime section: the walk-in half of the Events page, from its heading and steps to the card buttons.

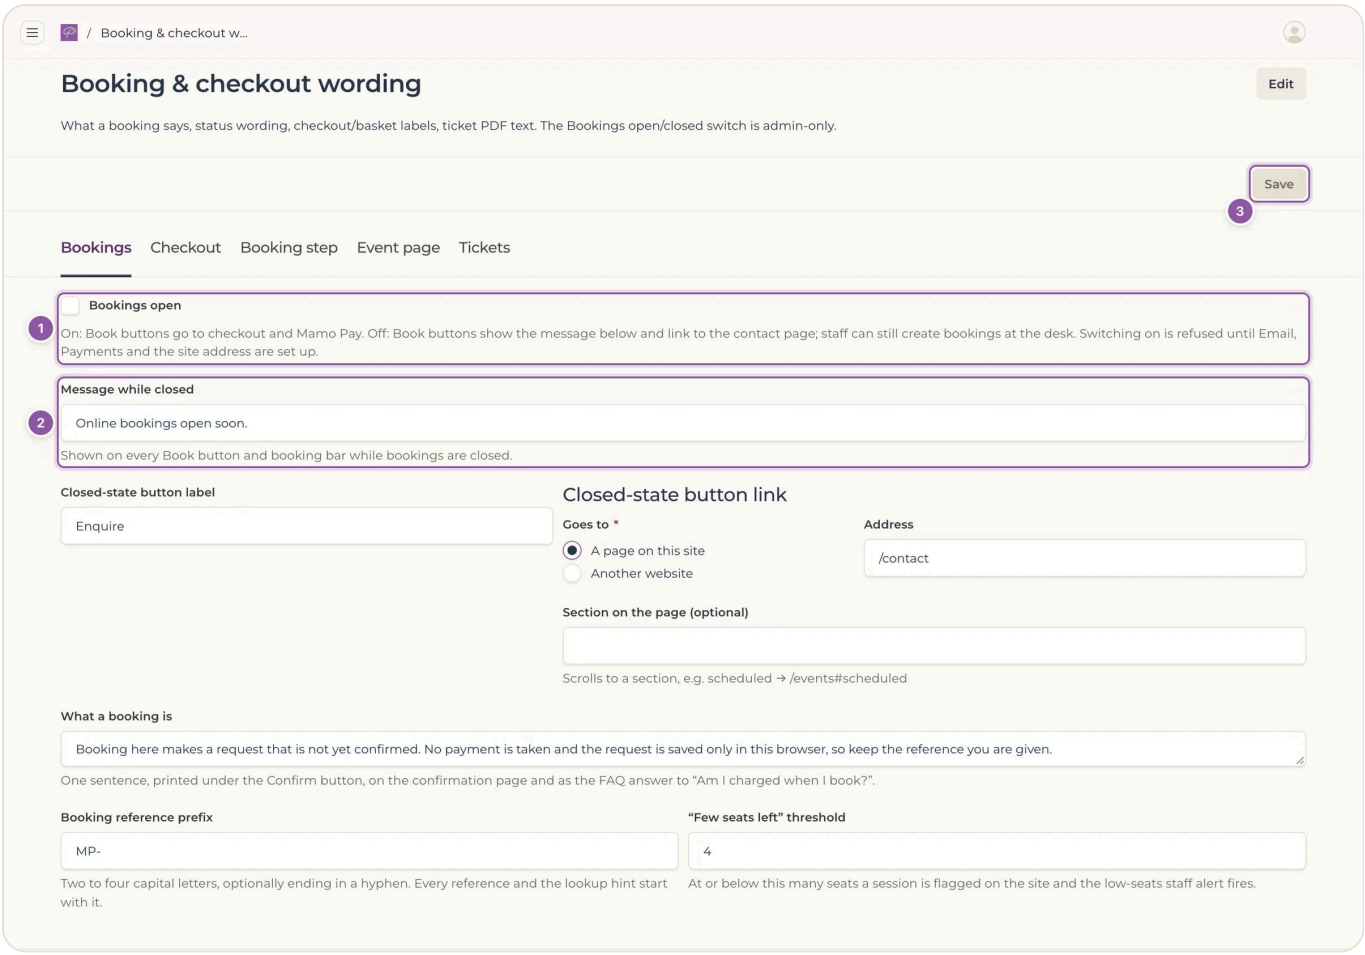

1. “How it works” heading
2. Up to four numbered steps
3. Group headings: Open for drop-ins, Coming soon
4. Card buttons
5. Shown when nothing matches the filter

> **GOOD TO KNOW**
> The booked half of the Events page is a calendar that draws each session as a ticket and filters by date, event, theme (workshop type), vibe and venue. There is nothing to set for it: it is built from your sessions, workshop types and vibes.

Open or close online bookings

Settings › Booking & checkout wording › Bookings Admin only

1. Tick **Bookings open** 1.
2. Check the message shown on Book buttons while bookings are closed 2.
3. Save 3. Until everything is ready, the panel refuses and says exactly what is missing.

Settings → Booking & checkout wording → Bookings tab. Tick Bookings open and Save to let customers book online. Until everything is ready the panel refuses and says exactly what is missing. While closed, every Book button shows your "closed" message.

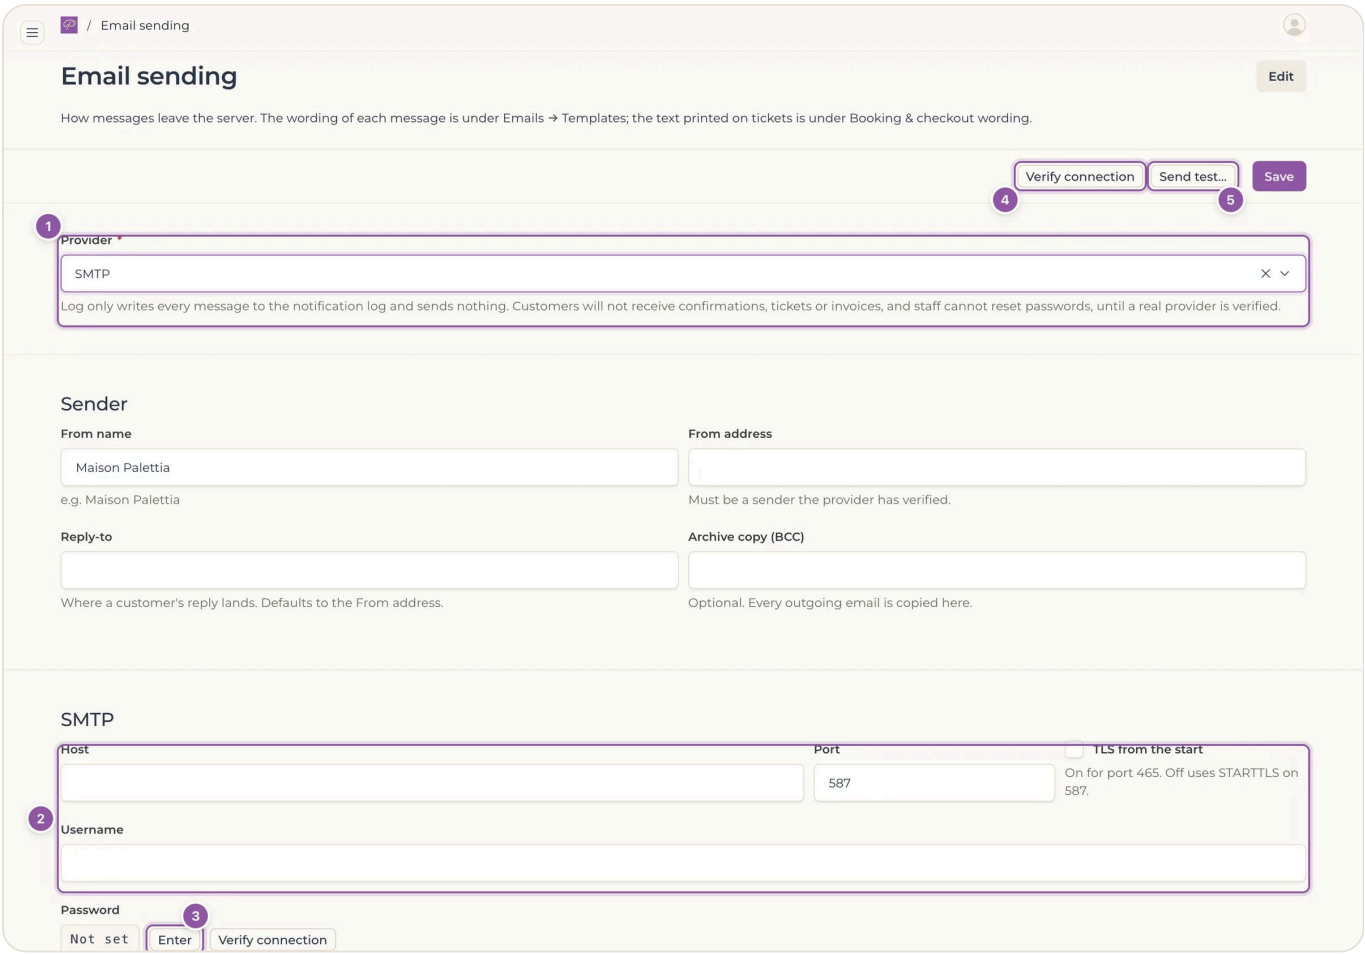

1. Bookings open — tick, then Save
2. The message shown on Book buttons while closed
3. Save

Email sending

Settings (admin) › Email sending Admin only

Without this, customers get no confirmations, tickets or invoices, and your team can't reset passwords. Your email provider (or Nexeor) gives you the details.

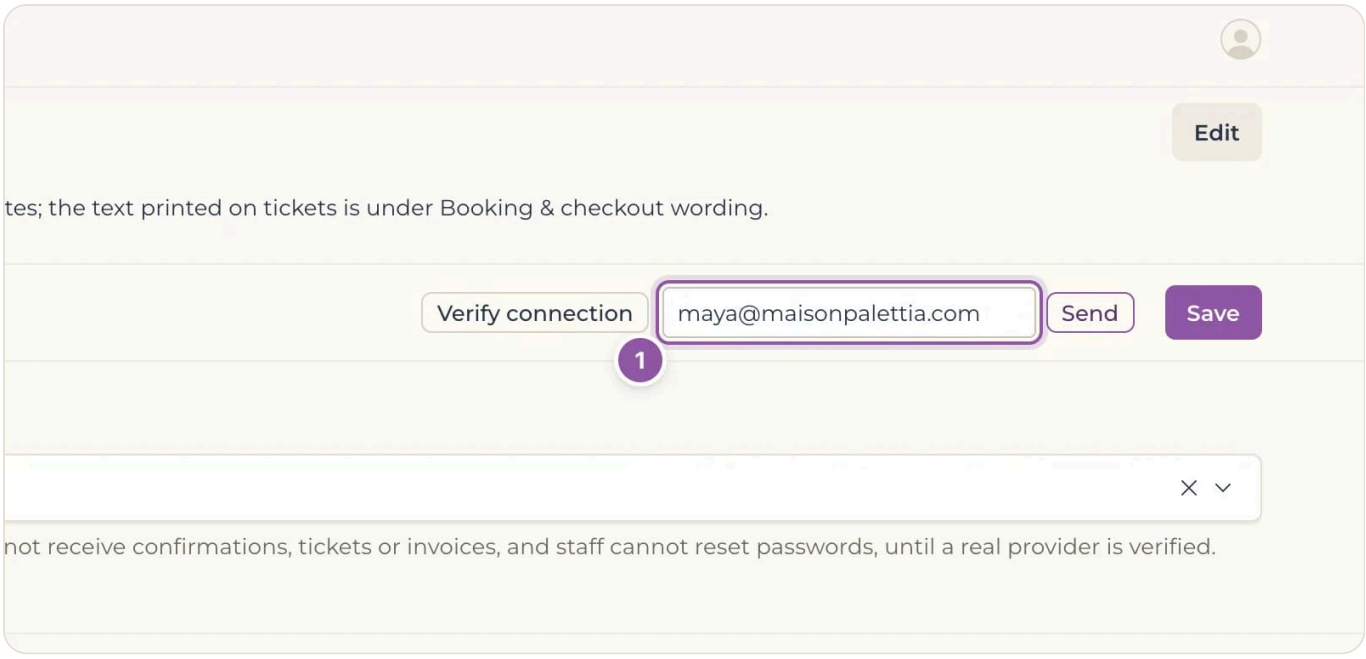

1. Choose the provider 1. Out of the box it says **Log only**, which sends nothing. Change it to **SMTP** (your email provider's sending details) or **Resend** (a key from resend.com).
2. Fill in the server details 2 and the From address customers see.
3. For the password (or the Resend key): next to **Not set**, click the **Enter** button 3, paste it into the box that opens, then press **Save**. It is never shown again.
4. **Verify connection** 4. Wait for the green confirmation.
5. **Send test...** 5 to yourself.

Settings (admin) → Email sending. Out of the box the provider says “Log only”, which sends nothing. Choose SMTP (your email provider's details) or Resend (an API key), fill in the From address, then Verify connection and Send test. Passwords and keys are stored locked and only ever shown as “Set” or “Not set”.

1. Provider — change Log only to SMTP or Resend
2. Server details from your email provider
3. Enter button — click it, paste the password, then Save
4. Verify connection — wait for the green confirmation
5. Send test... — one to yourself

Send test... fills in your own address 1 and shows the answer from your provider. Check your inbox, and the spam folder.

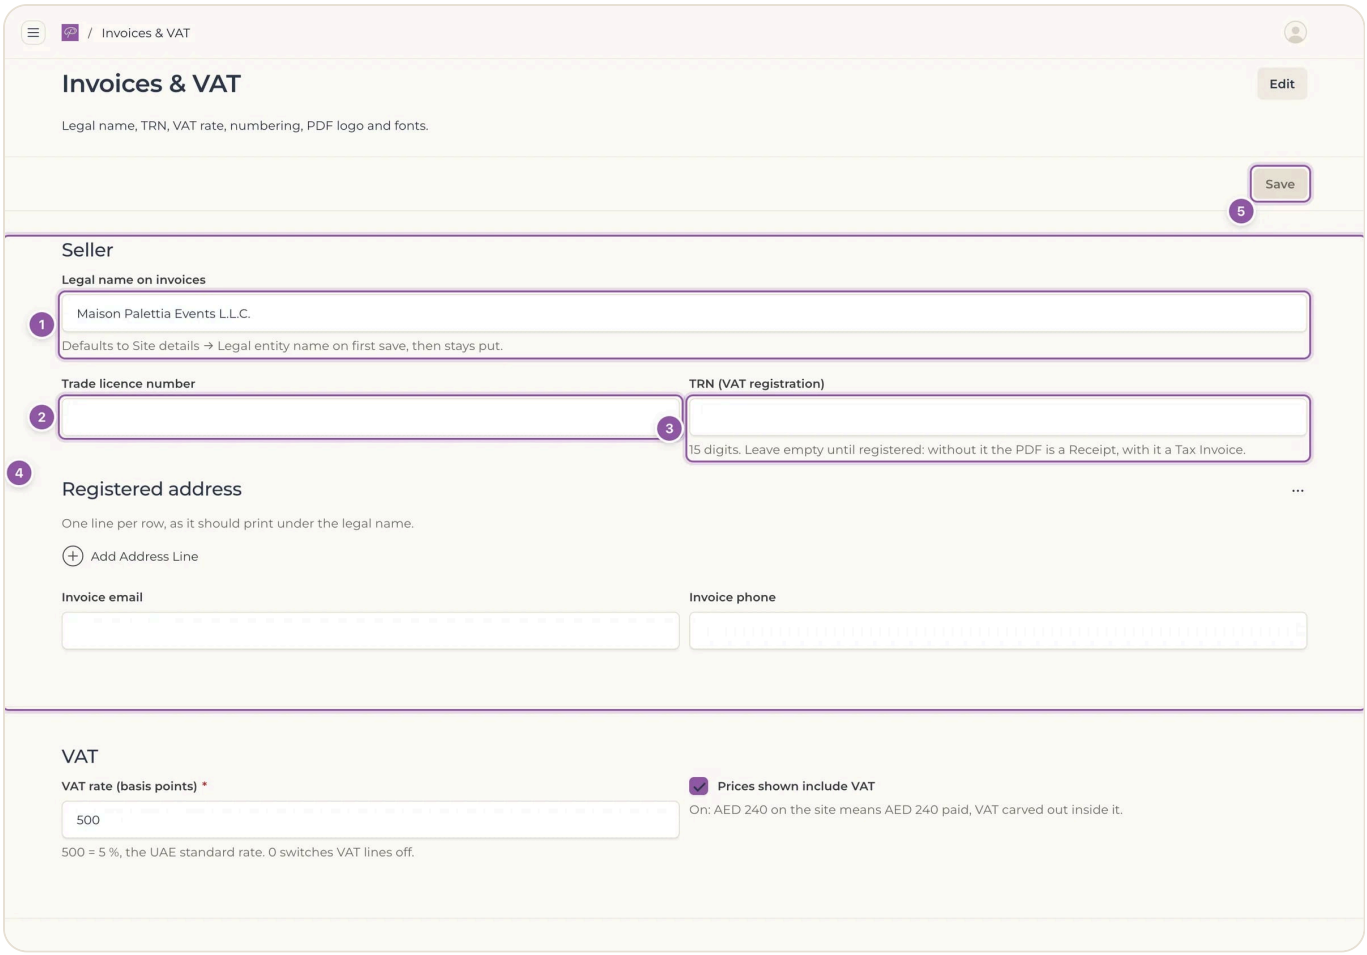

Send test… asks where to send it (your own address is filled in) and shows the answer from your provider. Check your inbox — and the spam folder.

1. Send the test to this address

Invoices & VAT

Settings (admin) › Invoices & VAT · Admin only

1. Legal name on invoices 1 and trade licence number 2.
2. **TRN** 3: your VAT registration number. Until it is filled in, documents print as receipts rather than tax invoices.
3. Registered address, invoice email and phone 4.
4. Save 5.

Settings (admin) → Invoices & VAT: the legal details printed on every invoice. Until the TRN is filled in, documents print as receipts rather than tax invoices.

1. Legal name on invoices
2. Trade licence number
3. TRN — your VAT registration number
4. Registered address, invoice email and phone
5. Save

> **IN PLAIN WORDS**
>
> Invoice numbers run in order with no gaps, as UAE VAT rules require, and refunds create credit notes automatically. You never number anything by hand.

CHAPTER 17

Staff & roles

Everyone gets their own login and only the tools they need. Nobody ever needs to know anyone else's password.

IN 30 SECONDS

- **Admin** can do everything. Keep it to yourself unless you really need a second one.
- **Editor** looks after the website: pages, sessions, workshop types, the Journal, music, photos and wording. No bookings, no owner settings.
- **Front desk** looks after customers: bookings, tickets, check-in and the inbox. No content changes.
- When someone leaves, untick **Can sign in**. Their history stays.

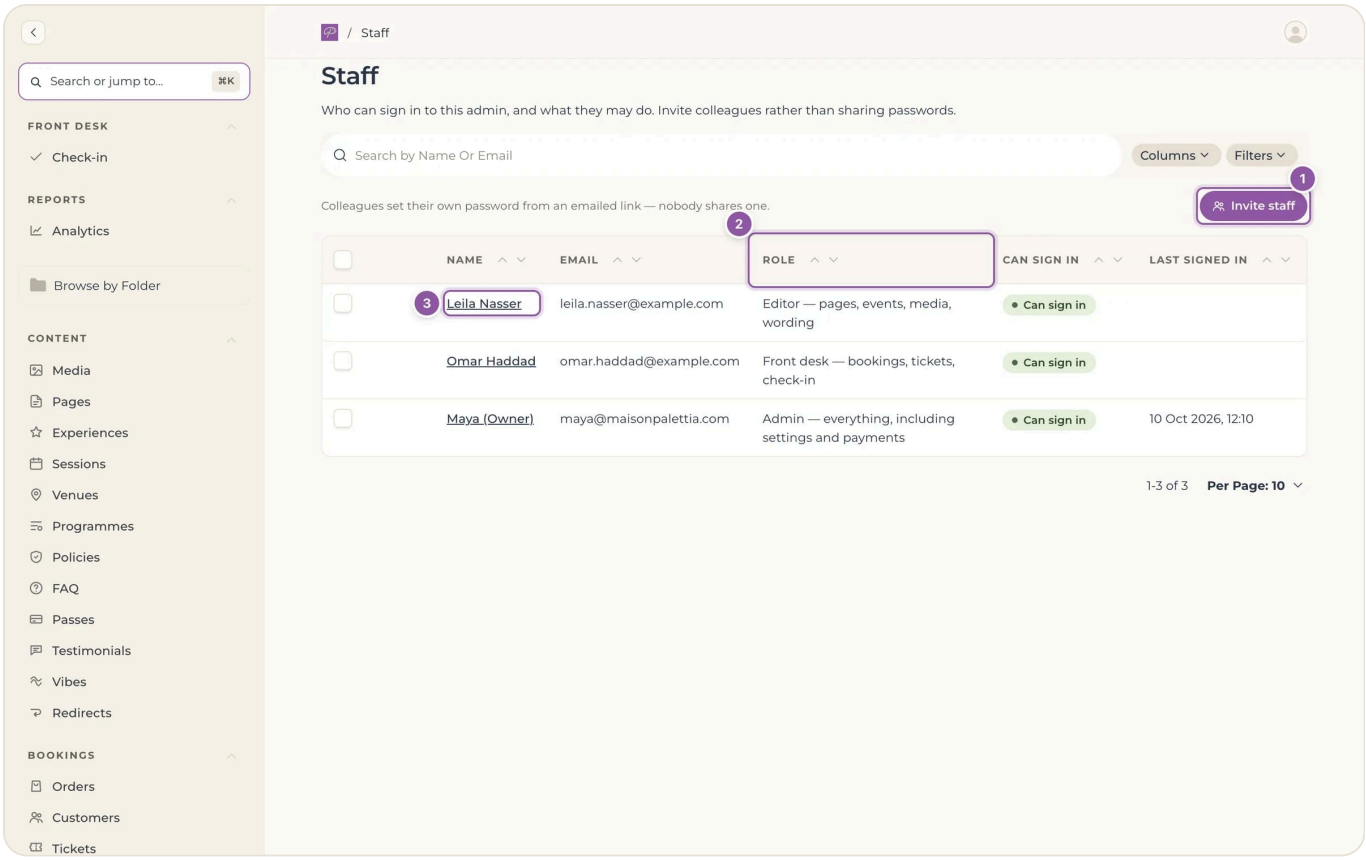

IN THIS CHAPTER

Your team 148
Invite someone 149
Change a role, switch someone off, or help them back in 150
Who can do what 151

Your team

Settings › Staff Admin

1. **Invite staff** (1) adds someone.
2. Each person's role (2): Admin, Editor or Front desk.
3. Click a name (3) to open their account.

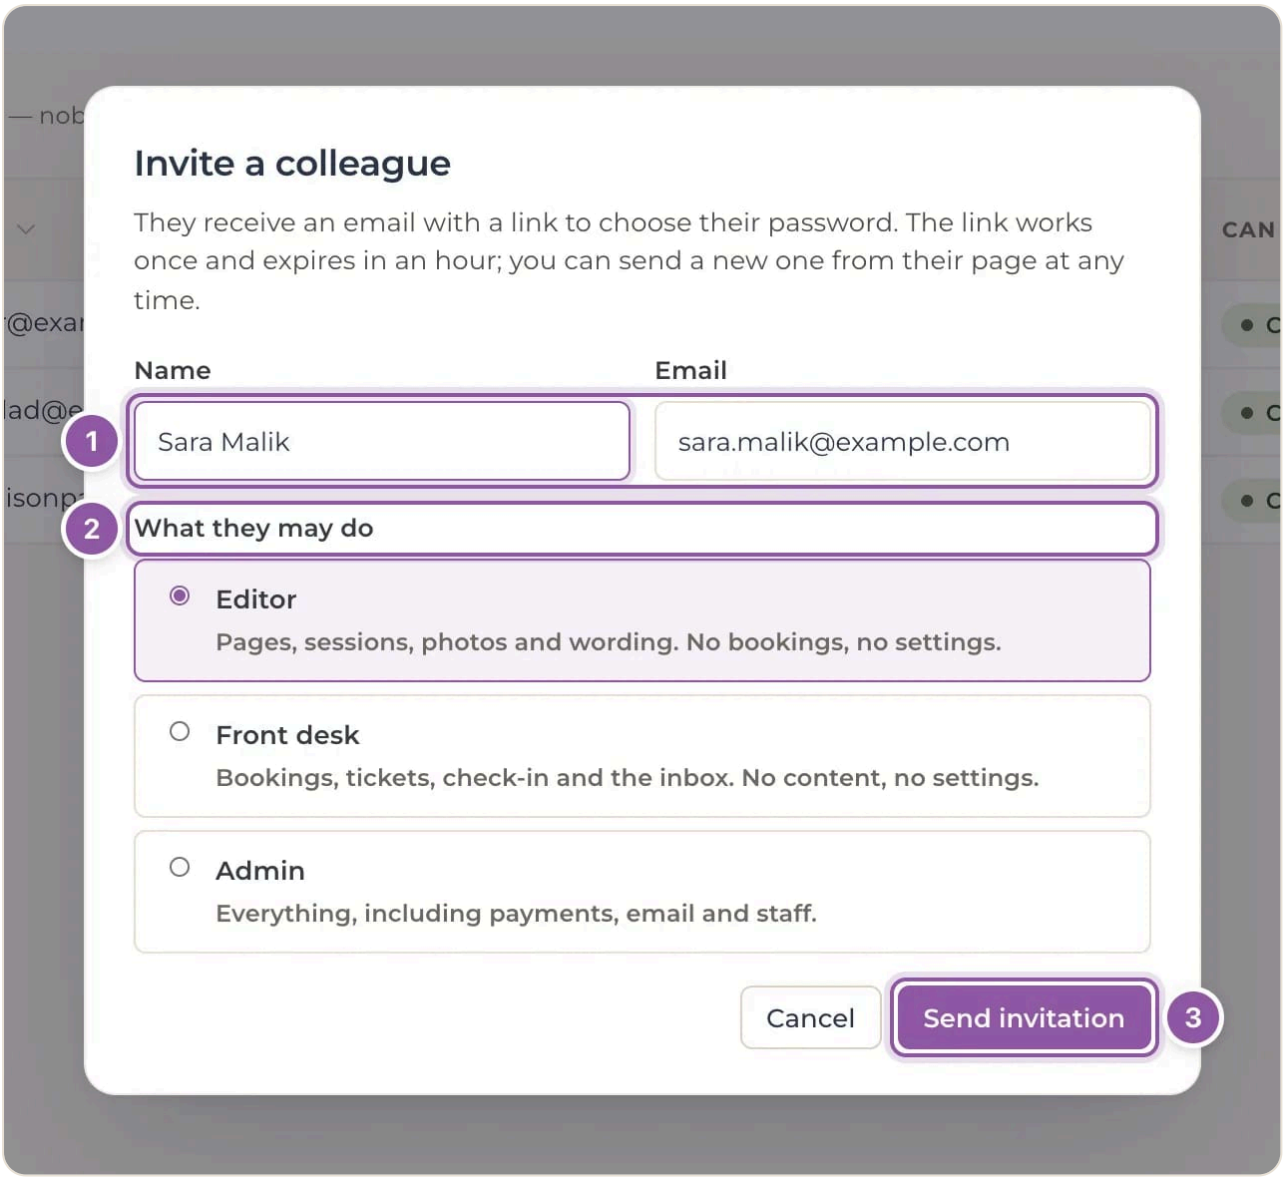

Settings → Staff: everyone who can log in, with their role. Invite staff adds someone; they choose their own password from the email.

1. Invite staff
2. Role — Admin, Editor or Front desk
3. Click a name to open their account

Invite someone

1. Their name and email 1. Spaces are removed as you type; if the address is incomplete, it says “Enter a full email address, like name@example.com.” and the button waits.
2. What they may do 2: the role.
3. **Send invitation** 3. They get an email and choose their own password.

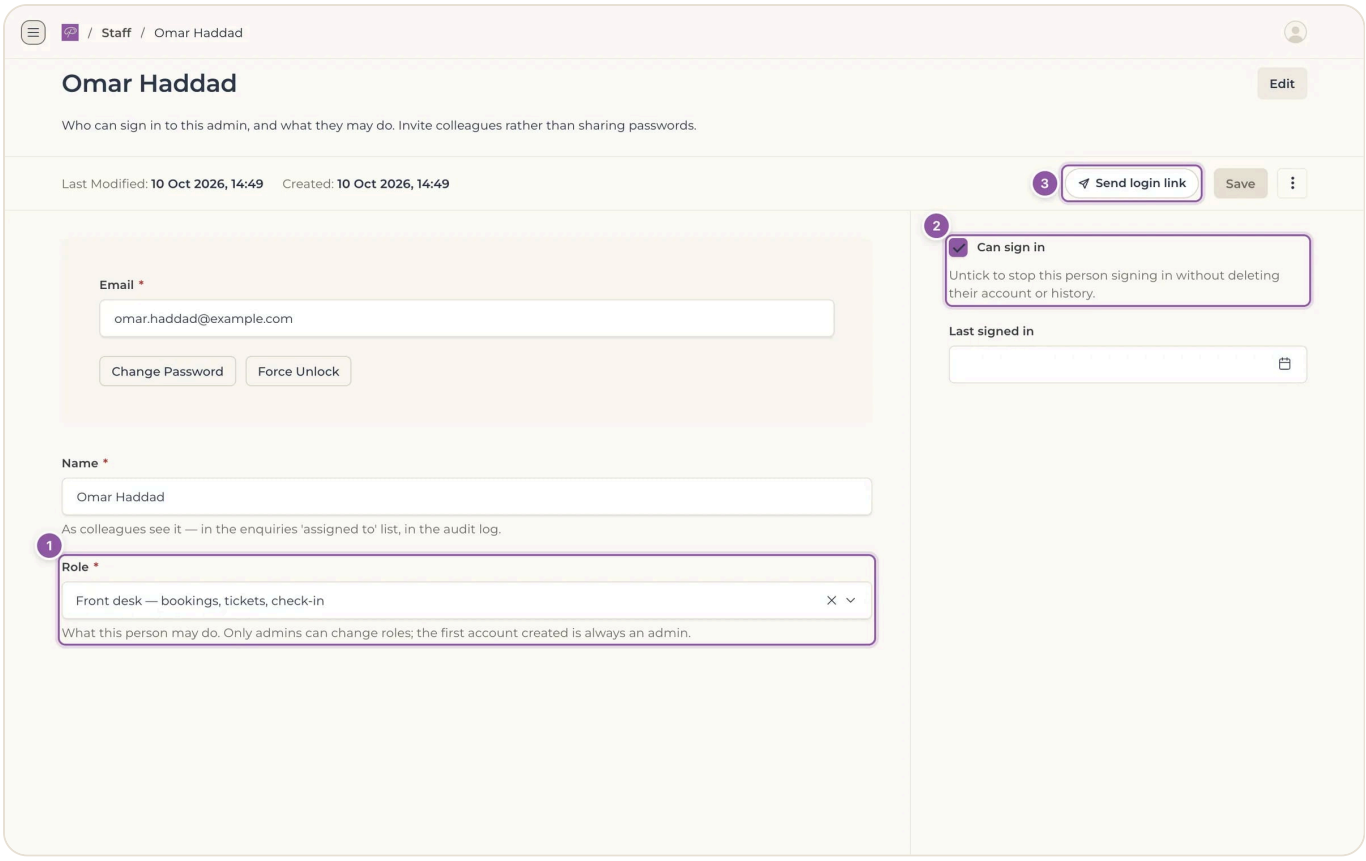

Invite staff: their name, their email, and what they may do. They receive an email and set their own password — you never need to know it. (Email sending must be set up first.)

1 Name and email
2 What they may do — the role
3 Send invitation

> ⚠ **GOOD TO KNOW**
> Invitations are emails, so email sending (p. 144) must be set up first. The button tells you if it isn't.

Change a role, switch someone off, or help them back in

1. Open the person. Change their role 1 if their job changes.
2. Untick **Can sign in** 2 to stop their access without deleting them. Their name stays on everything they did.
3. Locked out? **Send login link** 3 emails them a one-time sign-in.

A staff member's page: change their role, untick “Can sign in” to stop access without deleting them, or send a login link if they are locked out.

1. Role
2. Can sign in — untick to switch them off
3. Send login link — a one-time sign-in by email

> **NEVER DO THIS**
>
> Never delete a staff account when someone leaves. Switch it off instead, so the history on bookings still shows who did what.

CHAPTER 18

Routines

A few minutes a day keeps the website and your bookings in good order. Here is a rhythm that works.

IN 30 SECONDS

- **Daily**: dashboard notes, new enquiries, refunds to approve, tomorrow's sessions.
- **Weekly**: publish next week's sessions, check failed emails and drafts.
- **Monthly**: next month's theme and dates, a Journal story, numbers, VAT files for your accountant, tidy staff and photos.

IN THIS CHAPTER

Daily, weekly, monthly 154
Booking day at the studio 155

Daily, weekly, monthly

Daily

10 MINUTES, MORNING

- ○ Open the dashboard. Clear anything red first.
  Red means customers are affected now.
- ○ Reply to new enquiries and assign them.
  Inbox › Enquiries, filter New.
- ○ Approve waiting refunds.
  Owner only. Dashboard › Approve →, or Bookings › Refunds. Not refunding? Tell the customer and add a note to the order.
- ○ Check Coming up: tomorrow's sessions and seats.
  Print attendee lists for the day.
- ○ Look at Recent orders for anything marked Needs attention.

Weekly

30 MINUTES, SAME DAY EACH WEEK

- ○ Publish next week's sessions.
  Repeat weekly..., set the workshop type on each copy, then publish.
- ○ Close sales or switch to waitlist where you need to.
- ○ Check Drafts & scheduled on the dashboard.
  Publish or revert anything forgotten. Delete empty Untitled drafts left by Create New.
- ○ Sent emails: filter Failed and fix each one.
- ○ Move answered enquiries to Closed.
- ○ Glance at Analytics, last 7 days.

Monthly

1 HOUR, FIRST WEEK OF THE MONTH

- ○ Analytics for last month: sales, best sellers, how full sessions were.
- ○ Add next month's candle theme and its sessions.
  Content › Workshop types, then Content › Sessions. See Add next month's candle theme (p. 58).
- ○ Post a Journal story (optional).
  A new theme, a workshop moment, a gift idea.
- ○ Download the VAT summary and invoices CSV for your accountant.
  Quarterly for your VAT return.
- ○ Staff: untick Can sign in for anyone who has left.
- ○ Refresh seasonal photos and the homepage.
  Swap a photo once, every page updates.
- ○ Check FAQs, policies and promo codes are still right.
- ○ Ask Nexeor to confirm this month's backup restore test.

Booking day at the studio

A calm session starts well before the first guest arrives. Here is the day, from the morning to the last tidy-up.

MORNING

Know who is coming

On the dashboard, **Coming up** shows today's sessions and seats sold. Open the session's **Attendees** tab and print the list. Check customers' notes for allergies or requests.

1 HOUR BEFORE

Set up the door

Charge the phone. Open **Front desk › Check-in**, turn **Sound on**, and make sure today's session is listed. Pictures of each step are in Open check-in on your phone (p. 111).

DOORS OPEN

Scan each ticket

Start camera and hold each QR inside the frame. **Green**: welcome them. **Amber**: read the message and ask. **Red**: don't admit; ask for their email and look up the booking with **⌘K**. See Scan a ticket (p. 113) and What the colours mean (p. 114).

WALK-INS

Sell spare seats

Bookings › Orders › Create desk booking. Pick the session, seats and how they paid, and add their email so they get a ticket. Their ticket is valid straight away.

NO PHONE?

Type the code

If a guest has a printed ticket that won't scan, type the code under the QR (it starts `MPT-`). If they have nothing, find them on the attendee list and press **Mark as arrived**.

AFTER

Close the day

Check arrived against sold on the check-in page. Add anything worth remembering to the order's internal notes, such as “left her apron, collecting Thursday”.

TIP

Busy door? Two people can scan at once on two phones. Each scan is recorded with who did it, and a ticket can't be used twice.

CHAPTER 19

When something goes wrong

Most problems have a two-minute fix. Find yours below. If you are stuck, send Nexeor a screenshot of the dashboard.

IN 30 SECONDS

- Start at the dashboard. The coloured notes usually name the problem and link to the fix.
- Always act from the admin, never from Mamo's website, so everything stays in step.
- Any mistake on a page can be undone with Versions.

IN THIS CHAPTER

A customer says their payment failed 157
My change isn't showing on the website 158
A wrong price (or wrong words) went live 159
The check-in camera won't start 160
A photo won't delete 160
A journal post isn't on the Journal page 160
I can't change a session's date 161
A customer didn't receive their email 158
Someone is locked out 158
A red note says background tasks are paused, the webhook is at an old address, or settings can't be read 159
Bookings won't open 160
The music won't play, or I want it off 160
A journal category or workshop type won't delete 161

A customer says their payment failed

Or: “I was charged but got no confirmation.”

Check first

- Find the order with `⌘K` and their email. Read its status.
- Look at the payment badge on the dashboard. If it says **TEST**, real cards will not work.

Then

1. **Failed**: their bank declined the card. Ask them to book again, or try another card. Nothing was taken.
2. **Expired**: they took too long to pay (15 minutes unless changed) and the seats were released. Ask them to book again.
3. **Confirmed**: the booking worked. Open **Actions** › **Resend tickets**, and see “email not arriving” below.

4. Charged, but the order is not Confirmed: the dashboard shows “orders need a look”. Press **Review** and follow what it says. Tell the customer you are on it. When it is sorted, the owner presses **Actions** › **Mark review resolved** on the order.

> **NEVER DO THIS**
> Never refund from Mamo's own website. Always refund from the order here, so tickets, seats, invoices and emails all stay in step.

A customer didn't receive their email

Confirmation, tickets or a reminder never arrived.

1. Open **Emails** › **Sent emails** and search for their address.
2. **Sent**: it left your system. Ask them to check spam and promotions. Check the address for a typo on the order and correct it under contact details.
3. **Failed**: open it to read why. If many have failed, go to **Settings (admin)** › **Email sending** and press **Verify connection**.
4. **Skipped**: the template is switched off, or email isn't set up. If **Settings (admin)** › **Email sending** still says **Log only**, nothing is ever sent: change it to SMTP or Resend. An amber note on the dashboard also says so.
5. Fix the cause, then open the order and press **Actions** › **Resend tickets**.

My change isn't showing on the website

You edited something but the site looks the same.

1. Check the status at the top. **Changed** means it is still a draft: press **Publish changes**.
2. Did you schedule it? The dashboard's **Drafts & scheduled** list shows when it will go live.
3. Are you editing the right place? Use **⌘K** and type **“** plus a few words from the website to find where they live. Shared lines live in Brand wording.
4. Reload the website page. On a phone, close the tab and open it again.
5. Photo cropped badly? Set its focal point (p. 47).
6. Still the same after a minute? Send Nexeor a screenshot of the admin and of the website.

Someone is locked out

Forgotten password, or too many wrong tries.

1. They press **Forgot password?** on the login page and follow the email.

2. No email? The owner opens **Settings › Staff**, opens the person and presses **Send login link**.
3. Check **Can sign in** is ticked on their account.
4. After 5 wrong passwords in a row, the account rests for 10 minutes. Wait, then try once, carefully.
5. Owner locked out and email not working? Nexeor can reset it on the server in a minute.

> **CUSTOMERS**
>
> A **customer** who can't see their bookings uses the website's “My bookings” page to get a fresh link by email. If they lost their phone, open the customer and use **Sign out everywhere**.

A wrong price (or wrong words) went live

Put it right in two minutes by restoring the version before.

1. If people might book at the wrong price right now, open the session and set **Booking status** to **Closed — no bookings, no waitlist**. Press **Publish changes**.
2. Open the **Versions** tab. Click the version from before the mistake.
3. Check the highlighted changes, then press **Restore this version**.
4. Check the preview, set the booking status back to **Open — seats can be booked**, and **Publish changes**.
5. Look in **Bookings › Orders** for anyone who booked in between. If they were overcharged, give a part refund for the difference. If undercharged, honour the price they paid.

See History: restore older versions (p. 41) for pictures of each step.

A red note says background tasks are paused, the webhook is at an old address, or settings can't be read

Emails and payments are not being processed.

1. “Background tasks are paused”: open **Settings › Site details › Advanced**, tick **Run background tasks**, and Save. Only leave it off if Nexeor asked you to.
2. “The Mamo Pay webhook points at an old address (https://…)”: Mamo is sending payment messages to the wrong place, usually Nexeor's test copy. Open `maisonpalettia.com/admin` (not the test copy), press **Re-register →** on the note, choose Sandbox or Live to match the **Mode**, and press **Register/Update webhook**. The note goes away. Call Nexeor only if it refuses; the message says why.
3. “Encrypted settings cannot be read”: call Nexeor. Don't change keys yourself.

The check-in camera won't start

Black frame, or no permission prompt.

1. Allow the camera when the phone asks. If you said no before, open the browser's site settings and allow the camera for your website.
2. Close other apps that use the camera.
3. Meanwhile, type ticket codes by hand, or press **Mark as arrived** on the attendee list.

Bookings won't open

The Bookings open box refuses to save.

The panel tells you what is missing, for example “Set up Email first so customers receive their tickets”. Follow it, then try again. The usual three are the site address, email sending and payments. See the Day one checklist (p. 17).

A photo won't delete

It is still used somewhere. The message lists where. Replace it there first, or swap the file (p. 48) instead. No Delete option at all? Only the owner (Admin) can delete photos.

The music won't play, or I want it off

- **Want it off?** Settings › Music : untick **Show the music player** and Save. To silence one page, add its address to **Pages without the player**.
- **No player at all?** The player shows only while **Show the music player** is ticked *and* at least one track has **In the playlist** ticked under Content › Music .
- **Button there but no sound?** Some browsers (Safari always, others on a first visit) only allow sound after the visitor taps or clicks somewhere on the page. That is the browser's rule; nothing to fix. A visitor who paused it keeps it off until they press play.
- Still silent on every browser? Send Nexeor the track's name: the file may be missing on the server.

A journal post isn't on the Journal page

- Check its status: it must be **Published**, not Draft or Changed. Press **Publish changes** .
- Check it has a **Cover photograph**. A post can't be published without one.
- Scheduled? It appears at the time you chose (the dashboard's **Drafts & scheduled** shows when).
- Its **Publish date** decides its place: a backdated post sits further down the list.
- Looking for a category's page? A category only shows once it has a published post.

A journal category or workshop type won't delete

- **A journal category:** posts still use it. Move them to another category first (the message says how many). Only the owner (Admin) can delete a category.
- **A workshop type:** sessions still belong to it. Unpublish the type instead; its past bookings keep their history.
- **An experience:** workshop types still belong to it. Unpublish it instead.

I can't change a session's date

Once seats are sold, the date can only change with **Actions** › **Reschedule…**, so every ticket holder is emailed. See Reschedule a session (p. 66).

CHAPTER 20

Glossary & questions

Every word in the admin you might not use every day, in plain language.

IN THIS CHAPTER

Glossary 162
Questions 165

Glossary

Admin (role)
The role that can do everything, including payments and staff. Usually just the owner.

Alt text
A short sentence describing a photo, read aloud to blind visitors and used by Google.

API key
A long password Mamo Pay gives you so your website can talk to it. Kept locked; shown only as Set or Not set.

Booking reference
The order's name, starting MP-. Use it to find a booking.

Brand wording
Sentences used in several places, kept once under Settings › Brand wording.

Check-in window
How early and how late before a session a ticket will scan as valid.

Credit line
The words that say who made a music track and under which licence. The site builds it from the track's details and shows it beside the player and on /music-credits.

Credit note
The document created automatically when money is refunded. It cancels part or all of an invoice for VAT.

Desk booking
A booking taken by staff for a walk-in or phone customer, paid in person.

Draft
A saved change that visitors can't see yet. It goes live when you publish.

Editor (role)

Looks after the website's content. No bookings or settings.

Experience

A class you offer, such as Candle Making. It can have workshop types (themes or levels) and many sessions.

Featured post

The journal post shown large at the top of the Journal page. Tick “Feature at the top of the Journal”; the newest featured post wins.

Focal point

The spot in a photo that always stays in view when the site crops it.

Front desk (role)

Looks after customers: bookings, tickets, check-in and the inbox.

Hold

Seats kept aside while a customer pays (15 minutes unless the owner changes it). Shown as Held on a session.

Journal

The studio's blog at /journal. Its stories are journal posts, sorted into journal categories.

Journal category

A section of the Journal, such as Studio notes. Each post sits in one; its colour is the label on the card.

Journal post

One story in the Journal, with a title, a cover photo and text. A draft until you publish it.

Licence (CC BY)

The terms a piece of music comes with. CC BY means free to use as long as the creator is credited. Never use one marked NC (non-commercial).

Live preview

The copy of the page beside the form that shows your draft as you type.

Mamo Pay

The company that takes card payments for you.

Mode (Test / Live)

Whether card payments use pretend money (Test) or real cards (Live).

Mode labels

The names Create Anytime and Create Together, and their short labels and chips, kept once under Settings › Booking & checkout wording › Event page.

Music track
One piece of background music under Content › Music, with its creator and licence.

Pin (map)
A venue's latitude and longitude. With a pin, the site draws its own map of the venue in the Maison's colours.

Programme
A private-event offer: birthdays, corporate events, schools and more.

Publish
Put a draft on the public website.

Redirect
Sends visitors from an old or short address to the right page.

Sandbox
Mamo's practice area. Test cards work here; no money moves.

Schedule Publish
Choose a date and time for a draft to go live by itself.

SEO
Search engine optimisation: the title, description and picture Google and WhatsApp show for a page.

Session
One dated sitting of an experience, usually within a workshop type, with its own price and seats.

Site address
Your website's exact address, starting https://. Emails and payments rely on it.

SMTP
Your email provider's sending details: server, port, username and password.

Ticket code
The code under each QR, starting MPT-. One per seat.

TRN
Tax Registration Number. Without it, documents print as receipts, not tax invoices.

Variable
A word in {{double braces}} in an email that is replaced with real details for each customer.

VAT
Value added tax, 5% in the UAE. All your prices include it.

Version
A saved copy from the past. Pages, experiences, workshop types, sessions and journal posts keep their last 25, and any can be restored.

Waitlist

A queue for a full session. People are emailed in order if seats free up.

Webhook

How Mamo tells your website “this payment went through”. Set up with one button.

Workshop type

A theme (such as Sculptural Forms) or a level (such as Crochet — Beginners) of a booked experience. Customers pick the type, then a date.

⌘K / Ctrl K

The shortcut that opens the admin's search box from anywhere.

Questions

Can I break the website by making a mistake?

Very hard to. Changes are drafts until you publish, and every page keeps its last 25 versions. If something goes wrong, revert or restore an older version.

How quickly do changes appear?

Within a second or two after you press Publish changes (or Save on a settings page).

What's the difference between Save and Publish changes?

Pages, experiences, workshop types, sessions, journal posts, FAQs, policies and the like have drafts, and Publish changes puts them live. Settings pages, music tracks, journal categories and venues have a plain Save, and it goes live straight away.

Can I use the admin on my phone?

Yes. Check-in is designed for phones. Editing pages works on a phone too, but is far more comfortable on a laptop.

Do customers need an account?

No. They book with their email. They find their bookings with their reference and email, or a one-time link from the website's My bookings page.

Are prices shown with VAT?

Yes. Every price includes 5% VAT, and invoices show the VAT separately.

Can I delete a session that has bookings?

No. Reschedule it, or cancel it and refund everyone, so customers are told.

What happens to tickets when I move a booking?

The old tickets stop working and the customer is emailed new ones for the new date.

Who can see internal notes?

Only your staff. Customers never see order or customer notes.

How do I give a discount?

Create a promo code under Bookings › Promo codes, or for one person, take a desk booking with an adjusted price.

How do I stop a single email from being sent?

Open it under Emails › Email templates and untick Enabled. Be careful with confirmations and tickets.

Why was I logged out?

For safety, the admin logs you out after 8 hours. Log in again; drafts you were working on are kept.

How do I add next month's candle theme?

Add a workshop type for the theme under Content › Workshop types, publish it, then add its sessions under Content › Sessions. Step by step in Add next month's candle theme (p. 58).

How do I write a blog post?

Content › Journal › Create New (or Write a journal post on the dashboard). Give it a title, a cover photo, some text and a category, then Publish changes. See Write a journal post (p. 82).

Does the music play by itself?

Yes, when the player is switched on: it starts when a visitor arrives, or on their first tap where the browser insists. One press pauses it, and it stays off for that visitor. It never plays on checkout and payment pages. See Background music (p. 90).

Where is this guide?

Docs, at the top of the admin's menu, or “Open the guide” in ⌘K. It has a search box and a PDF to download.

Who do I ask for help?

Nexeor. Send a screenshot of the dashboard and of the page you are on. The coloured notes usually explain the problem.

Maison Palettia

Stuck on something this handbook doesn't cover? Send Nexeor a screenshot of the dashboard and the page you are on. The coloured notes usually say exactly what happened.

Screenshots show the admin as it was on 19 October 2026: mostly the live admin, with a few examples (the journal post, the desk booking) made up for the pictures and never saved. Earlier pictures show example data from a test copy.
